The Manitoba government is reported to be considering the appointment of a woman immigration agent for the purpose of personally selecting women in Great Britain for domestic service in that province. Half the salary of the agent will be paid by the provincial government and half by the federal government. A similar plan was adopted some months ago by the government of Saskatchewan.

A pension scheme for teachers in the city of Westmount, Quebec, has been amended with the approval of the provincial government, to provide an increase of 20 per cent in the pension scale for teachers and employees of the school board. Provision is also made for the pensioning of the widows of teachers and employees.

At the annual meeting of the Canadian Institute of Mining and Metallurgy, which was held at Montreal on March 2-4, a special committee strongly recom-

mended the standardization of oxygen-breathing apparatus for use in coal mines, and of training in its use, and suggested that the Dominion government be requested to co-operate with provincial governments to this end.

The annual convention of the American Federation of Labour will be held at Denver, Colorado, commencing June 13, 1921. This will be preceded by a convention of the National Women's Trade Union League at Waukegan, Illinois, on June 6.

In response to a request of President Harding made to Mr. B. M. Jewell, president of the railway employees' department of the American Federation of Labour, representatives of five unions of railway employees have suggested that the President call a conference of

representatives of the railway companies and their employees to draw up new rules governing working conditions to take the place of the national agreements now in dispute before the Railroad Labour Board, and that pending the holding of the conference all wage disputes be held in abeyance.

The Italian Federation of Sea Workers has organized a society, the Cooperativa Garibaldi, for the purpose of owning and operating ships. Only members of the Federation may hold stock, up to a limit of 5,000 lire for each stockholder. The society now owns seven ships. It is proposed to use the profits eventually to purchase outstanding stock. When all the stock has been purchased the ships will become the property of the Federation and all earnings will revert to the general treasury.

INDUSTRIAL CONDITIONS DURING MARCH, 1921

I.—General Review

A downward tendency in the average volume of employment was still evident during March, the decline being fairly general throughout Canada. In the Metals, Machinery and Conveyances group decreases were shown in the crude, rolled and forged divisions of iron and steel, and in railway shops and shipbuilding yards; the carshops in Ontario, however, showed some gains about the middle of the month. Industries in the Food producing group continued fairly steady, though some were affected by the Lenten and Easter seasons. The Textile and Clothing groups showed further gains, especially in the knitting and garment industries in Ontario and Quebec, and in the cordage, carpet, boot and shoe trades. The Pulp and Paper industry continued to record a decline, due large-

ly to reductions in the mills in Quebec and Ontario. Some gains were noted in the furniture and musical instrument factories in the same provinces; the planing mills and sash and door factories everywhere showed some increase in activity in anticipation of the coming building season; building operations, however, except as regards highway construction, were still mostly in abeyance, while Railway Construction showed an average decline during the month. Railway Transportation continued to decrease, but seasonal recovery was beginning in Water Transportation. Coal Mining was generally less active, but some improvement was noted in Alberta in the last week. The logging season practically closed in the woods during the month, except in the Pacific Coast district, and river driving had not yet begun. Saw and shingle mills were

The Labour Market

entering upon their period of greatest activity.

The loss of time on account of industrial disputes during March was greater than during February, 1921, and also greater than during March, 1920. There were in existence at some time or other during the month 26 strikes involving about 3,252 employees and resulting in an estimated time loss of 52,928 working days; as compared with 22 strikes, 2,624 workpeople and 23,547 working days in February, 1921; and 22 strikes, 3,789 workpeople and 43,169 working days in March, 1920. On March 1, there were on record 18 strikes affecting 2,289 workpeople. Eight strikes were reported as having commenced during March, as compared with fifteen during February, 1921. Seven of the strikes commencing prior to March and three of the strikes commencing during March were reported terminated, leaving 16 strikes involving 1,735 workpeople on record at the end of month.

In prices the movement continued downward, the chief decreases appearing in eggs and butter, in textiles, hides, and leathers, metals, building materials, and in chemicals. In the other groups, grains were slightly high-

er, except oats, but fodders were down. Cattle and beef were slightly up but hog products were lower. Butter and eggs were down but cheese was firmer. Fish were steady. Potatoes, onions, and canned vegetables were slightly higher. Bread, flour, and tapioca were lower but sugar advanced slightly. In fuel, bituminous coal was down but coke was higher. In the miscellaneous group muskrat skins, malt, and rubber were firmer but newsprint paper, binder twine, and laundry starch were lower. The index number of wholesale prices was down to 263.1 for March as compared with 270.1 for February, 349.0 for March, 1920, 277.6 for March, 1919, 269.2 for March, 1918, and 137.1 for March, 1914. In retail prices of foods the chief decreases were in eggs, and in rice, but there were slight decreases in nearly all the items included except cheese. In fuel, coal and wood showed slight decreases. The average cost of a list of twenty-nine staple foods in sixty cities at the beginning of March was \$13.23 as compared with \$14.08 in February, \$15.98 in March, 1920, \$15.77 in March, 1919, and \$7.68 in March, 1914.

II.—Industries and Trades.

Continued depression was reported during March in the iron and steel industry of Nova Scotia. SYDNEY reported the production of the local plants as follows: pig iron, 9,500 tons; ingots, 12,500 tons; blooms, 10,000 tons; rods, 1,000 tons; wire and fencing, 900 tons; nails, 1,100 tons; one blast furnace was in operation; the stove, furnace and metal roofing industries were quieter than in the

preceding month. At SYDNEY MINES production was still suspended owing to the continued dispute between the local company and its railway employees. HALIFAX reported conditions slightly less dull in the nut, bolt, iron bar and skate industries; engine and boiler shops were also quiet, some boiler makers and machinists being transferred to marine repair work. At AMHERST metal and machinery plants were very quiet; several foundries were closed down for

repairs, while others worked short time, with small orders on hand; the rolling mills and malleable iron plant also remained closed, and the machine and boiler shops were on short time. In NEW GLASGOW and district the steel plant continued idle; one boiler and machine shop and foundry employed about three-fourths of its normal staff, while other similar plants were quiet. Moulders at CHARLOTTETOWN were more active than in the preceding month. The rolling mills at ST. JOHN re-opened after being closed for two weeks; sheet metal workers were slightly more active. Machine shops and foundries at FREDERICTON were fairly busy. About 75 men were temporarily thrown out of work at MONCTON by the burning of a foundry machine shop; other machinists were well employed. At MONTREAL structural steel, iron and sheet metal workers were fairly well employed, but engine and boiler shops were quiet. QUEBEC reported activity among structural iron and steel workers, but the stove, furnace, portable and stationary engine trades were slack. Structural iron workers at SHERBROOKE were fairly active, while engine and boiler makers were quiet. At ST. HYACINTHE metal workers and machinists were reported busy. The iron foundries at THREE RIVERS were very slack. Metal workers at SOREL had a quiet month. At OTTAWA and HULL foundries and machine shops continued quiet throughout the month; the steel equipment plant was very busy; tinware and steel metal workers were increasingly active; the brass and bronze wire factory was busy. At TORONTO the metal and machinery trades continued quiet with many out of work; farm implement manufacturers were curtailing production owing to being overstocked and some men were laid off; the boiler and engine industries worked much below capacity. Metal and machinery workers at HAMILTON were only fairly active, but structural steel workers were well employed. At NIAGARA FALLS the metal working industries continued quiet, with little

prospect of improvement. Boilermakers and electrical workers at ST. CATHARINES continued well employed. At BROCKVILLE foundry workers were active, and sheet metal workers fairly well employed. The cutlery works at KINGSTON remained closed. A number of employees were thrown out of work temporarily at BELLEVILLE by the closing of the steel plant; foundry and portable engine and boiler workers were fairly well employed. At PETERBOROUGH moulders and coremakers were rather quiet, only one foundry working full time, while two were on short time and two were shut down; electrical workers had a busy month, the General Electric employing about 1,600 men; machine shops were generally quiet with the exception of one plant where night shifts were worked for a time. At GALT the the malleable iron works were busy, but machinists and other metal workers were still quiet. At BRANTFORD engine and machinery factories were slack; stove foundries were also quiet; farm implement plants reduced their staffs towards the end of the month. KITCHENER reported full time work throughout the month in the farm implement, portable and stationary engine and thresher factories; tinsmiths, machinists, moulders and other iron workers were well employed; the clock factory and the gasoline pump plant were fairly active. The metal trades at GUELPH had a very quiet month, all foundries running short time with reduced staffs, but at STRATFORD fair activity was reported throughout the group. The stove and furnace shops at WOODSTOCK continued dull though somewhat more active than in the previous month. At LONDON the rolling mills continued busy; the wire and iron works took on more help; the concrete machinery factory was exceptionally busy; threshing machine workers were well employed; work was resumed at the factories for force pumps and washing machines; the stove and furnace works were slack, but tin and enamelware plants were very busy. At ST. THOMAS the foundries were less than

normally active. At CHATHAM structural steel workers were employed only about half time with few orders on hand; sheet metal and electrical workers were active. At WINDSOR the bridge and trussed concrete steel plants were rather more active; moulders were slack owing to an industrial dispute; the injector plant was unusually busy; the scale and spark plug factories worked only four days a week; the adding machine plant was quiet; machine shop and electrical supply workers had a slack month. At OWEN SOUND the machine shops were on short time. The stove and farm implement factories at ORILLIA employed their normal staffs. The steel plant at SAULT STE. MARIE owing, it was said, to lack of orders, laid off 1,500 men at one time, and more later, leaving about 900 men employed. At WINNIPEG all branches of the metal group continued to be very quiet, all contract shops being on short time. Machine shops at BRANDON were fairly active. At REGINA the steel industry showed a slight improvement in the last week; farm implement and tractor plants were busy; electrical workers were fairly active, but sheet metal workers were quiet. MEDICINE HAT reported slack conditions in the metal working trades. The metal workers at Edmonton were rather quiet. At VANCOUVER the rolling mills and structural iron and steel plants were quiet; stove and furnace, electrical apparatus and fixtures, metal roofing and sheet metal workers had a dull month; the engine and boiler trade was rather quiet; the sheet metal and electrical trades were dull. Slackness was general at NEW WESTMINSTER in the metal working group. At VICTORIA the iron foundries and electrical shops were fairly active.

The railway repair shops at SYDNEY were less active during March than in the previous month. At

Vehicles (land and water) HALIFAX the shipyards were moderately active on two boats under construction and on repairs to steamships

and railway steam engines, but the number of employees continued to decline; engine and boiler shops were quiet. The carshops at AMHERST were closed down. In NEW GLASGOW and district the carshops were busy on an order for 500 freight cars for the C. N. R., about 1,000 men being employed, including a number of the men laid off at the local steel plants; about 150 men were engaged in construction work at the shipyards. The railway machine shop at CHARLOTTETOWN had a very busy month. At MONTREAL the shipbuilding industry was quiet; the C. P. R. carshops shut down for 10 days on March 24. The C. N. R. locomotive and car shops at MONCTON still ran on reduced schedule. QUEBEC reported slack conditions in the locomotive and car shops; the railway repair shops laid off a large number of employees; the shipyards were active in preparation for the opening of navigation; automobile and carriage works were busy. At THREE RIVERS a large number of shipyard workers were re-engaged to complete vessels in course of construction. Automobile mechanics at ST. JOHN'S and IBERVILLE were very busy. At OTTAWA and HULL some woodworkers were laid off at the car shops, but the paint department continued busy. The automobile industry at TORONTO showed some improvement and working forces were being gradually increased; railway repair shops were quiet, working only part time. The car shops at HAMILTON were active, except in the Toronto, Hamilton and Buffalo Railway, at which about 100 machinists, boilermakers and helpers were laid off. At BROCKVILLE the motor boat and engine shops were only fairly active, one firm employing half its normal staff; railway repair shops were quiet. The shipyards at KINGSTON were busy during the month on general repair work; the staff at the locomotive shops was reduced during the month by over 100. At BELLEVILLE automobile and carriage works were busy; the Grand Trunk repair shops had a busy month. At GALT also the railway repair shops were busy.

Carriage makers at BRANTFORD were rather slack. The automobile factory at KITCHENER was active, but the bicycle factory was rather quiet. The Grand Trunk shops at STRATFORD closed for a week during the month. The wagon industry at WOODSTOCK continued rather quiet, with considerable unemployment. At LONDON the Ford motor plant worked with full staff; the Grand Trunk carshops took on some help early in the month but shut down completely in the last week. The railway shops at ST. THOMAS were closed for practically the whole month. The automobile industry at CHATHAM was increasingly active, with about 60 per cent of the usual staffs employed. The Ford plant at WINDSOR started running full time in some departments; and the automobile industry generally showed improvement. The carriage factory at ORILLIA re-opened after being closed for a month, with about 75 men, or 40 per cent of its normal staff. The car works at FORT WILLIAM closed down on March 31, throwing between 300 and 400 men out of work. The shipyard at PORT ARTHUR reduced its staff of workmen considerably during the month. At WINNIPEG the railway shops continued very quiet, all workers being on a 4-day week as the month closed; the C. P. R. shops closed down for 10 days and the G. T. P. shops for 7 days; automobile repair shops were increasingly active. The railway repair shops at BRANDON had a slack month. Automobile shops at REGINA were busy. At CALGARY the railway repair shops continued slack; the C. P. R. shops at Ogden closed down for a week at the end of the month. At VANCOUVER the locomotive and car shops and automobile plants were quiet; boat and shipbuilding yards were fairly active. Work was resumed at the shipyards at PRINCE RUPERT, about 350 men being already employed; railway repair shops still worked on short time. At VICTORIA the iron shipyards were active on repairs, but the wooden shipyards were very quiet.

Normal activity continued at SYDNEY in the food group. At HALIFAX the sugar refinery continued running with a reduced staff, abattoirs and packing houses were dull; bakers and confectioners were fairly active and soft drink workers were well employed for the season. The milk factory at TRURO re-opened with full staff and working full time after having been closed for two months. CHARLOTTETOWN reported slackness in the food group excepting the flour mills and bakeries, which were fairly busy. ST. JOHN reported that the sugar refinery continued running on short time with reduced staff; other workers in the food group were fairly active, except those in the breweries and soft drink plants. At FREDERICTON workers in the food group were well employed. MONCTON reported steady conditions in the flour mills; the biscuit industry showed recovery, staffs being increased; creameries and dairies and soft drink plants were increasingly busy. MONTREAL reported fairly active conditions in the flour and feed plants; abattoirs and packing houses were quiet owing to an industrial dispute; bakers and confectioners were busy in preparation for the Easter season; breweries also were busy, but the tobacco trade was slack. At QUEBEC abattoirs, bakeries and confectionery plants showed increased activity on the approach of Easter; creameries and dairies were still rather quiet; the aerated water, soft drink and tobacco industries were also dull, but breweries were very busy. SHERBROOKE reported fair conditions throughout the food group. At ST. HYACINTHE the flour mill worked full time, and bakeries and confectionery plants were also very active. THREE RIVERS reported activity among bakers, confectioners and brewery and soft drink workers. At OTTAWA and HULL shipments to abattoirs were very light; the public demand for milk, confectionery and other products was affected by the Lenten season, but recovered for Easter. TORONTO reported

Foods, liquors and tobacco

fair activity in the flour, feed and cereal plants; abattoirs and meat packing houses had a quiet month; bakers were steadily employed; biscuit and confectionery plants were still quiet, though rather more active than in the previous month; breweries were busy, with large export orders on hand; dairies were active and taking on more help; tobacco factories were quiet; fruit canning establishments were busier in the orange departments. HAMILTON reported activity in the breweries and fair conditions in the bakeries, flour, feed and soft drink plants, but the tobacco industry was very dull. The food and tobacco industries were generally active at NIAGARA FALLS and ST. CATHARINES. At BROCKVILLE flour, feed and dairy workers were fairly well employed, but packers were rather slack. KINGSTON and BELLEVILLE reported activity throughout the food group. At PETERBOROUGH the flour, feed and cereal mills were still below their normal activity; bakers and packing houses, creamery and dairy workers were busy, but confectioners were less active and tobacco workers were quiet. GALT reported fair activity in all departments except the creamery. At BRANTFORD normal activity was reported throughout the group, and at KITCHENER similar conditions generally prevailed, though the brewery ran on short time, and tobacco factories were quiet. Activity was reported at GUELPH and STRATFORD in all departments of the food group excepting breweries and soft drink plants. LONDON reported cereal workers very busy, but confectionery and biscuit factories were still on short time; the cigar factories and breweries were practically idle. At ST. THOMAS the flour mills and chocolate factory were quiet. At OWEN SOUND, fruit canneries, creameries and soft drink plants were quiet. The flour and feed plants at CHATHAM worked only part time; the abattoir worked full time; soft drink factories were quiet, and the cigar industry was dull though few men were unemployed. Cereal workers at WINDSOR were steadily

active; the salt factory also ran full time; packing house workers, bakeries and creameries were increasingly active. At WINNIPEG confectioners had a quiet month; vegetable canneries slightly increased their staffs; abattoirs and packing houses showed some improvement towards the end of the month; breweries and soft drink plants were quiet, with a number of workers on short time; bakers and confectioners had increased employment. At REGINA flour and feed plants, abattoirs, packing houses, bakers and confectioners showed steady improvement, but soft drink plants were quiet. At LETHBRIDGE the flour mills ran steadily but with no increase in the number employed. The flour and feed mills, breweries and soft drink plants at CALGARY were quiet; bakers and confectioners were normally active. At EDMONTON the packing houses were active, and the biscuit factory fairly busy. At FERNIE the dairies and bakeries were more active, but breweries showed a slight decline. VANCOUVER reported fair activity in the flour, feed and cereal plants, sugar refinery, bakeries and confectionery plants, creameries and breweries, but abattoirs and packing houses, soft drink and tobacco plants were rather quiet.

The rope works at HALIFAX continued running on short time. The woollen mills at AMHERST were still shut down for repairs. At TRURO the woollen mills ran only 4 days a week. The cotton mills at ST. JOHN closed near the end of the month for two weeks, owing to trade depression, about 550 workers being thrown out of employment. At MONCTON the woollen, underwear and linen mills continued running steadily with the same staffs as in the previous month. Cotton operatives at FREDERICTON were not very busy. At MONTREAL woollen and knitting factories were fairly active and the tent and sail industry was busy in view of the coming season. QUEBEC reported activity in

**Textiles,
cordage and
carpets**

the cotton mills, and tent, awning and sail makers were busy. The cotton mills at SHERBROOKE were quiet, but the woollen, bleaching, dyeing, finishing and printing textile plants were fairly active. At ST. HYACINTHE the woollen and knitting mills and underwear and hosiery factories were quiet with rather dull prospects. Cotton operatives at THREE RIVERS had a slack month. At TORONTO the textile industry continued moderately busy; the knitting mills were only fairly active in the underwear and hosiery departments; the tent, awning and sail industry was slack; the carpet and rug plants continued working on part time with reduced staff. Knitting and cotton workers at HAMILTON had increased employment and carpet workers were fairly active. At ST. CATHARINES silk workers continued well employed but the woollen mills were still quiet; the equipment of the knitting plant at Thorold was moved to the same company's plant at Paris, Ont. Tent and awning workers at BROCKVILLE were fairly active. Textile workers at KINGSTON were busy during the month. At PETERBOROUGH the textile industry was very busy in the weaving department and the yarn department showed a marked improvement; hosiery, underwear and knitted goods workers had a quiet month; carpet weavers were on short time. The cotton and woollen mills at GALT were rather less active, and silk operatives were on short time. Woollen operatives at BRANTFORD were fairly well employed, and silk workers were busy, but a number of workers were laid off at the cordage factory. At KITCHENER the felt factories were busier than in the previous month, and the twine factory was still active. GUELPH reported quiet conditions in the cotton and woollen spinning, carpet and rug mills, but the linen mills ran steadily. At STRATFORD the woollen and knitting factories were slack. The knitting industry at WOODSTOCK was dull in most departments; the textile factory took back some of its old employees. Increasing activity was noted at LONDON in the

woollen and hosiery industries, additional help being employed. The knitting mills at ST. THOMAS were fairly active. The woollen and knitting factories at CHATHAM closed down, having no orders on hand. The woollen mill at ORILLIA ran 4 days a week except in the last week when full time was worked. At WINNIPEG jute and cotton bag factories continued very quiet without much change in the number of its employees; the knitting factory was quiet, but the tent and awning industry showed some improvement. At VANCOUVER the knitting industry was slack, and the tent, awning and sail factories were rather quiet. The cordage factory at NEW WESTMINSTER continued busy.

Steam laundries at SYDNEY were less active, but those at HALIFAX continued

Clothing, boots, shoes and laundering	busy. The boot and shoe industry at AMHERST was very quiet. The hat and cap factory at TRURO ran 4 days a
--	---

week with reduced staff, but shirt makers worked full time. CHARLOTTETOWN reported slack conditions in the garment and tailoring industries, but other workers in this group were well employed. Laundries at ST. JOHN were still busy with work for the steamship liners. The hat and cap factory, and tailoring and dressmaking plants at MONCTON were all active. Clothing workers were in demand at FREDERICTON, but the shoe and larrigan industry was slack, many workers being idle. At MONTREAL fair activity was reported in the ready-made clothing, hat, cap and whitewear factories and laundries; the boot and shoe industry showed a marked improvement, though the large Italian Government order mentioned last month was withdrawn. QUEBEC reported slackness in the ready-made clothing, boot, shoe, cap, glove and fur goods industries and in laundries. At SHERBROOKE fair activity was reported in the ready-made clothing, boot and shoe factories, laundries and cleaning plants. Garment factories at ST. HYACINTHE were very busy, the

staffs at some being doubled; the boot and shoe industry was quiet. Laundries and cleaning plants at THREE RIVERS were fairly active, but the boot and shoe trade was very dull. The shirt and collar factories at ST. JOHN'S and IBERVILLE were fairly active and the straw hat plant was busy. The clothing industry at OTTAWA and HULL showed a marked improvement over the previous month, the average number of workers being employed, and full time worked at most plants; steam laundries were quiet, working on short time. At TORONTO ready-made clothing workers had a busy month, labour being in demand, with overtime work; garment makers were active on the Easter demand; hat and cap factories were active; women's whitewear workers were busy, and shirt and overall plants were fairly active; boot and shoe workers had increased employment; steam laundries, dyeing and cleaning plants were in steady operation. HAMILTON reported practically all garment makers back to work, though trade was slow; whitewear factories were busy in some departments; the boot and shoe industry showed some improvement; laundries were increasingly active. The clothing trades at NIAGARA FALLS continued busy. At BROCKVILLE the hat factory had a busy Easter season, but was otherwise quiet; the glove factory worked part time; the boot and shoe trade was quiet. Shirt makers at BELLEVILLE had a busy month, and laundry workers were also well employed. Women's and children's clothing factories at PETERBOROUGH were quiet. The ready-made clothing industry at GALT was steady and laundries and cleaning plants were active; boot and shoe makers had better employment. Garment and overall makers at BRANTFORD worked about half time; shoe workers were well employed; laundries were very busy. At KITCHENER the robe and clothing factory worked only three days a week; shirt and collar workers were busier, but button and glove plants were only fairly active; laundries and cleaning plants were busy; boot and shoe makers

worked full time; rubber shoe factories ran full time but with reduced staffs. GUELPH reported fair activity in the women's whitewear and hat factories; the rubber footwear industry was also active. At STRATFORD ready-made clothing factories and laundries were busy. The costume factory at LONDON continued slack; men's ready-to-wear clothing makers had somewhat better employment; laundries and cleaning plants were very busy; boot and shoe workers were more active, nearly full time being worked. The shoe industry at ST. THOMAS showed improvement. At WINDSOR the overall factories were fairly busy; button factories were active, and laundry workers increasingly busy. The ready-made clothing factory at ORILLIA ran full time on an order for military uniforms. The whitewear factory at OWEN SOUND continued running, but was not busy. At WINNIPEG increased activity towards the end of the month was noted in the ready-to-wear clothing industry, 42 hours a week being worked in the factories; shirt factories ran full time with about three-fourths of their normal staffs; cap and glove workers also were on full time, but without increase in staffs; furriers were very quiet; laundries were steady and cleaners slightly more active. At EDMONTON garment makers were increasingly busy. VANCOUVER reported increased activity in the ready-made clothing plants, but the overall and shirt trades were very slack; whitewear workers were fairly well employed; steam laundries and dyeing and cleaning plants were quiet; boot and shoe workers were fairly busy. At VICTORIA the shirt and overall factories, laundries and cleaning plants were moderately active.

The tarred and felt paper industry at HALIFAX was less than normally active. The pulp and paper industry in the maritime provinces showed a further decline in activity during March, staffs

**Pulp, paper
and fibre**

being further reduced in the LIVERPOOL and MURRAY plants in Nova Scotia, while in New Brunswick the plant at CHATHAM was shut down all month and that at FAIRVILLE, near St. John, was closed for part of the month, or worked with fewer employees; the BATHURST mills, however, continued running steadily, though on reduced wages. In the Province of Quebec reductions in staffs were reported in the mills at LA TUQUE, KENOGAMI and EAST ANGUS. The plant at THREE RIVERS closed for part of the month, or ran with reduced staff. Fairly steady conditions were maintained at CHICOUTIMI, CHANDLER, CAP MAGDELAINE, DONNACONA, WINDSOR MILLS and SHAWINIGAN FALLS. At HULL the news mill ran only part of the month, only one machine working, but the box board, tissue, writing, book and writing paper and card board plants ran steadily. In Ontario some reductions in staffs were reported in the mills at OTTAWA, CORNWALL, SAULT STE. MARIE, IROQUOIS FALLS, THOROLD, HAWKESBURY and SMOOTH ROCK FALLS, while fairly steady conditions continued at TORONTO, STURGEON FALLS, ESPANOLA and St. CATHARINES. VANCOUVER reported that the pulp and paper mills on the Pacific Coast were busy on large foreign orders. The rubber roofing plant at VICTORIA was active.

Continued activity was reported in the printing and allied trades at SYDNEY, but at HALIFAX many printers were laid off; binderies were quiet. Fairly steady conditions were reported throughout the group at AMHERST, TRURO, CHARLOTTETOWN, St. JOHN, and MONCTON. At MONTREAL printers, bookbinders and lithographers were reported well employed. QUEBEC reported that printers were busy and paper box and bag makers well employed. At SHERBROOKE the printing trades were fairly well employed, but binderies were quiet. The printing and allied trades were re-

ported active at St. HYACINTHE and THREE RIVERS. At OTTAWA and HULL the printing and publishing trade was mostly slack, but the Government printing bureau continued very busy; the paper box factory worked 5½ days in the week. At TORONTO printers, bookbinders and allied trades were fairly active; paper bag and box factories were rather quiet. Considerable unemployment resulted among printers at HAMILTON from the closing of two large shops; binderies were fairly active. Good conditions were reported in the printing and allied trades at St. CATHARINES, BROCKVILLE, BELLEVILLE, and PETERBOROUGH; paper box makers at the latter point had a quiet month. At GALT printers were fairly active, though job offices were rather quiet; paper box factories were steady. The box factory at BRANTFORD was rather quiet, a number of female workers being still unemployed; printers had a busy month. At KITCHENER newspaper plants were fairly busy, but job offices were dull; binders had a good month, and paper box makers worked full time. GUELPH reported activity among printers and paper box makers. The printing and allied trades had fairly good employment at STRATFORD and WOODSTOCK. At LONDON printers were increasingly busy, especially in the job departments; lithographing plants were quiet; one paper box plant was very slack, partly closing down for two weeks; the other box factory was fairly active. Printers and allied trades were reported busy at St. THOMAS, CHATHAM, OWEN SOUND and WINDSOR, paper box workers at the latter point being fairly active. At WINNIPEG a considerable number of job printers were on short time or unemployed during the month; binderies were also very quiet, with the same staffs employed; but box makers were fairly well employed. Fairly active conditions were noted among printers at BRANDON, but at REGINA there was some slackness. At CALGARY printers and bookbinders were fairly well employed, and at EDMONTON improved conditions were

noted. VANCOUVER and NEW WESTMINSTER reported some slackness in newspaper and job printing shops, and binderies. At VICTORIA the printing industry was only moderately active, and paper box workers had a quiet month.

SYDNEY reported a continued decline in activity in the sash and door factories and planing mills.

Woodworking and furniture HALIFAX this industry was quiet, help being laid off; box makers

were fairly well employed. Increased activity was noted at CHARLOTTETOWN in the sash and door factories and planing mills, but other woodworkers were quiet. At ST. JOHN the planing mills and sash, door and brush factories ran steadily; the wooden box factory ran 4 days a week and the broom factory was also on short time. The sash and door factories at MONCTON worked with reduced staffs pending the revival of building operations; the cooperage factory was normally active. Employment was good in the planing mills at FREDERICTON. At MONTREAL wooden box, furniture and piano workers had a fairly active month. QUEBEC and SHERBROOKE reported slackness in the wood-working group. Sash and door factories at ST. HYACINTHE were normally busy. At THREE RIVERS the planing mills were active, chair makers were fairly well employed, but the wooden toy and sporting goods factory was idle. The planing mills were reported active at ST. JOHN'S and IBERVILLE. At OTTAWA and HULL furniture workers were on short time for the first half of the month; the washing machine factory resumed full time work; the piano industry showed some improvement. At TORONTO the sash, door and planing mills and furniture plants were fairly active; the piano, organ and gramophone trades were still quiet, though a slight improvement was noted. Woodworkers at HAMILTON were mostly on short time, but box makers were fairly active. The woodworking industries at NIAGARA FALLS and ST. CATHARINES

continued active, but at BROCKVILLE and KINGSTON rather quiet conditions were noted throughout the group. At BELLEVILLE more activity than usual at the season was reported in the planing mills. PETERBOROUGH reported increasing activity among woodworkers, though box factories were quiet. At GALT and BRANTFORD the planing and furniture factories were running, but the busy season had not opened. KITCHENER reported fair activity in the sash, door, wooden box, broom, mattress and cooperage factories; furniture factories were busy in some departments, while others were slack; interior hardwood factories were steadily active; piano and organ workers were on short time; the wooden ware and toy industry was dull. At GUELPH the planing mills were fairly active, but piano and sewing machine factories were quiet. Woodworkers at STRATFORD had a dull month. The furniture factory at WOODSTOCK was still very slack; musical instrument plants were quiet, though an improvement was expected in spring. At LONDON the planing mills worked fairly steadily; wooden box workers were busy, but cooperage workers were slack, a number being unemployed; piano factories were increasingly active. The woodworking plants at CHATHAM ran full time. The piano factory at WINDSOR worked full time with half its normal staff employed; sash and door factories and planing mills were busy in connection with the coming building season. The woodworking factories at OWEN SOUND worked with reduced staffs and on short hours. At ORILLIA the planing mills ran steadily, though little new building was in sight; furniture makers were fairly active. At SAULT STE. MARIE the planing mills had a slack month. At WINNIPEG the planing mills and box factories ran throughout the month with reduced staffs. The sash and door factories at BRANDON were fairly active. At MEDICINE HAT and CALGARY the woodworking industries were quiet. FERNIE reported an improvement for the first time for many

months in the sash and door factories. At VANCOUVER a slight improvement was noted in the sash, door and planing mills and wooden box factories. VICTORIA reported slack conditions in the planing mills; cooperages were also quiet, but wooden box factories were fairly active.

Employment was fairly steady at HALIFAX in the leather goods, trunk and harness industry. The leather trunk and bag factory at AMHERST was fairly active. The tannery at St. JOHN had an active month. Leather workers and tanners at FREDERICTON were fairly well employed. At MONTREAL the tanneries and trunk, bag and harness plants were moderately busy, and rubber workers had a quiet month. QUEBEC reported slackness in the tanneries, harness and horse goods factories. Saddlers at St. HYACINTHE and tanners at SOREL were busy during the month. The leather industry at OTTAWA and HULL was very slack. At TORONTO the trunk and harness industry gave slightly increased employment, but the rubber plants continued quiet. Rubber factories at St. CATHARINES had a busy month. At BROCKVILLE and KINGSTON leather workers were slack. The new rubber factory at BELLEVILLE increased its staff. At KITCHENER both large tanneries and the trunk and bag factories worked full time; rubber factories in some cases reduced staffs. Rubber workers at GUELPH were fairly active. At STRATFORD the tannery and harness shops were quiet. Tannery workers at LONDON had increased employment, but leather goods and harness plants were quiet. At BRANDON tannery workers and trunk makers were fairly active.

At HALIFAX the paint and varnish industry showed considerable increase in activity during March; the oil factory took on additional help. The paint and varnish industry at MONTREAL was rather quiet, but chemical, drug

and medicine plants were fairly active. At QUEBEC the soap, cartridge and ammunition factories were quiet. SHERBROOKE reported slackness in the oil, grease, gunpowder, drug and medicine plants. The paint mills at THREE RIVERS were fairly active. At TORONTO the paint and varnish industry was active, with good prospects; soap factories were fairly busy. The electro-chemical plants at NIAGARA FALLS were quiet, the largest plant which had been running at half capacity, further reducing its staff. The paint and varnish and prepared wax factories at BRANTFORD were fairly busy, but the glue factory shut down, throwing about 125 workers out of employment. At KITCHENER the oil and grease factory had a good month, and the glue plant was fairly active. Paint and varnish workers at WINDSOR had full time employment, but at OWEN SOUND this industry was quiet. The acid plant at TRAIL continued active. VANCOUVER reported fair activity at the oil refinery, but paint, varnish, starch and soap works were rather slack. At VICTORIA paint and soap factories were busy, mostly on trade with the prairie provinces; chemical and explosive plants were active.

Stone and granite cutters at St. JOHN had a slack month; some unemployment resulted from the closing of a lime kiln owing, it was said, to slackness of trade. Glass factories at MONTREAL continued running steadily during the month. QUEBEC reported dullness among stone cutters and in the brick and lime yards. At SHERBROOKE cut stone, granite and brick workers were quiet. The artificial stone factory at THREE RIVERS was fairly active. The brick yards at TORONTO were active, but the glass industry was quiet. HAMILTON reported increased activity in the pottery and porcelain trades; brick workers were preparing for the spring season; lime and stone workers were fairly active. No stone or brick work was

**Paints, oils,
chemicals,
explosives**

**Clay, glass,
stone, cement,
etc.**

started at BROCKVILLE during the month. The brickyards at BELLEVILLE reopened, and the cement plant worked day and night shifts; the pottery plant was busy, producing sewer pipes and tiles as well as pottery ware. At KITCHENER dull conditions prevailed among brick, tile, sewer pipe, stone and cement workers. The cut stone works at LONDON were busy, employing full staffs. The glass factory at CHATHAM worked only part time; the tile and brickyards started work, with good prospects. At VICTORIA the brick yards were still quiet, but a busy season was expected to open shortly; cement works were fairly active, large shipments being made to the Orient.

The gross earnings of the Canadian Pacific Railway in February were

\$12,768,986 as compared

Railways, with \$13,557,103
shipping and in February, 1920. The
'longshore work gross earnings of

the Canadian National Railways in March were \$9,497,740, as compared with \$7,761,326 in March, 1920. During March the number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways in railway operation, including general offices, trainmen and engine crews, station employees, sleeping, dining and parlor car employees, showed a net reduction amounting to about 800 persons. There were, however, in the middle of the month about 2,300 less employees on the payrolls of these companies than at the end of February, but some recovery occurred during the last week. The net reduction at the end of the month, in comparison with the end of February, was due to contraction in the Canadian Pacific Railway payrolls. During March navigation and 'longshore work was very quiet at SYDNEY; steam railways, transfers and garages were less active, but street railwaymen were steadily employed. HALIFAX reported the gradual closing of the most unprofitable navigation season for many years; consider-

able activity however resulted along the south shore of Nova Scotia from fishing operations. TRURO reported railway employees working on part time, but an improvement was expected. At CHARLOTTETOWN transportation continued dull, though somewhat brisker than in February. At St. JOHN the Canadian National Railways laid off some employees and reduced working hours; street railwaymen had a busy month. At MONCTON railway transportation was reported much quieter in both freight and passenger departments, the train schedule being reduced; express workers continued active. FREDERICTON reported a quiet month on the railways. At MONTREAL the railways were quiet; the Harbour Commission started work in preparation for the opening of navigation, which is expected earlier than usual. QUEBEC reported navigation already opening; steam railways laid off some local trains and dull conditions prevailed; street railways had a busy month. At SHERBROOKE railway passenger traffic was heavy, but freight rather light; transfers was fairly active. At THREE RIVERS and SOREL railwaymen had a good month. TORONTO reported steam railways active, especially about Easter, when passenger traffic was heavy necessitating the running of extra trains; street railwaymen had plenty of work; other transportation workers were well employed. At HAMILTON the Toronto, Hamilton and Buffalo Railway laid off a number of shipping clerks, firemen, helpers, and extra men; the Grand Trunk Railway was fairly busy; repair gangs were busy in preparation for the opening of navigation; 'longshore work was slack, but electric railways and motor transports were active. Railway workers at St. CATHARINES were well employed. At BROCKVILLE and KINGSTON the railways were busy at the holiday season; 'longshore work was still suspended, but transfers were busy. Passenger and freight traffic was brisk on the three lines operating at BELLEVILLE; liveries and garages had a good month. Railwaymen and other trans-

portation workers at GALT had a busy month. Freight traffic at BRANTFORD was heavy, and passenger traffic was good on both steam and electric lines; transfer workers were well employed. At KITCHENER steam railways were slack in the freight department; street-car men were fairly well employed; garages were busy, but liveryes were quiet. At LONDON a number of conductors, engineers, firemen and brakemen were still unemployed on the Grand Trunk and Canadian Pacific, but activity was increasing; garages increased their working staffs. ST. THOMAS reported increased activity on the railways, the regular employees making good time, while spare men were not well employed. The railways at CHATHAM handled increased freight, working forces being augmented. Electric railway employees at WINDSOR continued busy, but liveryes and garages had a dull month. Passenger traffic at OWEN SOUND was fair, but freight was somewhat light. At PORT ARTHUR and FORT WILLIAM preparations were under way for the opening of navigation, which would make a large demand for workers at the local freight sheds. Transportation workers at WINNIPEG continued busy during the month with normal staffs engaged. At BRANDON the steam railways were dull, but transfers and garages were busy. Railway traffic at REGINA was said to be normal for the season; the one-man car system was approved after trial on one route and when adopted generally will reduce the present electric railway staff by 40 per cent. Transport workers at MEDICINE HAT had a quiet month. At CALGARY also railwaymen and other transport workers were very quiet. Railway employers in NELSON district were still working on short time. VANCOUVER reported steam railways rather quiet; navigation and 'longshore work was also rather slack; electric railways, transfers and garages were fairly active. Navigation and 'longshore work at PRINCE RUPERT improved as the season advanced. At VICTORIA coast traffic was light,

except in the holiday season; 'longshore work was only fair; transfers and garages were active.

In QUEBEC district stone quarrying continued dull throughout the month.

The asbestos industry at SHERBROOKE was fairly active; the gravel pits were also active, but granite quarries were quiet. At THET-

FORD MINES considerable unemployment still continued in the asbestos mines. COBALT reported that 7 cars were shipped during the month, containing 490,714 pounds of ore; this compares with 12 cars containing 900,772 pounds in the previous month; 719 bars were shipped, containing 839,102 ounces of silver bullion for the month; this compares with four shipments of bullion in February, consisting of 309 bars containing 401,110 ounces; there was no demand for additional labour during the month. Power shortage affected the activity of the mines at TIMMINS. FERNIE reported slackness at the local mines, although no camps were entirely shut down. CRANBROOK reported that some additional help was taken on at the Sullivan Mine at Kimberley. Mining activity in the NELSON district was said to be affected by the low price of lead and silver, that for lead being below the pre-war level; working forces were accordingly reduced, activity consisting largely of development work with small crews; the mines at ROSSLAND continued fairly active, the ore being sent for smelting to TRAIL; this smelter had two lead furnaces in blast, but the copper furnace, which had been running steadily, shut down for 3 weeks for repairs, the employees being placed at other employment; the lead, zinc, silver and copper refineries were active, the rate of production of lead exceeding in quantity the rate for the past 20 years. PRINCE RUPERT reported that the mines at STEWART continued active, but at ANYOX conditions were still quiet.

The coal mining industry in the Maritime Provinces continued slack during

March, the number of unemployed miners at the close of the month

being estimated by the United Mine Workers at about 1,000, with about 11,000 on half time. SYDNEY reported the production of the Dominion Collieries at about 200,000 tons, compared with 227,030 tons (revised figure) in the preceding month; 14,700 tons of coke were produced, 120 ovens being in operation. At SYDNEY MINES the Nova Scotia collieries produced 42,800 tons of coal, compared with 45,000 tons in February. At NEW GLASGOW, owing it is said, to scarcity of orders, the collieries were mostly on short time. At SPRINGHILL and JOGGINS also short hours were worked. The coal mines at MINTO had a quiet month. The mines at DRUMHELLER, ESTEVAN and others points in the Prairie coal fields continued very quiet. At LETHBRIDGE the miners were still on short time, two or three days a week being usual at the larger mines; lack of orders was given as the reason for the general slackness. FERNIE reported the operations of the local mines fairly steady, the miners averaging about three-fourths time, which was a marked improvement over the previous months. NANAIMO reported the coal mines of Vancouver Island rather quiet; towards the beginning of the month one company closed down one of its mines, throwing nearly 200 men out of work; some of these however were absorbed in work elsewhere for the same company; one company adopted the plan of alternate working shifts, spreading their work and giving all workers some time; the mines generally lost one or two shifts each week.

The value of building permits in 56 cities during February amounted to \$3,216,085 as compared with \$2,378,937 (revised figure) in January. During March the building trades continued quiet at

SYDNEY and HALIFAX. At TRURO carpenters worked about four days a week. Some remodelling was in progress at CHARLOTTETOWN, but no new work was started. ST. JOHN reported quiet conditions in the building trades; work was suspended at the Courtenay Bay dry docks. At MONCTON and FREDERICTON the building trades became more active owing to the mild weather, though considerable unemployment continued. Only a few repairs were carried on at BATHURST. At MONTREAL building was still quiet, but considerable activity was anticipated, provided an agreement was reached in regard to the proposed reduction in wages. Some work was started at QUEBEC on commercial building. At SHERBROOKE, ST. HYACINTHE and SOREL the building trades were still quiet, but at THREE RIVERS some activity was noted. At OTTAWA and HULL no new building was begun, and out of the 700 men in the local building trades only about 50 were said to be at work. TORONTO reported the building trades active though not to the extent anticipated, operations being mostly confined to the erection of dwellings; many plans for industrial and commercial buildings were still in abeyance; bricklayers, carpenters, lathers, plasterers and the other trades were generally able to obtain work, though a small proportion remained unemployed. At HAMILTON painters and plumbers were fairly well employed; but the building industry was generally very quiet pending settlement of the wage rate for the coming year and readjustment of the prices of builders' supplies. Early warm weather caused some revival of activity at NIAGARA FALLS and at ST. CATHARINES fair activity was reported. At BROCKVILLE and KINGSTON building was still practically at a standstill. BELLEVILLE reported a beginning of construction work on dwellings. At PETERBOROUGH the building trades were fairly busy on work in the surrounding country, though little work was done in the city. GALT reported that much building work was planned, though little was actually

begun. At BRANTFORD practically no building was under way except a number of small dwellings. KITCHENER reported that no new dwellings were so far begun, but some public and industrial buildings were in progress; the civic authorities relieved unemployment by considerable local improvements and public works. The building trades at GUELPH and WOODSTOCK were still very quiet. At LONDON the building trades were still idle for the most part, very little work being so far begun, except on the new children's hospital; the city council still provided employment for about 300 men on public works, and had a further large programme of work for the coming season. Carpenters and bricklayers at CHATHAM had some employment on uncompleted contracts, and in connection with the new hospital building. At WINDSOR considerable work both on dwellings and public buildings was started during the month. The building trades at OWEN SOUND, ORILLIA and SAULT STE. MARIE had a quiet month. At WINNIPEG the building industry showed a slight improvement, mechanics being employed on small jobs, but a large number were still out of work. BRANDON reported increasing activity, but at REGINA, MOOSE JAW, MEDICINE HAT, LETHBRIDGE and CALGARY conditions were very quiet. Some activity was reported at EDMONTON, though unemployment still prevailed. At FERNIE the only activity reported was in road building for the public works department. Building operations at NELSON and TRAIL began to show signs of revival. At VANCOUVER very little new building work was begun, except in the outlying district; no work was done on public buildings, and very little on industrial plants; work on the new pier was still confined to excavation. Little new work was under way at NEW WESTMINSTER. Carpenters and other building trades at PRINCE RUPERT had a quiet month.

During March there was a further contraction in the volume of employment afforded by the Canadian Pacific,

Grand Trunk and Canadian National Railways, including maintenance of way. There were about 1,800 fewer persons on the payrolls of these companies at the end of March than at the end of February, reductions amounting to about 1,200 persons in the Canadian National staffs being mainly responsible.

Work in the woods practically ceased in the Maritime Provinces during

March; stream driving and hauling began, and the sawmills were starting or preparing for the season's cut. In Prince Edward Island the early disappearance of snow interfered with hauling, but lumbermen were fairly active. ST. JOHN reported driving operations under way, the pulp mills having about 8 million feet to come down, and the other companies from 12 to 15 million; saw and shingle mills had not yet started to run. FREDERICTON and BATHURST reported the completing of the winter's cut in the woods, but the streams were not yet clear for driving. In QUEBEC district logging camps closed down earlier than usual in the month, and river driving was not yet begun. The saw and shingle mills at SHERBROOKE were still quiet, but at SOREL the saw mills were reported to be active. Wood operations in Ontario slowed down during the month, the river drives had not started and the mills were not yet running. At OTTAWA and HULL the sawmills were still quiet. Similar conditions prevailed at PETERBOROUGH, where logging operations ceased much earlier than usual, and the large cut was expected to begin arriving shortly. NORTH BAY, TIMMINS and COBALT reported gradual cessation of work in the woods. At SAULT STE. MARIE the mills awaited the opening of the streams to bring down logs. PORT ARTHUR and FORT WILLIAM reported that the weather early in the month was favourable for bush work, the roads being good, but towards the close many camps broke up and practically all demand for men ceased in this industry. Employ-

ment centres in the Prairie Provinces reported a decline of activity in the woods and an increase in the sawmills. At FERNIE a general though slight improvement took place in the lumbering industry during the month; sawing started at some mills, more demand for lumber products being reported than for some months past; makers of posts, poles and ties, and especially cedar products, were very busy. At CRANBROOK, NELSON and TRAIL the sawmills were starting on the season's operations. VANCOUVER reported a decided improvement in the lumbering industry on the Pacific Coast, a number of camps open-

ing up and relieving the congestion of unemployment in the city; saw and shingle mills showed increased activity. At NEW WESTMINSTER the lumber industry continued slack, two large mills being still shut down. VICTORIA reported some improvement in the lumber industry on Vancouver Island, two or three of the mills which had been closed down during the past few months starting to work once more; a number of logging camps also opened up. NANAIMO however, reported that few men so far were employed by the logging companies. PRINCE RUPERT reported work being resumed at the logging camps on Queen Charlotte Islands.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

PROCEEDINGS FOR THE MONTH OF MARCH, 1921, WITH TEXTS OF BOARD'S REPORT

DURING the month of March the Department received a report from the Board established to deal with the dispute between the Temiskaming Mine Managers' Association and certain of their employees at Cobalt, being miners, millmen, etc., also eight applications for the establishment of Boards.

Applications Received

During the month of March applications for the establishment of Boards were received as follows:

(1) From the employees of the Dryden Paper Company, Dryden, Ont., being members of the International Brotherhood of Pulp, Sulphite and Paper Mill Workers. In this case the disputants were advised that joint consent to a Board reference would be necessary as the industry concerned was not one which fell within the direct

scope of the Industrial Disputes Investigation Act. This consent had not been received from the company at the close of the month.

(2) From the employees of the Canadian National Railways in the Stores Department, Fort Rouge, Winnipeg, Man., being members of Victoria lodge No. 1326, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. It appeared from investigation that the differences between the disputants were not such as constituted a dispute within the scope of the Industrial Disputes Investigation Act, and in these circumstances no Board was established.

(3) From the employees of the Niagara, St. Catharines and Toronto Railway Company, being members of Local Division No. 846, Amalgamated Association of Street and Electric Railway em-

ployees of America. A Board was established, Messrs. Geo. D. Kelly, Ottawa, and Jos. Gibbons, Toronto, being appointed members thereof on the nomination of the employer and employees respectively. At the close of the month the chairman had not been named.

(4) From the employees of the Corporation of the City of Ottawa, being firemen, members of the International Association of Fire Fighters. The employer in this case being a municipality a Board could be established only upon the joint consent of the disputants. The city granted its consent and a Board was established composed as follows: Messrs. Ainslie W. Greene and Daniel McCann, Ottawa, nominees of the corporation and employees respectively. At the close of the month the chairman had not been named.

(5) From the employees of the Dominion Steel Company, Sydney, N.S., being electrical workers, machinists, etc. In this case the disputants were advised that joint consent to the establishment of a Board would be necessary as the industry concerned was not one which fell within the scope of the Industrial Disputes Investigation Act. In the meantime a special officer of the Department visited the locality in an endeavour to bring about a settlement without Board reference. This officer was, at the close of the month, continuing his efforts.

(6) From the employees of the Nova Scotia Steel and Coal Company, New Glasgow, N.S., members of (1) the Amalgamated Association of Iron, Steel and Tin Workers; (2) the International Association of Machinists, and (3) the International Brotherhood of Electrical Workers. The conditions respecting this connection with the application from the employees of the Dominion Steel Company, and this matter was also receiving the attention of the special officer of the Department in the locality at the close of the month.

(7) From the employees of the Corporation of the City of Saskatoon, Sask., being street railway workers, members of Division No. 615, Amalgamated Association of Street and Electric Railway Employees of America. The employer in this case being a municipality a Board could be established only upon the joint consent of the disputants. This consent had not been received from the corporation at the close of the month.

(8) From the employees of the City of Windsor, Ont., being firemen, members of Local Union No. 169, International Association of Fire Fighters. The disputants were advised that as the employer in this case was a municipality, a Board could be established only upon their joint consent. In the meantime renewed negotiations resulted in a settlement of the dispute and the establishment of a Board was rendered unnecessary.

Report of Board in Dispute between the Temiskaming Mine Managers' Association and certain of their employees at Cobalt, being miners, millmen, &c.

A REPORT was received from the Board established to deal with the dispute between the Temiskaming Mine Managers' Association and certain of their employees at Cobalt, Ont., being miners, millmen, etc. The Board was composed as follows: Mr. J. M. Godfrey, Toronto, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. R. A. Bryce and Arthur W. Roebuck, Toronto, nominees of the employers and employees respectively. The report of the Board was unanimous and contained the recommendation that the present rate of wages remain in effect until April 1, 1921, after which date the reduction of seventy-five cents per day might be established. The findings of the Board were rejected by the men.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between Operators of Mills and Mines under the jurisdiction of the Temiskaming Mine Managers' Association, employers, and their employees, being miners, millmen, etc., employees.

Toronto, March 28th, 1921.

The Honourable G. D. Robertson,
Minister of Labour,
Ottawa, Ontario.

Dear Sir,

The Board of Conciliation estab-

lished by you under date of the 4th day of March, 1921, to enquire into the dispute between the above mentioned parties beg to report as follows:

Upon the Board being completed it was ascertained that its hearings could be conveniently held at Cobalt, and Monday, March 21st, 1921, was fixed as the date to commence the proceedings. The Board proceeded on that date and the employees were represented by Messrs. Harry Emden, Albert Clark, Robert McGowan and Bernard Marker, —being a committee appointed by the Central Council of the District.

The employers were represented by the following members of the Temiskaming Mine Managers' Association: Messrs. Hugh Park, Nipissing Mine, Cecil G. Bateman, La Rose Mine, Harry Kee, Kerr Lake Mine, Fraser Reid, Coniagas Mine, John Dickinson, O'Brien Mine, William Cooper, Temiskaming Mine, M. Fairlie, Mining Corporation of Canada, H. L. Donaldson, Beaver Mines Company.

Upon opening up the matters in dispute it was found that employees of the mines then operating in the Cobalt District to the number of seven hundred (700) were directly concerned. The locality of the dispute is the town of Cobalt and the township of Coleman.

The dispute arose as a result of a notice sent by the employers on January 8th, 1921, to the employees announcing that after the 15th of February, the

wages of the employees would be reduced by seventy-five cents (75c.) a day. The reason given for the reduction was that on account of the decreasing price of silver the mines could not be operated at a profit. Various conferences took place between the employers and the employees and a proposal was finally made by the employees that the reduction in wages should be distributed over a period of three months, at the rate of twenty-five cents (25c) per month. This proposal was refused by the employers and a Board of Conciliation was then requested by the employees and granted. In the meantime the proposed reduction had not been put into effect.

After hearing the statements of both parties to the dispute, it was proposed by the Board that a private conference should be held by the Board with representatives of the employers and the employees for the purpose of considering an amicable adjustment of the dispute. This conference took place on Wednesday the 23rd of March. During the course of the discussion it was proposed as a solution of the difficulty that the employers should continue paying wages at the present rate until April 1st, 1921, after which date, in view of the low price

of silver, the reduction of seventy-five cents (75c) a day should become operative. This proposal was accepted by both parties subject to it being confirmed on behalf of the employees at a mass meeting to be held in Cobalt on Sunday, March 27th, 1921. This mass meeting of the employees was held on the 27th day of March, and was attended by about two hundred and fifty employees of the seven hundred affected. The meeting rejected the proposed settlement.

The Board regrets the rejection of the settlement which had been approved by the Committee representing the employees and which was the best which could be obtained in view of the present difficult situation.

The Board recommends that the reduction in wages of seventy-five cents (75c.) per day be deferred until the 1st of April, 1921.

(Sgd.) JOHN M. GODFREY,
Chairman.

(Sgd.) ROBT. A. BRYCE,
Representative of the employers.

(Sgd.) A. W. ROEBUCK,
Representative of the employees.

SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

THE tables presented below summarize the proceedings under the Industrial Disputes Investigation Act, 1907,

for the fiscal year ending March 31, 1921, and from March 22, 1907, to March 31, 1921.

I.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1920 TO
MARCH 31, 1921.

Industries affected.	No. of applications for Boards received	No. of Boards established	No. of strikes not averted or ended.
I.—DISPUTES AFFECTING MINES, TRANSPORTATION AND COMMUNICATION AND OTHER PUBLIC UTILITIES:			
(1) Mines:			
(a) Coal.....	6	1	0
(b) Metal.....	1	1	0
Total mines.....	7	2	0
(2) Transportation and communication:			
(a) Railways.....	12	8	0
(b) Street railways.....	15	12	2
(c) Express.....	2	2	0
(d) Shipping.....	1	0	0
(e) Telephones.....	1	0	0
Total, transportation and communication.....	31	22	2
(3) Miscellaneous:			
Light and power.....	6	5	3
Total, mines, transportation and communication and public utilities.....	44	29	5
II.—DISPUTES NOT FALLING CLEARLY WITHIN THE DIRECT SCOPE OF THE ACT:			
(1) Public utilities under provincial or municipal control:			
(a) Street railways.....	1	0	0
(b) Other civic employees.....	5	2	0
Total public utilities under provincial or municipal control.....	6	2	0
(2) Miscellaneous.....	18	6	0
Total disputes not falling clearly within the direct scope of the Act.....	24	8	0
Total, all classes.....	68	37	5

The proceedings under the Act during the year include six cases in which certain proceedings had taken place during the preceding year, namely, disputes between (1) the Canadian National Railway and certain of its employees at Halifax, N.S.; (2) the Grand Trunk Railway Company and its clerks, etc.; (3) the Corporation of Ottawa and its civic employees; (4) the Canadian Fish and Cold Storage Company, Prince Rupert, B. C., and its fish packers; (5) the Nova Scotia Steel and Coal Company, Limited, Sydney Mines, and certain of its employees, and (6) the Inverness Coal and Railway Company, Inverness, N. S., and certain of its employees.

At the close of March, 1921, results were still pending in connection with six applications concerning disputes between (1) the Niagara, St. Catharines and Toronto Railway and certain of its employees; (2) the Corporation of Ottawa and its firemen; (3) the Corporation of Saskatoon, Sask., and its street railway workers; (4) the Dryden Paper Company, Limited, Dryden, Ont., and certain of its employees; (5) the Dominion Steel Company, Limited, Sydney, N. S., and its electrical workers, machinists, etc., and (6) the Nova Scotia Steel and Coal Company, Limited, New Glasgow, and its tin workers, electrical workers and machinists.

II.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM MARCH 22, 1907, TO MARCH 31, 1921.

Industries affected.	No. of applications for Boards received	No. of strikes not averted or ended
I.—DISPUTES AFFECTING MINES, TRANSPORTATION AND COMMUNICATION, OTHER PUBLIC UTILITIES AND WAR WORK:		
(1) Mines:		
(a) Coal.....	62	7
(b) Metal.....	19	5
(c) Asbestos.....	1	0
Total mines.....	82	12
(2) Transportation and communication:

(1) Public utilities under provincial or municipal control.....	45	1
(2) Miscellaneous.....	54	0
Total disputes not falling clearly within the direct scope of the Act.....	99	1
Total, all classes.....	508	32

The figures contained in the above table may be thought to show discrepancies as compared with those appearing in the yearly summary. A closer examination will, however, show the statements of both classes to be in agreement. A complete statement of proceedings for a year must show all disputes dealt with during the fiscal year. The figures of the yearly statement include, therefore, disputes carried over from the previous year and which are counted in the summary of that year's proceedings. Thus the same dispute may properly figure in the annual statement for each of the two years. In the statistical recapitulation covering several years, as above, it is necessary that no dispute shall be counted more than once, and account is taken of the number of applications received during the year and thus brought within the purview of the statute.

STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1921

EIGHT strikes, involving 963 employees were reported as having commenced during March. There were in existence at some time or other during the month 26 strikes, involving about 3,252 workpeople. The total time loss on account of industrial disputes was estimated at 52,928 working days, as compared with 23,547 working days during February, 1921, and 43,169 working days during March, 1920. The time loss occasioned by the eight strikes which began in March was 18,685 working days, while a loss of 34,243 working days is charged to the eighteen strikes that commenced prior to March. Termination was reported in the case of seven

strikes that commenced prior to March. Three strikes commencing during March terminated during the month, leaving the following sixteen strikes, involving 1,735 workpeople, on record on March 31: employees of steel and coal companies, Sydney; machinists, Brantford; patternmakers, Brantford; moulders, Walkerville and Windsor; moulders, Lindsay; patternmakers, Burnaby, B.C.; garment workers, Toronto; waterproof garment workers, Montreal; coal miners, Brule, Alta.; coal miners, Cumberland County, N.S.; pulp and paper workers, Thorold; woodworkers (finishers), Toronto; abattoir butchers, Montreal; meat cutters and packers, Montreal; cigarmakers, London; musicians, Kitchener.

Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

BUILDING AND CONSTRUCTION.—Twenty-five ornamental iron workers in the employ of a Montreal firm struck on March 1 because of a change in working conditions from forty-four hours in six days to forty-four hours in five days. After being out five days, the strike was declared off, work being resumed on the former basis of forty-four hours in six days. The strike of the building trades in Toronto (one firm involved) which concerned the painters, chiefly, terminated through the intervention of the Industrial Council.

METALS, MACHINERY AND CONVEYANCES.—Nine strikes, involving 404 employees with a time loss of 9,492 working days, were the approximate figures for this group. At some time or other

during the month there were strikes in this group at Sydney, St. John, N.B.; Brantford, Charlottetown, Walkerville and Windsor, Lindsay and Burnaby, B. C. Those which remained unterminated were: employees of the steel and coal companies at Sydney, nail workers at St. John, patternmakers at Brantford, moulders at Walkerville and Windsor, moulders at Lindsay and patternmakers at Burnaby, B.C.

CLOTHING.—The strike of 1,000 garment workers in Hamilton, which commenced on February 22, terminated on March 10. It resulted in the employees accepting a wage reduction of \$4 per week for men and \$3 per week for women. The proposed reduction, which caused the strike was \$7 and \$6 per week. In Montreal, 150 waterproof garment workers were on strike for five days in protest against a wage reduction. Work was resumed on the basis of the 1920 agreement.

LUMBERING.—Mill workers at Chip-

STRIKES AND LOCKOUTS DURING MARCH, 1921

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
Strikes commencing prior to March, 1921			
BUILDING AND CONSTRUCTION:—			
Building Trades, Toronto, Ont.	Commenced, February 28. Against the employment of non-unionists. Work resumed March 3.	56	112
Painters and paperhangers, Toronto, Ont.	Commenced February 14. Against a reduction in wages. Work resumed March 14.	25	275
METALS, MACHINERY AND CONVEYANCES:—			
Employees of steel and coal Companies, Sydney, N.S.	Commenced November 22. For increased wages and improved working conditions. Unterminated.	150	3,750
Machinists, Brantford, Ont.	Commenced February 23. Against a reduction in wages. Unterminated.	26	650
Metal workers, St. John, N.B.	Commenced February 4. Against a reduction in wages. Work resumed March 15.	33	396
Moulders, Charlottetown, P.E.I.	Commenced February 21. Against a reduction in wages. Work resumed March 12.	9	90
Patternmakers, Brantford, Ont.	Commenced February 21. Against a reduction in wages. Unterminated.	9	225
Moulders, Walkerville and Windsor, Ont.	Commenced February 28. Against a reduction in wages. Unterminated.	48	1,200
Moulders, Lindsay, Ont.	Commenced February 24. Against a reduction in wages. Unterminated.	7	175
CLOTHING:—			
Garment workers, Toronto, Ont.	Commenced November 25, 1920. In protest against piece work. Unterminated.	40	1,000
Tailors, pressers, cutters and operators, Montreal, Que.	Commenced January 10. In protest against piece work. Information received indicates conditions no longer affected.
Garment workers, Hamilton, Ont.	Commenced February 22. Against a reduction in wages. Work resumed March 10.	1,000	8,000
LUMBERING:—			
Sawmill workers, Vancouver, B.C.	Commenced February 11. Against a reduction in wages. Information received indicates conditions no longer affected.
MINES, SMELTERS, CLAY PRODUCTS, QUARRIES, Etc.:—			
Coal miners, Brule, Alta.	Commenced February 22. Against a new dockage system. Unterminated	500	12,500
Miners, Mayo, Y.T.	Commenced January 1. For improved camp conditions. Information received indicates conditions no longer affected.

STRIKES AND LOCKOUTS DURING MARCH, 1921—Continued.

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
LEATHER:—			
Leather cutters, Toronto, Ont.	Commenced January 4. Against a reduction in wages. Work resumed March 6.	9	45
PULP AND PAPER:—			
Employees at Thorold, Ont.	Commenced February 8. Against a reduction in wages for union recognition. Unterminated.	100	2,500
TRANSPORTATION:—			
Electrical workers, Vancouver, New Westminster and Victoria, B.C.	Commenced February 22. Owing to refusal of Railway Company to accept award of Board of Conciliation. Work resumed March 8.	200	1,400
WOODWORKING:—			
Finishers, Toronto, Ont.	Commenced February 19. Against a reduction in wages. Unterminated.	37	925
FOODS, LIQUORS AND TOBACCO:—			
Abattoir butchers, Montreal, Que.	Commenced February 1. In protest against closing of abattoir. Unterminated.	40	1,000
Cigarmakers, London, Ont.	Commenced January 1. In protest against a reduction in wages. Unterminated.		
Strikes commencing during March, 1921			
BUILDING AND CONSTRUCTION:—			
Ornamental Iron Workers, Montreal, Que.	Commenced March 1. Because of a change in the regulation of working hours. Work resumed March 7.	25	125
METALS, MACHINERY AND CONVEYANCES:—			
Patternmakers, Burnaby, B.C.	Commenced March 3. Against a reduction in wages. Unterminated.	22	506.
CLOTHING:—			
Waterproof garment workers, Montreal.	Commenced March 1. Against a reduction in wages. Work resumed March 7.	150	750
LUMBERING:—			
Mill workers, Chipman, N.B.	Commenced March 14. In protest against a longer working day and a reduction in wages. Unterminated.	56	784
MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.:—			
Coal miners, Cumberland County, N.S.	Commenced March 14. To enforce the Montreal Agreement regarding wages. Unterminated.	100	1,400
FOODS, LIQUORS AND TOBACCO:—			
Meat cutters, packers and butchers, Montreal.	Commenced March 1. Against a reduction in wages. Unterminated	600	15,000
MISCELLANEOUS:—			
Musicians, London, Ont.	Commenced March 7. Against a reduction of the orchestra staff. Terminated March 21.	10	120
Musicians, Kitchener, Ont.	Commenced March 15. For increased wages and a fixed staff. Unterminated.		

man, N.B., struck on March 14 in protest against a longer working day and a proposed reduction in wages. Fifty-six employees were involved. The strike was unternminated at the end of the month. It was reported that the operators in New Brunswick were planning on returning to a ten-hour day, instead of the prevailing nine-hour day. In Vancouver, mill and yard employees, who were on strike against a wage reduction of 15 cents per hour, accepted this reduction.

MINES, SMELTERS, CLAY PRODUCTS, QUARRIES, ETC.—The strike of 500 coal miners at Brule, Alta., which began on February 22, was unternminated. The employees struck against a new dockage system. Coal miners in Cumberland County, N.S., to the number of 100, struck on March 14 to enforce the Montreal agreement as regards wages. This strike also remained unternminated.

PULP AND PAPER.—The employees in this group at Thorold were still on strike. Union recognition and wage re-

duction were the causes involved in this strike which commenced on February 8.

TRANSPORTATION.—The strike of 200 electrical workers in Vancouver, Victoria and New Westminster, which commenced on February 22 owing to the refusal of the company to accept the award of a Board of Conciliation, terminated on March 8. Work was resumed on the same wage conditions that prevailed prior to the strike with modification of certain clauses in the agreement.

FOODS, LIQUORS AND TOBACCOS.—This group had the greatest time loss of all groups during the month, due to the strikes of butchers and meat packers in Montreal. The abattoir butchers struck on February 1 in protest against the closing of one abattoir. This strike was unternminated and was followed on March 1 by a strike of 600 employees (packers, cutters and butchers). Five firms were involved in this strike, which was in protest against a 12½ per cent wage reduction. It remained unternminated.

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING FEBRUARY, 1921

THE following details with regard to strikes and lockouts in the United Kingdom during February, 1921, based on returns from employers and workpeople, are taken from the March issue of the *British Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.—The number of trade disputes, involving a stoppage of work, reported to the Department as beginning in February, was 63, as compared with 44 in the previous month, and 122 in February, 1920. In these new disputes over 14,000 workpeople were directly involved, and nearly 1,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition to the numbers involved in new

disputes, nearly 13,000* workpeople were involved, either directly or indirectly, in 49 disputes which began before February and were still in progress at the beginning of that month. The total number of disputes in progress in February was thus 112, involving about 28,000 workpeople, as compared with 23,000* workpeople involved in 93 disputes in progress in January, and 110,000 workpeople involved in 169 disputes in progress in February, 1920.

CAUSES.—Of the 63 new disputes, 11, directly involving about 1,200 workpeople, arose on demands for advances in wages, 26, directly involving 8,700 workpeople, against proposed reductions

*See foot note on next page.

in wages; 7, directly involving 400 workpeople on other wages questions; 9, directly involving 2,700 workpeople, on questions respecting the employment of particular classes or persons; and 10, directly involving 1,200 workpeople, on other questions.

RESULTS.—During February settlements were effected in the case of 26 new disputes, directly involving about 4,400 workpeople, and 20 old disputes, directly involving about 3,000 workpeople. Of these disputes, 10, directly involving 1,100 workpeople, were settled in favour of the workpeople; 21, directly involving 4,500 workpeople, in favour of the employers; and 15, directly involving 1,800 workpeople, were compromised. In the case of 6 disputes, directly involving 500 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in progress in February.	Aggregate duration in working days of all disputes in progress in February
	Started before February 1.	Started in February.	Total		
Building.....	11	13	24	3,000	48,000
Mining and Quarrying.....	7	5	12	3,000	28,000
Metal, Engineering and Shipbuilding.	9	22	31	17,000*	255,000
Other Trades.....	22	23	45	5,000	47,000
Total, Feb., 1921...	49	63	112	28,000*	378,000
Total, Jan., 1921...	49	44	93	23,000*	408,000
Total, Feb., 1920...	47	122	169	110,000	450,000

Of the 378,000 working days lost in February by all disputes in progress, over 236,000 were lost by disputes which began before February and were still in progress at the beginning of that month, and nearly 142,000 by disputes which began in the month.

*Considerable numbers of other workers are reported to have been rendered idle as a result of the strike of ship joiners, but the information at present available is insufficient to enable a trustworthy estimate of the total number to be made.

THE COAL STRIKE IN GREAT BRITAIN

A GENERAL strike of coal miners in Great Britain, which commenced on April 1, arose out of the terms of a provisional settlement of a previous strike in the coal mining industry which occurred in October, 1920.

The October strike, it will be remembered, was settled on the basis of an unconditional increase of 2s. per shift for a period of two months. Thereafter, any future increase was to be dependent upon the volume of production over periods of three months. The weekly average of production for the month of September, 1920, was taken as a basis for a sliding scale of wages. A system of test periods, on which to establish the relationship of production and wages for this sliding scale, was put into effect. Finally, the mine

owners and employees were to reach an agreement by March of this year as to wage rates in general. Such, briefly, were the wage provisions of the Coal Mines (Emergency) Act, which also determined that the Government's financial control of the mines would continue until the end of August, 1921.

During the earlier weeks in which the above agreement was in effect, coal production and, consequently, wages were increased. The output during the first test period, which ended December 18, was sufficient to increase the wage advance from the original 2s. to 3s. 6d. In January, however, the effects of trade depression began to be felt by the industry, there was a decrease in the output, and as a result the advance for February was reduced to 1s. 6d.

Trade depression and unemployment increased, and the output, for the test period ending February 19, dropped below the September standard (agreed upon as a basis), with the result that the wage advance disappeared entirely.

The trade depression in the coal mining industry was attributed, chiefly, to the marked decline in exports. This decline had become acute only within recent months. The demands of the war had induced the Government to adopt a scheme of control over the coal mines, which control was subsequently continued as a means of maintaining a maximum of production. Under this scheme, the surplus earnings of the coal export trade were pooled at a rate which assured steady dividends to the owners of the more profitable mines and at the same time enabled the poorer mines to continue in operation. The scheme revealed no flaw until the export trade began to diminish. This diminution was attributed to two main causes—the delivery of German coal, under the indemnity terms, and successful foreign competition. Profits could no longer be guaranteed to the mine owners without subsidizing the industry from the national treasury. As a result of the decrease in coal exports and the attendant decrease in production, in February many collieries closed down or curtailed their operations, thereby adding to the unemployment.

Two alternatives were now before the Government; it would either continue to subsidize the industry out of public funds, or release its control over the mines much sooner than the time established (August) by the Coal Mines (Emergency) Act. It adopted the latter course, known as decontrol of the mines. This action came early in March, and complete control was announced to terminate on March 31. It was estimated by the Secretary of Mines that the Government would thus save at least \$25,000,000 each month.

It was argued by the owners and miners that this change in the Government's plans created an unexpected

situation, deprived them of time to adjust themselves to altered conditions, and precipitated their difficulties.

The result of absolute decontrol was apparent. Each colliery group became entirely dependent upon itself financially for existence. The owners of inferior mines recognized their inability to pay the wage schedule without the Government pool of profits, or the Government subsidy, upon which to draw. The owners of more profitable mines contended that unless production costs (including wages) decreased, the industry would be so crippled as to preclude its competing in foreign markets. However, the Mining Association of Great Britain (representing the mine owners) and the Miners' Federation (representing the mine workers) commenced to carry on negotiations under the new situation. The point at issue was whether a national or a district standard of wages should be adopted. The miners demanded that wages should remain on a national basis with a uniform scale throughout the country, with the continuance of the principle of pooled earnings. This claim was strongly opposed by the mine owners who insisted that each district should determine its own wage schedule, based upon local conditions and earning capacity.

The mine owners submitted a draft scheme for determining a district basis of wages. This scheme the miners' leaders would neither accept nor definitely reject without securing the opinion of the rank and file. A resolution was accordingly submitted by them to the various districts as to whether or not they were prepared to abandon temporarily the policy of a national wages board and a national pool, and empower the national executive to proceed with the negotiations with a view to establishing an agreement on a district basis for the period of the present abnormal state of trade and prices. When the result of the district decisions was announced it was seen that, while the important districts of Yorkshire and

Northumberland were willing to accept the owners' terms, they were overborne by South Wales, Scotland and Lancashire, which districts insisted on a national settlement. The coal owners then announced the termination of all existing agreements on March 31. On March

30, the Miners' Federation executive sent instructions to every district to withdraw all the colliery workers at the expiration of the agreements. Accordingly work ceased on April 1, and approximately 1,200,000 men left the pits on that date.

WORK OF THE DEPARTMENT OF LABOUR

THE Annual Report of the Department of Labour for the fiscal year ending March 31, 1920, has recently been issued. The Report contains statements of proceedings under the Conciliation and Labour Act, the Industrial Disputes Investigation Act, 1907; the Fair Wages Resolution; the Employment Offices Co-ordination Act and the Technical Education Act. It also contains chapters dealing with the Report of the Director of Coal Operations in Alberta and South Eastern British Columbia, prices and wages statistics, the Royal Commission on Industrial Relations, the National Industrial Conference, and the League of Nations International Labour Conference.

In the introductory summary a comparison is made between Canada and other countries with regard to the extent of industrial unrest, and the situation in Canada in this regard is shown to have been very favourable. The number of persons affected by strikes and lockouts and the number of days lost during the first six months of 1920 in the countries for which statistics are available are shown in the following table:

Country	Persons affected	Days lost	Population
Italy	1,781,250	21,650,200	36,740,000
France. ...	1,186,670	19,358,400	39,601,509
Germany ..	1,866,358	18,201,660	63,051,979
Spain	724,700	11,630,100	20,719,598
United States	958,700	11,287,400	91,972,266
Australia ..	303,400	7,602,000	4,455,005
Great Britain	769,200	7,337,000	45,267,100
Sweden	180,070	4,779,170	5,813,850
Switzerland	73,380	2,753,160	3,937,000
Belgium ...	176,940	2,096,340	7,555,576
South Africa	41,000	809,000	5,973,394
Holland ...	63,000	795,300	6,778,699
Canada. ...	35,005	523,526	7,206,643

The chapter on conciliation work shows that apart from the operations of the Industrial Disputes Investigation Act, 1907, the assistance of the Department was invoked in connection with many individual disputes. A list is given containing 83 of the more important cases in connection with which mediation was performed during the year.

The chapter on the Industrial Disputes Investigation Act, 1907, gives particulars relating to 77 applications for boards during the fiscal year. In connection with these 51 boards were established. There were only three cases in which strikes were not averted or ended. A table covering the fiscal years since the passing of the Act shows that up to March 31, 1920, there had been received 446 applications for boards, and there were granted boards in 333 cases, while

in 27 disputes strikes were not averted or ended.

A summary of the second annual report of the Director of Coal Operations for Alberta and south eastern British Columbia contains an account of the relations between the Western Coal Operators' Association and their employees, members of the rival organizations of the United Mine Workers of America and the One Big Union. During the period covered by the report 79 disputes were brought before the Director for settlement. Of these 15 were decided in favour of the employers, 17 in favour of the employees, in 19 compromises were reached, and 28 cases were withdrawn. In this district 58 pit-head strikes occurred affecting about 10,000 miners and causing a loss estimated at 1,502,405 working days and a loss in wages of \$2,500,000.

A brief account is given of the work of the statistical branch of the Department. Statistics on prices and the cost of living were calculated as in previous years since 1910. Certain sections of the field were further developed, the number of commodities in food and fuel for which quotations were secured having been increased from 35 in the original list to over 100. Reference is made to special inquiries into rentals of houses and retail prices of clothing. It is stated that information has been collected as to family consumption of certain commodities with a view to the establishment of a proper weighting for an index number of the cost of living. The statistical work on wages and hours of labour, etc., has been continued, and the information has been compiled with a view to the calculation of an index

number of wages. A special inquiry was made into the 8-hour day in the summer of 1919 with the object of furnishing information for the Industrial Conference which was held in September of that year. The results of the inquiry were published in the LABOUR GAZETTE for January, 1920.

The second annual Report of the Employment Service of Canada, which is embodied in the Report, contains the text of the agreement for the fiscal years 1919-1920, which was entered into by the Minister of Labour with the provinces of British Columbia, Alberta, Saskatchewan, Manitoba, Ontario and Quebec, with reference to the operations of Employment Offices under the Employment Offices Co-ordination Act. The number of offices increased from 66 to 95, but after the end of the fiscal year the number was reduced owing to the closing of offices in the Maritime Provinces operated by the Department. During the period of demobilization the disbursements to the provinces under the Act totalled \$169,207. An account is given of the proceedings of the Employment Service Council of Canada, which held its first meeting at Ottawa in May, 1919, and the action taken under the various recommendations of the council is set forth. Statistics of the work of the Employment Service for the fiscal year show that there were 470,250 applications for employment, 449,022 vacancies reported and 328,937 permanent and 51,663 casual placements.

The clearance work of the Service was reported to be fairly well organized, local offices reporting daily to the clearing house of their province: (1) positions unfilled and impossible to fill

locally; and (2) applicants unplaced and willing to leave locality. Bulletins are issued by the provincial clearing houses and forwarded to the interprovincial clearing houses. By this means 16,116 workers were transferred from one province to another and 23,962 from one point to another in the same province. A scheme of co-operation with the British Employment Exchanges, suggested by the British authorities, was also put into effect, but it was not in operation long enough to make possible an estimate of its value.

The Report of the Director of Technical Education for Canada contains an account of the progress made in the various provinces in industrial and technical education. It is noted that this work is carried on in all the provinces with the exception of Prince Edward Island. While an impetus was given by the passing of the Technical Education Act and the appointment of a Federal Director progress has been hampered by the increased cost of building and equipment and by the difficulty in securing properly qualified teachers. During the year the sum of \$273,788 was paid out to the provinces by the Dominion Government under the Technical Education Act out of an appropriation of \$700,000. During the year ended June 30, 1920, there were 139 technical schools in operation in the Dominion having 1,810 teachers and an enrollment of 60,546 pupils.

The report also contains a summary of the report of the Royal Commission on Industrial Relations, which was appointed on April 4, 1919; and of the proceedings of the National Industrial Conference, which met at Ottawa in September, 1919. An account is given of the

action taken on the resolutions passed at this conference. The resolution proposing a conference with the provincial governments and with representative employers and workmen on the subject of uniformity of labour laws was accepted by the federal authorities. The Minister of Labour invited the provincial governments to appoint three members in the case of each province selected on the basis recommended by the National Industrial Conference. A Royal Commission was later appointed for the purpose of investigating the question of uniformity of labour legislation, and the Commission met shortly after the close of the fiscal year. During the interval between the holding of the National Industrial Conference and the meeting of the Royal Commission of Inquiry memoranda were prepared in the Department of Labour on the subjects of workmen's compensation, minimum wages, factories and shops acts and mining laws, and were communicated to the provincial representatives and to the employer and labour members of the Royal Commission. Following the adoption of the resolution of the conference on the subject of proportional representation inquiries into this plan were made by public authorities in various parts of the Dominion including the provincial governments of Manitoba and Ontario and the Montreal Civic Charter Commission. In the case of Manitoba legislative action was taken. In view of the resolution of the conference with regard to joint industrial councils the Department of Labour which had for some time been giving consideration to this subject continued and extended its study, and before the close of the fiscal year steps were taken looking to the adoption

of the recommendation of the conference. The recommendation of the conference in favour of the appointment of a board or boards to inquire into the subject of state insurance against unemployment, sickness, invalidity and old age, was not acted upon, but these questions were instead made the subjects of study in the Department of Labour. The subject of minimum wage laws was dealt with by the Royal Commission on Uniformity of Labour Laws, already referred to. The recommendation of the conference in favour of equal opportunities in education was referred to the Provincial Governments for attention. With reference to the conference resolutions on the subject of freedom of speech and the press, an Order in Council was

adopted on October 6, 1919, bearing on this matter. Consideration was also given to the resolutions of the conference on the subject of housing and employment by the authorities respectively concerned. The subject of hours of labour was on the agenda of the International Labour Conference, which assembled at Washington in the month of October, 1919. In connection therewith the Canadian representatives at the International Labour Conference were duly apprised of the discussions which had taken place on the question of hours of labour at the Ottawa conference. The report concludes with a brief summary of the proceedings of the League of Nations International Labour Conference which met at Washington in October, 1919.

LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA IN 1919

Reports by the Dominion Bureau of Statistics on (a) the fruit and vegetable industry; (b) the bread, biscuit, confectionery and ice-cream industry; (c) the automobile industry; (d) the cooperage industry

RECENT reports of the Dominion Bureau of Statistics on various industries in the calendar year 1919 cover fruit and vegetable evaporating, canning and preserving; the bread, biscuit, confectionery and ice-cream industry; automobile and accessory manufacture and repairs; and the cooperage industry.

Fruit and Vegetable Industry

Sections of this report deal separately with the evaporating, canning and preserving of fruits and vegetables. Of 77

evaporating plants investigated 66 were in Ontario, 8 in Nova Scotia and 3 in British Columbia, the amount of capital invested in these plants being \$1,225,485. Of 120 canning plants 89 were in Ontario, 12 in Quebec, 11 in British Columbia, 6 in New Brunswick and 2 in Nova Scotia, the total capital investment being \$10,133,682. Forty preserving plants were also investigated, including 19 in Ontario, 12 in British Columbia, 7 in Quebec, and one each in Alberta, and Manitoba, the amount of capital invested being \$4,597,528. The number

of persons employed in each section of the industry by classes of employment and sex, with amount of wages etc., was as follows:

Classes of employment	Evaporating Plants			Canning Plants			Preserving Plants		
	Male	Female	Salaries and wages	Male	Female	Salaries and wages	Male	Female	Salaries and wages
			\$			\$			\$
Officers, superintendents, etc.	34		37,525	156	10	271,269	62	6	186,336
Clerks, stenographers, etc	12	7	9,505	49	55	73,657	63	49	112,645
Employees on wages average number	216	181	227,771	1,361	1,336	1,562,073	436	469	614,799
Outside pieceworkers				84	632	61,131	88	678	27,952
Totals	262	188	\$274,801	1,650	2,033	\$ 1,968,130	649	1,202	\$941,732

Classified according to weekly wage payments within certain specified groups of weekly earnings, the number of persons employed is shown as follows:

Weekly Wage Groups	Evaporating Plants		Canning Plants		Preserving Plants	
	Male	Female	Male	Female	Male	Female
Under \$5 per week	8	9	40	111	7	43
\$ 5 to \$10 per week	29	309	181	624	19	193
\$10 to \$15 "	83	392	280	648	38	246
\$15 to \$20 "	260	5	782	114	167	21

\$30 per week and over	13		29	1	18	

Included in the figures shown in the foregoing table are 55 male and 102 female employees under 16 years of age.

The cost of fuel, miscellaneous expenses and overhead charges was \$19,463,771, while the selling value of all products at the factory was \$26,732,560.

Bread, Biscuits, Confectionery and Ice-Cream

In this group 2,015 plants were sur-

veyed, 902 being in Ontario, 611 in Quebec, 140 in British Columbia, 97 in Alberta, 91 in Manitoba, 81 in Saskatchewan, 53 in Nova Scotia, 29 in New Brunswick, 9 in Prince Edward Island and 2 in Yukon. The total amount of capital invested in these concerns was \$51,466,410. The number of persons employed in each trade, by classes and sex, with wages etc., is shown in the following table:

Industry	Officers, Superintendents and Managers			Clerks, Stenographers, Etc.			Wage Earners			Outside Workers		
	Number		Salaries	Number		Salaries	Number		Wages	Number		Wages
	Male	Female		Male	Female		Male	Female		Male	Female	
Bread and other bakery products.....	287	23	633,322	518	254	652,087	6,477	762	7,205,477	51	12	9,088
Bread, other bakery products and confectionery.....	49	6	688,792	36	71	88,032	751	469	965,518	5	10	1,345
Confectionery only.....	119	14	871,737	264	136	484,925	1,389	3,045	2,623,614	2	6	1,787
Biscuits and confectionery.....	65	2	238,685	374	112	518,960	1,424	1,762	1,857,958			
Biscuits only.....	47		165,738	117	50	214,462	740	874	1,111,342

The classification of employees by wage groups, age and sex, is as follows:

Specified groups of weekly wages	Over 16 years of age		Under 16 years		Total employees
	Male	Female	Male	Female	
Under \$5 per week.....	264	166	80	34	544
\$ 5 to under \$10 per week.....	763	3,364	160	399	4,686
\$10 to under \$15 ".....	1,845	3,184	51	111	5,191
\$15 to under \$20 ".....	2,803	838	10		3,651
\$20 to under \$24 ".....	2,546	104	2		2,652
\$24 to under \$30 ".....	2,710	45			2,755
\$30 per week and over.....	1,238	9			1,247
Totals.....	12,169	7,710	303	544	20,726

The cost of fuel and materials, miscellaneous expenses and overhead charges was \$73,102,120, while the total value of products at the factories was \$104,868,699.

The Automobile Industry

This report covers the operations of 11 automobile factories all of which are in Ontario; 42 Auto accessories plants,

of which 26 are in Ontario; and 1,236 auto repair plants, of which 600 are in Ontario, 162 in Quebec and 134 in Saskatchewan, the balance being distributed over the remaining provinces. The total investment of capital in these concerns was \$56,943,018. The number of persons employed in the various sections of the industry by classes of employment and sex, with amount of wages etc., was as follows:

Classes of employment	Automobile Plants		Auto Accessories		Auto Repairs				
	No. of employees		Salaries and wages	No. of employees		Salaries and wages	No. of employees		Salaries and wages
	Male	Female		Male	Female		Male	Female	
Officers, superintendents and managers.....	124	1	\$ 606,067	81	1	\$ 288,521	95	2	\$ 174,426
Clerks,stenographers, etc.	585	227	954,566	193	80	197,776	100	39	162,183
Wage earners, average No.	5,580	259	8,152,155	1,187	191	1,462,144	3,372	3	3,389,794
Outside pieceworkers....				1		99	18		2,011
Totals.....	6,289	487	\$9,712,788	1,462	272	\$1,948,540	3,585	44	\$3,728,414

Classification by wage groups was as follows:

Groups of classified weekly wages	Automobile Plants		Auto Accessories		Auto Repairs	
	Male	Female	Male	Female	Male	Female
Under \$5 per week.....			4	1	39	
\$5 to under \$10 per week.....	22	51	21	14	177	1
\$10 to under \$15 ".....	99	84	66	78	557	1
\$15 to under \$20 ".....	374	53	202	47	896	1
\$20 to under \$24 ".....	1,139	100	308	11	654	
\$24 to under \$28 ".....	1,229		455	6	556	1
\$28 to under \$30 ".....	357	1	64	7	137	
\$30 per week and over.....	4,044		650		577	

Included in the above figures are 53 male and 6 female employees under 16 years of age.

The cost of fuel was \$533,471, miscellaneous expenses were \$11,667,735, and the cost value of materials delivered at the factory was \$61,280,964. The selling value at the factory of all products made during the year was \$101,196,706.

The Cooperaage Industry

The report on the cooperaage industry of Canada covers the operations of 100 concerns, of which 54 were situated in Ontario; 30 in Nova Scotia and New Brunswick; 10 in Quebec and 6 in the Western Provinces. The total capital invested in these plants was \$2,020,404. The number of persons employed, by classes, with wages etc., is shown as follows:

Classes of employees	No. of employees		Salaries and wages
	Male	Female	
Officers, superintendents, etc.....	34	1	\$ 52,570
Clerks, stenographers, etc.....	14	6	12,645
Wage earners, average number.....	689	3	591,000
Outside pieceworkers.....	22		6,097
Totals.....	759	10	662,312

The classification of employees by specified wage groups is as follows:

Specified wage group	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
Under \$5 per week.....	5				5
\$5 to under \$10 per week.....	36	2	7		45
\$10 to under \$15 per week.....	139	3	2		144
\$15 to under \$20 per week.....	271	1			272
\$20 to under \$24 per week.....	138				138
\$24 to under \$28 per week.....	85				85
\$28 to under \$30 per week.....	52				52
\$30 per week and over.....	61				61
Totals.....	787	6	9		802

The cost of fuel, materials and miscellaneous expenses was \$1,757,621, and the value of the products at the factory was \$2,903,035.

RAILWAY STATISTICS FOR 1919

Supplementary report of the Dominion Bureau of Statistics

UNDER the Statistics Act and the Railway Act, 1919, the railway reporting year was changed from the 12-months period ending June 30 to the calendar year. In accordance with this rule the Dominion Bureau of Statistics has issued a report on railway statistics for the year ending December 31, 1919, to supplement the report previously

issued for the year ending June 30, 1919, of which a review appeared in the LABOUR GAZETTE for February, 1921, (page 196.) Considerable changes appear in the figures for the calendar year as compared with those for the earlier period. Some of these changes are shown in the following table:

	Year ending December 31, 1919	Year ending June 30, 1919
STEAM RAILWAYS		
Average number of employees.....	173,728	158,777
Salaries and wages.....	\$233,323,074	\$208,939,995
Ratio of wages to operating expenses	62%	61.1%
Ratio of wages to gross earnings	57.1%	54.5%
Average wage per hour.....	\$0.523	\$0.484
Employees killed.....	190	151
ELECTRIC RAILWAYS		
Average number of employees.....	16,940	17,242
Salaries and wages.....	\$20,211,576	\$17,210,851
Employees killed.....	29	37

These figures show for the steam railways an increase in the latter over the earlier period of 9.4 per cent in the average number of employees and 11.7 per cent in salaries and wages. The average wage per hour increased from

48.4 cents, to 52.3 cents or 8 per cent. With respect electric railways, the wages paid increased by over three million dollars, though the number of employees showed a decline of 302 persons.

MINIMUM WAGES FOR WOMEN IN ONTARIO

IT will be remembered that a Minimum Wage Board was appointed by the government of Ontario on November 17, last, composed of Professor J. W. Macmillan of Victoria College, Toronto, chairman, Mr. R. A. Stapells, Managing Director of the McElroy Manufacturing Company, Toronto, Miss Margaret Stephens, of the Garment Workers' Union, Toronto, Mrs. H. W. Parsons, secretary of the Women's National Council, Toronto, and Mr. H. G. Fester, secretary of the Hamilton Trades and Labour Council. The first Order of the Board containing regulations governing the wages to be paid to female employees in the laundries, dye works and dry-cleaning establishments of the city of Toronto has recently been issued. The regulations which go into effect on May 1 are as follows:—

(1) No experienced female employee of 18 years or over shall be paid wages at a less rate than \$12 per week. (2) No inexperienced female employee of 18 years or over shall be paid wages at less than the rate of \$10 per week for the first three months of her employment in the industry, and of \$11 per week for the second three months of her employment in the industry; after which period of six months she shall be considered an experienced employee. Not more than 25 per cent of the total female employees in any establishment shall be inexperienced adult employees. (3) No young girl under 18 years shall

be paid wages at a less rate than \$9 per week for the first six months, \$10 per week for the second six months, and \$11 per week for the third six months of her employment in the industry. After 18 months she shall be considered an experienced adult employee. If she has been employed in the industry for one year or more before reaching the age of 18 years she shall be considered an experienced adult employee upon reaching the age of 18 years. Not more than 25 per cent of the total female employees shall be young girls. (4) In the laundries, dye works and dry-cleaning establishments of the city of Toronto lodging shall not be charged for in excess of a rate of \$2 per week; nor board in excess of a rate of \$5 per week; nor single meals in excess of a rate of 25 cents per meal. (5) Any violation of this order is punishable by fine or imprisonment. (6) Each establishment shall keep a copy of this order posted in a conspicuous place. (7) This order is subject to annual revision by the Board.

During the last week of March the Board held sittings at Ottawa to determine the minimum wage to be paid in these industries in that city.

Similar minimum wage boards exist in five other provinces, Manitoba, British Columbia, Quebec, Saskatchewan, and Nova Scotia. Orders made by the boards of these provinces have appeared in various previous issues of the **LABOUR GAZETTE**.

REPORT ON MINING AND QUARRYING IN NOVA SCOTIA IN 1920

THE annual report on the mines of Nova Scotia, issued by the Department of Public Works and Mines, shows an increase during the fiscal year ended September 30, 1920, in the production of coal, gypsum (crude), building stone, drainpipe and tile, brick, arsenic concentrates, manganese ore, barytes, salt, benzol, toluol, solvent naphtha and tar, and a decline in the production of pig iron, steel ingots, coke, limestone and dolomite, gypsum (calcined), grindstone, fire clay, ground gold, gold-bearing ore, and ammonium sulphate.

The collieries of the province produced 5,687,970 tons as compared with 5,004,757 tons in the previous year; the sales were 5,087,744 tons as against 4,459,648 in 1919. The coal consumed within the province amounted to 2,445,195 tons in 1920, a decrease of 67,522 tons over 1919, which is accounted for largely by the fact that the British Government ceased to operate a distributing plant in Halifax about the beginning of the year. The shipments to the United States were 27,439 tons; to the St. Lawrence ports, 240,071 tons; and to Europe 527,727 tons; a decline from the shipments for 1919 to the first two points of 48,374 tons and 104,591 tons respectively, and an increase in the shipments to Europe of 436,309 tons. There was an average daily force of 14,020 workers employed in the mining industry, of which number 2,285 were working on the surface, 5,733 were working underground, 3,282 were cutting coal, and 2,744 were employed in transportation, upkeep and repairs. In 1919 there were 12,925 workers employed. The aggregate days worked at the collieries during the year were 3,375,950, an increase of 479,383 over the previous year. The average production per man, in long tons, was 503, as against 467 in 1919. Six new openings and two re-openings of mines were made during the year. Fatalities

in and around the coal mines in 1920 numbered 26, or 2.30 per 1,000 men employed, and 4.57 per 1,000,000 long tons mined.

In the gold-mining industry, one company only was reported as carrying on continuous operations. There was a decline in the output of gold of 191 ounces, the production amounting to 744 ounces from 850 short tons of ore crushed. As was the case in 1919, the continued shortage of labour and the high cost of material was responsible for the decline. The report states, however, that there are signs of a revival of the industry, and that toward the end of the year the mines operating reported many applications for employment. About 500 tons of concentrates were mined from the gold-bearing veins during the year, and this was shipped to the United States to be treated for arsenic contents.

In the clay products, a total of 18,350,354 brick and 1,164,270 lineal feet of tile and drain-pipe was produced, the brick production being the largest since 1916 and an increase over the amount produced in 1919 of 42 per cent.

The report of the quarries of the province showed a revival in the gypsum industry; the production of gypsum amounted to 191,670 tons, an increase of 142,820 tons over the production of 1919. A number of the quarries are reported to be installing a crushing equipment to facilitate the handling of ores by travelling belts and bucket elevators in the loading and unloading of vessels, this work having been done in the past by hand. The production of limestone and dolomite amounted to 249,993 tons, a decrease of 103,386 over the previous year, which is attributed to the slowing down of the iron and steel industry. There was one fatal accident reported as occurring in the quarries of the province during the year.

MINING ACCIDENTS IN ONTARIO IN 1920

THE annual report of the Ontario Department of Mines on Mining Accidents states that at the mines, metallurgical works, quarries, and clay and gravel pits, regulated by the Mining Act of Ontario, there were 26 fatal accidents causing the death of 29 men in 1920, as compared with 39 deaths in 1919. Ten fatalities occurred at the gold mines and mills, 9 at nickel mines and smelters, 3 at silver mines and mills, 2 at iron mines, 4 at limestone quarries, and 1 at a gravel pit. Of these fatalities 16 occurred underground and 6 above ground at the mines, and 3 at the metallurgical works. An analysis of the fatalities at the mines for the years 1919 and 1920 is given as follows:

	1919	1920
	Per cent.	Per cent.
Falls of ground.....	22.2	23.8
Shaft accidents.....	29.6	9.5
Explosives	7.4	23.8
Miscellaneous under-ground	18.5	14.3
Surface	22.2	28.6

Fifteen of the men killed were English-speaking and 14 were of foreign nationalities. Three deaths occurred to men between the ages of 17 and 20 years, 14 between the ages of 21 and 30 years, and 12 between the ages of 31 and 55.

There were 1,497 non-fatal accidents, 634 of which occurred underground and 372 above ground at the mines, and 491 at the metallurgical works. The causes of the non-fatal accidents are set forth in tables contained in the report. The highest number of accidents due to any one cause at the mines was attributed to being struck by rock when loading cars at chute, 138 being reported, and at the metallurgical works to being hit by falling objects, 72 being due to this cause. Of the non-fatal accidents, 794 of the injured were English-speaking and 703 of foreign nationalities.

The report also contains the following table of the fatal accidents and number of persons employed during the years 1901 to 1920:

TABLE OF FATAL ACCIDENTS IN MINES, METALLURGICAL WORKS AND QUARRIES, 1901 TO 1920

Year.	Persons killed at metallurgical works and mines	Persons employed at metallurgical works and producing mines	Persons employed at non-producing mines (estimated)	Total persons employed	Fatal accidents per 1,000 employed.
1901.....	13	4,135	550	4,685	2.77
1902.....	10	4,426	450	4,876	2.05
1903.....	7	3,499	400	3,899	1.79
1904.....	7	3,475	400	3,875	1.80
1905.....	9	4,415	500	4,915	1.83
1906.....	11	5,017	750	5,767	1.90
1907.....	22	6,305	1,140	7,445	2.93
1908.....	47	7,435	1,750	9,185	5.11
1909.....	49	8,505	2,000	10,505	4.66
1910.....	48	10,862	2,000	12,862	3.73
1911.....	40	12,543	2,000	14,543	3.37
1912.....	43	13,108	2,000	15,108	2.84
1913.....	64	14,293	2,000	16,293	3.93
1914.....	58	14,361	1,500	15,861	3.60
1915.....	22	13,114	1,500	14,614	1.51
1916.....	51	14,624	2,000	16,624	3.07
1917.....	36	16,791	1,000	17,791	2.02
1918.....	32	14,726	500	15,226	2.10
1919.....	39	11,926	1,000	12,926	3.00
1920*.....	29	10,000	1,000	11,000	2.64

*Figures for 1920 are subject to revision.

ACCIDENTS TO WOMEN IN INDUSTRY

Findings of the Bureau of Women in Industry, of New York

THE New York Bureau of Women in Industry recently undertook a study of accidents among working women, covering the period from June 1, 1917, to June 1, 1918. One thousand compensated accident cases were studied, comprising chiefly five industries—metal, textile, clothing, paper products, and printing, almost one-half of these occurring in the metal and textile industries. The investigation which is described in *Safety Engineering* for January, 1921, shows that the highest percentage of accidents fell among the very young and inexperienced workers, almost one-half of those injured being under 21 years of age, and about 63 per cent having been employed less than a year; also that more than one-half of the injured women were receiving less than \$10 a week. It was discovered that 28 per cent of accidents fell to married women, who comprised but 10 per cent of the total number employed, thus showing that proportionately more married women were injured than single women. Here, no doubt, fatigue plays an important part, where the woman becomes the breadwinner as well as the homemaker. Ten per cent of the women injured were not actually at work, but were moving to and fro in the building. The greatest number of accidents occurred in connection with machinery, attributed to the fact that during the war many women were doing machine work for the first time. The metal industries led in machine accidents, a great number of which resulted from presses; power sewing machines also were responsible for a number of accidents, needle injuries often becoming serious through neglect. In the paper industry the machine that caused most accidents was the corner stayer; while in the textile industry the loom, the knitting machine, and draw frame reaped the heaviest toll.

The stumbling and falling accidents ranked next in number to machine accidents, and represented about 17 per cent of the whole,—poor lighting, bad construction, obstacles, high heels, or slippery floors being the direct causes of these accidents. Less than 1 per cent of the accidents resulted from lifting heavy burdens—this source of injury being difficult to trace and often slow to develop. In three cases the hair of the women caught, and in two instances the hands were drawn in because of the gloves worn. Only 2 per cent of the accidents were attributable to clothing. Of the parts of the body injured the thumbs and fingers seem to be far in the lead, the majority resulting from machines. Of the arm and hand injuries one-half came from machines; of the leg and foot injuries one-half came from stumbling or falling; of the trunk injuries practically two-thirds came from stumbling or falling; of the head and neck injuries almost one-third were from machines. The rest were scattered in origin. As to the type of injury, slightly less than half were cuts, punctures, or lacerations, and most of the disabilities sustained by the injured women were merely temporary; about half being of less than six weeks' duration. From one hundred personal interviews, the investigators found that one-half the girls pronounced themselves unable to return to work when their compensation period was over; while changes to different kinds of work were made by some whose accidents had made them fearful of their old jobs. The report of the investigators recommends that safety work should play a greater part in industries where women are employed, that safety devices on all machines should be made "fool-proof," and that presses and sewing machine needles should be guarded. While the above are given as some of

the direct causes of accidents, the indirect cause is frequently thought to be fatigue. "Fatigue," it is stated, "undoubtedly plays a more important part in causing work accidents among women than among men." It is therefore further recommended that a campaign should be carried on to prevent fatigue

by the provision of periodic rest periods, reduction of hours of work, changes of processes during the day, and similar devices. With these preventive measures, perfect machine guards, and proper training in industry, the report concludes, "work accidents among women will take care of themselves."

ANNUAL REPORT OF THE NEW BRUNSWICK WORKMEN'S COMPENSATION BOARD

THE Workmen's Compensation Board of New Brunswick has recently issued its report for 1920, covering the second year of its operation. The report contains revised figures of the adjusted financial statement for 1919 as at December 31, 1920, which show an increase in the receipts from \$437,783 to \$484,974, and in the expenditures from \$292,443 to \$408,828; the increase in expenditures being attributed to legislation increasing the benefits under the Workmen's Compensation Act and the unexpected increase in fatalities and accidents in Class 2, "Lumbering, Woodworking, and Pulp Mills." In 1920, the Act was amended so as to increase the benefits in case of death, making the pension payable to a widow \$30 a month instead of \$20, and the payment to children \$7.50 instead of \$5 a month, and the limit of \$3,500 was repealed. The total amount payable as permanent total disability indemnity was increased from \$1,500 to \$2,500. In addition the Board was made liable for medical aid and hospital maintenance, and allowances for funeral expenses were increased from \$75 to \$100. The increase in pensions to widows was made retroactive, from the inception of the Act, and resulted in reducing the provisional balance for 1919 from \$145,339 to \$76,145, and in creating a deficit in Class 2 of \$12,600, and in Class 6 "Railway Construction and Bridge Work" of \$4,418. The latter deficit, however, was

wiped out during 1920, and at the end of the year there was a small provisional balance for that class.

During 1920, the net amount of assessment received was \$374,380. (As the provisional rate of $1\frac{1}{2}$ per cent on logging and stream driving during 1919 had proved to be too low, the actual rate for these industries for 1920 was raised to $2\frac{1}{2}$ per cent.) The total receipts, including balances from 1919, were \$556,424, and the total disbursements \$520,815.

During 1920, the pension awards amounted to \$316,730 and the amount of pensions paid was \$61,839, the balance to the credit of the pension fund at the close of the year being \$340,678.

Up to December 31, 1920, there were reported to the Board 5,012 accidents for the year which included 49 deaths, 255 cases of permanent partial disability, 3,419 cases of temporary disability, 841 minor accidents; 239 claims were partially disposed of and 209 claims in assembly. There were 3,723 claims finally disposed of which included 523 accidents to Dominion government employees and 15 to employees of the Provincial government. The completed claims, other than claims for government employees, showed a time loss due to accidents as follows: Due to permanent partial disability, 16,452 days, or an average per worker injured of 67.98 days; due to temporary disability, 72,759 days, or an average per worker in-

jured of 25.05 days. The average age of the workers injured was 33.36 years. The average weekly wage was \$23.74. The greatest number of accidents in any one class occurred in the lumbering, woodworking and pulp mills industries, (Class 2) in which there were 24 fatal accidents. The compensation awarded and estimated to be awarded for accidents up to December 31, 1920, is as follows:

Compensation paid, other than pensions	\$ 170,592
Medical aid	19,912
Hospital maintenance	9,704
Transferred to pension account	219,649
Compensation estimated for unreported claims and claims in assembly	45,028
Compensation estimated for reported claims not completed	18,488
Total compensation	\$ 483,373

The cost of administration was \$37,442. The amount deducted as the proportionate share of the Dominion government was \$5,280, and of the Province of New Brunswick, \$351. The net cost of the administration of this Act to employers was .0777 per cent of the total assessment. By legislation passed in 1920, the administration of the Factory Act was placed in the hands of the Board, and Mr. John Kenny was appointed inspector and commenced duties on August 1, 1920. The Board also was given charge of the granting of certificates to stationary, hoisting and pumping engineers. All outstanding certificates were cancelled as of December 31, 1920. An examination was held and several new licenses granted.

For the purpose of spreading instruction in "safety first" rules and "First Aid," Mr. W. J. Redfern has been engaged to visit the various camps, mines, mills and factories and give lectures to the workers.

RECENT DEVELOPMENTS IN VOCATIONAL EDUCATION IN CANADA

British Columbia

VOCATIONAL education is being rapidly developed in the province of British Columbia. The following brief summary of the extent of the work in this province shows an increase in every department over the work reported for the year ending March 31, 1920. Since then technical schools have been opened in Victoria, New Westminster and in Vancouver. The new schools have a total attendance of over 500 pupils; over 400 boys taking a four year technical or industrial course, and nearly 100 girls commencing a three year course in home economics or home making.

The commercial courses carried on in Victoria, Vancouver, New Westminster, Nelson, Revelstoke and Kamloops, have a total attendance of 900 pupils. These courses cover a period of three years,

and are carried on in connection with the technical schools and high schools.

Evening classes with a total attendance of over 3,000 pupils are now conducted in Victoria, Vancouver, North and South Vancouver, Anyox, Bevan, Chilliwack, Duncan, Fernie, Nanaimo, Revelstoke and Saanich. The number of courses provided in these night schools varies from one to twenty-five and embraces the following subjects: Business English, and Arithmetic, Bookkeeping, Accounting, Commercial Law, Typewriting, Shorthand, Salesmanship, Economics, Stationary Engineering, Ignition, Draughting, Mathematics, Electrical Engineering, Automobile Engineering, Navigation, Carpentry, and Joinery, Ship Building, Cabinet Making, Plumbing, Dressmaking, Millinery, Cookery, Drawing and Design, Show Card Writing and Pharmacy.

Correspondence courses in mining has shown an increase in attendance of from 83 in March 1920 to 115 in December. The work in this branch is divided into 6 courses and is conducted in co-operation with the evening classes.

The courses of study are as follows:—

No. 1. Preparatory mining course for boys over fourteen years of age who have left school.

No. 2. Course in arithmetic and mathematics.

No. 3. Course of fireboss, shiftboss or shop lighter's papers—Third class.

No. 4. Course of overman's papers—Second class.

No. 5. Course of mine manager's papers—First class.

No. 6. Course in mine survey work.

It is expected that the current year will witness a still greater development and that with the increased accommodation something can now be done for those pupils who at present proceed to work without entering high school or being prepared in any practical way for their future vocations.

Alberta

Dr. F. W. Merchant, Director of Technical Education for Ontario, addressed the annual convention of the Alberta Educational Association held in Edmonton, March 29-30-31. Dr. Merchant stated that technical schools should be established as a part of the educational system just as were the public and high schools. He thought it only just that boys desiring instruction in the various trades should be given equal rights with those intending to enter the professions.

The Alberta Teachers' Alliance has decided to request the provincial executive through the medium of the Federation of Teachers to urge the Federal Government to appoint a minister of education for the Dominion, with a view to forming a national educational policy.

Manitoba

The annual convention of the Manitoba Education Association held in Winnipeg on March 28, 29 and 30, was addressed by Professor L. W. Gill, Director of Technical Education for Canada, and Mr. R. L. Cooley, Director of Continuation Schools, Milwaukee, Wis. Professor Gill emphasized the necessity of training teachers for vocational education and recommended the co-operation of the different provinces in establishing a central training school for Canada. The Director also pointed out the necessity of establishing technical schools and stated that 70 per cent of the public school pupils left school before completing the seventh grade. Professor Gill emphasized the importance of physical development and training for citizenship in connection with any system of vocational education. The boy's interest in school can be maintained only when he realizes that the training received will help him to earn his living, and to become better fitted to take his place among men.

Mr. Cooley stated that technical education is a necessity in any country, as opportunities for advancement without thorough and efficient training are dying out. He stated that the object of technical education is to teach children to do better work and to give them the desire to spend their money for the best products rather than to train the children to be mere productive machines.

Ontario

During the latter part of March, three important educational conferences were held in Toronto by the Ontario Educational Association, the Ontario Federation of Home and School Associations and the Ontario Library Association. One of the outstanding features of the conference of the Ontario Educational Association was the increased interest in educational affairs manifested by the school trustees. 1,600 delegates were registered from this de-

partment of the Association, and a keen interest was shown in the new duties being thrust upon trustees by the development of consolidated schools, and by the Adolescent School Attendance Act. The Ontario Federation of Home and School Associations discussed the advisability of establishing a scheme of local education whereby fathers and mothers might study with their children. It was pointed out that this would be particularly valuable for the foreign population. The Ontario Library Association emphasized the importance of teaching children how to use books and libraries.

In connection with vocational education, a committee of the Ontario legislature on industrial rehabilitation has recommended the passing at the next session of an Industrial Rehabilitation Act which would provide for the vocational re-training of crippled workmen in addition such medical treatment as the Workmen's Compensation Board might deem necessary, and assistance in securing suitable employment. These benefits would be paid by the Board out of the accident fund and the necessary amount would be included in assessment levied upon the employers. The committee recommended that its report be printed.

The University of Toronto intends to provide special classes for those who are unable to attend regular day classes. These classes are to be open to students belonging to any organization in any locality in the province, under the following conditions:

1. The class must consist of not fewer than 20 members.

2. The fees paid by each student must be the same as those paid by students in the Teachers' Course.

3. The organization making application for such a class must collect the fees from every student and forward those fees to the University within the time limit stipulated in the case of Students in the Teachers' Course.

4. The University will select and pay the members of its staff who give the tuition.

5. Such class or classes may be held in classrooms supplied by the organization concerned,

provided the equipment and library facilities are suitable in the judgment of the University, for the work of such class or classes.

6. The tuition given to such class or classes shall be of the same character as that given to the students in the Teachers' Course.

7. The number of such classes shall be determined by the ability of the University to provide this instruction.

8. Unless otherwise expressly stated in this section such classes shall be governed by the regulations at the time governing classes in the Teachers' Course.

The London Board of Education has decided to erect one central collegiate institute and provide for the addition of junior high schools to feed this institution as the need arises. These junior schools will provide for pupils in the fourth book and in the first and second years of the regular collegiate work. The central senior institution will provide for the senior grades only. This plan is similar to the method adopted by many cities in the United States, but is a new departure in Ontario.

Evidence of the increasing interest on the part of the public in vocational education was clearly shown by the greatly increased attendance at the recent closing exercises of the evening classes carried on in connection with the various technical schools throughout the province. In Ottawa between nine and ten thousand people attended the splendid exhibit of the work done by the various evening classes. The principal Mr. W. W. Nichol reports an enrollment of 3,600 students in 131 different classes. This is an increase of 30 classes and 700 students over last years enrollment. Reports from Fredericton, Montreal and Brantford indicate similar increased enrollments and appreciation of the work of these classes on the part of the public.

Arrangements have been made for the second Imperial Conference of Teachers Associations to be held in Toronto on August 10-13, of this year. It is expected that a large number of educationists from Great Britain and other parts of the empire will attend.

Quebec

Mr. A. Macheras, Director of Technical Education for the province of Quebec, has been recalled to France and appointed Inspector of Technical Surveys to the Ministry of Pensions, Paris.

Mr. Macheras came to Canada in 1907 on loan from the French Government to the province of Quebec. He was the first principal of the Montreal Technical School, and has done excellent work in developing technical education throughout the province.

RECENT EDUCATIONAL DEVELOPMENTS IN THE UNITED STATES

Continuation Schools

IN 1919 the State of New York adopted a programme of continuation schooling that was a significant step forward in education. The Lockwood law, establishing compulsory part-time schools for employed boys and girls who had not finished their education, was the culmination of a long series of experiments in which the continuation had proved its right to a place in the American educational system. The law went into effect last September, and the five continuation schools operating under it in New York City have, despite the most serious handicaps, already done a remarkable work.

The Fearon Bill recently introduced in the New York legislature, aims to eliminate these schools on the ground of economy, but the New York State Federation of Labour has taken up the fight to retain them, claiming that they have been of great value to both industry and labour.

Workers' College

On March 31, labour leaders and educationists met in Ketonah, N. J., to discuss plans for establishing the first resident workers' college in America. The plans discussed were based on the following principles:

"First—That a new social order is needed and is coming—in fact, that it is already on the way.

Second—That education will not only hasten its coming, but will reduce to a

minimum and perhaps do away entirely with a resort to violent methods.

Third—That the workers are the ones that will usher in this new order.

Fourth—That there is immediate need for a workers' college with a broad curriculum, located amid healthy country surroundings where the students can completely apply themselves to the task in hand."

Junior High Schools

Progress of the junior high school movement in the United States is one of the miracles of recent educational development. Advocated in principle more than thirty years ago by President Eliot of Harvard as part of his programme of educational reform, and urged by many educators after him, the idea was at first slow in taking hold in actual practice.

It was not until 1910 that city school systems in any number actually began to reconstruct their educational organization on the basis of what Commissioner Claxton and others called the "six-six" plan—six years of elementary school and six years of high school—or, as it was also called, in indication of its most usual form, the "six-three-three" plan, the secondary period involving a junior and senior high school, each of three years.

In 1914, Prof. Thomas H. Briggs of Teachers' College, Columbia University, found 167 cities that claimed to have junior high schools, but he accepted only 57 as qualifying under his definition,

that a junior high school was "an organization of grades 7 and 8 or 7 to 9, to provide by various means for individual differences, especially by an introduction of prevocational work and of subjects usually taught in the high school." In 1917 Prof. Briggs reported 377 junior high schools, and recent estimates put the number at over a thousand, with enrollments totalling several hundred thousand.

Many are the arguments that have led school men generally to approve of the abandonment of the eight-four organization in favour of the junior high school plan. One of the earliest arguments was based on economy of time. It was shown that the United States was the only nation in the world with an eight-year elementary school, and that as a consequence American youths who were going on into the professions were at least two years older than the youths of other countries in entering upon their life work. Later more fundamental arguments were developed based on careful study of the illogical distribution of grades and the relation of education to the needs of all the people. The amazing pupil mortality revealed by the investigations of Thorndike, Ayres, and others came to be regarded as an indictment of the eight-four system and the rigid programme of studies that seemed to go with it. Numerous inquiries into the problem of school leaving and employment between 1910 and 1916 showed that much of the loss of pupils at the sixth grade was due not to economic pressure, as is usually assumed, but to dissatisfaction with the offerings of the traditional eight-grade school. It was felt that the eight-four system actually encouraged early school leaving.

Not only was the break between the elementary school and the high school unnecessarily abrupt, but it came at the wrong time. The junior high school, by taking boys and girls two years earlier, would, it was believed, largely do away with this break; it would make it possible to provide different types of courses to suit the varying needs of

adolescent youth; it would tend to tide boys and girls over the fourteen-year compulsory age, and increase the chances of carrying them forward into more advanced high school work. Thus Berkeley, Cal., where one of the first junior high school organizations was affected, was able to show that after the new type of school was established, 94.73 per cent of the pupils completing the eighth grade went on to the ninth and 95.29 per cent of those completing the ninth grade continued on into the tenth, whereas under the old organization the city had eighth-grade classes in which as few as 41 per cent entered high school.

There can be no question that American educational opinion has decided definitely against the eight-four organization and in favor of six years of elementary schooling and six years of high school. The new plan has been made part of the official programme of the United States Bureau of Education and of most of the State departments. There is, indeed, some danger that the movement may be too rapid; that the mere form of the junior high school may be adopted without the fundamental modification of methods and subject matter that alone can make the new organization permanently worth while.

Industrial College at Antioch, Ohio

A new kind of industrial college is being constructed at Antioch, Yellow Springs, Ohio. The aim of this college is to make generalists rather than specialists in industry, and the aim of the courses is to develop the capacity for initiative, self reliance, sound judgment, and the ability to carry ultimate responsibility. The courses will cover all phases of administration including organization, personnel, management, accounting and cost keeping, salesmanship, management, etc., such as required by any industrial manager, or administrator. The programme provides that the professional or technical student may spend half his time at school and

half at practical work as near as possible along the line of his calling. Students will alternate between a month at school and a month at work. Courses will extend over a period of six years and it is hoped that before long provisions will be made so that all students will be self-supporting during the college course. Cooperation has been arranged with nearby industries for the employment of students on a half time basis and arrangements are being made to construct a factory building on the college campus, in which will be located small

industries where the students will be engaged in the various phases of industry. The school will be supported mainly by tuition fees which will range from \$200 to \$300 per year. To quote from a recent article in the *New York Post*, "Antioch is blazing a new path in American education. Students, teachers and trustees will be pioneers together in working out its destiny. The entire country is being searched for a faculty of men and women who have the courage, vigor, originality and vision to bring these hopes to fruition."

THE MINIMUM OR BASIC WAGE IN AUSTRALIA

Report of the Royal Commission on the Basic Wage

A ROYAL Commission was appointed by the Government of Australia on December 8, 1919, to report on the minimum or basic wage, to ascertain what was a fair basic wage, how much the sovereign had depreciated in value during the war, and how the basic wage should be adjusted to the current cost of living and in future be adjusted according to changes in the cost of living from time to time. The appointment of the Commission had been announced by the Prime Minister, the Right Hon. W. M. Hughes, on October 30, 1919, in the following statement:

If we are to have industrial peace we must be prepared to pay the price, and that price is justice to the worker. Nothing less will serve. We have long ago adopted in Australia the principles of compulsory arbitration for the settlement of industrial disputes and of the minimum wage. The cause of much of the industrial unrest, which is like fuel to the fires of Bolshevism and direct action, arises with the real wage of the worker—that is to say, the things he can buy with the money he receives. This real wage decreases with an increase in the cost of living. Now, once it is admitted that it is in the interests of the community that such a wage should be paid as will enable a man to marry and bring up children in decent, wholesome conditions—and that point has been settled long ago—it seems

obvious that we must devise better machinery for insuring the payment of such a wage than at present exists. Means must be found which will insure that the minimum wage shall be adjusted automatically, or almost automatically, with the cost of living, so that within the limits of the minimum wage at least the sovereign shall always purchase the same amount of the necessities of life. The Government is, therefore, appointing a Royal Commission to inquire into the cost of living in relation to the minimum or basic wage.

The Commission consisted of three representatives chosen by the Associated Chambers of Commerce of Australia, the Associated Chambers of Manufacturers, and the Central Council of Employers, three representatives chosen by the Conference of Federated Unions of Australia, and the Chairman, Mr. A. B. Piddington, Chief Commissioner of the Inter-State Commission on Trade, Industry, etc., who was agreed upon by these six representatives.

The Origin and Method of Adjustment of the Basic Wage

In 1906, the President of the Commonwealth Arbitration Court, the late Mr. Justice O'Connor, pointed out that

wages must have reference to existing standards of social conditions:

.....there must also be added something for the increased cost of living in Australia, not only by reason of the higher cost of some of life's necessities but also by reason of the increased comfort of living and the higher standard of social conditions which the general sense of the community in Australia allows to those who live by labour.

In the following year Mr. Justice Higgins in what became known as "the Harvester case" laid down as a living wage the sum of 7s. per day as "appropriate for the normal needs of the average employee regarded as a human being living in a civilized community in a condition of frugal comfort estimated by current human standards." This sum of 7s. became known as the "basic wage," having been thus adopted by the Arbitration Court as the minimum for a labouring man in Melbourne, wages in other localities and for other trades being adjusted by reference to this as the basis, and according to the changes in prices from time to time. After 1912 the index numbers computed by the Commonwealth Statistician were used to determine the amount of the adjustments made necessary by the changes in prices.

From time to time it was pointed out by the judges of the Arbitration Court that the basic rate of 7s. per day in 1907 had not been scientifically determined but adopted chiefly because it was the minimum rate of pay for employees of several municipal councils in the State of Victoria and had been set as the proper figure by a Wages Board that year, and because it was borne out as approximately correct by evidence submitted, as to the cost of food and groceries for several families and as to the prevailing rent in the suburb of Melbourne under consideration. It was also pointed out by the judges that the Commonwealth Statistician's index number did not include clothing and other important items in the list used and that he (the Commonwealth Statistician) had recommended in 1916 that

in normal times an extensive inquiry should be made, to ascertain what a minimum wage should be. The judges therefore expressed the hope that some party to an arbitration would challenge the correctness of the basic rate so that it might be accurately determined.

Proceedings of the Commission

The Commission appointed in 1919, therefore, regarded the field as entirely clear in its inquiry to ascertain what should be the basis for a minimum wage. The Commission had been instructed to report upon:

1. The actual cost of living at the present time, according to reasonable standards of comfort, including all matters comprised in the ordinary expenditure of a household, for a man with a wife, and three children under fourteen years of age, and the several items and amount which make up that cost.
2. The actual corresponding cost of living during each of the last five years.
3. How the basic wage may be automatically adjusted to the rise and fall from time to time of the purchasing power of the sovereign.

It was therefore decided to ascertain not the standard for any particular type or class but "to determine reasonable standards of comfort not by reference to any one type or group of employees but by reference to the needs which are common to all employees, following the accepted principle that there is a standard of living below which no employee should be asked to live."

In order to get as much light as possible on the current habits and standards of the people, the Commission invited the public to fill up household budget forms during a period of four weeks. Though over 9,000 of these forms were issued, only about 400 were returned to the Commission, a result due, no doubt, to the exacting labour necessary to fill in a multitude of details, every one of which is essential if safe inferences are to be drawn.

An examination of the returns leaves no doubt that this method, though frequently adopted, is not effective even to discover what is the general level of expenditure.

The Commission took evidence in the six capital cities of the States, Melbourne, Sydney, Adelaide, Brisbane,

Perth and Hobart. It was considered that the adjustment of the basic wage to country centres could be accomplished by the machinery recommended for making other adjustments. The Federated Unions placed before the Commissions schedules showing the amounts and cost of the various items considered necessary for the maintenance of a family in each of the capital cities, the quantities being practically the same in each case, the total costs for each city varying according to the prices prevailing in each. The employers put in a "counter claim" covering clothing only.

In all the States the amount claimed by the Federated Unions and the details of which it was composed have been found to be open to the comments already made upon extravagance in evidence. It is, indeed, more than likely that those witnesses who did put forward inflated estimates of their requirements had taken their cue from the claims they knew were being made. If this were all, no great harm would have been done other than waste of time and effort, but it is possible that the knowledge circulated throughout Union circles of the amount of the claim made in their name may have disinclined capable witnesses of a moderate bent of mind, and imbued with a sense of responsibility, to come forward with their evidence, when to do so would be to incur the odium of undermining contentions made in their behalf. In point of fact a great number of witnesses were called for the Unions, and most of them had the courage to ignore the claim as put forward, and to give independent evidence as to their experience, which showed the claim, as presented, to be extravagant.

Rent

Although many workmen owned their houses, the Commission decided that it was necessary to include rent as an item, and adopted as a standard house for the average family one with five rooms having bath, copper, tub, etc., and situated in decent surroundings, and not actually cramped as to space. In order to ascertain the prevailing rents for such houses, lists of houses rented were submitted by house agents, those conforming to the standard were selected and the house agents were also asked to give their opinions as to the average

prevailing rent for such houses. Municipal records were also examined but were found to afford little information as to the condition of the houses. Some employees and their wives also gave evidence as to rates for rent. The members of the Commission visited the localities investigated and inspected the houses. On the increases in rentals which came to its attention the Commission commented, approving recommendations by other authorities as to building programmes and regulation of rentals by courts.

The Housing Problem and the Standardization of Rent

The evidence brought into prominence the continuous increase of house rents in the capital cities of Australia, resulting from the shortage of houses during the last few years. Personal contact with tenants during the course of the inquiry has led the Commission to the consideration that inadequate accommodation in houses may be a potent cause in industrial unrest. The family oppressed by unpleasant surroundings is apt to feel that such grievances as it may have against the existing social order are fomented by the chronic discomforts of the space and atmosphere in which it lives. Discontent on this score is increased by the idea widely held that the tenant of a home to-day gets less service and little improvement from the landlord for more rent.

For years past Commissions and reformers have denounced these unsatisfactory social conditions, but since little has been done to remedy them, the consequence has only been to draw pointed attention to the unequal situation of tenants when their bargain has been struck, and to the poor prospect of a remedy from that competition which, in regard to commodities freely produced, is the best safeguard against unfair exactions. Fortunately for the community, landlords do not, in general, press to the full the economic advantage they possess under present circumstances. The evidence showed in all the capital cities that it is the practice of landlords not to raise, or at any rate not to raise to the full market rental, the rents that are paid by tenants who have been in long continued possession. Still, of late years there has been a gradual and general increase in rents, even for tenants of this kind, and when a house does become vacant, it is almost invariably the case that the new tenant is called upon to pay a higher rent. The increases in rent here spoken of are those that take place without any additional service or improvement being

rendered to the tenant; and indeed the complaint more generally is that houses are not even kept up to a proper state of repair and comfort, even though the rents are raised.

The only effective cure under present circumstances for this state of things is a steady building programme under some form of governmental or municipal action similar to that being taken under the War Service Homes Act, whether that takes the form of assistance to co-operative schemes or is more direct. The Inter-State Commission's Report on Rents in April, 1919, dealt very fully with this matter, and described various schemes in the Commonwealth and elsewhere, including the Imperial Government's programme of building 300,000 homes for England and Wales, under a system of financial assistance to Local Government Authorities. The Inter-State Commission recommended—

1. That the Federal Government, preferably in conjunction with State and Local Authorities, and with approved co-operatively managed institutions, undertake at once constructional work to meet the existing shortage of houses. It is estimated that this shortage amounts to 25,000 homes in the three eastern States.

10. That action be taken, in co-operation with State Governments and Local Authorities, for the re-designing and reconstruction of city and suburban areas where the conditions are admittedly below reasonable standards of comfort.

Other ancillary recommendations as to supply of material, etc., need not be reproduced.

In every city visited your Commissioners were deeply impressed with the urgency of the case. In the older parts of the cities the contrast is striking between the fine streets and buildings on the outside of many blocks and the hovels and slums concealed in the centre. Every year of neglect makes the congestion worse, but already, as a consequence of earlier want of foresight, Australia has become a country of wide spaces and narrow habitations.

While, however, the overtaking of supply is the only permanent remedy, another important question which was not raised by either the Federated Unions or the Employers in the course of the enquiry came under observation while the Commission was considering its report. Under the system contemplated by the Letters Patent of adjusting the basic wage according to the purchasing power of the pound sterling, it would appear that if rents were increased irrespective of any additional service rendered by a landlord to a tenant, the basic wage would be adjusted to meet that increase, and the burden would fall on the employer, because he would be paying in increased wages an increased amount for rent.

This opens up the question of the stabilization of rents which was one objective of the (Imperial) Increase of Rent, etc. (War Restrictions) Act 1915, the New South Wales Act No. 66 of 1915, and the Queensland Act No. 31, 1920. These acts differ widely in their method for determining the "standard rent" (as it is called in England) but they have these features in common—

1. They are limited to houses below a defined value—broadly, such as workingmen's homes.

2. They stabilize rents as they were on a date named in the Act. Such rents can only be raised after equitable reasons, such as expenditure on improvements, are shown to a Court.

3. Rents are determined on the application of landlord or tenant by a Court.

The question thus opened up of the stabilization of rents is not directly within the scope of the Commission, and it is sufficient therefore to indicate the position, which may need to be considered by the Governments of the several States, in view of the fact that the producers and manufacturers of a State which takes no action may be adversely affected in Inter-State competition.

The Commission desires to make it clear that the matter dealt with, not as a matter of policy in the general case, but only because under the basic wage adjustment if employers are controlled in their contract with employees in such a way that theirs is the purse from which increases of rent must be paid, the case needs special consideration. It may be said that somewhat similar conditions apply to other Sections of the basic wage such as Food, etc., but in no other case is competition at present so entirely absent, or legislative action so simple.

Clothing

The Commission based its findings on the requirements of a man, wife, and for the three children selected a boy of 10½ years, a girl about 7 years, and a boy of 3½ years, as representative. A great deal of evidence was taken as to the cost of clothing for the various members of such a family, having regard to the quantity, material, quality, price, etc. of each article, the annual cost of replacement being the basis on which the calculation was made. Traders, householders, and others gave information. From the lists presented by the Federated Unions and the Employers, the Commission drew up a

tentative list and secured evidence as to the reasonableness of this list and as to the prices of the items in the various cities. From this a final list was adopted. From the cost of this list 8 per cent was deducted to allow for possible economies in buying at special sales and by making over clothes.

Food

In determining the requirements for food the Commission adopted the following as the prime conditions in the provision of a family's food:

First—that it shall be sufficient in food values, expressed in calories, to provide warmth and energy, to renew tissue so as to maintain the weight of the body, and to satisfy the requirements of growing and developing children.

Second—that it shall contain a proper proportion of the three main constituents of food, viz., proteins, which produce new growth or replace tissue lost, fats and carbohydrates to supply energy. Such a proportion is deemed necessary in order to obtain a proper physiological balance in the total equipment of Food so as to maintain the various functions of the body.

Third—the supply must permit of a sufficient variety of food for the preparation of palatable and digestible meals.

Fourth—the varieties of food must conform generally to the habits of the community.

After reviewing the findings of various authorities throughout the world and considering a claim for an Australian standard somewhat higher in caloric value than that usually accepted in other parts of the world, put forward by the Federated Unions, the Commission based its calculation on the usually accepted standard of 3,500 calories per day for a man at moderate muscular work. Taking into consideration the ascertained habits of Australians in food consumption an average weekly food list was drawn up. A quantity of meat smaller than was commonly used before the war was included owing to the indications that the change was beneficial to health, it being recognized that before the war Australia showed a high per capita consumption of meat.

Other Items

Among miscellaneous items the Commission decided not to include life insurance, unemployment insurance, old age annuity, church and charity, alcoholic and soft beverages or tuition in music and art, but included fuel and lighting, groceries other than food, renewal of household dishes, linen, etc., union and lodge dues, medicine and dentist, recreation, amusement and library, street car fare, and school requisites. The quantity and cost of fuel in Australia being comparatively trifling owing to mild climate conditions, this item was therefore included among miscellaneous items. Evidence as to the amount and cost of fuel required by families was secured from dealers. The annual cost of coal and wood so ascertained, it was stated, would also cover the cost of gas if used. Similarly the cost of gas and electricity for lighting was ascertained, and this amount, it was stated, would cover the cost of kerosene if used.

The Corresponding Cost in 1914

By securing statistics as to prices in 1914 it was possible to ascertain the cost of the standard adopted in terms of prices in 1914. In rents, food and groceries, the figures of the Commonwealth Statistician were used, and the clothing dealers furnished lists of prices in Melbourne for goods in 1914 of the same grades as for 1920. It was assumed that the general change in prices in the other cities would be similar, approximately the same. Similar methods were adopted to ascertain the cost in 1914 of other items.

Proposed Method of Adjustment of the Basic Wage

The Commission was required to inquire "how the basic wage may be automatically adjusted to the rise and fall from time to time of the purchasing power of the sovereign" so that the "wage earned would always purchase

the same number, quantity, and quality of the articles which go to make up reasonable standards of comfort without having an investigation before a Wages Board Arbitration Court or other industrial tribunal." The Commission therefore recommended that a Bureau be created for determining and reporting from time to time the changes in the cost of the various items and that the staff of the Bureau should be secured by transferring the officials and work from the various departments where they were then performing such work. The Commission recommended quarterly adjustments, the basic wage at each date being the average of the amounts shown in the four preceding quarters, in order to eliminate seasonal changes.

Difficult questions arise in determining how long the interval should be between each declaration as to the cost of living. The following matters have to be borne in mind. First, during the interval between declarations the worker who obtains a basic wage as fixed at the beginning of the interval will be worse off or better off according as the cost of living goes up or comes down. Second, employers naturally desire as great a measure of stability as can be obtained and therefore desire that the interval should be as prolonged as possible. Third, the Arbitration Court has ordinarily taken about a year as the shortest interval for reviewing the basic wage in the light of cost of living fluctuation.

Dealing first with the first of these positions, it has been the case during the last six years that the cost of living has always been rising. As a result a basic wage which at the beginning of any one year was, or was deemed to be, sufficient to meet the cost of living was bound to be insufficient during some part at least of the time before the next fixation of the basic wage. If, on the other hand, a period of falling prices were to set in, the wage-earners would, during any interval, be receiving more than the amount necessary to meet the cost of living until the ensuing fixation of the basic wage ascertained to what figure that ought to be reduced.

Next, with regard to the desire of the employers for as great a measure as possible of stability in the wage, the risk they run as the result of wages increasing as the cost of living increases is that they may enter into contracts, either for construction work or for the supply of goods or services for export, at prices based on the wage at the time of contracting, which prices may prove unprofitable if wages rise before the termination of the

contract. In the case of contracts which permit of it, this difficulty can be got over by a clause such as is now common, providing that prices to be paid shall increase corresponding to any increase in the declared basic wage. But a great deal of business is carried on under arrangements which do not permit of such a saving clause.

The accompanying tables show for the City of Melbourne the weekly cost of the items adopted for the standard, and the cost in each of the other capital towns in 1914 and 1920.

The Commission pointed out that the cost of living so ascertained for 1914 was higher than the basic wage or the minimum wage rates for that year ordinarily awarded by various arbitration tribunals because the various courts adopted certain working assumptions and the investigation of the commission indicated to what extent these assumptions were borne out by the facts as to actual living conditions.

Minority Report

The report was signed by all the Commissioners, but two of the employers' representatives signed it subject to dissent and made a minority report, expressing their doubts as to the applicability of the results as the basis for a minimum wage to be adjusted according to changes in the cost of living, and also dissenting from the statement as to the inadequacy of the basic wage rates fixed in previous years.

As the adoption of these amounts as minimum wages for 1920 would involve considerable increases, the average weekly wage for the Commonwealth

being reported at only £3 14s. by the Commonwealth Statistician, the Prime Minister on receipt of the report requested the Chairman to furnish a statement as to the effect the adoption of these rates would have upon the industry of Australia and as to how they might be applied. The Chairman therefore presented a memorandum showing the number of men without wives, without children, without children of varying ages, etc., and the cost of basing all wages upon the report of the Commission. The Chairman included in his memorandum an outline of a scheme whereby the basic wage would be £4 per week, a bachelor or a married man without children being paid this amount, while the father of children would also be paid £4 per week by his employer but in addition would receive from the Government 12s. per week for each dependent child, paid out of a fund provided by a tax on all employers. When tabled in Parliament the report aroused considerable opposition. Statements by members of the government indicated that no legislation would be introduced to give effect to the report of the Commission.

ANNUAL CONFERENCE OF WESTERN REPRESENTATIVES OF THE EMPLOYMENT SERVICE OF CANADA

THE second annual conference of Western representatives of the Employment Service of Canada was held at Regina, Sask., on March 8 and 9. The first day was occupied with a discussion of technical and administrative problems. On the second day of the conference the subject of farm labour problems was discussed. At the invitation of the general superintendent of the three western provinces representatives of the farmers' provincial organizations attended the conference and took part in the discussion. The subject was introduced by Mr. J. W. Mitchell, General Superintendent of Employment Agencies for Alberta, who pointed out the seasonal

nature of farm labour and the influence of climatic conditions on the demand. The difficulties faced by the Employment Service in supplying harvest labour were described. Owing to the extremely rapid vegetation in the three prairie provinces it is almost impossible to forecast when harvesting will commence in the various sections of the country. Harvest labour must be imported; but as to when and in what quantity no advance information is available; consequently either too many or too few labourers are imported, or they are brought in either too early or later than they should be. The demand for labour in other quarters during the

harvesting season accounts for the shortage in farm labour. At that period of the year, the speaker said, there was a great demand for men among the mining companies, lumbering firms, railway construction contractors, and on government and municipal works.

Mr. R. M. Johnson, representative of the Saskatchewan Grain Growers' Association, submitted the following recommendations which had been agreed upon by the representatives of the various farmers' organizations who were present.

- (1) Abolition of private labour bureaus.
- (2) As nearly as possible standardization of wages in different provinces.
- (3) One standard of wages for five months commencing April 1. One standard of wages adjusted for three months commencing September 1. One standard of wages for eight months commencing April 1.
- (4) Periodical survey to estimate labour requirements for any period (farmers associations should be used for this purpose where possible). Labour bureaus should make every effort to adjust labour supply to meet requirements of seasonal employment within the province, by making convenient the transfer of labour from agriculture to winter industries and vice versa.
- (5) In adopting standard of wages due consideration should be given to the experience of the applicant. We would suggest that \$40 to \$50, would be fair for first five months; \$50 to \$60 for eight months season. Rate of harvesting season to be adjusted at such time.

Mr. T. M. Molloy, Commissioner of Labour for Saskatchewan, referred to the uncontrollable causes of fluctuation in the demand for men due to weather conditions, rust, grasshoppers, hail, drought and rain. The desire of farmers to complete harvest operations as

soon as possible tends to create a great demand for a few weeks. Harvest labourers frequently wait in the cities for the larger wages paid during the peak load, and then rush back east for inside jobs before the winter. The distribution of harvest labour is poor because a large percentage of labourers seem to go by rumours, causing congestion in some centres and shortage in others. Calls for help featured by newspapers with a view to assisting their neighbourhood, the speaker said, almost invariably have an unfortunate effect. An over-supply of men in any district is always followed by wage cutting; men rapidly quit the district and shortage of help follows and wages soar. This condition is also brought about by interviews given to the press by secretaries of boards of trade and of grain growers' locals, prominent merchants, bankers and others.

Mr. Molloy made the following suggestions towards the solution of the farm labour problem: That a more general use of the Employment Service be made by the farmers, and that there be less indiscriminate hiring of men from other sources; that the idea be impressed upon farmers that the hiring of men a few days before they are actually needed is cheap insurance against loss due to labour shortage later on; that newspaper interviews by individuals "boosting" the crop conditions in the locality, and the possible shortage of men, be discouraged, and that such interviews should be offset by a system of centralized reliable official advertising of actual conditions by the Employment Service.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD OF JANUARY 31 TO FEBRUARY 26, 1921

REPORTS from Employment Offices to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, for the four weeks period of January 31st to February 26, 1921, show a decrease in the number of placements when compared with the preceding period. The offices

reported that 13,875 placements were effected during the period as compared with 15,321 reported during the preceding period, a decrease of 1,446.

During the period under review regular placements by weeks were reported as follows: Week ended February 5—3,626; week ended February 12,—

3,289; week ended February 19—3,352; week ended February 26—3,608. In addition 5,165 casual jobs were supplied during the period and were reported by weeks as follows: Week ended February 5—1,236; week ended February 12—1,412; week ended February 19—1,337; week ended February 26—1,180. Placements in casual work during the preceding period totalled 5,093, representing an increase during the present four weeks of 72 placements.

The accompanying chart presents in graphic form a history of the movement

of labour through the Employment Offices, from October, 1919. It will be noted that the curve for applications indicates a sharp decline in the number of applicants registered at the offices during February of this year. The chart indicates also that the curves for vacancies and placements retain the same relative position at the end of February as at the end of January, 1921. The fluctuations of these curves during the intervening weeks may be attributed in some measure to the effect of changeable weather conditions throughout Canada.

The accompanying table presents in some detail the work of the offices for the four week period ended February 26. During the period 34,188 applicants were registered at the offices, while during the same period 17,089 vacancies were notified by employers, an excess of applicants over vacancies of 17,099. Corresponding figures for the preceding four weeks were 41,599 applications and 19,144 vacancies, an excess of applications over vacancies of 22,455. This would indicate a closer approximation of demand (vacancies) and supply (applications) than during the preceding period, the excess of the latter being due, in part, to the operation of the emergency relief funds.

It will be noted that at the beginning of the period, January 31, there were 34,208 applicants unplaced, in comparison with 37,068 unplaced applicants on February 26, after allowance had been made for cancellation and placements. The number of vacancies remaining unfilled on January 31 was 8,001, while the unfilled vacancies on February 26 totalled 7,765. On comparing the above with the figures of the corresponding period of last year it may be of interest to note that the total number of unplaced applicants on February 28, 1920, totalled 26,242, while the number of vacancies unfilled on this date was 9,577.

EMPLOYMENT CONDITIONS IN CANADA FROM FEBRUARY 20 TO MARCH 19, 1921, AS REPORTED BY EMPLOYERS

WEKKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from February 20 to March 19, inclusive, show steady declines in the volume of employment afforded by these employers, the accumulated losses being 14,964 persons.

The change reported for each week as compared with the preceding week is as follows:

Week ending February 26, a decrease of 3,742 persons or .60 per cent.

Week ending March 5, a decrease of 4,237 persons or .68 per cent.

Week ending March 12, a decrease of 4,167 persons or .67 per cent.

Week ending March 19, a decrease of 2,818 persons or .47 per cent.

During the four weeks under review, employment conditions in the different parts of Canada were substantially the same, contractions in payroll on the whole, being registered during each week. There were, however, slight fluctuations in conditions in the different districts. In the Maritime Provinces, New Brunswick showed a nominal increase during the week of February 26 and for the following week Prince Edward Island and Nova Scotia registered increased activity. During the week of March 12 New Brunswick showed a substantial gain, while in Prince Edward Island there was a slight increase for the week of March 19. The

most pronounced losses, of course, were reported by firms in Quebec and Ontario, where the combined contractions in payroll amounted to 10,194 persons, of whom 5,274 were released in Ontario. In the Prairie District the declines were steady, though not as pronounced as elsewhere, the only increase in employment reported during the four weeks under review being registered in Alberta on March 19. The gain however, was insignificant. Firms in British Columbia showed increased activity during the week of March 5, with large shrinkages for the other three weeks.

A summary of the returns by industrial groups indicates that employers in Lumber and its Products, Edible Plant Products, Leather Goods, Telephone Operation and Retail Trade reported additions to staff during all four weeks. In Building Construction, Textiles, Wood Distillates, Hotels and Restaurants and Local Transportation there were net gains with declines during one or more weeks of the period. On the other hand, firms in Edible Animal Products, Clay, Glass and Stone, Fur Goods and Mineral Products, n.e.s., Non-Ferrous Metal Products, Pulp and Paper, Rubber, Miscellaneous Manufacturing Industries (largely Chemicals, Musical Instruments and Tobacco), Coal Mining and Water Transportation reported contractions in payroll on the whole with increases during one or more weeks. In Logging, Railway Construction, Iron and Steel, Metallic Ores, Non-Metallic Minerals other than Coal and Railway

under review was largely the result of a shut-down in Ontario. The losses in Coal Mining were almost entirely in Alberta and Nova Scotia and were partly caused by the mild weather but more particularly by the general depression. In addition there was considerable inactivity in Nickel and Asbestos Mining. The declines in Wholesale Trade were comparatively slight, but are in contrast with the more pronounced increases reported in the Retail Group.

Employment during the four weeks under review was considerably lower than for the same period in 1920, when the index number stood at about 101.2 in comparison with about 87.4 during the period February 20 to March 19. While all the provinces participated in this depression, the contractions in Ontario and Quebec were the most noteworthy. The Manufacturing Group, of course, showed the largest losses in this

comparison, but the decreases in Mining, Building and Trade also were important. Within the Manufacturing Group the largest losses occurred in Iron and Steel Products, Textiles and Lumber and its Products.

The accompanying chart shows the weekly percentage of change in the number of persons on payrolls since the base week (January 17, 1920,) as reported by those employers making returns, the number averaging over 5,100 firms a week. The curve during the four weeks under review, while showing no marked fluctuations, evidences a steadily downward tendency, the percentage of loss declining from 12 below the base on February 26 to 13.56 below on March 19. These figures are in marked contrast with those registered by the firms reporting for the corresponding period of last year, when the increase over base was slightly over 1 per cent.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF FEBRUARY, 1921, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of February, 1921, and is based on returns received from 1,513 labour organizations with a combined membership of 198,276 persons. For all occupations reporting, 16.12 per cent of the members were unemployed as compared with percentages of 13.07, 4.33, and 5.61 at the end of January, 1921, February, 1920, and February, 1919, respectively. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons

occupied in work other than their own trades or who are idle because of sickness or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of employment is based, it should be understood that the percentages of unemployment figures have reference only to those unions reporting.

The increase in unemployment for the month under review as compared with the preceding month may be attri-

buted partly to increased slackness in the transportation group, but more especially to greater inactivity in lumbering and logging and also in the miscellaneous group of occupations. The increase in unemployment over February of preceding years was of a general nature, that in the manufacturing and mechanical industries and transportation being especially marked.

Table I on this page summarizes the returns by provinces. New Brunswick and Quebec showed slight declines in the percentage of unemployment in comparison with the returns for the preceding month, while in the remaining provinces decreased activity was evidenced, particularly in British Columbia. Every province showed

more unemployment than in the corresponding month in 1920 and 1919.

The percentages reported unemployed in the different groups of industries are indicated in table II on page 614.

Unemployment in the manufacturing and mechanical industries as reflected by 349 unions with a combined membership of 49,647 persons showed a slight decrease as compared with the returns for January, 1920, but the percentage of unemployment was considerably larger than in February of preceding years, 11.13 per cent of the members having been idle as compared with percentages of 14.67, 2.49 and 4.29 in January, 1921, February, 1920 and February, 1919, respectively. This improvement as compared with the previous month was reported very largely by garment workers (mainly in Montreal) and also by workers in the pulp, paper and fibre, wood-working and furniture, leather, boot, shoe and rubber, food, tobacco and liquor, and textile, carpet and cordage divisions. There was, however, less activity in the metal, machinery and conveyances, printing, publishing and paper goods, glass bottle blowing, jewelry and oil refining groups. In the first named the increase in unemployment occurred chiefly among moulders, boiler-makers and iron shipbuilders and machinists, mainly in shipbuilding and railway car plants. In comparison with the reports for February of previous years there was more unemployment in every group of occupations with the exception of textile, cordage and carpets in which the percentage of unemployment in February, 1919 exceeded that reported for the month under review.

In addition to the total unemployment, considerable short time was re-

ported by unions of moulders, blacksmiths, boilermakers, metal polishers, pattern makers, machinists, iron, steel and tin workers, meat cutters and butcher workmen, bakers, cigar makers, textile workers and carpet makers, tailors, garment workers, pulp and paper makers, compositors, pressmen, bookbinders, lithographers, boot, shoe and musical instrument workers.

Reports from 631 organizations of transportation workers with an aggregate membership of 79,305 persons showed that 9.52 per cent of the members were out of work as compared with 7.98 per cent in January, 1921, 2.77 in February, 1920 and 4.56 per cent in February, 1919. This increase in unemployment occurred mainly among steam railway employees but also among street and electric railway and navigation workers. Steam railway employees, whose returns constitute about 80 per cent of the entire group membership reporting, indicated an unemployment percentage of 8.02 as compared with percentages of 6.02, 1.78 and 2.74 in January, 1921, February, 1920, and February, 1919, respectively. Within this group, carmen, trainmen, maintenance of way employees and railway shop labourers were especially affected, showing in each case, more than 11 per cent of unemployment, as compared with considerably smaller percentages in preceding months. In the navigation subgroup much unemployment was reported by unions of sailors, cooks and firemen, but it may be noted that these unions are largely affected by seasonal conditions. In addition, reports were received from 8 locals of longshoremen showing 668 of the 2,856 members unemployed, a percentage of 23.39, as com-

pared with percentages of 49.23, 11.04 and 23.14 in January, 1921, February, 1920 and February, 1919 respectively. These returns, on account of the casual nature of longshore work are not included in the accompanying tabulations. A large number of the unions classified under the transportation group showed considerable short time.

In the mining, quarrying and refining of ores group, returns were tabulated from 35 unions with a combined membership of 10,105 persons, showing 9.01 per cent of the members unemployed as compared with percentages of 1.52, 4.78 and 3.79 in January, 1921, February, 1920, and February, 1919 respectively. Miners showed considerably less activity than in any of these months, while mill and smeltermen, as indicated by one union, also showed an increase in unemployment. In addition to the total idleness a great many miners were reported as being partially employed.

The percentage out of work among workers in the building and construction group was 31.38 as compared with percentages of 30.77, 12.14, and 16.44 in January, 1921, February, 1920 and February, 1919. Electrical workers, plumbers and steamfitters, tile-layers, lathers and roofers, bridge and structural iron workers and hod carriers and building labourers registered more unemployment than in the former months used for comparison. The percentages out of work among bricklayers, masons and plasterers, carpenters and joiners, painters, decorators and paper hangers were slightly smaller than those reported for the preceding month, but they exceeded those recorded for February of preceding years. More activity was reported by granite and stone

cutters than in January, 1921, February, 1920 and 1919. The same is true also for steam shovel and dredge-men with the exception of February, 1920, when the percentage out of work was considerably smaller. Many of these unions showed a large proportion of their working membership on short time.

The percentage out of work in the public employment group was 3.58 as compared with percentages of 5.02, 1.63 and .48 in January, 1921, February, 1920, and February, 1919. Employment for civic employees was slightly more active while the percentage out of work among letter carriers and postal employees showed a nominal increase over January, 1921, and February of last year.

Logging and lumber workers as indicated by 3 organizations with a combined membership of 9,514 members, were considerably less fully employed than during the preceding month, while returns for February of previous years are not available. In the former comparison, however, it may be noted that the returns for January were incomplete, the union which showed the most unemployment during February not having reported for the former month. Fishermen as represented by 3 unions with 1,745 members showed a nominal decrease in the percentage of idleness

as compared with January, but it was substantially larger than that reported for February of previous years.

Unemployment in the group of miscellaneous trades as recorded by 140 unions with a total membership of 12,278 persons was more pronounced than in any month used in this article for comparison, 9.05 of the members being out of work as compared with percentages of 4.73, 4.84 and 4.07 in January, 1921, February, 1920 and February, 1919, respectively. Retail clerks, as indicated by 4 unions, showed a nominal increase in unemployment over the preceding month and also over the corresponding month of last year, but the percentage was smaller than in February, 1919. Hotel and restaurant employees and barbers were somewhat more fully employed than in January, but the percentages of idleness exceeded those reported for February of previous years. Musicians and theatre employees and stationary engineers and firemen reflected greater activity than in the three months used here for comparison. On the other hand, the reverse is true for unclassified workers, who showed more unemployment than in January, 1921, February, 1920 and February, 1919. A large number of these unions registered considerable short time.

The tabular statement on pages 616-617 presents the returns in some detail.

EMPLOYMENT IN THE BUILDING TRADES DURING FEBRUARY, 1921, AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 56 cities, showed an increase during February as compared with the preceding month, the total

value rising from \$2,378,937 in January to \$3,216,085 in February, an increase of \$837,148 or over 35 per cent. Nova Scotia, Quebec, Saskatchewan, Alberta and British Columbia registered in-

creases in the value of the permits issued, while in New Brunswick, Ontario and Manitoba there were declines. Of the increases, that of \$676,615 or nearly 164 per cent in Quebec was the largest.

As compared with the figures for the corresponding month in 1920 there was a decrease of \$2,606,182 or almost 45 per cent, the value for February 1920 having been \$5,822,267. In this comparison there were decreases in every province, that of \$1,202,605 or practically 49 per cent in Ontario being the most pronounced.

Of the larger cities, Montreal registered increases in the value of the permits issued as compared with both January, 1921 and February, 1920. At Toronto, Edmonton and Vancouver there were gains in comparison with the preceding month and declines as compared with the corresponding month of last year. Winnipeg showed decreases in both cases.

Of the smaller centres, Three Rivers, Westmount, Kitchener, London, Sarnia, Moose Jaw, Point Grey and South Vancouver reported increases as compared with January and also with February, 1920.

The returns from 35 cities formerly used in this report (which are distinguished by asterisks and which are also tabulated separately for statistical purposes) showed that the total value of the building permits issued by these cities was \$2,831,156 as compared with \$2,128,742 in January. There was, therefore, an increase of \$702,414 or 33 per cent in comparison with the returns for the preceding month. As compared with the corresponding month of last year however, there was a decline of \$2,616,443 or 48 per cent, the value for February, 1920, having been \$5,447,599.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES, FEBRUARY, 1921

REPORTS from fifteen cities showing the number of civic employees temporarily employed and the wages paid these persons during the month of February showed a decrease of about 13 per cent in the number of employees and of slightly over 8 per cent in the wages paid, as compared with the preceding month. In February, 1921, 11,373 persons were temporarily engaged and the wages amounted to \$818,649.78 as compared with 13,129 employees and an aggregate payroll of \$893,591.97 in January.

In comparison with the returns for the same period in 1920 there were increases of nearly 8 per cent in the number of employees and of about 1 per cent in the wages paid, there having been

10,577 employees with a total payroll of \$809,788.34 in February of last year.

London, Winnipeg, Vancouver and Victoria registered increases in the number of persons temporarily engaged as compared with both January, 1921, and February, 1920. At St. John, Moose Jaw, Saskatoon, Calgary and Edmonton there were gains in the former, with declines in the latter comparison. Regina reported the same payroll as in the preceding month with a decline in comparison with February, 1920. In Ottawa, Hamilton, and Brandon the number of persons temporarily employed was smaller than in January, but there were increases over February of last year. Montreal and Toronto registered losses in both cases.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS FEBRUARY, 1921, COMPARED WITH JANUARY, 1921 AND WITH FEBRUARY, 1920.

Total.....	13,129	11,373	10,577	\$893,591.97	\$818,649.78	\$809,788.34

As to wages, Winnipeg and Victoria reported increases as compared with the returns both for January and for February, 1920. St. John, Calgary showed gains as compared with the preceding month and a slight decline as compared with the corresponding month of last

year. On the contrary, in Hamilton, Ottawa, London, Brandon, Regina and Vancouver there were decreases in the former and increases in the latter comparison. Montreal, Toronto, Moose Jaw, Saskatoon and Edmonton registered losses in both cases.

FAIR WAGE CONTRACTS, MARCH, 1921

DURING March the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to three fair wage contracts, of which two were awarded by the Department of Public Works, and one by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Supply and installation of Post office fittings in public building, Portage la Prairie, Manitoba. Name of contractor, Snyder Brothers, Portage la Prairie, Manitoba. Date of contract, March 12, 1921. Amount of contract, \$5,088.

Construction of wharf, South Gabriola Island, B. C. Name of contractor,

Daniel O. Shook, Vancouver, B. C. Date of contract, March 16, 1921. Amount of contract, unit prices.

DEPARTMENT OF RAILWAYS AND CANALS.

Erection of highway steel swing bridge over Chambly Canal, at crossing No. 6. Name of contractor, The Phoenix Bridge & Iron Works, Limited, Montreal, Quebec. Date of contract, March 2, 1921. Amount of contract, \$5,490.

POST OFFICE DEPARTMENT.

The following is a statement of payments made in March for supplies ordered by the Post Office Department subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions.

Nature of orders	Amount of orders.
Making metal dating stamps and type and other hand stamps and brass crown seals.....	\$2,727.28
Making and repairing rubber stamps, daters, etc.....	207.81
Supplying stamping material, pads, and ink.....	656.00
Supplying mail bag fittings.....	509.00
Making up and supplying letter carriers' uniforms, etc.	959.21
Repairing letter boxes, etc.....	455.53
Making and supplying letter box locks and keys.....	1,615.00

RECENT INDUSTRIAL AGREEMENTS

THE following agreements and schedules of wages and working conditions have recently been received in the Department. In the case of each agreement the rates of wages in the principal occupations are given, together with the significant points as to working conditions and a summary of other information of general interest.

Printing and Publishing

OTTAWA, ONT.—EMPLOYING PRINTERS WITH PRINTING PRESSMEN AND ASSISTANTS' UNION No. 5. Agreement in effect from July 1, 1919 to May 31, 1921.

Agreement summarized in the January, 1920, issue of the LABOUR GAZETTE, page 66.

A bonus of \$3 per week was granted to pressmen by employers, in force from August 1, 1920.

TORONTO, ONT.—MASTER PRINTERS' AND BOOKBINDERS' ASSOCIATION OF TORONTO WITH TORONTO PRINTING PRESSMEN'S UNION No. 10. Agreement in effect from June 2, 1919 to June 2, 1921.

Agreement summarized in July, 1919 issue of the LABOUR GAZETTE, page 837.

The bonus agreement, in effect from May 1, 1920 to May 31, 1921, provides that on account of the high cost of living a bonus of 10 per cent on current wages shall be paid to Journeymen Pressmen; bonus to be paid weekly on basis of regular 48-hour week or fraction thereof, bonus not to affect overtime rates, which shall be governed by existing agreement.

Building and Construction

MONTREAL, P. Q.—VARIOUS LOCAL FIRMS WITH INTERNATIONAL ASSOCIATION OF BRIDGE, STRUCTURAL AND ORNAMENTAL IRON WORKERS, DISTRICT COUNCIL OF MONTREAL AND VICINITY. Agree-

ment in effect from March 1, 1921 to February 28, 1922.

Hours of labour, eight per day; four hours on Saturday.

Overtime, time and one-half; Sundays and holidays, double time.

No discrimination against Union members.

No strike or lockout to take place until dispute has been found impossible to adjust.

Complaints and grievances to be reported to foreman; failing adjustment, matter to be taken up with manager or general superintendent by the men's shop committee. In the event of inability to reach settlement, matter to be referred to three arbitrators, one representing the men, one the company, and in the event of these two not agreeing, a third who shall be named by a Judge of the Superior Court in Montreal.

In event of shortage of labour, Union to endeavour to supply men as far as possible from other districts.

Weekly pay to be adopted.

Wages: Per hour—first class mechanics, 75 cents; second class mechanics, 67½ cents; third class helpers, 57½ cents; apprentices, 25 cents. Scale to remain in force for 3 months, at which time an adjustment will be made based on relative cost of living, with index number for February 1921 as base.

Above rates to apply to outside men.

Employees not bound to work on jobs where there are labour troubles.

Public Utilities

VANCOUVER, B. C.—BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY, LIMITED, VANCOUVER POWER COMPANY, LIMITED, THE VANCOUVER ISLAND POWER COMPANY, LIMITED, AND THE WESTERN POWER COMPANY, LIMITED, WITH THE

INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS. Agreement in effect from March 8th, 1921 until after 30 days' notice in writing it be amended, cancelled, or substituted.

Only good standing members to be employed except in certain cases in rural districts.

Employees covered by this agreement to be entitled on becoming consumers to gas concessions as heretofore, and to purchase of electric light at 4 cents per kilowatt hour; company to install metres free and charge no rent for same. Employees to have free transportation and a certain number of passes on street cars.

In case of lay-off of men through slackness of work seniority and efficiency to govern. Men laid off for a period not exceeding six months to be given credit for all past services in question of seniority.

Men having previous service to be given preference when men are engaged, provided services were satisfactory at time of lay-off.

Apprenticeship: An employee with less than three years' experience to be classed as apprentice; apprentices to serve three years; no more than one apprentice to seven journeymen in each department. Groundmen to be given preference when apprentices are taken on, and one-third of their time as groundmen to count as apprenticeship, time allowed not to exceed one year.

Hours of labour, eight per day. Holidays and certain overtime, time and one-half. Provisions made for expenses of board and lodging when away from home.

Employees to be paid by cheque four times per month.

Work on poles, etc., at elevation of 85 feet or over, double time.

Station operating staff: Monthly days off not to be taken while on night shift. Shifts to be worked by revolving watch: 7K-15K; 15K-23K; 23K-7K. Two

weeks to be maximum period for same shift. In case of sickness, a reasonable amount of time to be allowed with pay at discretion of chief operating engineer. In event of working overtime, double amount of time worked to be allowed off. Four days' monthly vacation and fourteen days' annual vacation with pay. In event of man having worked less than one year, one day's holiday allowed each month of service up to the month in which the holiday is taken.

Metermen: hours of labour, eight per day; in case of sickness, a reasonable amount of time to be allowed off with pay at discretion of superintendent, also pay to be allowed for public holidays.

Arc trimmers: same provision for sickness as metermen; one day off per week to be allowed with pay. For overtime, double the time worked to be allowed off.

Wages: Per day—Line department and wiremen: lead covered cable foreman, \$8.75; journeyman cable splicer, \$8.00; foreman lineman, \$8.50; sub-foreman lineman, \$7.75; journeyman lineman, \$7.00; foreman wireman, \$8.50; journeyman wireman, armature winder, transformer winder, \$7.00; auto driver, \$5.50; troubleman, repairman, track bonder, \$7.00; groundman \$5.50. Apprentice lineman and wireman; beginners, \$5.65; after 6 months, \$5.90; after 12 months, \$6.20; after 18 months \$6.45; after 24 months, \$6.70; after 36 months, \$7.00. Apprentice cable splicer: beginners, \$7.00; after 12 months, \$7.20; after 24 months, \$7.50; after 36 months, \$8.00. Station operating staff: Per month—operators, \$175, \$180, \$185. Apprentice operator: Per month—\$140, \$145, \$155; Engineer-in-charge, \$185, \$195, \$210; floormen and helpers, \$140; load dispatchers, \$215; chief load dispatcher, \$220. Meter department: metermen, \$160; apprentice metermen, \$130, \$140, \$150; Meter foreman, \$195. Arc trimmers: trimmers, arc tester and repairmen \$155.

PRICES, RETAIL AND WHOLESALE, IN CANADA, MARCH, 1921

THE movement in prices continued downward and was also marked by unusually steep seasonal decreases in eggs, while butter, milk and potatoes tended downward. The chief decreases for the month appeared in textiles, hides and leather, metals, building materials and in chemicals.

In retail prices, the average cost of a list of staple foods in some sixty cities was \$13.23 at the beginning of March as compared with \$14.08 in February, \$5.98 in March, 1920, \$15.77 in March, 1919, and \$7.68 in March, 1914. The chief decreases for the month were in eggs, but there were also substantial decreases in rice, meats, lard, potatoes, with slight decreases in nearly all the other commodities. Coal and wood averaged slightly lower.

In wholesale prices, the Departmental index number was down to 263.1 for March as compared with 270.1 for February, 349.0 for March, 1920, 277.6 for March, 1919, 269.2 for March, 1918, and 137.1 for March, 1914. The chief decreases for the month were in textiles, hides and leather, metals, building materials, and chemicals. In the other groups decreases in some lines were partly offset by advances in others. Except oats, grains were slightly up but fodders were down. Cattle and beef were up slightly but hog products were down. Butter and milk were down but cheese advanced slightly. Bread, flour and tapioca were lower but sugar advanced slightly. In fuel, bituminous coal was down but coke was higher. In the miscellaneous group, muskrat skins, malt, and rubber were firmer but newsprint paper, binder twine, and laundry starch were down.

The table of retail prices and rentals shows the prices at the beginning of January of over one hundred staple foodstuff, groceries, coal, wood and coal oil, and the rent for 6-roomed houses in

some sixty cities throughout Canada having a population of 10,000 or over. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these have been published each month since the beginning of 1910, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915 when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts exclusively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences or with incomplete conveniences.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, those being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel

supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designated to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding months back to 1913.

Retail Prices

In meats all lines averaged lower, there being a general decrease in beef and in pork. Lard was 2c. per pound lower. In general lines of fish there were declines in some localities. Eggs declined steeply in almost all of the cities, the price averaging 55c. for fresh eggs and 50c. for cooking eggs as compared with 79c. for fresh eggs and 73c. for cooking eggs in February. In several cities the price was below 45c. per dozen. Milk averaged slightly lower, there being decreases at Sydney, Halifax, Sherbrooke, Brockville, Kingston, Port Arthur, Fort William, and Victoria. Butter was slightly lower, there being slight declines in some of the cities, but slight increases in others. Cheese averaged slightly higher, there being decreases in some cities, but increases in others. Bread was slightly higher at Amherst, St. Hyacinthe, Port Arthur,

* December only.

Fort William, and Prince Albert. Soda biscuits were slightly lower in nearly all of the cities. Flour, rolled oats, corn meal, and barley declined slightly. In rice, there were considerable declines, prices being 5c. per pound lower in a number of instances. Tapioca was also substantially lower. In canned corn, peas, and tomatoes slight increases appeared in some of the cities, but slight decreases in others. Beans were slightly lower in most localities. There were slight decreases in potatoes throughout the Dominion. Prunes and evaporated apples were somewhat lower, and jams and canned fruits showed substantial declines. Corn syrup and honey were lower. Sugar was slightly higher in several of the cities. Cream of tartar and laundry starch showed a number of decreases. Anthracite coal was lower at Amherst, Halifax, Charlottetown, St. John, Thetford Mines, Kitchener, Stratford, London, St. Thomas, Chatham, and Cobalt. Bituminous coal was lower at Amherst, Charlottetown, Moncton, Fredericton, Sorel, Peterborough, Niagara Falls, Brantford, Galt, Kitchener, Stratford, London, Cobalt, Fort William, Vancouver, Victoria, and Nanaimo. Wood showed some slight decreases. Coal oil was down slightly. Matches were steady. Rent was higher at St. Hyacinthe, and increases to take effect on the first of May were reported in several cities.

Wholesale Prices

GRAINS AND FODDER.—Wheat, No. 1 Northern, at Winnipeg averaged almost the same as in February, the price falling from \$1.95 per bushel to \$1.85 but rising to \$1.99 later. Winter wheat at Toronto fell to \$1.80-1.85, recovered 5c. and declined 5c. again. Barley at Win-

nipeg rose to 85c. per bushel but fell to 81c. Barley at Toronto was unchanged at 80-85c. Oats at Winnipeg fell from 50c. per bushel to 47c. and at Toronto from 48c. to 45c. American corn rose to 98c. per bushel but fell to 96c. Flaxseed at Winnipeg rose to \$1.83 per bushel but fell to \$1.68. Peas at Toronto rose 5c. to \$1.55-\$1.65 per bushel. Rye at Toronto was cheaper at \$1.45-\$1.50 per bushel for No. 2. Hay was lower at Montreal at \$24.00-\$25.00 per ton. Straw was lower at Toronto at \$11.00 per ton. Bran and shorts were down to \$36.00 per ton.

ANIMALS AND MEATS.—Cattle at Winnipeg rose from \$8.00-\$8.75 to \$8.25-\$9.00 per hundred pounds. Beef, hind-quarters, was one cent higher at 17-23c. per pound, at Toronto and forequarters at 11-15c. per pound. Hogs had fallen to \$12.75-\$13.00 per hundred pounds at Ontario points but rose to \$14.25-\$14.50, declining 50c. per hundred in the last week. Bacon was lower at 38-40c. per pound and lard at 18-18½c. Sheep rose to \$8.00-\$10.00 per hundred pounds. Fowl and turkeys were steady.

DAIRY PRODUCTS.—Butter, finest creamery, at Montreal, rose from 55½c. per pound to 58½c. but fell to 55½c. later. Cheese rose to 29½-30c. per pound at Montreal. Fresh eggs at Montreal fell from 50c. per dozen to 35c. Milk at Victoria fell 10c. per gallon to 45c.

FISH.—In the dry fish export market there was some improvement owing to somewhat better conditions in Cuba and Porto Rico. The demand for pickled fish was also light but as stocks were small prices were steady. The lobster catch on the south west coast of Nova

(*) Preliminary figure.

(†) Nine commodities off the market, fruits, vegetables, etc., One line of spelter was dropped in 1915.

Scotia was better than expected, in spite of stormy weather.

FRUITS AND VEGETABLES.—Apples rose to \$6.50-\$8.50 per barrel at Toronto. Oranges were easier at \$4.50-\$6.25 per box. Prunes were lower at 11c. per pound. Potatoes rose from \$1.00 per bag to \$1.15 in Montreal but fell to \$1.05. Dried beans were lower at 5-6c. per pound. Onions were higher at \$2.00 per hundred. Canned vegetables were higher, canned peas being up to \$1.65-\$1.70 per dozen cans and tomatoes to \$1.60-\$1.85. Flour was down 20c. per barrel at \$10.50 for Manitoba patents in small lots at Toronto. Sugar advanced from \$10.76 to \$10.89 per hundred pounds in barrels at Toronto. Glucose, honey, and baking soda were lower.

TEXTILES.—The wool market continued quiet. Raw cotton was lower at \$11.65 per pound at New York for upland middlings. Raw silk, Japan filatures, was down from \$6.20 per pound to \$5.97½. Jute was down from \$9.76 per pound to \$8.89.

HIDES, LEATHER, BOOTS AND SHOES.—Beef hides and calf skins fell to 5c. per pound and horse hides to \$1.00-\$2.00 each. Leather, Spanish sides, fell to 60-62c. per pound. Harness leather fell from 66-67c. to 62-63c. per pound.

METALS AND IMPLEMENTS.—A line of pig iron was \$5.00 per ton lower at \$30.00-\$35.00. Iron bar was down to \$4.00 per hundred. Galvanized sheets fell from \$10.60 per box to \$9.60. Steel billets were \$5.00 per ton lower at

\$45.00-\$50.00. Cast steel fell from 24½c. per pound to 23c. Brass, copper, lead, quicksilver, bar silver, zinc, and tin declined. Coil chain, crowbars, soldering coppers, and grindstones were also lower.

FUEL AND LIGHTING.—Bituminous coal was lower, but furnace coke was slightly higher.

BUILDING MATERIALS.—Shingles were 50c. per M lower at St. John, N. B. Lath declined 50c. per M at Toronto. Oak and birch declined. British Columbia fir fell \$2.00 per M at Winnipeg and shingles 20c. Iron pipe, lead pipe, wire nails, sash cord, copper wire, and iron wire declined. White lead declined 2c. per pound. Turpentine fell from \$1.20 to \$1.00 per gallon. Linseed oil and Paris green, shellac, glue, window glass and putty declined.

HOUSE FURNISHINGS.—No changes were reported.

DRUGS. AND CHEMICALS.—Bleaching powder, brimstone, caustic soda, copperas, glycerine, and opium declined.

MISCELLANEOUS.—In raw furs, muskrat skins were lower. Malt advanced from \$1.30 per bushel to \$1.35. Newsprint fell from 61½c. to 51½c. per pound. Ground wood pulp was down from \$80.00 per ton to \$50.00. Bleached sulphite pulp was down from \$140.00 per ton to \$130.00. Sisal binder twine was down to 17¼c. per pound. Crude rubber rose from 16½c. per pound to 18c. Laundry starch fell from 81½c. per pound to 8c.

PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest information available as to the movement of prices in other countries as compared with Canada.

The United Kingdom

At the beginning of March the level of retail food prices was reported by the Ministry of Labour to be 149 per cent higher than in July, 1914, and the level of all items in the cost of maintaining a workingman's family to be 141 per cent higher than 1914. At the first of February food had been 163 per cent higher than in 1914 and all items 151 per cent. The decreases for the month were in bread, flour, potatoes, butter, eggs, fish, meat, bacon, milk, margarine, cheese and tea, while there were no increases in average prices of any foods. Rents had risen 44 per cent, clothing was 240 per cent higher than in 1914, but at the beginning of February had been 250 to 260 per cent higher. Fuel and light were about the same as a month earlier, that is 140 per cent higher than in 1914. At the first of April food was again lower being only 138 per cent higher than in July, 1914.

France

The level of retail prices in Paris of food, fuel and lighting in February was reported by the General Statistical Department of France to be 6.7 per cent lower than a month before but 282 per cent higher than in July, 1914.

Italy

The Municipal Labour Office for Milan reported the cost of maintaining a family in February, 1921, to be 0.8 per cent lower than in January, food being down 1.5 per cent. Price levels were still 464 per cent higher than in

1914 for food and 466 per cent for all items.

The Municipal Statistical Office for Florence reported the cost of food for a family of five in February, 1921, to be 1.6 per cent lower than January but 384 per cent higher than in 1914. All items showed an increase of 0.1 per cent for the month, and of 354 per cent over 1914.

Germany

The *Frankfurter Zeitung* on March 6 published index numbers of wholesale prices in Germany showing the level on March 5 to be 131 as compared with 136 in February, 153 in December, 1920, 156 in May, 1920, 100 in January, 1920 and 9.10 in 1914.

United States

Prices continued to fall, the index numbers of wholesale prices published by the United States Bureau of Labour Statistics as well as by private compilers showing decreases. The index number of retail prices of food calculated by the United States Bureau of Labour Statistics for February was down to 158 as compared with 172 in January, 219 in July, 1920, and 201 in February, 1920. The chief decreases for the month were in meats, eggs, butter, milk, bread, rice, potatoes and sugar.

Indications that the downward movement was slowing up were reported by some observers. Bradstreet's index number for April 1st was down to \$11.3749 as compared with \$20.8690 in February, 1920, when the high point was reached. The level for the end of March was thus down to the same point as in March, 1916, at \$11.3760. Dun's index number for April 1st was down to \$174.404 as compared with \$263.332 in May, 1920, when the high point was reached, showing a fall of 33.8 per cent in 11 months but was still 44.0 per cent higher than 1914.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Executive of Trades and Labour Congress of Canada restrained from expelling Canadian Brotherhood of Railroad Employees from Congress

AN action in the form of a notice for judgment was brought in the High Court of Ontario by A. R. Mosher, president of the Canadian Brotherhood of Railroad Employees, acting on behalf of himself and all other members of the brotherhood, against the president, secretary-treasurer and other members of the executive council of the Trades and Labour Congress of Canada, on the ground that the president and secretary-treasurer of the congress had, pursuant to an alleged action of the executive council, announced to the brotherhood that its membership in the congress had been terminated and had made representations to the same effect to other labour organizations and their members. The court declared that for three years the brotherhood had been *de facto* a member of the congress, and until the body of which it had been *de facto* a part should question its right to membership, it was entitled to have it assumed as between it and a body subordinate to the congress, that its election to membership in the congress was justifiable in law. The executive council of the congress is "to act for congress during intervals between sessions"; it has express power to suspend or revoke a charter of any provincial federation of labour, trades and labour council or federal union chartered by the congress which has wilfully violated the constitution, or has done certain specified acts, but it has no other express power to expel any organization from

membership in the congress. It was admitted by counsel that the charter of the Canadian Brotherhood of Railroad Employees was not one to which the express power of suspension or revocation was applicable. The purpose of the congress as defined in the preamble to the constitution was to promote legislation in the cause of organized labour and the power of the Executive Council to act for the congress could not be held to authorize the expulsion of other organizations. The court further declared that even if the executive council had power to expel a member for due cause there had not been a valid exercise of the power. It was clearly indicated in the constitution that the executive council was to meet for the exercise of its powers and there was no meeting in this case. The brotherhood was not called upon for its defence and no meeting was held at which it was asked to show cause why it should not be expelled. In the opinion of the court the act of expulsion was irregular and invalid. Judgment was therefore delivered declaring that the executive council of the congress had no right to cancel the brotherhood's membership in the congress, and that no action taken by the defendants had been effective to exclude the brotherhood from membership, and restraining the defendants and each of them from representing that the brotherhood has ceased to be a member. (*Ontario—Canadian Brotherhood of Railroad Employees vs. Moore, et al.*)

Accident insurance company not liable if essential clause of contract is violated even if its agent had offered to make a settlement

A boy 14 years of age employed in a box factory in the Province of Quebec lost a thumb and two fingers when working on a circular saw. The father, as guardian of the boy, brought an action under the Workmen's Compensation law of Quebec, against the firm employing him, and the employers were condemned by the Superior Court to pay \$2,000 compensation. After paying this sum the employers brought an action against the Travellers' Insurance Company to reimburse them for the \$2,000 plus \$756.45 for expenses, interest, etc. The action was based on an insurance policy which protected them against loss from accidents to their employees. The firm claimed that the insurance company had recognized its responsibility by offering to make a settlement with the victim's guardian. The defendant company, however, contended that it was not liable, on the ground that the insurance policy contained the following clause: "This agreement shall not apply to any such injuries sustained by any person or persons except as above provided, nor to any such injuries assured in violation of law as to age or under the age of 14 years if there is no legal age limit." It was held, on behalf of the defendant, that the boy was employed on a dangerous machine contrary to the regulation that prohibits any boy under 16 years of age being employed working on edged tool machines in woodworking establishments. The trial judge held that the boy was employed in violation of law as to age and that he was, therefore, not one of the persons covered by the policy. The employers appealed against this judgment. With regard to the question whether the

victim was illegally employed on account of his age the Court of King's Bench confirmed the judgment of the Trial Court. The court held that the statement of law was that no boy under the age of 16 might be employed in that part of an industrial establishment carried on for the preparation of wood where edged tool machines were used, if such boy is called upon by his engagement to work or make use of such machinery or tools. The term "edged tool machinery" was interpreted to mean not only the saw but the shaft, gearing, belt, etc., by which it is operated, and the stand, bench, or table used in connection with it.

With regard to the second ground of appeal: that the company, through its agent, had offered the boy's father \$750 in settlement of his claim, and that such offer constituted an admission of liability on their part for damages arising out of the accident in question, the court held that this contention could not be supported. It was declared by the court that the clause excluding from the cover of the policy persons employed by the insurant in violation of the law as to age was not an admission of the policy which might be waived by the insurer, either expressly or tacitly, but it was a principal part of the covenant. It was held that the company's agent, their claims adjustor, who made the offer of settlement, had no authority to waive any of the insurance company's rights under the policy, nor to bind them to liability beyond that expressed in the policy. For these reasons the judgment of the Trial Court was confirmed. (*Quebec—Pariseau Frères Limited vs. Travellers' Insurance Company.*)

Workman injured by his own negligence cannot recover damages under common law

A miner in Alberta when in the performance of his duties was struck by a descending cage and severely injured. He brought an action against the company employing him and was awarded damages of \$10,433.79 upon the verdict of a jury. The company appealed against this judgment and the case was heard in the Appellate Division of the Supreme Court of Alberta. The accident occurred on a Sunday morning when the employee was examining the "sump," an excavation below the shaft into which the water of the mine is drained and from which it is pumped. On Sundays no cage man is employed but there is communication between the engine room, from which the cages are operated, and the bottom of the shaft, by means of electric bells and a telephone. The plaintiff was accustomed to examine the "sump" on holidays, usually on Sunday, when the mine was not in operation. The particulars of negligence charged by the plaintiff against the defendant were: (1) In not warning the plaintiff of the lowering of the cage; (2) in not providing a proper system for the warning of workmen engaged at the bottom of the shaft that the cage was being lowered; (3) in not having a person at the bottom of the shaft to warn the workmen that the cage in the said shaft was being lowered; (4) in not providing a proper system of bells or other equipment in the engine room by which workmen at the bottom of the shaft could warn the engineer that employees were engaged at the bottom of the shaft and the cage should not be lowered until further signals were given.

The defendant company lodged the following claim: (1) that the accident

was wholly caused by the plaintiff's own negligence; (2) that the plaintiff, before the action was begun, claimed and received from the defendant a payment of and in respect of compensation under The Workmen's Compensation Act, 1918, Chapter 5, for the personal injury in question and that by the terms of that Act the plaintiff was thereby barred from any common law remedy. The verdict of the jury in the Trial Court was in part as follows:

"There is no evidence in our opinion that the plaintiff ever put in any application for compensation. We therefore cannot consider the cheque for \$165.71 accepted by the plaintiff as being on account of compensation.

"Evidence shows that during the week days a cage man is continuously in charge of cage while in operation but on Sundays and idle days no cage man is employed. We are therefore of opinion that a cage man should be in charge of cage at all times while in operation and if this precaution had been employed this accident to the plaintiff would not have occurred. We therefore believe that the defendant is responsible for injuries done the plaintiff."

The company based its appeal on the following grounds: (1) There was no evidence from which the jury could reasonably infer any negligence on the part of the defendant, or from which they could infer that any negligence of the defendant was the cause of the accident; (2) the evidence showed that the accident was the result of and caused by the plaintiff's own negligence; (3) the evidence showed that the plaintiff had accepted compensation

under the Workmen's Compensation Act; (4) the jury's finding that the plaintiff had not accepted compensation because he had made no claim for it was not really a finding that he had not accepted compensation; (5) the jury returned no finding as to whether or not the plaintiff had been guilty of negligence which was the cause of the accident.

The court declared that in the verdict of the jury only one ground of negligence was sustained, namely: that the defendant company should have had a man at the bottom of the shaft on Sundays as on other days and that the accident would not have happened if such a man had been there, and therefore

the company were responsible for it. The evidence showed that the plaintiff knew that the cages were liable to be moved at any moment and that by giving signals he could secure complete control of the cages and be absolutely safe, and he admitted after the accident that he ought to have notified the engineer. The court therefore held that the plaintiff's own omission was obviously the real cause of the accident, and plaintiff's being guilty of the culpable omission was sufficient to defeat his claim at common law. The appeal was therefore allowed and the action dismissed with costs. (*Alberta—Muir vs. Canadian Pacific Railway.*)

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON,
DEPUTY MINISTER—F. A. AGLAND.

Volume 21

MAY, 1921

Number 5

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

This issue of the LABOUR GAZETTE contains a review of a special report published by the Department on Labour Organization in Canada during 1920. It also contains a brief summary of a report of a Joint Conference of the Building and Construction Industries in Canada which has been issued as a supplement.

At the beginning of April unemployment among trade unions was 16.48 per cent of the total membership as compared with 16.12 at the beginning of March and 3.13 at the beginning of April, 1920. According to returns received from about 5,000 firms there was a slight improvement each week in the volume of employment, but the net gains were smaller than the losses registered in the previous month.

The cost of the weekly family budget of staple foods continued to decline, averaging \$12.74 at the beginning of April as compared with \$13.23 in March, \$15.99 in April, 1920, \$13.35 in April, 1919, and \$7.51 in April, 1914. The index number of wholesale prices for April fell to 253.7, as compared with 263.1 for March, 353.1 for April, 1920, 279.6 for April, 1919, and 136.7 for April, 1914.

The time loss due to industrial disputes was greater during April than during March but less than in April,

1920. There were in existence during the month 19 strikes involving about 3,697 workpeople and resulting in a time loss of 57,071 working days. At the end of the month there were on record 10 strikes involving about 1,577 workpeople.

Proceedings under the Industrial Disputes Investigation Act

During April the Department received a report from one Board of Conciliation and Investigation established to deal with a dispute between the Corporation of the City of Ottawa and certain of its employees being firemen, members of the International Association of Fire Fighters. Seven applications were received for the establishment of Boards, and a Board was established in connection with one of these applications.

Joint Confer- ence of Build- ing and Con- struction Industries

In accordance with a request of the National Joint Conference Board of the Building and Construction Industries in Canada, a joint conference of representatives of employers and employees in these industries was held at Ottawa on May 3-6, on the invitation of the Dominion Government. The request of the Board was in the following terms: "That this National Joint Conference Board requests

the Minister of Labour to call a Joint Industrial Conference in the Canadian Building and Construction Industry at as early a date as possible, attendance not to exceed thirty representatives each from employers and employees. It being understood that it is possible for the Minister to call the conference on a similar financial basis to the previous National Joint Conference, we recommend that such similar arrangement be made. Suitable representatives to the conference shall be selected by the representatives parties to this National Joint Conference Board. It is understood that each side shall give to the other, in advance, a list of the thirty representatives chosen by them. The date selected as most suitable for such conference was the first week of May, commencing with Tuesday, May 3. It was suggested that a committee of four, composed of two from each side, should meet and discuss the agenda." The agenda of the conference was as follows: (1) Existing conditions in our industry; (a) Shortage of dwelling, commercial and public buildings, (b) seasonal nature of the industry and possible methods of regulation. (2) Apprenticeship and craftsmanship; (a) consideration of National Joint Conference Board proposals; (b) development of technical training. (3) Costs and production; (a) factors in building costs, (b) efficiency and its relation to production, (c) hours of labour, (d) wages and their relation to cost of living. (4) Conditions of employment; (a) distribution of labour, (b) unemployment insurance, (c) industrial safety. (5) Development of Joint Industrial Councils.

Unanimous resolutions based on committee reports were adopted by the conference on all the five items of the agenda.

A report of the proceedings of this conference, Bulletin No. 3. Industrial Relation Series, has been issued by the Department of Labour as a supplement to the present number of the LABOUR

GAZETTE. This report contains the details of a proposed scheme for a national apprenticeship system in the building and construction industries with rules and regulations governing local apprenticeship councils and a form of indenture of apprenticeship. It also contains a proposed constitution to govern local joint industrial councils in the building and construction industries.

Proposed Sliding Scale in British Building Trades The executives of the unions affiliated with the National Federation of Building Trades Operatives met in London on March 2, 1921. The following statement on their proceedings was issued: "The report of the Wages and Conditions Councils set up for the industry has been submitted to the full joint executives of the building trades unions, and they have decided to recommend acceptance of the same by the constituent bodies and members. The principle of the scheme is that on the reduction in the cost of living by a clear 6.5 point in any period of six months, a reduction in wages of a halfpenny an hour comes into operation. A fall of 13 points in the cost of living would mean a decrease in wages of a penny an hour. The halfpenny decrease automatically works from a basis of 170 points above the pre-war cost of living." The sliding scale referred to is based on the British *Labour Gazette* cost of living number of retail prices, rents, etc.

The proposal was submitted to the constituent unions of the Federation for their opinion on April 4, 1921, but full returns are not yet to hand, although the general indication seems to point to the fact that the proposals will be accepted both by the master builders and the men. If ratification takes place, the National Wages and Conditions Council will proceed to deal with all outstanding notices for alterations and conditions now pending, but any decision they may give will not be effective until the First of August.

Industrial conditions in the United States

The Fidelity and Deposit Company of Maryland conducted an industrial survey of the United States in March, the results of which have been embodied in a comprehensive chart contained in a report of the survey issued by the company in April. This is the second industrial survey conducted by the company the first having taken place last September. A questionnaire containing 36 questions was sent to 1,049 cities and towns in all parts of the country and submitted by the company's representatives to leading business and professional men. For the purposes of the survey the country was divided into nine geographic divisions, but the investigation showed that in many respects uniform conditions prevailed in all localities. No marked resumption of industrial activity was reported. Buying by the public was still restricted, but cancellation of orders had ceased. Retailers had not stocked up in expectation of a good spring business and retail prices had not been reduced in the same proportion as wholesale prices, although the cost of living had appreciably diminished since last September. Massachusetts and New York were the only states that reported the existence of strikes, but appreciable wage reductions were reported in all the states except Illinois. These reductions were chiefly in the building and metal trades. In all districts the productivity of labour per man had increased since September. In New England and the mountain division building operations were decreasing, but elsewhere they were reported to be increasing. The need of building construction was felt everywhere, the chief demand being for low priced dwellings, but sentiment was not favourable anywhere to proceeding with building operations at the present cost.

National Conference on workers' education in United States

The First National Conference on workers' education in the United States was held in New York on April 2 and 3, at which there were present over two hundred trade unionists, teachers and students. Reports presented to the Conference showed the existence of twenty-five workers' educational enterprises in the United States. The total enrollment in twenty-three of these (excluding the Rand School and the United Labour Education Committee) carried on in twenty-two cities amounted to 4,670. All of these except three were set on foot since 1918. Most of these originated with city, state or local unions, as in the case of the Trade Union colleges of Boston, Washington and Philadelphia. Educational work has also been carried on by the International Garment Workers' Union. Classes for workers have been conducted by Amherst College, and arrangements are being made by the college of Bryn Mawr to provide an eight weeks' course for women workers next summer.

At the conference the "Workers' Educational Bureau of America" was formed, for the purpose of directing and assisting in a national way the efforts of the workers to obtain education. The objects of the Bureau are to act as a clearing house of information; an organization for publicity; a register of teachers; a laboratory on textbooks and other classroom materials, on syllabi of courses and methods of pedagogy; and an agency for the collection and co-ordination of statistics. Mr. James H. Maurer, president of the Pennsylvania State Federation of Labour, is Chairman of the Bureau and Mr. Spencer Miller, Jr., Columbia University, is Secretary.

Mine safety engineer appointed in the United States

The United States Bureau of Mines and the National Safety Council recently entered into a co-operative agreement providing for the appoint-

ment of a travelling mine safety engineer, whose duties will be: To visit the headquarters of the National Safety Council and familiarize himself with the work of its mining section, and visit and acquaint the mining company members of the Council with the scope of the technical safety service available to them through this agreement; to familiarize himself with the best methods of preventing accidents as demonstrated by the mining companies who are most advanced in this respect; to establish cordial relations with the mine superintendents and foremen, and disseminate suggestions looking to improved practices, which shall be free from criticism of the practices he finds; to collect photographs, blue prints, sketches, and other information suitable for the preparation of "Safe Practices" leaflets of the National Safety Council and bulletins, technical papers and other publications of the Bureau of Mines; to co-ordinate and develop the safety work of the mining section of the National Safety Council with the safety work of the Bureau of Mines; to disseminate among the operators, foremen and workmen in the mining industry, by personal visits and orally, the arguments for and against increased or new activity along any line of endeavour or research, looking to increased safety in the mining industry.

Second meeting of International Congress of Working Women The Executive Committee of the International Congress of Working Women has announced that the second meeting of the Congress will be held at Geneva in October, 1921, one week previous to the opening of the Third International Labour Conference (League of Nations). The first meeting of the Congress was held at Washington in October, 1919, prior to the first International Labour Conference (see LABOUR GAZETTE, November, 1919, page 1318). The accredited trade union organizations will be entitled to ten delegates for each country.

The agenda for this meeting will include: 1. The permanent constitution of the International Congress of Working Women; 2. report on the resolution adopted at the Washington Congress in October, 1919; 3. discussion on the next steps in reconstruction; 4. discussion of the following questions on the agenda of the Third International Labour Conference (League of Nations): (1) Reform of constitution of the governing body of the International Labour Office; (2) agricultural questions; (a) the adaptation of the Washington decisions to agricultural labour, regulation of the hours of work, measures for the prevention of or providing against unemployment, and protection of women and children; (b) technical agricultural education; (c) living in conditions of agricultural workers; (d) guarantee of the rights of association and combination; (e) protection against accidents, sickness, invalidity and old age; (3) (a) disinfection of wool infected with anthrax spores; (b) prohibition of the use of white lead in painting; (4) the weekly rest day in industrial and commercial employment; (5) (a) the prohibition of the employment of any person under the age of 18 years as trimmer or stoker, and (b) compulsory medical examination of all children employed on board ship.

Agricultural employment offices in France

During the war, the Minister of Agriculture of France formed an employment service for agricultural labour. In addition to a central office, the service consists of departmental offices established by agricultural associations, and frontier employment offices for foreign labour. These offices were re-organized last September and their duties were defined as follows: To recruit and place workers who are suited for farm work; to place unemployed of both sexes and disabled persons suited to agricultural work; to place tenant farmers, *métayers* and foremen; to recruit seasonal workers; to distribute military labour; to

arrange for the employment of young persons during school vacations; to discover model farms suitable for apprenticeship and to organize centres for apprenticeship; to recruit apprentices and place them after apprenticeship; to issue an appeal to foreign workers with a view to their establishing correct relations with the immigration officers; to issue circular letters, pamphlets, etc., to employers, advising them as to the methods of treatment, housing and feeding of immigrants, which methods are to be in accordance with national tastes and customs; to ameliorate the conditions of life of rural workers; to make thorough investigation of the arrangement of work, etc. on farms; to publish monographs dealing with farms on which the labour problem has been satisfactorily solved; to inquire into questions of wages (estimating the value of wages paid in kind), bonuses, economies effected in costs, family allowances, pensions, lodging accommodation, and the feeding of agricultural workers. Employers are required to pay the cost of hiring to supply the departmental bureau with funds for the cost of hiring and travelling expenses, the amount to be fixed by the bureau. Applicants for foreign labour may be required to deposit an additional sum to provide compensation for employers who may suffer loss through the breaking of an engagement for which they are not responsible.

Amsterdam

Building Guild

A building guild has been formed at Amsterdam for the purpose of carrying on building operations and forming similar organizations in other places in the Netherlands, with a view to the creation of a national guild. The Social Democratic, Syndicalist, Christian and Catholic Building Unions are each entitled to two members on the guild council, and provision is made for other unions to have representation on it. The objects of the Guild are similar to those of the Manchester Building Trades Guild, an account of which appeared in the LABOUR GAZETTE for April, 1920, on page 424.

The Directorate consists of a director, who attends to the general development of the guild and acts as its representative in dealing with house proprietors and architects; the secretary, who must consult regularly with trade unions, see that guild workers keep trade union rules, collect statistics of wages, prices of materials and building costs, and promote the formation of building guilds in other localities; and the administrator who acts as treasurer. Special rules are to be fixed concerning wages and conditions of work. The guild directorate decides where a worker is to be employed, and it may transfer him from one job to another at the end of an agreed period. If a guild worker resigns from his trade union he is struck off the guild list.

Italian Labour Federation and International organizations

The Italian General Federation of Labour, at a national conference held at Leghorn in March, by a vote of 1,435,873 to 432,588 rejected a resolution censuring the moderate or progressive labour leaders and calling for revolutionary methods. This vote, according to the Rome correspondent of *The Survey* (New York) "shows that the labouring masses have faith in gradual conquest, and are opposed to plunges in the dark and catastrophic solutions by small revolts." Early this year the Communists broke from the Socialist party, but continued as members of the Labour Federation in the hope of influencing its policy. They contended that the labour movement was being conducted by the present leaders in a bureaucratic spirit, that the real voice of the workers was suppressed by official "mandarinism," and that the emancipation of the proletariat could only be accomplished through direct action by workers' organizations. To these criticisms the more moderate party replied that the plans of the Communists were impracticable. The Federation moreover re-voted adherence to the Socialist party, an organization recently excommunicated by the Moscow International

ale, in preference to the new Communist party. At the same time, however, a vote was carried that the Federation participate in the Moscow International, on condition that the latter agrees to revoke its recent pronouncement and accepts the Socialist Party as officially representing the workers of Italy. Should the Moscow Communists decline to accept this condition the General Federation will continue to be affiliated as at present with the International Federation of Trade Unions. (See LABOUR GAZETTE, January, 1921, page 68.) The General Federation was organized in 1906 with 150,000 members, and has now a membership of two and a half million workers.

Jottings

A report of the proceedings of the eighth annual meeting of the International Association of Public Employment Services, which was held at Ottawa on September 20-22, 1920, has been published by the Department of Labour. An account of this meeting appeared in the issue of the LABOUR GAZETTE for last October.

In the April issue of the LABOUR GAZETTE, on page 589, it was stated that minimum wage boards existed in the provinces of Quebec and Nova Scotia. While a minimum wage act providing for a board became law in Quebec on March 17, 1919, and a similar law was passed in Nova Scotia in 1920, it appears that boards have not yet been appointed in either of these provinces. In the latter province the law will come into force by proclamation.

A convention of the International Typographical Union will be held at Quebec city in August next.

Under a group insurance contract recently signed by the city of Calgary for its employees, linemen of the electric light department as well as firemen and policemen have been entered on the list for free accident and sick benefit insurance from the city. The contract also

provides that employees who leave the service of the city may continue their policies by assuming all premium charges and paying same to the city.

The annual report of the Ontario Pulp and Paper Makers' Safety Association states that in the pulp and paper industry, including wood operations, compensable accidents increased from 1,461 non-fatal and 16 fatal in 1918 to 1,563 non-fatal and 13 fatal in 1919. During the same period the number of full year workers increased from 10,045 to 10,250, and the time lost decreased from 22,489 days to 21,003 days. In order to stimulate interest in accident prevention work, a competition for the best accident record for 1921 has been inaugurated. The mills are divided into two groups and the prizes take the form of two shields. The expenses of the association for 1920 amounted to \$4,964 as compared with \$4,008 in 1919.

The Ontario Motor League has offered, through the Ontario Safety League, 140 cash prizes ranging in value from \$1 to \$10, and totalling \$200, to school children in Ontario (a) of 12 years and under, and (b) of 13 years and over, for compositions in English, prose or verse, upon "How Children May Help to Avoid Motor Accidents." Prose compositions must be confined to 150 words, and poetry to 16 lines. The contest will close June 1, 1921. Further particulars may be obtained by writing to Safety Essay Contest, Ontario Safety League, 189 Church Street, Toronto.

The women's section of the Alberta Workmen's Compensation Board have decided to give special instruction in first aid work to women employees of factories and shops in Alberta.

A bill providing for the establishment of the 8-hour day in all industries of Manitoba was rejected by a committee of the provincial legislature on April 26. The vote was 12 for reporting the bill and 29 against.

The ladies' auxiliary of the Joan of Arc Institute, Ottawa, have completed

arrangements for the opening of a club room for household workers where members may rest or entertain their friends. The room will be under the supervision of the institute, and two members of the auxiliary will attend each evening from 7 to 10.30 p.m. An annual fee of \$1 will be charged to members.

Professor L. W. Gill, Director of Technical Education for Canada, recently visited Halifax and other centres on the east coast in connection with establishing vocational classes for fishermen. A conference of university representatives and a number of the leading fishermen of the province was held at Dalhousie University. Dr. F. H. Sexton, Director of Technical Education for Nova Scotia, stated that classes for fishermen would be commenced in selected centres throughout the province.

The amount required to cover the expenditure for vocational education in New Brunswick for the current year is estimated at \$30,000, whereas the total expenditure for this purpose last year amounted to \$13,028.

By a law of the Swiss government which became effective on February 1, 1921, there has been established a Federal Department of Labour as a section of the Department of National Economics.

The tenth congress of the International Co-operative Alliance will be held at Basle, Switzerland, during the week of August 22, next.

Arrangements have been made for the holding of this year's International Mine Rescue and First Aid meeting at St. Louis, Mo., on September 1-3. Delegates representing Canada, England, France, and Belgium are expected to attend. A conference will be held dur-

ing the meeting on standardization of mine rescue methods. There will also be displayed commercial exhibits of mine rescue apparatus.

According to a report by the United States Consul-general at Stockholm, the eight-hour law of Sweden which became effective on January 1, 1920, resulted in the following year in a decline in production proportionate to the decrease in the hours of labour. In 1919 the working time in industrial establishments was 51 $\frac{1}{3}$ hours per week, and the reduction to 48 hours lessened the output in the following year by 7 per cent. The Government accordingly has commissioned the Royal Social Board (Kungl. Socialstyrelsen) to investigate the report upon the advisability of a modification of the law.

Under an unemployment relief plan recently adopted in the zinc lead district of Oklahoma, the mining companies and the miners pay equal amounts into a fund which is spent by a Central association on productive local work carried out by the unemployed. In three weeks ending March 5, the Association raised \$2,700, of which the mining companies gave \$1,000, and the employed miners an equal amount by paying 25 cents per week each, the balance coming from mine supply houses and individuals. Unemployed miners were given work on the local roads at \$2 per day.

Announcement has been made of the eighteenth economic essay contest for prizes donated by the Chicago tailoring firm of Hart, Schaffner & Marx. Two prizes, a first of \$1,000, and a second of \$500, are offered in Class B, which includes undergraduates of any American college. Class A is open to any other American without restriction, a first prize of \$300, and a second prize of \$200, being offered in this class.

INDUSTRIAL CONDITIONS DURING APRIL, 1921

I.—General Review

Industry continued to decline during the first two weeks of the month, the downward tendency in the second week being exaggerated by fluctuations in the Iron and Steel group resulting from temporary shutdown of railway shops. In the third week the re-opening of these shops over-emphasized to a certain extent the upward movement shown in the industries generally, but in the fourth week this upward movement was shown in its normal proportions. In those industries that showed any noticeable change during the month, such changes were of a fluctuating nature. Logging, which was due for the usual seasonal decline upon the closing down of winter camps, showed losses in all except the fourth week of the month, when increased activity in river driving in Quebec and in general operations in British Columbia, occasioned a favourable balance. On the other hand Lumber, by reason of seasonal resumption of activity in saw mills, showed decided gains in the latter half of the month; in the first two weeks the season was not sufficiently advanced to permit of much expansion. In the Manufacturing industries the Iron and Steel group lost ground considerably, an upward movement in the third week of the month being a result merely of the abnormal movement in railway shops already noted. The Textile group showed steady reductions throughout the month, largely in the provinces of Ontario and Quebec. Much the same situation prevailed in Rubber products. Toward the end of the month the Leather industry, more especially in the foot-wear section, experienced a fairly substantial recovery, chiefly in Ontario and Quebec. The only notable movement in Food products

was a seasonal revival in fish canning and packing on the Atlantic and Pacific coasts. Another gain of some importance was in the Tobacco industry, chiefly in Quebec. During the month Railway Transportation, Construction and Maintenance exhibited a general decline, many employees being laid off. On the other hand, Water Transportation slightly increased its operations, shifting from the winter ports of the Maritime Provinces to the St. Lawrence and Upper Lake ports; on the West coast activity was somewhat less marked than usual. The Mining situation varied according to districts; in Nova Scotia the situation was unfavourable, while in Northern Ontario metalliferous mining commenced seasonal activity, and in the West the coal situation swung from a decline in the early part of the month to a slight advance during the last week.

The loss of time on account of industrial disputes was greater than during March, 1921, but not as great as during April, 1920. There were in existence at some time or other during the month 19 strikes, involving 3,697 workpeople and resulting in an estimated time loss of 57,071 working days; as compared with 26 strikes, 3,252 workpeople and 52,928 working days in March, 1921; and 44 strikes, 6,349 workpeople and 84,099 working days in April, 1920. On April 1, there were on record 9 strikes affecting 1,159 workpeople. Ten strikes were reported as having commenced during April, as compared with seven during March, 1921. Three of the strikes commencing prior to April and six of the strikes commencing during April were reported terminated, leaving 10 strikes, involving 1,577 workpeople on record at the end of the month.

The downward movement of prices continued during April, the most important changes being declines in prices of grains and hogs with seasonal decreases in butter, cheese, milk and eggs. In materials there were again numerous declines in leather, textiles, metals and building materials. There were increases in cattle and beef and a rise in sugar of 50 cents per hundred pounds. The Departmental index number of wholesale prices was down to 253.7 compared with 263.1 for March, 353.1 for April, 1920, 279.6 for April, 1919, 269.4 for April, 1918 and 136.7 for April, 1914.

Prices

In retail prices, the average cost of a

list of staple foods in sixty cities was \$12.74 for April as compared with \$13.23 for March, \$15.99 for April, 1920, \$13.35 for April, 1919, \$12.57 for April, 1918, and \$7.51 for April, 1914. The chief changes for the month were in eggs and in potatoes, decrease in these commodities accounting for a fall of 36 cents out of 50 cents in the budget. Sugar and butter showed slight increases, meats were practically unchanged and there were slight decreases in rolled oats, rice, prunes and evaporated apples. In fuel, coal was slightly lower, as is usual in the spring for a short time. Rent showed a slight increase in the average and further increases to become effective in May were reported.

II.—Industries and Trades

Logging

THE logging situation in the Maritime provinces reflected the usual seasonal decline consequent upon the closing down of the winter camps. An added factor in the general slackness was the unsatisfactory condition of the lumber market. The situation varied but little between districts; possibly there was less activity in this industry at HALIFAX, SYDNEY, and FREDERICTON than at NEW GLASGOW and MONCTON. Disputes between employers and men over the resumption of the ten-hour day are said to have been responsible in part for the stated intention of several large firms to leave their drives in the streams this season rather than to bring them out to the mills as usual. In the Province of Quebec the seasonal decline in camp work was partly offset by an increase in river driving, water conditions being favourable in all districts. There was a notable increase in activity at ST. GABRIEL de BRANDON, LA TUQUE, ST. JOVITE STATION and HULL. At MONTREAL and MUNGO there was little change, while at LOUISEVILLE, BREAKEYVILLE and THREE RIVERS there were reductions in staffs. In Ontario condi-

tions were not so favourable, the cessation of work in camps overbalancing river-driving activities. In Northern Ontario at COBALT, NORTH BAY, SUDBURY and TIMMINS, the amount of pulpwood cut this year exceeded that of other years, but the market was not active and the companies did not appear anxious to start driving. At PEMBROKE the Ottawa river drive had started, though not to the extent of last year. At FORT WILLIAM and PORT ARTHUR, bush work was curtailed greatly and river driving had commenced. In Manitoba the situation was somewhat similar. At THE PAS the closing down of lumber camps caused slackness, only partially offset by river work. There were slight declines in the volume of business in the PRINCE ALBERT district. In British Columbia the situation was reversed; there was the usual seasonal increase in activity consequent upon the opening of the summer camps in combination with river driving. Work at FERNIE and NELSON was temporarily delayed by snow and shortage of water. CRANBROOK, NANAIMO and PRINCE GEORGE districts did not develop much activity, in contrast with PRINCE RU-

PERT and REVELSTOKE, where work had started fairly well. In VANCOUVER district the industry was reported to be only some 50 per cent active with wages decidedly lower.

Mining

On the whole, the coal mining situation in the Maritime Provinces was unfavourable. At AMHERST and INVERNESS this industry was still slack, and at NEW GLASGOW and SYDNEY the mines were working only part time. With the re-opening of navigation a slight improvement took place, with further improvement anticipated. In QUEBEC there was fair activity in the asbestos mines, notably in SHERBROOKE district. Quarrying companies in this district and in QUEBEC district resumed normal operations. In ONTARIO there was a fairly general seasonal resumption of work in metalliferous mining. Mines already operating at COBALT remained open, though there were no indications of the re-opening of those recently shut down. It was stated that the market price of silver remained at a level which renders production unprofitable for some properties. In the KIRKLAND LAKE district there were good prospects of increased seasonal expansion, due in part to new developments. A temporary stoppage at the NIPISSING MINE was caused by fire. In NORTH BAY and SUDBURY districts the industry was still inactive, but at TIMMINS the mines were gradually increasing the scale of their operations as power once more became available.

In Manitoba there was promise of growing activity in the FLINFLON district. In Alberta there was some improvement in the coal mining situation; at DRUMHELLER one mine had re-opened and at EDMONTON there was increased activity at the Brule mines. The Sullivan mine at KIMBERLEY, B. C. was operating normally, but no silver-lead mines in that district were open. Coal mines at FERNIE, COAL CREEK and MICHEL were running on part time. At NANAIMO one large coal company was

running on part time and practically all mines were operating irregularly. At GRANBY and NELSON there was only slight activity, and the silver-lead mines in the SLOCAN district were still closed. Gold and gold-copper properties were producing very little.

The Manufacturing Industries

In the Maritime provinces the most notable improvement in food products

Food	was in fish and lobster
PRODUCTS.	canning and packing,
	a seasonal development.

At NEW GLASGOW, while the lobster factories were operating normally, it was reported that the low price of fish meant reduction in factory operations. Biscuit factories and sugar refineries in the Maritime district were about normal, but other lines showed slackness. At HALIFAX plants of all descriptions were working with minimum staffs. At MONTREAL the strike of meat cutters was still a factor in the subnormal condition of abattoirs, while flour and feed and allied lines showed no recovery compared with last month. There was a noticeable gain, however, in the tobacco industry. In QUEBEC abattoirs and packing houses were somewhat below normal. Dairy and creamery operations had been resumed and business in these lines was fairly brisk throughout the province. At PETERBOROUGH all firms engaged in manufacturing food products were experiencing quiet conditions, while at BRANTFORD the biscuit companies were running full time with full staffs. At CHATHAM a packing-house strike over a reduction in wages caused a temporary shut-down, but business was later resumed. Plants in this group at KITCHENER were reported as normal. Throughout the Prairie Provinces food manufacturing plants were running below normal. The same conditions obtained in British Columbia with the notable exception of plants in fish canning and packing districts, which were busy with the seasonal intake.

This industry was still experiencing depression throughout the Maritime provinces. At HALIFAX the rolling mills, foundries and machine shops were working with reduced staffs; at NEW

GLASGOW the shops had laid off men and the steel and coal works were practically closed. With the exception of a nail mill and 16 inch mill all operating plants were on part time. At NORTH SYDNEY a foundry was re-opened on part time; another firm which had no new orders in sight were using their staff in local improvements to the plant. The engineering works at AMHERST were practically idle. At SACKVILLE moulders and polishers lost some time through an industrial dispute. At MONCTON some men were laid off in the railway shops, and other plants were scarcely normal. Rolling mills and forging plants at MONTREAL showed increased activity, but steel shipbuilding and repairing, railway car shops, machinery plants and locomotive works were reducing staffs. At SOREL the shipyards were discharging employees; the yards at THREE RIVERS showed no change. At SHERBROOKE machinery plants were slightly reduced; the same condition prevailed in the bridge works at LACHINE. Arsenal work at QUEBEC, the cartridge plant at BROWNSBURG and sewing machine plant at St. JOHN'S were about normal. At BELLEVILLE one railway shop laid off a considerable number of employees; at KINGSTON the locomotive works had made further reductions in staff. At OSHAWA the motor industry showed symptoms of seasonal revival but foundries reduced staffs and were working only part time. At PETERBOROUGH the cream separator plant reduced its staff and other branches of the industry were very slack. At St. CATHARINES some tool companies still remained closed and other large plants were carrying on curtailed operations. At CHATHAM motor companies were increasing their output while agricultural implement firms

were running only part time. Sewing machine plants at GUELPH reduced staffs and other branches were likewise in a depressed condition. At LONDON the railway shops were running short time and making reductions; the situation was much the same at St. THOMAS. At SARNIA foundries and bridge works anticipated improvement and were adding slightly to staffs, while stove firms were still working part time only. At TORONTO agricultural implements, machinery, sheet metal, foundry and machine shop and steel car plants were contracting payrolls, while slight increases in activity were shown by steam engine and boiler firms, steel shipyards and wire fence plants. At WINDSOR motor companies were working five days per week instead of four as formerly. At FORT WILLIAM the car plant closed down indefinitely and laid off a large number of employees. At PORT ARTHUR the ship yards were finishing their last order with no others in sight. Throughout the PRAIRIE PROVINCES the situation was much the same; in general there was a decided depression. At WINNIPEG the railway shops were averaging only three days per week and other firms experienced little change. In British Columbia conditions were relieved somewhat by activity in ship building at PRINCE RUPERT, but in VANCOUVER and VICTORIA the industry as a whole was dull.

In the Maritime Provinces and in the Province of Quebec the leather industry experienced more favourable conditions but LEATHER AND RUBBER rubber factories continued to release employees. At AMHERST the boot and shoe company was giving some of their staff casual employment; in QUEBEC, MONTREAL and St. HYACINTHE most boot and shoe firms were working full time again and increasing their staffs. In MONTREAL, GRANBY and St. JEROME rubber plants almost without exception were running below normal. At St. CATHARINES the rubber company

had closed down indefinitely, at KITCHENER rubber plants were running part time only, with about half the usual number of employees. At ST. THOMAS, LONDON and TORONTO shoe factories were again quite busy, but rubber factories were operating at much less than capacity.

In the Maritime Provinces lumbering experienced the usual spring revival.

At SYDNEY and MONCTON saw mills were again in operation.

Many large mills in New Brunswick were operating on a 10-hour day basis with about 15 per cent reduction in wages. Barrel and other wood products factories were about normal. At FREDERICTON a mill strike somewhat interfered with production. At AMHERST the mills were working fairly steadily. In the Province of QUEBEC the situation was not so good. At HULL, ST. PACOME, SAYABEC, QUEBEC, BEAUHARNOIS and COATICOOK the lumber mills were running on reduced staffs; at COWANVILLE and MONTREAL there was little change; at SOREL, BREAKEYVILLE and PORT ETCHEMEN there was increased activity. At MONTREAL and SHERBROOKE wood and furniture factories were running at normal. In the Province of Ontario there was an increase in activity in this group, due largely to resumption of work in saw mills. At PEMBROKE it was anticipated that all mills would be running by the beginning of May. At PETERBOROUGH the local mills completed repairs and began cutting stock. At KITCHENER the wood working factories, including pianos, were still below normal, working only about four days per week with reduced staffs. The saw mills had recommenced operations at SARNIA. In Manitoba conditions were not so favourable as in Ontario; but mill activities were to be resumed at an early date. At VANCOUVER it was reported

that saw mills in the Fraser district were cutting only about half the quantity of last year. At PRINCE RUPERT, however, mills were operating on the same scale as in 1920. At NANAIMO operations had not yet been resumed but at NELSON, PRINCE GEORGE, REVELSTOKE, and FERNIE mills had reopened, and in NEW WESTMINSTER there had been improvement in this industry.

Conditions in Pulp and Paper mills in the Maritime Provinces on the whole were slightly better. At MONCTON the pulp mills had recommenced operations with wages greatly reduced and working 10 hours per day. Near ST. JOHN a new pulp and paper mill was manufacturing fibre packing cases and packing material. The same firm was also developing a mill at BEAR RIVER. At CHATHAM and ST. JOHN there was increased activity. At LIVERPOOL the mills made reductions in the number of employees. In the Province of Quebec the situation was similar. At HULL, SHAWINIGAN FALLS, DONNACONA, BAGOTVILLE and LA TUQUE there were minor increases in activity; this was much more marked at CHICOUTIMI, while at KENOGAMI there was no change. At CHANDLER, CAP MAGDELEINE, THREE RIVERS, WINDSOR MILLS and EAST ANGLUS reductions were made in staffs and operations were curtailed. Paper box factories throughout the province were about normal. In Ontario there was a decided decrease in activity at SMOOTH ROCK FALLS, HAWKESBURY, OTTAWA, and CORNWALL and to a less extent at SAULT STE MARIE, TORONTO, IROQUOIS FALLS and ESPANOLA. The beaver board plant at THOROLD lost heavily by fire. The industry was slightly better than the previous month at STURGEON FALLS, but the situation was unfavourable in the province as a whole. In British Columbia the situation was slightly improved. A new pulp and paper company was beginning operations at PRINCE RUPERT.

In the Maritime Provinces the textile industry was dull. At AMHERST the

TEXTILE PRODUCTS.

woollen mills were still closed; at MONCTON the woollen mills were about normal, but the cotton mills were running only three days per week and the linen mills were still closed down. In the Province of Quebec the industry was much brisker. In MONTREAL a few large firms made slight reductions in staffs, but others showed increases, more especially in garments, thread, yarn and cloth. At QUEBEC the corset plant was more active; at SHERBROOKE and THREE RIVERS thread, yarn and cloth plants mainly showed gains. Hosiery and knit goods at ST. HYACINTHE showed a decline, employees being let out. At ST. JOHN'S, MAGOG and MONTMORENCY FALLS the thread, yarn and cloth mills showed uniform gains, while at VALLEY-FIELD the cotton mills were below normal. At PETERBOROUGH the textile business was better than for some months, but factories were not yet running at full capacity. At ST. CATHARINES silk, knitting and hair cloth plants were operating with reduced staffs, trade being somewhat dull. At CHATHAM the textile plants were running full time, while at GUELPH the spinning mills were working only three days per week. The Felt factory at KITCHENER was closed down. At TORONTO thread, yarn and cloth plants showed slightly increased activity; knitting and hosiery plants showed small declines, while the garment firms had changed but little as compared with the previous month.

Through the Maritime Provinces generally other industries were operating with reduced staffs,

MISCELLANEOUS MANUFACTURING.

with the exception of the oil company at HALIFAX where business in that line was fair. In QUEBEC brick making was fairly good, in anticipation of the building demand, while paints, varnishes,

chemicals and drugs were normally active. In MONTREAL brass, bronze and copper products showed improvement. Jewellery firms in MONTREAL and SHERBROOKE were reducing staffs. At SHAWINGAN FALLS the aluminum plant, and at MAISONNEUVE the can factory were below normal. The nickel plant at DESCHENES laid off 300 men with a view ultimately to closing the plant. In Ontario conditions were similar. Brick and tile making was resuming normal operation in view of building demands. In HAMILTON an American brush company opened a new branch in that line. In GUELPH plants producing electrical accessories reduced their staffs and other lines were running short time, in some cases at only about 30 per cent capacity. At KITCHENER the situation remained below normal and at SARNIA oil companies had laid off a number of workers. In the Prairie Provinces conditions generally were dull, an exception being the briquetting plant at ESTEVAN, Saskatchewan, which had commenced operating at full capacity. In British Columbia oil firms were dull and explosive plants running less than full time.

Construction

The value of building permits in 56 cities during March amounted to \$6,610,703 as compared with \$3,216,085 (revised figure) in February. The Canadian Pacific, Grand Trunk and Canadian National Railways reported an increase in the volume of employment afforded on railway construction, including maintenance of way, during the month of April, there being some 2,400 more persons on the payrolls of these companies at the end of April than at the end of March. The chief item in this increase was the addition of about 1,500 employees to the staff of the Canadian Pacific Railway. In the Maritime provinces generally building operations were getting under way but slowly. At AMHERST there was little or no construction work, but road work was starting and there was

some double tracking to be done by the railways. At HALIFAX construction was brisker, with longer hours and lower wages, and with road construction also beginning. As yet there had been no activity in this line in NEW GLASGOW, though survey parties were out on the highways. Material had arrived for the new marine slip in SYDNEY; beyond that there were repair jobs only. At MONCTON also construction work was getting under way very slowly, the bulk of the work being casual repairs. In this city there was some difficulty in adjusting the wage scale. At ST. JOHN some power house and Federal Government construction work was commencing, as also a new dry dock. In MONTREAL the building industry was very quiet. QUEBEC had commenced repair work only, with lessened activity on the docks. In NORTH BAY building was practically at a stand-still, but considerable railroad construction was commencing. At TIMMINS work was slow in commencing but the mining companies were preparing for extensive construction work on houses. At BELLEVILLE the provincial highway started operations, as also at KINGSTON, but building was practically at a standstill. In OTTAWA and TORONTO much construction work was being held up until the wage schedules should be worked out. At PEMBRIDGE some small contracts were commenced and at HAMILTON there was some improvement in this industry. WINDSOR also was held up by wage disagreements, and at numerous other points the situation was developing very slowly. In Manitoba much the same conditions prevailed. At BRANDON the railway bridge staff was reduced and all construction work was cancelled. Local construction as yet had scarcely begun. At WINNIPEG the wage schedule was not yet settled and hence there was no pronounced activity. At THE PAS some construction work on the Hudson's Bay railway was started but at other points this industry was very quiet. Saskatchewan and Alberta reported much the same state of affairs;

SASKATOON and REGINA had little demand for the building trades, while in CALGARY there was only slight activity. In Alberta generally a few large contracts had improved the situation somewhat; thus at EDMONTON work was commencing on telephone construction and a municipal building. In British Columbia the Government road crews were going out to work, although there was a decline in wages. At NEW WESTMINSTER there was some activity in construction work and at VICTORIA railway work, both steam and electric, had revived, also operations on the dry dock. At VANCOUVER there was little call for men for the railroads compared with previous years; wages were lower and hours longer for extra gangs. In other parts of the province construction work was mainly in logging roads, building saw mills and repair work, although at PRINCE RUPERT the industry was fairly active because of the commencement of work on the new ocean docks.

Transportation

The gross earnings of the Canadian Pacific Railway in March were \$14,705,726 as compared with \$15,715,936 in March, 1920. The gross earnings of the Canadian National Railways in April were \$8,164,955 as compared with \$7,977,478 in April, 1920. During April the number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways in railway operation, including general offices, trainmen and engine crews, station employees, sleeping, parlour and dining car employees, showed a reduction of about 1,900 persons. The Canadian National Railways reduced their staffs by about 1,100 persons and the Canadian Pacific Railway by about 800 persons; the Grand Trunk Railway staffs showed no change since the end of March. Shipping and longshore work in Eastern Canada showed the usual spring revival, activity moving from the Maritime winter ports to the St. Lawrence and Upper Lakes ports. At HALIFAX shipping was declining, trans-Atlantic liners making their last call

of the winter season. Longshore workers were going to MONTREAL and QUEBEC or to fishing centres along the coast. The MONCTON-ST. JOHN river steamers were again operating. The Canadian National Railways reported passenger business good but volume of freight decreased. At NEW GLASGOW there was a noticeable increase in coastwise shipping. Passenger steamship service between PICTOU and CHARLOTTETOWN was being established. At SYDNEY no marked activity yet prevailed and it was stated that large ice floes, hugging the coast, continued to hinder the opening of navigation. At ST. JOHN winter port

activities were ceasing. At MONTREAL and QUEBEC navigation and longshore work was lively, and the same condition prevailed to a less extent at FORT WILLIAM and PORT ARTHUR, SARNIA, OWEN SOUND and TORONTO. On the Pacific coast minor decreases in both water and rail transportation occurred.

Trade

Throughout the Dominion generally retail trade remained at about the same level as in March, but there were slight increases in wholesale business. The normal spring recovery appeared to be slow in coming.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

PROCEEDINGS FOR THE MONTH OF APRIL, 1921, WITH TEXT OF BOARD'S REPORT

DURING the month of April the Department received a report from the Board established to deal with the dispute between the Corporation of the City of Ottawa and certain of its employees, being firemen, members of the International Association of Fire Fighters. Seven applications were received for the establishment of Boards and advice was received in connection with an application which had been received during the previous month that a settlement had been reached by renewed negotiations.

Applications Received

During the month of April applications for the establishment of Boards were received as follows:

(1) From the employees of the Toronto and York Radial Company, on the Metropolitan, Mimico and Scarborough Divisions, being linemen, wiremen, train despatchers, operators, etc., members of the Toronto Branch of the Canadian Electrical Trades Union. This dispute was investigated by a

special officer of the Department and in view of certain negotiations which were in progress with respect to the transfer of the property concerned the matter of establishing a Board was left in abeyance pending results.

(2) From certain of the employees of the Greater Winnipeg Water District Railway, being enginemen, conductors, trainmen, etc. This dispute was investigated by an officer of the Department, and it was explained to the parties concerned that as the railway was one under municipal control a Board could be established only upon the joint consent of the disputants. The consent of the employing body was declined and no further action could, therefore, be taken by the Department. Advice was received, however, that negotiations between the disputants had been renewed and would indicate that a satisfactory adjustment might be reached.

(3) From the employees of the Canada Steamship Company, operating on the Great Lakes of Canada, being firemen, oilers, wheelmen, watchmen, deck

hands, cooks, stewards, etc., members of the Sailors, Firemen and Cooks' Union of Canada. A Board was established, Mr. A. E. House, Midland, Ont., being appointed a member on the nomination of the employees concerned. The Board had not been completed at the close of the month.

(4) From the employees of the Algoma Eastern Railway, Sudbury, Ontario, being members of Division No. 4, Railway Employees' Department, American Federation of Labour. This application was under consideration at the close of the month.

(5) From the employees of the Ottawa Branch of the Association of Canadian Building and Construction Industries, being members of the Ottawa District Council of the United Brotherhood of Carpenters and Joiners. In this case the disputants were advised that joint consent to the establishment of a Board would be necessary as the industry concerned was not one which fell within the scope of the Industrial Disputes Investigation Act. This consent was refused by the employing body.

(6) From the employees of the To-

ronto Hydro Electric System, being linemen, operators, etc., members of the Canadian Electrical Trades Union, Toronto Branch. This application was under consideration at the close of the month.

(7) From the employees of the Maritime Nail Company, St. John, N. B., being members of Nail Makers' Union No. 14199, American Federation of Labour. This industry was not one which fell within the scope of the Industrial Disputes Investigation Act, and the disputants were advised that their joint consent would be necessary before a Board could be established. This consent had not been received from the company at the close of the month.

Other proceedings under the Act

During the month of April, through the mediation of an officer of the Department, a satisfactory adjustment was reached in connection with the dispute between the Corporation of the City of Saskatoon, Sask., and its street railway workers, for which an application for a Board had been received during the month of March.

Report of Board in Dispute between the Corporation of the City of Ottawa and its Firemen

A report was received from the Board established to deal with the dispute between the Corporation of the City of Ottawa and certain of its employees, being firemen, members of the International Association of Fire Fighters. The Board was composed as follows: Captain W. P. Grant, appointed on the joint recommendation of the other two members, Messrs. Ainslie W. Greene and Daniel McCann, Ottawa, nominees of the City and employees respectively. The report was unanimous and, while the Board did not concur in the employees' demand for increased

wages, certain recommendations as to changes in working conditions, etc., were made.

Report of Board

In the Matter of the Industrial Disputes Investigation Act and of a dispute between the Corporation of the City of Ottawa, (Employer), and its Civic Employees, members of the Local Union, International Association of Fire Fighters, (Employees.)

To The Honourable,

Senator G. D. Robertson,

Minister of Labour, Ottawa.

The Board appointed to investigate the dispute between the above parties, convened at the City of Ottawa in the City Hall on the 11th of April, 1921, and held sessions on the 12th, 19th, 20th, 21st, 25th, 27th, 30th and May 2nd.

Mr. F. B. Proctor represented the city and Mr. Donald Dear represented the Fire Fighters.

In their application for appointment of a Board of Conciliation and Investigation, the Civic Fire Fighters requested an advance of \$300 over their present rate of wages, that the maximum rate of pay be reached in two years instead of three as at present, that two extra district chiefs be appointed, and that the city take over the expense of the telephones in the men's homes.

In the matter of wages your Board finds that in 1917 the men were paid \$990, in 1918 \$1,100, in 1919 \$1,200, and in 1920 \$1,500, the cost of living being responsible for the proportionately large increase in 1920 over that of previous years.

In support of their claim for a further increase of wages, the men urge the high cost of living, the fact that the fire fighters in other cities receive a higher rate of pay, and also that the police of the city of Ottawa are paid a higher rate than the city fire fighters.

In reply, the Corporation maintains that local conditions determine the rates of pay in different cities, not only among civic employees, but also in other channels of industry, that the pay of policemen has no more bearing on that of the fire fighters than on that of any other class of civic employees, whose rates of pay may differ, and that the cost of living has decreased and is steadily decreasing.

The request to have the maximum rate of pay reached in two years was

not pressed very seriously, the experienced members of the brigade being of the opinion that with rare exceptions men could not qualify as efficient fire fighters in two years. At present new men begin at \$1,200 rising \$100 yearly until the maximum of \$1,500 is reached.

On the request that two extra district chiefs be appointed to allow the two present district chiefs the benefit of the two platoon system, the Corporation was of the opinion that this expense might be avoided by making the present district chiefs, deputy chiefs to cover the entire city as the necessity arose.

To the request of the fire fighters that the Corporation of Ottawa take over the expense of the telephones in the men's homes, the Corporation replied that at the time of the installation of the two platoon system the men, in view of the improved conditions and the additional benefit to be derived from telephones in their homes under the new system, offered to bear the expense of the telephones. The fire fighters maintain that, as the telephones are only used, as regards the city's business, in cases of second alarms, the expense is out of all proportion to the number of second calls in a year as borne out by the records.

Your Board having heard all the evidence given and arguments advanced (it may be said here that wide latitude was given both sides in producing their evidence) came to the conclusion that, taking into consideration the substantial advance in pay made to the firemen last year, and the fact that owing to the addition of 31 men to the brigade this year so that all the members might have one complete day off duty in every seven, which along with the fixed annual advance to the probationers, will increase the Fire Department's 1921 payroll by \$40,639, and more especially being influenced by the steadily decreasing prices of commodities, the present unsettled business conditions which find so many out of employment, the many others who have accepted cuts in wages

and still others who are faced with wage decreases, they would not be justified in recommending any advance in wages at this time.

Nor would they recommend any reduction in the probationary period, as they believe that the present high standard of efficiency held by the City of Ottawa fire brigade would be jeopardized by such action.

Your Board recommends that the Council of the Corporation seriously consider the appointment of two extra district chiefs to allow these men the benefit of the two platoon system. The Board was much impressed by the development of fire prevention work in recent years and is of the opinion that the appointment of two more district chiefs would still further increase the efficiency of the brigade in this direction.

Your Board also recommends that the Corporation take over the expense of the telephones in the men's homes if

the Corporation believes they are necessary to maintaining the present efficiency of the fire brigade.

Dated at Ottawa this 2nd day of May, 1921, and respectfully submitted.

(Sgd.) W. P. GRANT,
Chairman.

(Sgd.) AINSLEE W. GREENE,
(Sgd.) DANIEL McCANN,
Members.

In signing the above report, I wish to emphasize that in my opinion the evidence submitted clearly showed that the firemen of Ottawa were not paid equally with similar employees throughout Ontario, but, in view of the general trade depression, it does not seem the best time to correct this condition, and I therefore agree to the present recommendations as a settlement for the year 1921.

(Sgd.) DANIEL McCANN,
Member.

PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

NINE new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. Case No. 94 has reference to payment of assigned crews of the Canadian National Railways when laid up away from home. Case No. 95 relates to the allowance for conductors and trainmen of the Canadian National Railways when detained between terminals. Case No. 96 deals with a dispute as to rates for baggagemen and brakemen in passenger train service on the Canadian National Railways south of the St. Lawrence river. Case No. 97 relates to a dispute affecting yard conductors of the Toronto, Hamilton and Buffalo Railway. Case No. 98 has reference to a claim for payment of time and one half made by a yard crew of the Toronto, Hamilton and Buffalo Railway. Case No. 99 has reference to a claim of a yard brakeman

of the Toronto, Hamilton and Buffalo Railway for payment for time lost. Case No. 100 relates to a claim of a disabled employee of the Toronto, Hamilton and Buffalo Railway for a certain position. Case No. 101 deals with a claim of a passenger crew of the Toronto, Hamilton and Buffalo Railway for payment for extra services. Case No. 102 relates to the dismissal of a telegraph operator of the Canadian Pacific Railway.

Case No. 94.—The Canadian National Railways (Eastern Lines) and The Brotherhood of Railroad Trainmen.

A conductor and crew of the Canadian National Railways (Eastern Lines) in assigned service were held away from home in excess of 18 hours, but they were not paid for the time they were so

held as required by Rule No. 8 of the schedule, which reads: "Except in case of wrecks, washouts or snow blockades, preventing crews being returned to their home terminals, crews laid up at other than their home terminal longer than sixteen hours, exclusive of Sunday, without being called for duty will be paid twelve and one-half miles per hour for the first eight hours in each subsequent twenty-four hours thereafter. When men book rest of their own accord, the time so booked will not be included." The management of the railways contended that although this rule had been in effect for practically five years this was the first time a claim had been made that it applied to assigned crews. The guarantees provided for assigned crews, in the opinion of the railways, made the operation of such a rule unnecessary in their case.

The employees contended that the following words were found on page 12 of the schedule: "General Rules applying to all classes of service unless otherwise specified in this schedule." Rule 8, quoted above, followed on page 13. They claimed that this rule applied just as it read, and that as it had been carried over in the last four schedules the company had had ample time to correct a mistake if one was made, and therefore as the company had made no attempt to change the language of this rule, and as it had been in effect for almost five years, they submitted that the conductor and crew should be paid for the time claimed.

In its general statement, the Board declared that the representatives of the railways took the position in their oral evidence that the word "unassigned" had been left out of the rule by error. Although the rule had been in effect since 1916, the employees' representatives could not recall any payments under this rule to assigned crews prior to December, 1920, when payment was made to certain passenger crews after it had been held up for investigation. The railways' officers afterwards ques-

tioned this payment. No conclusive evidence was presented to show this rule was originally intended to apply.

The decision of the Board was as follows:

The decision of the Board is that the word "crews" in Rule No. 8 was and should be intended to mean "unassigned crews." This position is sustained by the fact that assigned crews have, under the provisions of schedule, their regular guarantees.

Case No. 95.—The Canadian National Railways (Eastern Lines) and The Brotherhood of Railroad Trainmen.

A conductor and crew of the Canadian National Railways (Eastern Lines) were tied up at a junction for rest. After the period of rest had expired they were on duty for 22 hours and 25 minutes, going a distance of 54 miles, and were paid actual mileage only. A difference arose as to the payment due to these men for this work. Rule 17 for conductors and trainmen over which the difference arose reads as follows: "Trainmen delayed between their terminals by cancellation of train, or other unavoidable causes, will be paid mileage and overtime to the point of delay and thereafter 100 miles for each consecutive 24 hours on the basis of hour for hour for the first eight hours and so on at the end of each 24 hours, then mileage to the terminal. This to apply to passenger trains on the basis of 20 miles per hour. It is understood that trainmen on trains detained between their terminals by annulment or other unavoidable causes, will be allowed 12½ miles per hour for the first eight hours of each 24 hours so held, whether held two hours, two or three days or more. Delays of less than two hours will not come under this clause. The taking of engines for other service, or engine failure, or any delay through being held between terminals except delays in meeting and passing trains or work in connection with their train, is covered by this clause and the provisions of this clause will apply even though the crew arrives at destination within the overtime limit."

The railways contended that the intent of the rule was that only mileage would be paid to terminal after resuming duty at the point where the crew was tied up between terminals. On behalf of the employees it was contended that while the rule provided mileage to the terminal, the intent was to pay mileage or hours to the terminal. They claimed they had nine specific cases where this time was paid in 1918-19.

The decision of the Board was as follows:

The words "then mileage to the terminal" in Rule 17 should be understood and applied in the same manner as if such language read: "then time or mileage to the terminal." Pending claims now properly before the railways in the form of time slips or otherwise shall be adjusted accordingly.

Case No. 96.—The Canadian National Railways (Eastern Lines) and The Brotherhood of Railroad Trainmen.

A difference of opinion arose between the management of the Canadian National Railways (Eastern Lines) and the Brotherhood of Railroad Trainmen in connection with the proper rates for baggagemen and brakemen in passenger train services south of the St. Lawrence river. When Supplement No. 16 to General Order No. 27 (the McAdoo Award) was issued, establishing certain rates for baggagemen and brakemen in passenger train service, the mileage rates on these lines were higher than those established by the Supplement, and were, therefore, not reduced. The employees claimed that increases as provided in the so-called Chicago Award should be applied to rates in effect as at July 20, 1920, while the railways were willing to put into effect rates based on the application of the increases specified to rates as named in Supplement 25 to General Order No. 27.

By the decision of the Board the position of the railways was sustained.

Case No. 97.—The Toronto, Hamilton and Buffalo Railway Company and The Brotherhood of Railroad Trainmen.

On a certain date, a day yard conductor was relieved by the night yard conductor of the same place, 50 miles from Hamilton. This arrangement was made by agreement between the men themselves, who advised the chief dispatcher at Hamilton accordingly. A brakeman who was on the spare board at Hamilton made a claim that he should be paid 50 miles for run-around on account of these men changing off. It was contended that this brakeman who stood first on the extra board should have been sent to fill the vacancy created by the day conductor laying off, and that the night yard conductor should not have been allowed to work out his own assignment and the assignment of the day yard conductor, making two shifts in the 24 hour period, depriving the spare men of the time from their work. The company contended that it had been the practice on this road for a number of years by request of employees at points where two or more yard crews work for these men to have the privilege of changing off with one another in order to get relief for a day or part of a day, as no spare men were available at such points to take care of relief work. The company claimed that on the day when these conductors agreed to change off it would have been impossible to send relief from Hamilton in time. The company further contended that nothing in the schedule prevented these men from changing off at a point where no spare board was maintained.

The decision of the Board was as follows:

The Board does not believe that the company should be penalized for its consideration in permitting employees at outlying points, under proper authority, to change off with each other, and the claim for run-around is therefore, denied. The Board further decides that arrangements should be made as far as consistent and possible to give the work of men laying off to the spare men.

Case No. 98.—The Toronto, Hamilton and Buffalo Railway Company and The Brotherhood of Railroad Trainmen.

A yard crew had been sent to a junction for the purpose of switching. Three of their cars were derailed, and owing to this accident they did not return to their yard until the following day at the time of their regular assignment which they proceeded to take up. When they stopped work they had been on duty for 32 hours. They put in a claim for compensation at the rate of time and one half for all time engaged after the first eight hours, including the time of their regular assignment on the second day. In reference to this claim a letter was sent by the company to the chairman of the Trainmen's committee which was in part as follows:

The interpretations and decisions in connection with Article 14 of Supplement No. 25, which corresponds to Article 31 of your schedule have been reviewed, but nothing has been found to cover the question involved in this particular ticket. The article provides for the allowance of overtime rates for all time worked in excess of 8 hours continuous service in the 24-hour period. Without prejudice to our rights under this clause or under any subsequent instructions or interpretations which may be issued, the Company is agreeable to allowing this ticket at continuous overtime rates after the first 8 hours worked."

The employees contended that this time claim was paid by the company on the merit in the case and that the Board would not be justified in ruling that the company could deduct the difference between the overtime rate and the *pro rata* rate after the twenty-four hour period from the yard crews.

The decision of the Board was as follows:

The Board decides that the yard crew in question was only entitled to single time for service performed on its regular assignment—8.30 a.m. to 4.30 p.m. on November 23, 1920, and the position of the company to that extent is sustained. The Board, however, further decides that Mr. M—'s letter of December 18, 1920, to Mr. G— commits the company to the payment made in the case in question.

Case No. 99.—The Toronto, Hamilton and Buffalo Railway Company and The Brotherhood of Railroad Trainmen.

A dispute arose with regard to time lost by yardman M— of the Toronto, Hamilton and Buffalo Railway. This employee was notified by the trainmaster that he had been displaced as helper on second trick Aberdeen yard engine by brakeman D—, a senior displaced man. The latter had been the senior applicant for the position of helper on third trick Aberdeen engine and was notified to commence work with that engine but he was displaced from this assignment by an older man. It was claimed by the employees that yard brakeman D—, a senior applicant should have been assigned to the third trick Aberdeen engine instead of being allowed to displace yardman M— after the job he bid in had closed. After yardman D— worked one day on the second trick engine he was finally notified that he was the senior applicant for the vacancy on the third trick engine. The second trick engine was then put up for bid for a yard helper. Yardman M— bid for the job again and being the senior applicant he was given the assignment. In the meantime he had lost four days. It was contended that he should be compensated for the pay he lost on these days on account of the company allowing yardman D— to displace him when D— had already a regular assignment. The company contended that yardman D— was within his rights in displacing M—, a junior man, D—having been displaced from his assignment by an older man; that the assignment as helper on the third trick Aberdeen engine was closed by the company in the same manner as all bids had heretofore been closed; and that there was nothing in the schedule which stated how soon positions would be filled after the dates specified in the notices of vacancies. According to the company the usual procedure was followed in this case.

The decision of the Board was as follows:

The claim for time lost by Yardman M— is denied, and it is suggested that the company and the committee arrange a consistent understanding as to when successful applicants for a position should be advised that they have by bulletin bid secured such position.

Case No. 100.—The Toronto, Hamilton and Buffalo Railway Company and The Brotherhood of Railroad Trainmen.

Brakeman S—, an employee of the Toronto, Hamilton and Buffalo Railway Company was injured while engaged as yardman. He received compensation under the Workmen's Compensation Act of Ontario until he resumed service as passenger trainman. About fourteen months later he was displaced by a senior man and was assigned a position as freight brakeman. He did not take up this assignment but obtained leave of absence for three months. When reporting for duty he stated that owing to the condition of his injured knee he did not think he could fill a freight or yard job. The company's surgeon advised that Brakeman S— could not satisfactorily work as brakeman on a freight run, but that it might be possible for him to take a passenger run. As his seniority did not entitle him to a passenger run, he made application, supported by the company, to the Workmen's Compensation Board to re-open his case, and was awarded a further lump sum for permanent partial disability. The trainmen's committee then requested the superintendent of the railway that S— be given suitable employment and they were informed that an effort would be made to do so. Later on the committee asked that S— be appointed switch tender at Aberdeen, but the request was not granted. The committee contended that Brakeman S— should be assigned to this position and that he should be paid for all time lost since December 14, 1920. The company contended that they could not appoint him switch tender at Aberdeen owing to the liability of further injury to his knee as this was the busiest piece of traffic on the railway. The company,

however, offered him the position of switch tender at Coyle Yard where the work was light and the rate of pay was the same as that at Aberdeen. The company further contended that the application of the committee for payment of time lost was unreasonable and if complied with would result in the payment of a considerable amount of double time, in view of the compensation awarded by the Workmen's Compensation Board.

The decision of the Board was as follows:

The position of the company is sustained, with the understanding, however, that if or when conditions permit both the company and the employees make an effort to get Brakeman S— placed in a position at or running out of Hamilton such as his physical condition may enable him to fill.

Case No. 101.—The Toronto, Hamilton and Buffalo Railway Company and The Order of Railway Conductors, and The Brotherhood of Railroad Trainmen.

A conductor and crew in assigned passenger service on the Dunnville subdivision of the Toronto, Hamilton and Buffalo Railway were ordered to go to Port Maitland on certain dates during their lay-over between trips at Dunnville, to pick up express shipments of fish. Their earnings in this service were applied on the monthly guarantee under Article 4 (a) of the schedule. On all these occasions there were one or more freight cars on the station track ahead of the express cars, and on account of having to remove and re-spot these cars the employees contended that the crew should be paid passenger rates or yard rates for the actual time occupied in handling the freight cars, with a minimum allowance of one hour, and that this work should not be applied on the monthly guarantee. The employees contended that it was most unfair to demand an assigned passenger crew to perform services, the largest percentage of which was switching service, in order to make up a passenger guarantee. Tickets for these trips were originally put in asking for freight rates and when

corrected by the timekeeper to read "passenger" the employees took it to signify a common understanding by the company and employees as to the application of a special clause in the contract which was as follows:

"The work incident to this service includes turning, setting away and making up trains; it does not include station switching or work not in connection with their trains. At Hamilton, Waterford, Dunnville and Welland passenger crews required to handle cars other than those necessarily handled in the making up or putting away of their trains will be paid actual time at one-eighth of daily passenger rate per hour with a minimum of one hour. This allowance will also apply to the picking up of a freight car to be handled on a passenger train at the above points or en route when such car is not first out."

The company held that in handling the cars spotted on the station track at Port Maitland, the crew were not engaged in station switching and that this work was their work in connection with their trains. The company further claimed that between Dunnville and Port Maitland this crew was run as an "extra" and not as a freight extra and handled passenger cars exclusively in both directions. It was, therefore, contended by the company that it was entirely in order in applying Article 4 (a) of the existing schedule to this service, which reads as follows:

"Regularly assigned passenger trainmen who are ready for service the entire month and who do not lay off of their own accord, shall receive the monthly guarantee provided for in Article 1, exclusive of overtime. Extra service may be required sufficient to make up these guarantees, and may be made between regular trips; may be made on lay-off days; or may be made before or after the completion of their trip. If extra service is made between trips, which go to make up a day's assignment, such extra service will be paid for on the basis of miles or hours, whichever is the greater, with a minimum of one hour. Extra service before or after the completion of a day's work will pay not less than the minimum day. The basis of pay for extra service applies only in making up the guarantees. After guarantees are absorbed, schedule provisions for extra service apply."

The Board declared in their statement that there did not appear to be any specific schedule provisions under which the contention of either of the parties could properly be completely sustained.

The decision of the Board was as follows:

If, as the Board understands, the claim of the employees is that, for the service referred to, compensation should be allowed for time or mileage on the basis of passenger rates, and should not be applied against monthly guarantees, such claim is, in the opinion of the Board, and under all the circumstances and conditions applicable to this particular case, a reasonable one.

Case No. 102.—The Canadian Pacific Railway (Western Lines) and The Order of Railroad Telegraphers.

A telegraph operator employed by the Canadian Pacific Railway Company was dismissed for failure in the performance of his duties. The company claimed that he had not been giving satisfactory service to the agent at Banff where he was acting as third trick operator. He was charged by the chief despatcher with operating a taxicab while in the employ of the company and he was warned that he must either give up running the cab or resign from his position with the company. On one occasion he failed to give the east way freight instructions to marshal some passenger coaches to be picked up by the passenger trains, causing a fast freight to be held up to do the switching which resulted in serious delay. On another occasion when a light engine was sent to pick up nine west loads and nine empties at Banff he failed to have all these cars lifted, causing a delay. The company declared that considering that this operator had received fair warning and that certain information had reached the officers of such a nature that he was not considered a desirable man to have in the service with the possibility of his neglecting to carry

out instructions, they felt fully justified in removing him from the service. The employees contended that the offence for which this operator was removed from the service did not merit dismissal, and

claimed that he should be reinstated in the service with pay for time lost.

By decision of the Board the claim of the employees was denied.

AGREEMENT CONTINUING CANADIAN RAILWAY BOARD OF ADJUSTMENT No 1.

Renewal of Agreement between the Railway Association of Canada and Various Railroad Brotherhoods

A RECENT issue of the LABOUR GAZETTE contained the official report of proceedings of the Canadian Railway Board of Adjustment No. 1 as from August 7, 1918, to August 31, 1920. The report contained a detailed statement of the eighty-seven cases submitted to the Board during the period named, and which had been definitely determined in accordance with the terms of the agreement under which the Board was constituted, acceptance of the decisions being obligatory.

The circumstances leading to the organization of the Board of Adjustment may be with advantage briefly reviewed, and this is best accomplished by extracting from the report in question the following statement on this point:

"On July 26th, 1918, in response to a request made by the Dominion Government though the then Acting Minister of Labour, Hon. Senator G. D. Robertson, officials, representative of the various Railways in Canada, and Vice-Presidents and General Chairmen from practically all lines in Canada for:

"The Brotherhood of Locomotive Engineers,

"The Brotherhood of Locomotive Firemen and Enginemen,

"The Order of Railway Conductors,
"The Brotherhood of Railroad Trainmen,

"The Order of Railroad Telegraphers,

"The International Brotherhood of Maintenance of Way Employees
met at the Windsor Hotel, Montreal.

"Senator G. D. Robertson, acting as Chairman, explained that the purpose for the call of the meeting was to arrive at an understanding as to the methods to be adopted for the application of the provisions of General Order No. 27 of the Director General of the United States Railroad Administration, to the Railways of Canada, and to also consider and, if possible, arrange for some agreement whereby all differences arising between the Railways and the Employees concerned could be disposed of in a mutually satisfactory manner.

"General questions relative to the application of the provisions of General Order No. 27, and other matters of mutual concern to the Railway Companies, their Employees and the Canadian people, were discussed at the meeting of July 26th, the general consensus of opinion, both from the viewpoint of those in charge of the Railways and

those representing the Employees, being that some tribunal could and should be created to which all differences not otherwise disposed of between the Railways and their Employees could be referred for decision.

"On July 27th, 1918, a Joint Committee, representing the Railways and the Employees' Organizations, met and prepared a tentative draft of a Memorandum of Agreement for the above purpose, such draft being in line with the terms of General Order No. 13 of the United States Railroad Administration, under which Railway Board of Adjustment No. 1 at Washington had been instituted some months previously, the only difference in the draft as proposed being that the language was made applicable as a mutual agreement between the Canadian Railway War Board and the Chief Executives of the six Organizations, parties to the proposed agreement.

"After the preparation of the Memorandum of Agreement, and its submission to and adoption by the representatives of the employees in conference, a few days' adjournment was taken in order that the Railway War Board might submit the tentative draft of the proposed memorandum of Agreement to its member Roads for consideration and endorsement, if approved, and so that the approval of the Chief Executives of the Organizations might also be secured.

"On August 7th, 1918, a further meeting was held between the Administrative Committee of the Canadian Railway War Board and the Vice-Presidents, or other representatives, of the Organizations specified, and on the same date the following Memorandum of Agree-

ment was adopted and signed by the Canadian Railway War Board and by the Chief Executives of the Organizations, parties to the Agreement."

The agreement established a body to be known as Canadian Railway Board of Adjustment No. 1, the Board to be composed of twelve members, six representatives of the railways, to be selected by the Canadian Railway War Board (now the Railway Association of Canada), and six representatives of the six labour organizations named. The agreement provided the reference to the Board of all differences arising as between any of the railways and any of the organizations concerned during the continuance of the war and thereafter until abrogated by one side or the other; the decision of the Board to be binding.

The Board has operated continuously since its inception, but, formal action with respect to the matter of continuance appearing to be desirable, it was lately decided to take a plebiscite from the membership of the organizations affected. The plebiscite favoured the continuance of the Board substantially on the lines of the past, and an agreement to that effect was made as from April 15, 1921.

Following is the text of the agreement between the Railway Association of Canada and the various railroad brotherhoods named, together with an appendix giving the names of the railways which are members of the Railway Association:

Memorandum of Agreement made between the Railway Association of Canada, acting for the Railways of Canada, whose names appear in Appendix "A" hereof, members thereof, of the one Part; and

The Brotherhood of Locomotive Engineers,
The Brotherhood of Locomotive Firemen
and Enginemen,

The Order of Railway Conductors,
The Brotherhood of Railroad Trainmen,
The Order of Railroad Telegraphers, and
The United Brotherhood of Maintenance
of Way Employees and Railway shop
Labourers,
acting for the said classes of employees
of the said railways, of the other Part.

Whereas the parties hereto, guided by a desire to aid in the preservation of industrial peace in the Dominion of Canada, have resolved upon the appointment of a Board composed of members to be selected as hereinafter prescribed, which shall have full power and authority to determine all differences which may arise between any of the said railways and any of the classes of its employees above-mentioned, and which are not settled between the officers and employees of the railway concerned, including the interpretation of wage schedules or agreements, having due regard to the rights of the several classes of employees and of the railways respectively.

Now, therefore, it is agreed by and between the parties as follows:

1. The Board appointed in pursuance of the terms of agreement dated August 7th, 1918, between the parties hereto, known as Canadian Railway Board of Adjustment No. 1, shall be continued subject to change or dissolution as provided for herein.

2. The Board shall consist of twelve members, six to be selected by the Railway Association of Canada and compensated by the railways, and six by the Executive Officers of the organizations of employees hereinbefore named, and compensated by such organizations.

3. The officers of the Board shall consist of a Chairman and a Vice-Chairman who shall be members of the Board and elected by the Board, and a Secretary appointed by the Chairman subject to approval of the Board.

The Chairman and Vice-Chairman shall serve for a period of one year from date of election. In case of vacancy, the position shall be filled for unexpired portion of term by the election of a member of the Board.

The Chairman or Vice-Chairman shall preside at meetings of the Board, and both are required to vote upon the adoption of all decisions by the Board.

4. The Board shall meet regularly at stated times and continue in session until all matters placed before it at the commencement of the session in accordance with its regulations, have been considered.

5. Unless otherwise mutually agreed, all meetings of the Board shall be held in the City of Montreal, P.Q., provided that the Board shall have authority to empower two or more of its members to conduct hearings and pass upon controversies when properly submitted, at any place designated by the Board, provided, further, that such division of the Board shall not be authorized to make final decision. All decisions shall be made, approved, or ratified by the Board as herein provided.

6. Should a vacancy occur in the Board, such vacancy shall be filled immediately by the same appointive authority which made the original selection.

7. The Board shall render decisions on all matters of controversy arising from interpretations of wage agreements and other matters in dispute, as provided in the preamble hereof, and when submitted to the Board in accordance with its regulations.

8. All disputes, including personal grievances, or controversies arising or pending under interpretations of wage agreements between officials of a railway and its employees covered by this agreement, are to be handled in the usual manner by General Committees of the employees up to and including the Chief Operating Officer of the railway, (or someone officially designated by him,) when if an agreement be not reached, the Chairman of the General Committee of employees may refer the matter to the Executive Officer of the organization concerned, and if the contention of the Employees' Committee is approved by such Executive Officer, then the Chief Operating Officer of the railway and the Executive Officer of the organization, shall refer the matter with all supporting papers to the Board, which shall promptly hear and decide the case, giving due notice to the Chief Operating Officer of the railway

and to the Executive Officer of the organization of the time set for hearing.

9. No matter will be considered by the Board unless officially referred to it in the manner herein described, provided, however, that no case having origin in circumstances which occurred prior to August 7th, 1918, (date of original agreement between Canadian Railway War Board and Labour Organizations upon which Canadian Railway Board of Adjustment No. 1 was founded,) shall be referred to the Board except those arising out of disputes properly pending at the above-mentioned date.

10. In hearings before the Board, the railway shall be represented by such person or persons as may be designated by the Chief Operating Officer, and the employees shall be represented by such person or persons as may be designated by the Executive Officer of the organization.

11. All clerical and office expenses will be borne equally by the Railway Association mentioned of Canada and the Organizations above-mentioned. The railway directly concerned and the organizations involved in a hearing, respectively, will assume any expense incurred in presenting a case.

12. In each case an effort should be made by the disputants to present a joint, concise statement of facts, but the Board is fully authorized to require information in addition to such statement of facts, and call upon the Chief Operating Officer of the railway or the Executive Officer of the organization for additional evidence, either oral or written. In event of a joint statement not being submitted, each disputant should furnish the other with a copy of his individual statement and each should give the other a copy of his supporting statement of the contention.

13. All decisions of the Board shall be approved by a majority vote of all members of the Board, except that in the event of a member of the Board presenting a case, such member shall not vote upon the decision of the case, and in order that the voting strength of each side may be equal, a member of the opposite side of the Board shall also refrain from voting.

14. After a matter has been considered by the Board, in the event a majority vote can-

not be obtained, any six members of the Board may elect to refer the matter upon which no decision has been reached to a referee to be unanimously agreed upon by the Board, and in case of failure to agree, application shall be made to the Minister of Labour of the Dominion of Canada for appointment of a referee.

15. The Board shall keep a complete and accurate record of all matters submitted for its consideration, and of all decisions made by the Board.

16. A report of all cases decided, including the decisions, will be filed with the Railway Association of Canada, with the Chief Operating Officer of the railway affected, and with the Executive Officer of the organization concerned.

17. It is further agreed that the Board shall have like authority to determine differences between any of the railways represented herein and any other classes of employees of such railways, and between any steam railway in Canada not represented herein and the employees thereof, provided that the parties to the dispute shall make joint submission of the case to the Board and shall agree that the decision of the Board shall be accepted by each party as final and binding.

18. This Agreement shall remain in full force and effect until amended or terminated in accordance with the terms of Clause 19 hereof.

19. Should it be so desired by the Railway Association of Canada, representing the railways, or a majority of the Executive Officers of the organizations, representing the employees, this Agreement may be amended or terminated at any time during its existence upon service of thirty days' notice by the one party upon the other.

Signed on behalf of each of the above named parties this 15th day of April, A.D. 1921.

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1921

TEN strikes, involving 2,538 employees were reported as having commenced during April. There were in existence at some time or other during the month 19 strikes, involving approximately 3,697 employees. The total time loss on account of industrial disputes was estimated at 57,071 working days, as compared with 52,928 working days in March, 1921, and 84,099 working days in April, 1920. The time loss occasioned by the ten strikes which began in April was 31,909 working days, while a loss of 25,162 working days is charged to the nine strikes that commenced prior to April. Termination was reported in

the case of three strikes which commenced prior to April. Six strikes commencing during April terminated during the month, leaving the following ten strikes, involving 1,577 workpeople, on record on April 30: employees of steel and coal companies, Sydney; pattern-makers, Brantford; mill workers, Chipman, N.B.; coal miners, Cumberland County, N.S.; pulp and paper employees, Thorold; meat cutters and packers, Montreal; carpenters, Sydney; mill workers, Northumberland County, N.B.; pulp and paper employees, Kenogami and Jonquières, Que.; pressmen, London.

Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

BUILDING AND CONSTRUCTION.—Four strikes, involving 121 employees with an estimated time loss of 2,417 working days were in existence in this group during the month. The strikes which

STRIKES AND LOCKOUTS DURING APRIL, 1921

Industry or occupation	Particulars	No. of employees affected	Time loss in working days
Strikes commencing prior to April, 1921			
BUILDING AND CONSTRUCTION—			
Carpenters, Regina, Sask.	Commenced March 24. For increased wages. Terminated March 28
Granite Cutters, Vancouver, B.C.	Commenced March 1. In protest against a reduction in wages. Terminated April 15.	18	216
METALS, MACHINERY AND CONVEYANCES—			
Employees of steel and coal Companies, Sydney, N.S.	Commenced November 22. For increased wages and improved working conditions. Unterminated.	150	3,900
Machinists, Brantford, Ont.	Commenced February 23. Against a reduction in wages. Terminated April 6.	26	156
Patternmakers, Brantford, Ont.	Commenced February 21. Against a reduction in wages. Unterminated.	9	234
Moulders, Walkerville and Windsor, Ont.	Commenced February 28. Against a reduction in wages. Terminated March 26.
Moulders, Lindsay, Ont.	Commenced February 24. Against a reduction in wages. Information received indicates conditions no longer affected.
Patternmakers, Burnaby, B.C.	Commenced March 3. Against a reduction in wages. Terminated March 15.
Moulders, Brampton, Ont.	Commenced February 1. Against a reduction in wages. Information received indicates conditions no longer affected.
CLOTHING—			
Garment Workers, Toronto, Ont.	Commenced November 23, 1920. In protest against piece work. Conditions no longer affected.
LUMBERING—			
Mill Workers, Chipman, N.B.	Commenced March 14. In protest against a longer working day and a reduction in wages. Unterminated.	56	1,456
MINES, SMELTERS, CLAY PRODUCTS AND QUARRIES—			
Coal Miners, Brule, Alta.	Commenced February 22. Against a new dockage system. Terminated March 15.
Coal Miners, Cumberland County, N.S.	Commenced March 14. To enforce the Montreal Agreement regarding wages. Unterminated.	100	2,600
PULP AND PAPER—			
Employees at Thorold, Ont.	Commenced February 8. Against a reduction in wages and for union recognition. Unterminated.	100	2,600

STRIKES AND LOCKOUTS DURING APRIL, 1921—*Continued.*

Industry or occupation	Particulars	No. of employees affected	Time loss in working days
WOODWORKING—			
Finishers, Toronto, Ont.....	Commenced February 19. Against a reduction in wages. Terminated March 10.
FOODS, LIQUORS AND TOBACCOS—			
Meat cutters, packers and butchers, Montreal	Commenced March 1. Against a reduction in wages. Unterminated.	500	13,000
Cigarmakers, London, Ont.....	Commenced December 20, 1920. Against a reduction in wages. Terminated April 6.	200	1,000
MISCELLANEOUS—			
Musicians, Kitchener, Ont.....	Commenced March 15. For increased wages and fixed staff. Terminated March 21.
Strikes commencing during April, 1921			
BUILDING AND CONSTRUCTION—			
Bricklayers and Plasterers, Windsor, Ont....	Commenced April 5. Against a reduction in wages. Terminated April 23.	46	1,282
Carpenters, Sydney, N.S.....	Commenced April 15. Against a reduction in wages. Unterminated.	32	544
Stone cutters, Hamilton, Ont.....	Commenced April 5. For increased wages. Terminated April 22..	25	375
METALS, MACHINERY AND CONVEYANCES—			
Moulders, Amherst, N.S.....	Commenced April 13. Against a reduction in wages. Terminated April 28.	20	260
LUMBERING—			
Mill Workers, Northumberland, County, N.B.	Commenced April 18. In protest against a ten-hour day. Unterminated.	125	1,500
MINES, SMELTERS, CLAY PRODUCTS AND QUARRIES—			
Coal Miners, Drumbeller, Alta.....	Commenced April 1. For improved working conditions. Terminated April 5.	43	172
FOODS, LIQUORS AND TOBACCOS—			
Meat Packers and Butchers, Toronto, Ont....	Commenced April 4. In protest against a reduction in wages. Terminated April 18.	1,700	22,100
Butchers, Chatham, Ont.....	Commenced April 5. Against a reduction in wages. Terminated April 7.	42	126
PULP AND PAPER—			
Pulp and Paper Employees, Kenogami and Jonquières, Que.	Commenced April 19. Against a reduction in wages. Unterminated.	500	5,500
PRINTING AND PUBLISHING—			
Pressmen, London, Ont.....	Commenced April 20. In protest against the discharge of an employee. Unterminated.	5	50

commenced in the month were those of 46 bricklayers and plasterers at Windsor, 32 carpenters at Sydney and 25 stonecutters at Hamilton.

METALS, MACHINERY AND CONVEYANCES.—A strike of yardmen at Sydney, which commenced on November 22, remained untermiated, also a strike of patternmakers at Brantford which began on February 21. Twenty moulders at Amherst were involved in an alleged lockout which commenced on April 13, owing to their refusal to accept a reduction in wages.

LUMBERING.—Mill workers in Northumberland County, N.B. were involved in a strike which commenced about the middle of the month. This dispute was caused by the inauguration of the ten hour day instead of the former nine hour day. The strike was untermiated at the end of the month.

MINES, SMELTERS, CLAY PRODUCTS, AND QUARRIES.—One of the mines involved in a strike of coal miners in Cumberland County, N. S., resumed operations, but no general agreement had been reached and two mines were still involved. This dispute commenced on March 14 to enforce the Montreal Agreement as regards wages. A strike of coal miners at Brule, Alta., which commenced on February 21, was reported to have been terminated on April 21. This strike, which involved 250 employees, was in

protest against a new dockage system. By March 15 a large percentage of the strikers had been replaced and the remainder resumed work on April 6 on the open shop basis. Forty-three coal miners at Drumheller, Alta., struck on April 1 for improved working conditions. After conditions were remedied work was resumed on April 6.

PULP AND PAPER.—About 500 pulp and paper mill workers at Kenogami and Jonquières, Que., struck on April 19 in protest against a proposed decrease in wages averaging about 15 per cent. This strike remained untermiated. Pulp and paper employees at Thorold were still on strike.

FOODS, LIQUORS AND TOBACCO.—This group had the greatest time loss during the month due to strikes of butchers and meat packers in Montreal, Toronto and Chatham, Ont., in protest against a general wage reduction of 12½ per cent. About 600 employees were originally involved at Montreal, but this number was reduced to about 500 at the end of the month when the strike was still untermiated. In Toronto, the strike commenced on April 4 involving approximately 1,700 employees and terminated on April 18, when the employees accepted the reduction. In Chatham, 42 employees were involved, the strike commencing on April 5 and terminating on April 7.

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING MARCH, 1921

THE following details with regards to strikes and lockouts in the United Kingdom during March, 1921, based on returns from employers and workpeople, are taken from the April issue of the *British Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.—The number of trade disputes, involving a stoppage of work, reported to the Department as beginning in March, was 42, as compared with 63 in the previous month, and 184 in March, 1920. In these new disputes about 12,000 workpeople were directly involved, and about 1,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition to the numbers involved in new disputes, nearly 18,000* workpeople were involved, either directly or indirectly, in 63 disputes which began before March, and were still in progress at the beginning of that month. The total number of disputes in progress in March was thus 105, involving about 31,000* workpeople, as compared with 28,000* workpeople involved in 112 disputes in progress in February, and 134,000 workpeople involved in 242 disputes in progress in March, 1920.

CAUSES.—Of the 42 new disputes, nine, directly involving about 2,500 workpeople, arose on demands for advances in wages; 22, directly involving 7,700 workpeople, against proposed reductions in wages; four, directly involving 1,000 workpeople, on questions respecting the employment of particular classes or persons; and seven, directly involving 300 workpeople, on other questions.

RESULTS.—During March, settlements were effected in the case of 15 new disputes, directly involving about 2,200 workpeople, and 20 old disputes, directly involving about 2,000 workpeople. Of these disputes, five, directly involving

700 workpeople, were settled in favour of the workpeople; 14, directly involving 1,800 workpeople, in favour of the employers; and 16, directly involving 1,700 workpeople, were compromised. In the case of 5 disputes, directly involving 7,000 workpeople, work was resumed pending negotiations.

Of the 469,000 working days lost in March by all disputes in progress, over 346,000 were lost by disputes which began before March and were still in progress at the beginning of that month, and nearly 123,000 by disputes which began in the month.

The following table classifies the disputes by groups of trades:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in progress in March.	Aggregate duration in working days of all disputes in progress in March.
	Started before March 1.	Started in March.	Total		
Building.....	14	7	21	5,000	89,000
Mining and Quarrying.....	6	3	9	2,000	24,000
Metal, Engineering and Shipbuilding.	20	7	27	15,000*	256,000
Woodworking and Furnishing.....	3	7	10	4,000	53,000
Other Trades.....	20	18	38	5,000	47,000
Total, March, 1921.	63	42	105	31,000*	469,000
Total, Feb., 1921....	49	63	112	28,000*	378,000
Total, March, 1920..	58	184	242	134,000	788,000

*Considerable numbers of other workers are reported to have been rendered idle as a result of the strike of ship joiners, but the information at present available is insufficient to enable a trustworthy estimate of the total number to be made.

THE COAL STRIKE IN GREAT BRITAIN

IN the LABOUR GAZETTE for April (pages 579 and 580) there appeared an account of the negotiations prior to, and at the out-break of, the coal strike in Great Britain. Subsequent events, which occurred during the month of April, are reviewed in the present article, the information being based, largely, on the report of the strike which appeared in the April issue of the *British Labour Gazette*.

Early in April, the coal situation became the subject of debate in the House of Commons, in the course of which the Premier stated that the Government was prepared to meet representatives of both parties to the dispute in an effort to arrive at a practical solution of the problem compatible with the interests of the nation. He concluded his speech with the declaration that the Government could not enter into any negotiations on the assumption that it would be possible to resume control of the mining industry or to maintain the same out of the general taxation of the country. Mine owners and strikers accepted this proposal for a conference, but the commencement of definite discussion was delayed by the Premier's stipulation to the Miners' Executive that the first subject to be discussed should be the return of the safety men to the mines. The assurance was given that the pumpmen, by resuming, would not suffer any wage loss, but would return on the basis of the rate existing previous to the stoppage, and would continue at that rate during the period of the negotiations.

The miners at first refused to agree to this proposal. On the following day (April 8) under the Emergency Powers Act, a Royal Proclamation was issued, which called out the Army Reserves. The principal features of this measure empowered the Government to take over, protect and maintain the mines in a condition of utility; and to secure the pro-

vision of fuel, transportation, etc., for the country. On April 10 the miners acquiesced in the matter of resumption of pumping and the negotiations proceeded.

Meanwhile, on April 1, the Miners' Federation Executive had decided to appeal for active support to the other branches of the Triple Alliance—the railway men and transport workers. Separate conferences of Transport Workers and Railwaymen were called on April 5; and April 6, respectively. On April 7, a decision in favour of supporting the miners was taken at both conferences. "It was at this juncture, that the attempt to re-open negotiations between the owners and the miners, through the good offices of the Government broke down over the question of the return to work of the pumpmen. Then, at a joint meeting of the Triple Alliance on April 8 it was agreed that a strike of railwaymen and transport workers should take place on the night of April 12."

On the return of the pumpmen to the pits, a resumption of negotiations took place on April 11. This action resulted in the railwaymen and transport workers postponing their strike until April 15 pending the negotiations. The Prime Minister and the Cabinet met the Executive of the Miners' Federation and the Central Council of the Mining Association. The proposals of these bodies did not differ, essentially, from their respective claims prior to the stoppage—the miners holding out for the establishing of a national wage scale made up by Government subsidy, or by subsidies from the wealthy mines to the poorer; the owners contending for district scales of wages based upon the capacity of each coal area, with a share of the profits wherever such exceed a legitimate return on capital. However, the statement outlining the Government's views ex-

pressed the opinion that while the miners' demands for a national settlement of wages might be practicable, their demand for a national pool of profits was impracticable.

With respect to the question of assistance from the Government to meet the difficulties created by the abnormal depression of trade the Prime Minister stated: "If, and when, an arrangement has been arrived at between the coal-owners and the miners as to the rate of wages to be paid in the industry, fixed upon an economic basis, the Government will be willing to give assistance, either by loan or otherwise, during a short period, in order to mitigate the rapid reduction in wages in the districts most severely affected." These proposals were fully discussed, but the miners' officials intimated their inability to accept them or to abandon their former position, and the conference thereupon ended.

The railwaymen and transport workers met the miners' executive again on April 13, and after a brief discussion it was agreed to communicate to the Prime Minister the decision of the two former bodies to strike on the night of April 15, in support of the miners.

At this stage, an unexpected development occurred. In the evening of April 14, some 200 members of the House of Commons met informally the leading coal owners, who stated their case. Later, Mr. Frank Hodges, Secretary of the Miners' Federation, put the case for the miners, and intimated that the miners were prepared to discuss a temporary wages settlement, provided that a period of time were fixed for the negotiation of a permanent settlement, to contain the principles of a national pool and a national wages board. However, the miners' executive, which met next

morning (April 15) repudiated by a narrow majority Mr. Hodges' suggestion.

On the morning of April 15, the Premier, (having been notified of the result of the private members' meeting with the disputants) communicated with the Miners' Federation, inviting them to a further conference with the owners. The miners declined the invitation. Their view was that "the only condition upon which a temporary settlement can be arrived at is one that must follow the concession of the two principles" of a national wages board and a national pool. In the afternoon of April 15, Mr. J. H. Thomas, M.P., and Secretary of the National Union of Railwaymen, announced that the strike of railwaymen and transport workers, fixed for 10.00 p.m. that day, was cancelled owing to the fact that, in view of the miners' refusal to resume negotiations on the basis of Mr. Hodges' suggestion, a strike in their support would be incomplete and foredoomed to failure.

Eventually, negotiations were resumed again between the owners and the miners, and subsequently the Government entered into the discussions. On April 28, the Government offered £10,000,000 to keep up the miners' wages for the next four months, or for the period ending August 31. The only condition that the Government proposed was that, in return for this aid, the miners and owners should agree on a permanent system of dividing profits and wages, which should hold good for at least a year from the end of August and should then be terminable only on three months' notice.

The miners' delegates to the Board of Trade conference refused this offer, and the deadlock ensued and remained unbroken at the end of the month.

RECENT LABOUR LAWS OF NEW BRUNSWICK, QUEBEC AND SASKATCHEWAN

THE present article is a summary of various laws bearing directly or indirectly on labour matters and enacted at the last sessions of the provincial legislatures of New Brunswick, Quebec and Saskatchewan.

New Brunswick

The New Brunswick Legislature was in session from March 17 to April 16, 1921, but only one act of industrial interest was passed. The Act in question deals with fire prevention and provides for the appointment of a board of six members with power to make regulations relative to the prevention of fires, the storage, sale and use of combustibles and explosives, the installation and maintenance of fire alarm systems and fire extinguishing equipment, the construction, maintenance and regulation of fire escapes, the means and adequacy of exit in case of fire from all public buildings including factories, and the investigation of fires.

The board may appoint a Fire Marshal and other officers to carry out the provisions of the Act and of the regulations made thereunder. All chiefs of fire departments, and, in municipalities where there is no fire department, the mayor, warden and any councillor are, by virtue of their offices, local assistants to the Fire Marshal. These officials may inspect any buildings within their jurisdiction and may order the owner to remedy any conditions which they consider dangerous. They may also conduct investigations of fires.

Quebec

The Quebec Legislature was in session from January 11 until March 19, 1921, and enacted a number of laws of industrial interest.

The Municipal Strike and Lock-out Act passed during the session provides

for the compulsory arbitration of disputes in municipal services in municipalities having 10 or more persons in their employ. The law is applicable to policemen, firemen, waterworks employees and those in charge of the incineration of garbage, and governs all disputes relating to wages, working hours or dismissals on account of membership in any labour union. The act renders it unlawful for any employer to declare a lockout or for an employee to strike before submitting the dispute to a board of arbitration, and provides for a fine of not less than \$100 and not more than \$1,000 to be imposed on the employer for every day such lockout lasts, and for a fine of not less than \$10 nor more than \$50 for each employee for every day that he remains on strike. A fine of not less than \$50 nor more than \$1,000 may be imposed upon any person encouraging or aiding any strike or lockout which is contrary to the provisions of the Act. Applications for the creation of a board of arbitration must be made in writing to the Minister of Public Works and Labour and must be signed, if made by an employer, by the mayor or one of the principal officers of the municipality duly authorized. If the application is made by employees who are members of a labour union it must be signed by two of the officers regularly authorized by a vote representing a majority of the members of the union, or by a ballot of the members who were present at a meeting called by a notice given at least three days beforehand of the subject to be debated. If the dispute directly affects the interests of employees in more than one province, or the employees from part of any labour union having a general committee authorized to carry on negotiations in disputes between employers and employees, and recognized by the employer as such, the declar-

ation may be signed by the president and by the secretary of each committee. If the application is made by employees, some or all of whom are not members of the union, it may be signed by two of their number regularly authorized by a vote by ballot of the majority of the employees present at a meeting of which three days' notice has been given of the subject to be debated.

The Minister must take action looking to the creation of a board of arbitration within five days of the receipt of an application in due form.

The board is composed of three members, each of the parties to the dispute appointing one representative and the third being chosen by the other two. If they are unable to agree on such choice within two days of their appointment, however, the Minister of Public Works and Labour shall himself choose the third arbitrator. If either party fails to designate a representative within five days after being called upon to do so by the Minister, the latter is empowered to appoint a representative for such party.

The board must submit its award to the Minister after not more than five days' deliberation, and a copy of such award is to be sent to the registrar of the Council of Conciliation and Arbitration to form part of the archives of the Department of Labour.

The law relating to the inspection of scaffoldings was replaced by a new measure which imposes on the municipal authorities of every city or town in which a public building of three or more stories is being erected, the duty of employing a competent person as inspector of scaffolding. Every contractor, builder or foreman using scaffolding fifteen feet or more in height must under penalty of a fine of \$50 and costs obtain a certificate of inspection signed by the inspector and countersigned by the secretary of the municipality. No such certificate may be granted unless the scaffolding conforms to certain approved standards laid down in forms

which will be distributed by the Department of Public Works and Labour to the municipalities interested who, in their turn, will supply them to the parties interested. In case of neglect or refusal on the part of contractors, builders or foremen to comply with such forms, the inspector may, at any time during the construction of the building, cancel the inspection certificate and proceed against the offending parties. Any corporation refusing to have the erection of scaffoldings supervised or to issue certificates or distribute forms is liable to a penalty of \$25 and costs. Finally the Act reserves to municipalities the right to make any regulations not inconsistent with its provisions.

An Act authorizing the establishment of a dairying school and intermediate agricultural schools was also passed at this session.

The law relating to the protection of public buildings against fire was amended to provide for the inspection of electrical construction and heating systems and for the examination and licensing of electricians. All steam-heating apparatus and hot water-section boilers as well as all electrical installations for lighting, heating or the production of power in public buildings, workshops, factories and industrial establishments, must be approved by an inspector of public buildings. No such installation may be made or altered except by, or under the supervision of, a person duly licensed under the Act. The Minister of Public Works and Labour is authorized to appoint a board of three members having at least five years' experience as journeymen electricians to examine electrical and heating installations and to conduct examinations for certificates of competency and grant licenses. Every company or person carrying on the business, or undertaking the work, of electrical construction must also obtain a license from the board. A number of inspectors duly qualified as journeymen electricians may be added to the staff of the

department of inspection of industrial establishments.

The scope of the Act, providing pensions for provincial civil servants has been extended to include members of the outside service, and a further act authorizes the Government of the Province to take out group insurance on the lives of public officers and employees.

Saskatchewan

The Saskatchewan Legislature at the recent session which opened on November 4 and closed on December 15, 1920, amended a number of laws which are of interest to labour including those relating to factories, workmen's compensation, mothers' pensions and mechanics' liens.

The amendment to the Workmen's Compensation Act brings within its scope all public employees, and raises the maximum amount of compensation recoverable from \$2,000 to \$2,500. It also brings under the Act persons employed otherwise than in manual labour whose remuneration does not exceed \$2,000 per annum, whereas formerly only those receiving less than \$1,800 were included.

Two changes were made in the Mechanics' Lien Act. The section dealing with the registration of claims was amended to provide that no claim may be registered unless the amount, or the

aggregate of the amounts, claimed as due exceeds \$50. In cases where the amount found due in respect of a claim of lien does not exceed \$100, only such costs as are recoverable under the small debt procedure of the district courts are allowed.

An amendment to the Factories Act raises the minimum age for the employment of girls from fourteen to fifteen years.

The only change in the Mothers' Pensions Act is the repeal of that section which provided that a municipality might be ordered to pay a sum not exceeding three dollars per week for each child, to cover wholly or partly the amount expended from the consolidated fund in respect of any mother resident in such municipality.

Sections were added to the Town Act and to the City Act providing for the holding of advance polls in municipal elections for the benefit of railway employees and others whose employment is such as to necessitate their absence from their place of residence on polling day.

The Vehicles Act is amended to permit a magistrate who convicts any person of driving a motor vehicle while intoxicated to prohibit the offender from driving a motor vehicle for one year. The Provincial Secretary may refuse to issue a further license to any driver whose license is revoked.

EMERGENCY RELIEF FOR UNEMPLOYED IN CANADA

Partial Statement of Payments Made

THE policy of the Dominion Government in regard to emergency relief to meet the unemployment situation which developed in Canada towards the close of 1920 was announced in a memorandum issued under date of December 24, 1920. The essential portions of this memorandum appeared in the

January, 1921, issue of the LABOUR GAZETTE, page 46, in the form of a letter from the Honourable G. D. Robertson, Minister of Labour, to the Honourable Walter Rollo, Minister of Labour for Ontario. Copies of the memorandum were forwarded to the premiers of each province, to members

of parliament, and to the mayors of every municipality in which employment offices have been established under the Employment Offices Co-ordination Act. The memorandum urged that the situation should be met to the utmost possible extent by the provision of work instead of relief. It stated, however, that if emergency relief measures became necessary by reason of utterly unavoidable shortage of employment, the Federal Government was willing to co-operate on the following basis:

The organization for determining where relief must go and for distributing the same shall be provided by the municipal authorities, and in each case before relief is given and as relief is continued a certificate must be obtained from the Government Employment Service, showing that the applicant cannot be given employment. The general system and details and the safeguards adopted must be approved by, or on behalf of, the Federal Government. If this is done the Federal Government is willing to contribute in places where relief on any substantial scale appears to be necessary one-third of the amount actually disbursed on this relief provided the other two-thirds is either paid by the municipality or paid by the municipality and the province jointly.

Copies of the form to be used in connection with the relief funds together with a circular containing instruction as to procedure accompanied

the memorandum. An emergency appropriation of \$500,000 was secured for the purposes of unemployment relief under order-in-council 139, of January 24, 1921.

Steps along the lines suggested were immediately taken to relieve the situation in several municipalities, and during the winter as unemployment became more acute in other districts, additional municipalities applied for grants under the appropriation. Up to April 23, the total amount expended by the Dominion Government on unemployment relief was \$133,093. This amount was distributed as follows: Amherst, N. S., \$830; Montreal, \$3,811; Winnipeg, \$51,003; St. James, Man., \$847; Moose Jaw, Sask., \$7,505; Saskatoon, Sask., \$1,320; Regina, Sask., \$10,540; New Westminster, B. C., \$112; Vancouver, \$49,457; West Kildonan, B. C., \$316; Burnaby, B. C., \$140; Nelson, B. C., \$105; Prince Rupert, B. C., \$1,558; The District of South Vancouver, B. C., 5,519; Cumberland, B. C., \$26.

Several other municipalities including Toronto and Hamilton have also made considerable expenditures for relief purposes but at the time of writing their claims for money under the appropriation have not been received by the Dominion Government.

LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA IN 1919

Reports by the Dominion Bureau of Statistics on: (a) the aerated water industry; (b) the electrical apparatus industry; (c) the clothing [men's wear] industry; (d) the macaroni and vermicelli industry

CONTINUING the survey of Canadian industries in 1919 the Dominion Bureau of Statistics lately issued preliminary reports on the aerated water, the electrical apparatus, the clothing (men's wear), and the macaroni and vermicelli industries. Earlier reports in this series were summarized in previous issues of the LABOUR GAZETTE.

Aerated Water Industry

This report covers the operations of 320 plants, of which 129 were in Ontario, 98 in Quebec, 19 each in Nova Scotia and New Brunswick, 17 in British Columbia, 16 in Saskatchewan, 13 in Alberta, 5 in Manitoba and 4 in Prince Edward Island. The total amount of ca-

pital invested in these plants was \$6,-545,803 of which, \$1,849,860 was invested in the plants in Ontario, \$1,809,-845 in Quebec and \$1,168,757 in Manitoba. The number of persons employed, by classes, with the amounts of payments made to each class, is as follows:—

Classes of employees	No. of employees		Salaries and wages
	Male	Female	
Officers, superintendents, managers.	158	5	\$ 276,870
Clerks, stenographers and other salaried employees.	129	58	160,134
Wage earners, average.	1,528	119	1,109,128
Outside piece workers.	35	2	29,207
Totals.	1,850	184	1,575,339

Classified according to weekly wage earnings within certain specified groups, the numbers employed were as follows:

Wage group	16 years and over		Under 16 years		Total
	Male	Female	Male	Female	
Under \$5 per week.	33	4	8		45
\$ 5 to under \$10 per week.	105	59	32		196
\$10 to under \$15 per week.	229	38	4	2	273
\$15 to under \$20 per week.	446	4			450
\$20 to under \$24 per week.	273	1	3		277
\$24 to under \$28 per week.	125		1		126
\$28 to under \$30 per week.	11				11
\$30 and over.	78				78
Totals.	1,300	106	48	2	1,456

The cost of fuel consumed during the year was \$88,464, miscellaneous expenses totalled \$1,194,243, and the materials used cost \$3,385,583. The

selling value of the products at the factory was \$7,366,759.

Electrical Apparatus

The statistics given for this industry are based on the operations of 95 individual plants distributed as follows: 64 in Ontario, 16 in Quebec, 6 in Manitoba, 5 in British Columbia, and 4 in Alberta and Saskatchewan. The total capital investment in these plants was \$45,-956,399 of which amount \$25,482,946 was in Ontario and \$20,094,032 in Quebec. Grouped by classes, the numbers of employees and the amounts paid in wages, etc., were as follows:—

Classes of employees	No. of employees		Salaries and wages
	Male	Female	
Officers, superintendents, managers.	343	13	\$69,007
Clerks, stenographers and other salaried employees.	1,118	620	2,123,933
Wage earners, average.	5,593	1,866	6,591,933
Outside piece workers.	1	6	892
Totals.	7,055	2,505	9,685,705

Classified according to weekly wage payments within certain specified groups the number of employees was as follows:

Groups of classified weekly wages	Over 16 years of age		Under 16 years		Total
	Male	Female	Male	Female	
Under \$5 per week.	18	22	1		41
\$ 5 to under \$10 per week.	229	304	53	24	610
\$10 to under \$15 per week.	517	1,420	35	28	2,000
\$15 to under \$20 per week.	1,696	406	1	3	2,106
\$20 to under \$24 per week.	1,548	57			1,605
\$24 to under \$28 per week.	976	14			990
\$28 to under \$30 per week.	383	1			384
\$30 per week and over.	1,210	16			1,226
Totals.	6,577	2,240	90	55	8,962

The fuel consumed during the year was valued at \$436,498; miscellaneous expenses totalled \$4,390,730 and the total cost of materials was \$15,257,617. The selling value at the factory of the articles produced during the year was \$34,187,658.

Clothing (men's wear) Industry

The report on the Men's Clothing Industry is presented under two heads: (a) wholesale or factory-made clothing and (b) merchant or custom tailoring.

The operations of 145 factories and 1,523 custom establishments are covered. Of the factories '82 were situated in the province of Quebec, 57 in Ontario, 3 in British Columbia, 2 in Manitoba and 1 in Nova Scotia. Of the custom establishments 671 were in Optario, 422 in Quebec, 102 in British Columbia, 89 in Manitoba, 67 in Nova Scotia, 55 in New Brunswick, 47 in Saskatchewan, 41 in Alberta, and 29 in Prince Edward Island. The following table summarizes by provinces the principal statistics of the industry for each section:—

FACTORY-MADE CLOTHING.

Province	Capital	Employees		Cost of material	Value of products
		No.	Salaries and wages		
			\$	\$	\$
British Columbia	162,511	73	46,283	223,415	331,303
Manitoba and Nova Scotia.....	327,509	192	113,110	132,327	313,957
Ontario.....	10,938,519	4,179	4,593,425	9,662,401	19,020,285
Quebec.....	15,864,862	8,352	6,468,863	15,824,629	28,114,761
Canada, totals	27,293,401	12,796	11,221,681	25,842,772	47,780,306

CUSTOM-MADE CLOTHING

Totals.....	4,932	5,298	71	130	3,303	2,670	122	101

Macaroni and Vermicelli Industry

In the macaroni and vermicelli industry the operations of nine individual plants were examined. Of these plants 4 were in Ontario, 2 in Quebec, 2 in Manitoba and 1 in Alberta, the total amount of capital invested in the industry being \$873,442. The number of persons employed by sex and classes, with amounts paid in wages etc., is shown as follows:

Classes of employment	No. of employees		Salaries and wages
	Male	Female	
Officers, superintendents & managers	10	\$ 18,580
Clerks, stenographers & other salaried employees.....	13	4	13,969
Wage earners, average No.....	114	93	132,617
Totals.....	137	97	165,166

The employees are classified as follows by specified wage groups, age and sex:

Groups of weekly wage earners	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
Under \$5 per week.....			1		1
\$5 to under \$10 per week.....	14	60	9	16	99
\$10 to under \$15 per week.....	22	31		1	54
\$15 to under \$20 per week.....	39	3			42
\$20 to under \$24 per week.....	24				24
\$24 to under \$28 per week.....	23				23
\$28 to under \$30 per week.....	2				2
\$30 and over.....	3				3
Totals.....	127	94	10	17	248

The cost of fuel consumed during the year was \$11,823, miscellaneous expenses were \$158,638, and expenditure on materials totalled \$657,942. The selling value at the mill of the products of the industry during the year was \$1,152,652 of which amount \$694,718 represented the value of the products of mills in Quebec, \$350,388 in Ontario, \$58,536 in Alberta and \$49,010 in Manitoba.

VOCATIONAL OPPORTUNITIES IN THE INDUSTRIES OF ONTARIO

Report by Ontario Department of Labour on Foundries and Machine Shops

F“FOUNDRIES and Machine Shop Products” is the subject of Bulletin 10 of the series of studies entitled “Vocational Opportunities in the Industries of Ontario,” now in course of publication by the Ontario Department of Labour (Previous bulletins were noted in the LABOUR GAZETTE for October and December, 1920, and March, 1921). The importance of this sub-group of the iron and steel industry is shown by the fact that in 1915, with

12,450 workers engaged in its various operations, it ranked second only to log products among the manufacturing industries of Ontario in the numbers employed. As compared with other industries, the workers in foundries and machine shops have fairly regular employment throughout the year, the yearly averaged based upon the highest monthly employment being given for the year 1917 as 95.7 per cent for male and 86.6 for female workers. The fact-

ories are for the most part moderate in size, the average number of employees at each plant being only 45, and in the absence of highly specialized conditions a fair opportunity is open to a man of unusual ambition and ability to start an independent business. Increasing capital requirements and costs of production, however, are steadily lessening the number of chances in this direction. Owing to the large number of existing plants managers and executive officers are comparatively numerous, but the average salary of this class is less than in the more highly centralized industries. In 1917, according to figures collected and compiled by the Dominion Bureau of Statistics, the average salary of higher officers was \$2,263, while in the same period the salary of clerks, stenographers, salesmen, etc., averaged \$906 a year, or very slightly higher than that of the wage earners, which was \$905. The latter figure compares favourably with the average yearly wages in other male-employing industries, though somewhat lower than the average in other industries in the iron and steel group where the work is more trying.

The following table shows for 1917 the number of male workers in foundries and machine shops, including those in the press shops and in enamelling, japanning, tinning, etc., by specified weekly wage groups:

Weekly wage	No. of workers considered, 1,131	Cumulative percentage
Under \$8.....	41	3.6
\$ 8—\$ 9.....	18	5.2
9—10.....	24	7.3
10—12.....	42	11.0
12—15.....	118	21.5
15—20.....	447	61.0
20—25.....	195	78.2
25—30.....	166	93.0
30—35.....	42	96.7
35 and over.....	38	100.0

The number and cumulative percentage of male workers in foundry and machine shop products are shown by

groups according to hourly rates, in the following table:—

Hourly rates	No. of workers considered, 335	Cumulative percentage
Under 15 cents.....	11	3.3
15 to 20cents.....	24	10.4
20 to 25 ".....	26	18.2
25 to 30 ".....	63	32.0
30 to 35 ".....	62	55.5
35 to 40 ".....	40	67.4
40 to 45 ".....	17	72.5
45 to 50 ".....	23	79.4
50 to 55 ".....	53	95.2
55 to 60 ".....	7	97.3
60 to 65 ".....	6	99.1
65 to 70 ".....	3	100.0

Foundry work, which consist of casting or moulding metal into some required form, is an integral part of many industries. The principal occupations in foundries are those of patternmakers, moulders and coremakers. Pattern making is described as one of the most highly skilled trades in modern industry. A good eye for form, a head for geometry, and general accuracy, are the natural requirements for this trade, together with a thorough knowledge of woods and woodworking, of the theory of moulding, and of the making of core-boxes, and some acquaintance with mechanical drawing. A high school or technical school training is recommended but at the present time the required knowledge is obtained by an apprenticeship lasting from three to five years. The work of the patternmaker is varied, and is usually fairly clean and healthy. Employers are usually unwilling to dispense with the services of a good craftsman. The proportion of patternmakers to the whole number of foundry-workers is about one to thirty or more. Knowledge of the craft qualified workers to open an independent job shop, only a small amount of capital being required and the number of such job shops is said to be growing in Ontario.

The largest proportion of foundry

workers are usually moulders. Their work is of three classes, namely floor, bench, and machine moulding, the two former being "skilled" and requiring intelligence and mechanical knowledge. Most workers now gain their experience by serving as helpers, but formerly an apprenticeship of three or four years was required. A machine moulder may become proficient in about six months, but the class of work which he performs is limited to large shops where many castings are made from the same pattern. The moulder's work is often heavy and dirty, and is exposed to extremes of temperature and to the fumes of molten metal. The chief risk incidental to the work, apart from accidents, is pneumonia, but the death rate from other causes is low. Moulding is recommended as a good job for the physically fit.

Coremaking is a branch of moulding, and it also is generally described as a "skilled" trade. The required knowledge is now generally acquired "on the job." A considerable proportion of core-makers, as well as of moulders, are foreign born. Women were successfully employed during the war at coremaking, the work being much lighter than moulding, and many are still so employed.

Machine shop work consists of machining operations on parts of machines or machine tools previously cast; fitting together or assembling the parts of a machine, and making tool steel into tools. A small number of workers, all highly skilled, are engaged in the latter process. Learners must acquire knowledge of all hand and machine tools and

fit themselves for all classes of work. A 4-years' industrial course at a technical school is recommended as a basis of knowledge, while a couple of years at the high school is said to be almost essential. The term of training for apprentices is usually four years. Tool-making is described as a highly skilled trade, calling for natural ability in designing. The all-round machinist's trade has been called "the broadest of all trades", owing to the great variety of operations he may be called on to perform. After mastering all branches of the trade he can specialize later, for example, in one of the branches of tool-making or in drafting.

The report also contains a sketch of the boiler and engine industry, in which the Ontario plants in 1917, employed 7,212 persons including office staff. Physical strength is needed for most of the occupations in this group as in moulding, and on account of the strenuousness of the work most of the employees are adult men. Other requirements are good eyesight and extreme accuracy. The average wage in boiler and engine shops is much higher than in foundries. In 1917 about 69 men in 100 received \$20 a week and over, an unusually high proportion, which is exceeded only by that prevailing in the steel furnaces and rolling mills. The average yearly wage, however, in the same period was only \$1,127, the annual income being affected considerably by irregular work. In 1917, the yearly average number of male employees, based on the highest monthly employment, is given as 84.4 per cent for the boiler and engine industry.

MOTHERS' ALLOWANCES IN MANITOBA IN 1920

THE fourth annual report of the Mothers' Allowances Commission of Manitoba, covers the 12 months' period ending November 30, 1920. Under the Act of 1916 assistance is given only to families consisting of a widow and two or more children, or in which the father is an inmate of a hospital for mental diseases; two years' residence by the

family in the province, and British citizenship on the part of the father, are also required. As noted in the LABOUR GAZETTE for December, 1920 (page 1580), the Commission towards the close of last year recommended a considerable extension in the scope of the Act by including the families of fathers physically disabled, by raising

the age of children benefitting from 14 to 16 years, and in several other directions. Since it became law the Manitoba Act has been subjected to continuous review by the Commissioners, the Winnipeg Mothers' Allowances Auxiliary (a volunteer body), labour organizations, and others; its provisions have been constantly tested and many improvements have been embodied in various amendments. The report shows that on November 30, 1920, 479 families were receiving allowances as compared with 362 on November 30, 1919. The total number of families under allowance during the year was 532. Out of 200 new applications received 156 were granted, 35 were refused, 8 were deferred, and one was withdrawn. The number of cancellations was 53 in 1920, compared with 51 in 1919; of these cancellations 14 resulted from increases in the family income, 23 because the mothers remarried; 7 because the families removed from the province; 4 because the regulations were not observed; 2 because only one child under 14 remained; one because the mother had become insane, the children being then cared for otherwise; one case was found ineligible after allowance had been granted. The number of children in the families of beneficiaries in 1920 totalled 1,894, of whom 1,636 were 14 years of age or under, and 258 were

15 and over; children over 15 working for wages numbered 181; 16 over 15 years of age were working at home, and 52 over 15 years of age were at school. As to the number of children per family, 8 families had one child at home; 145 had two children; 141 had three; 106 had four; 74 had five; 37 had six and 21 had seven or more children. The average rent paid by all families occupying rented dwellings in Winnipeg and "Great Winnipeg" in November, 1920, was \$23.80 per month, as compared with \$17.91 per month in November, 1919. The report points out that Manitoba leads the other provinces of Canada in this field of social welfare. "During the past year," it is stated, "British Columbia and Ontario have followed along similar lines. This is an indication of a growing appreciation of the valuable contribution that the state receives in the conservation of home life and proper care of dependent children which is made possible by the Mothers' Allowances." However, this form of assistance, it is suggested, "will doubtless be replaced by other methods. Social insurance, whereby the employer or employee or other person may contribute jointly their quota towards the prevention of dependency, may prove a better way to meet the demands for a more scientific provision for widowhood and dependent children."

WORKMEN'S COMPENSATION IN NOVA SCOTIA IN 1920

THE fourth annual report of the Workmen's Compensation Board of Nova Scotia shows various new features introduced during 1920 in the Workmen's Compensation Act of the province. These amendments which relate to crews of fishing and trading vessels, the provision of free medical aid for thirty days, and increased allowances to widows and children were set forth in the issues of the LABOUR GAZETTE of September, 1920, on pages 1193-4, and November, on page 1568. As a result

of these amendments over 100 fishing vessels in addition to a number of trading vessels came under the Act, and dependents of 30 members of their crews drowned at sea were benefited; the cost of medical aid, including payments made and estimated to be made for the year amounted to \$50,789; and a sum of \$335,748 had to be added to the pension reserve to take care of future payments, necessitating an increase of rates in 1920 in some industries, especially lumbering, and preventing the lowering

of rates in others. The report states that the present arrangement regarding medical aid at the coal mines is not satisfactory and that a conference is to be held at an early date between coal mine operators, the United Mine Workers' executive and the Board to make better arrangements.

The report shows that 1920 was above 1919 in the number of fatal accidents reported, but below 1917 and 1918, the figures being: 1917, 146; 1918, 185; 1919, 59; and 1920, 81. Temporary total disability accidents numbered in 1917, 4,504; 1918, 4,504; 1919, 4,640; and in 1920, 5,374; and the number of permanent disability accidents was, in 1917, 187; in 1918, 242; in 1919, 250; and in 1920, 194. There were 932 cases requiring medical aid only, and the claims pending completion at the end of the year were 535. Twenty-eight fatal accidents occurred in the coal mines of the province in 1920, as compared with 21 in 1919.

The provisional assessment based upon estimated payrolls in 1920 was \$1,318,970. It was expected, however, that adjustments of the payrolls would reduce the amount by \$99,000. When the 1919 report was prepared there was a provisional deficit in the lumbering and woodworking class of \$77,588, which was reduced by adjustment of payroll statements to \$29,159. At the end of 1920 this class showed a surplus of \$7,788, thus reducing the lumbering rate in 1920 from \$4.20 to \$3.80 for every \$100 of the payroll. Owing to the improvement shown in this class, the provisional rate for 1921 will be \$3.30. A list of reductions in the rates of some of the industries for 1920 is given as follows:

	Provisional	Adjusted.
Coal mining	\$ 3.00	\$ 2.20
Lumbering and sawmills	4.20	3.80
Steel and iron manufacture	1.50	1.00
Fish curing and packing	1.00	.50
Laundries	1.20	.80
Cordage and rope manufacture	1.40	1.20

Building (General construction)	1.50	1.00
Telegraph and telephone systems (operation, maintenance, etc.) ..	2.00	1.00
Telegraph and telephone systems (office and exchange employees) ..	.20	.10
Steel shipbuilding	2.50	2.25
Express companies	1.00	.50
Steam railways (operation and maintenance)	2.00	1.00
Stevedoring	3.00	1.00

As an example of the economical value of the present state board system of assessment over the individual liability and private insurance company system, the report states that the rates charged by private insurance companies, in the building class, ranged from \$1.70 upwards, as compared with the rates quoted above. It also states that owing to depression in the lumbering, fishing and coal mining industries, at the end of 1920, considerable amounts of assessments were outstanding. As the Act makes assessments a first lien upon the property used in the industry, it is not likely that the loss through these uncollected assessments will be appreciable. At the end of 1920, the provisional balance shown was \$237,131, as compared with \$318,758 at the end of 1919.

The total amount paid in wages in the various industries under the Act during 1920 was approximately \$73,000,000; the amounts in the chief industries being approximately as follows: coal mining, \$21,170,000; steel and iron manufacture, \$9,350,000; steam railway operation, \$2,090,000; lumbering and saw mills, \$5,800,000; and building (general construction), \$3,570,000.

The expenditures of the Board, as shown by a provisional statement to December 31, 1920, were as follows:

Compensation paid other than pensions	\$ 269,410.12
Transferred to Reserves for pension awards	408,626.70
Paid for medical aid	36,561.22
Administration expense	104,872.53

Nova Scotia Accident Prevention Association	8,320.14
Compensation estimated for reported claims	369,504.64
Compensation estimated for unreported claims	103,074.88
Estimated to complete medical claims	14,228.04
Disaster reserve	87,430.91
Total	\$1,402,029.18

In connection with the administration expense, the proportion charged to the Nova Scotia Accident Prevention Association was \$384.88 which was deducted from the total expense for administration. No expense has been incurred by

the Board at any time in connection with legal expenses other than fees for prothonotaries, sheriffs and registrars of deeds on judgments and executions.

In addition to the report on the workings of the Board during 1920, some particulars are given relative to the accidents that occurred in 1919. In this connection, the total number of days lost through temporary disability was 126,265, or an average of 27.21 days; through permanent disability 31,364, or an average of 125.46 days; through fatal cases 255, or an average of 4.32 days. The average age of the workers was 32.25 years, and the average weekly wage, \$18.57.

PROGRESS OF SAFETY MOVEMENT IN CANADA

THE second annual report of the Canadian National Safety League describes the progress of the movement in the various provinces during 1920. It contains also the seventh annual report of the Ontario Safety League, an older organization, but now a member of the Canadian League. The Ontario League remains in charge of safety work in that province.

The National League reports that in 1920 a second Provincial League was established in Manitoba, with headquarters in Winnipeg, and it is anticipated that the Canadian National Safety League will in the future fulfil one of its chief functions by assisting in the creation of other Provincial Safety Leagues. Owing to the interest taken by the Manitoba Government in safety work in that province the clerical and office work of the Manitoba Safety League is being handled through the office of the Provincial Bureau of Labour, overhead expenses being thus reduced to a minimum. Another affiliated body is the Shawinigan Falls Safety League, organized in connection with a recent safety movement among several large industrial plants in the Province of Quebec. This league, which is car-

rying on useful work by means of traffic regulation, school instruction, food and health inspection and guidance, will soon lead, it is hoped, to the formation of a Quebec Safety League. The Canadian National organization holds a special charter from the Dominion Government, and is authorized to carry on safety work in the Dominion of Canada. Its objects are set forth in the charter as follows: "To safeguard and protect the public, especially children, from the dangers of automobiles, railroads, street railways, and all other forms of vehicular traffic on the public highways in the Dominion of Canada. To educate the public through schools, churches, literature and all channels of publicity upon matters pertinent to public safety. To minimize the injury and killing of persons employed in stores, factories, workshops, and all departments of industrial and mercantile activity, by instilling into the minds of employer and employee the full meaning of 'Safety Always.' To cooperate, so far as lies in the power of the League, in preventing the useless destruction of life and property by fire. To advocate and secure possible remedies and preventives, and to assist in the enactment and en-

forcement of ordinances requisite to carry out the foregoing."

The seventh annual report of the Ontario Safety League records a remarkable extension during the year 1920 in the work of this organization. Much of the success achieved is attributed to the co-operation of the Ontario Government and its various departments; the city councils in Toronto, Hamilton, Ottawa and London; the Ontario Motor League; the Board of Education in numerous towns and cities; the Fire and Police Departments; Boards of Trade and Chambers of Commerce; District Labour Councils; public libraries; principals and teachers of schools; safety

workers in big industries, and many others. During the year the general work in the schools was extended and improved; a 3-day safety convention was held in April and a "safety-week" in October; a vigilance committee was formed in Toronto, their duties being to report infractions of the Motor Vehicles Act or the traffic by-laws. Bulletins dealing with industrial hazards were issued each week to hundreds of industries in Ontario, some of these covering specific hazards and others dealing with safety from a general viewpoint, and there was evidence of good results from these notices. The headquarters of both the Canadian and the Ontario Leagues are in Toronto.

EMPLOYMENT OF CHILDREN IN THE UNITED STATES

THE United States Children's Bureau has recently compiled statistics on the subject of the employment of children in industry, from 14 to 16 years of age. These statistics, which cover the period 1913-1920, are based on published reports, employment certificates, and such information as could be secured through inquiries sent out to various cities. Only twelve out of the seventy-one cities solicited furnished complete and satisfactory statistics covering the whole period, but these were considered fairly representative of the country as a whole, the South Atlantic States being the only ones not represented. Other cities furnished statistics for more recent comparison, and good use of this information was also made.

Before the War

According to statistics for manufacturing establishments given in the Census of Manufacturers for 1914, the number of employed children under 16 years of age was diminishing during the years just prior to 1914, the decrease being due mainly to the extension of child labour legislation. The industrial depression which marked the opening

months of the war and continued throughout the winter of 1914-15 was reflected in the numbers of children taking out permits to work, which showed a decrease amounting to approximately from one-fifth to two-thirds.

During the War

By the latter part of 1915, the effect of foreign orders for war goods was beginning to make itself felt in the unprecedented rise in the number of children entering gainful employment, the cities not showing an increase being those not immediately affected by the increased manufacture of munitions for export. Heavy increases were practically everywhere recorded for 1916 and 1917, the exceptions being in Detroit and San Francisco; the large decrease in the former being caused by the law of 1915 raising the minimum age from 14 to 15 years, and the decrease in the latter being attributable to the strengthening of the minimum age provision of the former law and improved physical requirements for certification. Massachusetts cities, manufacturing foundry and machine-shop products recorded increases in 1916 ranging from 90 to 145 per cent. The

increase was most striking in centres where children were not normally employed in large numbers; textile cities which always employed children not showing relatively large increases. An exception to this is Lowell, which showed an increase of almost 400 per cent over 1915, due to the large foundries, machine shops and cartridge plants which had recently been established there. In nearly all the cities furnishing complete statistics, a larger number of children were certificated in 1916 than in 1913.

After the United States entered the War

After the entrance of the United States into the war, the number of children taking out employment certificates continued to rise. The causes for this increase were varied and included the rising of cost of living, the absence of the breadwinner on military duty, the high wages offered by employers hard pressed for help and a general spirit of adventure, due to excitement of the war, which pervaded many children, especially boys. The extent of this increase is indicated below:

State	Increase in 1917 over 1916	Increase in 1918 over 1917
New Hampshire...	119 per cent	58 per cent
Rhode Island.....	6 "	14.7 "

A few cities recorded a decrease in 1917, but so large had been the increase in these cities in 1915 and 1916 that the net increase over 1913 was still considerable. Four of the cities where decreases were shown were in New York State, where an amendment to the child-labour law, effective February 1, 1917, requiring higher educational qualifications, was no doubt responsible. In 1918 four more cities showed decreases, attributable to the strengthening of the child labour laws, the raising of the educational requirements; and the restriction of school exemptions in New Jersey, Pennsylvania, Delaware and Michigan. With these exceptions

the year 1918 was the peak year as regards the number of children going to work. In several cities the increase was striking. In Washington D.C. there was an increase of more than 163 per cent, said to be due largely to a demand for child workers in Government offices. In Louisville, Kentucky, there was an increase of 52 per cent, following an increase in 1917 of 174 per cent, so that the number of children receiving employment certificates in 1918 was four times as great as in 1916; this, despite the fact that in 1918 Kentucky had strengthened its requirements relating to evidence acceptable in proof of age. In Philadelphia an increase of 82 per cent in 1917 was followed by a still further increase of 15 per cent in 1918, due to the fact that boys of 16 were allowed to work in the shipyards and munitions plant, receiving unusually high wages, so that there was a shortage of help in office, trade, and messenger service, to be filled by younger children.

Children Illegally Employed

The foregoing figures relate only to children legally certificated, and give no indication of the numbers going to work without complying with the law. While in a few instances higher standards became effective during the war due to changes in child-labour and school-attendance laws, in certain places pre-war standards were actually relaxed. Reports from labour commissioners and factory inspectors indicate the difficulty experienced during the war years in adequately administering child-labour laws. In Philadelphia violations of this law were four times as great in 1917 as in 1916. In inspections made by the Children's Bureau of 63 shipyards where steel ships were being built, approximately 60 per cent of the children found at work, who claimed to be 16 and were without certificates, were actually only 14 or 15 years of age. From this it is clear that in many cases the increase recorded in the number of children receiving certificates represents only the minimum increase

during the year in which industry was most affected by the war.

half of 1920, a decrease over the latter half of 1919 was shown.

Post-Armistice Conditions

Summary

With the shutting down of war industries, the return of soldiers, and, possibly, the uncertainty of the business outlook, there were fewer places for children to fill; consequently, during 1919, there was a general decrease shown in the number of children receiving employment certificates. The few exceptions, where the increase was large, were due to the high cost of living and labour shortage, and where slight, probably to the normal increase of population. In 1920 the number of children receiving certificates again mounted, the continued increase in the cost of living and the lure of high wages being assigned by a number of certificating officers as causes for this increase. But, beginning with the late summer of 1920, there occurred a depression in industry and business, accompanied by a gradual decline in the prices of necessities, and a similar decline in the number of certificates issued to children. Thus, in the latter

In summing up, it was found that for the entire period 1913-1920, an increase of about 13 per cent in 1920 could be recorded over 1913. The increase in the population of those cities represented during that period was 14 per cent, from which it would appear that the number of children taking out certificates to work had kept pace with the growing population. A number of States represented by those cities passed legislation during the period under discussion, which would tend to decrease the number of children going to work without legal certificates, but possibly resulting in larger numbers receiving certificates. Therefore, while the number of children taking out certificates has increased in proportion to the increase in population, it cannot be stated positively, any more than it can be denied, that the number of children actually going to work in 1920 increased in like proportion over the number going to work in 1913.

DECISION IN ROCHESTER CLOTHING TRADES DISPUTE

THE decision of Dr. William M. Liserson, the impartial chairman of the Rochester Clothing Market, in the recent arbitration proceedings, is briefly reviewed in *Bloomfield's Labour Digest*. Dr. Leiserson, says the *Digest*, dwells particularly on the necessity of reducing labour costs in the clothing industry, so that employers may get enough business to prevent unemployment. The decision places all workers on a piece-work basis.

"If no other method of decreasing costs can be found, wages will have to be reduced in order that more work may be provided," declares Dr. Leiserson in that part of his decision in which he gives the conclusions he arrived at from the facts presented. "This would

be better than no cut at all with a great deal of unemployment, for lower wage rates, which increase the amount of business and employment, might bring greater annual earnings.

"However, aside from some peaks of wages, especially among the under-pressers, where earnings are considerably higher than the level of the market, and which may be cut without injury to any one, a better method of reducing cost is available than cutting wages. It is possible to transfer the week workers who are paid on a time basis, and whose unit costs of production are much higher than that of the piece workers, to a basis where they, too, would be paid according to production. This would decrease production

costs and thus result in a saving in labour cost much greater than could be secured in any other way.

"The entire problem of wage readjustment at the present time arises out of the emergency created by the industrial depression from which the clothing industry is suffering. Something must be done to lower costs and prices in order that the industry may revive. The interests of all concerned require that more work be offered to the employees, and this can only be done now by a sacrifice of some kind. In an emergency of this kind the chairman would have to reduce wages even though wages were comparatively low. Similarly, the chairman is of the opinion that the same emergency justifies a change in the wage payment plan from a time basis to a production basis, although if there

were no emergency, such a change might not be justified. As an alternative, therefore, to a cut in wages, the chairman is of the opinion that time workers may properly be changed to payment by the piece.

"This change from a time basis to payment according to production is, in the mind of the chairman, the most sound method of bringing industry out of the present depression. What is needed is lower costs and prices and at the same time increasing purchasing power of the people. By changing from week work to payment by the piece, the earnings of the workers would actually be increased and at the same time the unit cost of production, as experience has amply demonstrated, would be considerably reduced by the increased output."

LABOUR ORGANIZATION IN CANADA, 1920

THE Tenth Annual Report on Labour Organization in Canada, covering the year 1920, has been issued by the Department of Labour. In addition to the statistics furnished, the report contains much general information as to the activities of the organized labour bodies operating in Canada, as well as references to important labour events in other countries. The total trades union membership reported at the close of 1920 is 373,842, a slight decrease from the figures of December, 1919, when the total stood at 378,047, as comprised in 2,918 local branches, an increase of 71 over the branches of last year. Of the 2,918 branches in the Dominion, 2,455 are affiliates of international organizations and between them they comprise 267,247 members, a gain over 1919 in this class of membership of 7,000 and in branches of 146; 259 local branches with 25,406 members are what are termed non-international bodies, these figures showing a loss of 66 branches and 7,966 members; 30 are independent units, a gain of one, the reported membership

of 27 being 31,189, an increase of 22,911 for this group; the national and Catholic unions now number 124, a gain of 41, comprising a reported membership of 45,000, an increase of 10,000; the local units of the One Big Union, which in 1919 were reported at 101 have decreased to 51, and the estimated membership is 5,000, a drop of 36,150. The membership of all classes of organized labour in Canada, as reported to the Department for the past ten years, has been as follows:

1911.....	133,132	1916.....	160,407
1912.....	160,120	1917.....	204,630
1913.....	175,799	1918.....	248,887
1914.....	166,163	1919.....	378,047
1915.....	143,343	1920.....	373,842

TRADE UNION MEMBERSHIP BY PROVINCES.—Including all classes of trade unions in the Dominion, the standing by provinces is as follows: Ontario, 1,231; Quebec, 568; British Columbia, 251; Alberta, 230; Nova Scotia, 167; Saskatchewan, 160; Manitoba, 159; New

Brunswick, 142 and Prince Edward Island, 10.

TRADE UNION MEMBERSHIP IN CHIEF CITIES.—The number of cities in Canada, having not less than 20 local branches of the international and non-international organizations and independent units has increased by three, there now being 35. These cities represent 59 per cent of the local branches of unions just mentioned and comprise 60 per cent of the branches of all classes which reported their membership, as well as containing approximately 44 per cent of the trade union membership of 373,842 in the Dominion, as reported from headquarters of the central organizations. Montreal leads the cities with 215 local branches of all classes of unions, 121 of which reported 45,209 members; Toronto stands in second place with 164 branches, the membership of 104 which reported being 25,978; Winnipeg occupies third position with 91 branches, 57 of which reported 9,940 members. Other cities in order of number of branches of all classes are: Vancouver, 86 branches, 55 reporting 9,670 members; Ottawa, 85 branches, 57 reporting 11,143 members; Quebec, 75 branches, 36 reporting 6,502 members; Hamilton, 73 branches, 50 reporting 5,184 members; London, 67 branches, 46 reporting 5,009 members; Edmonton, 63 branches, 42 reporting 3,867 members; Calgary, 59 branches, 43 reporting 4,310 members; St. John, 49 branches, 25 reporting 3,809 members; Victoria, 49 branches, 34 reporting 2,490 members; Halifax, 37 branches, 26 reporting 3,251 members; Saskatoon, 37 branches, 26 reporting 1,390 members; Regina, 35 branches, 22 reporting 1,187 members; St. Thomas, 34 branches, 26 reporting 2,853 members; Windsor, 33 branches, 24 reporting 1,469 members; Moose Jaw, 33 branches, 24 reporting 2,020 members; Sault Ste. Marie, 32 branches, 24 reporting 1,980 members; Brantford, 28 branches, 21 reporting 1,345 members; Moncton, 27 branches, 22 reporting 3,368 members; Fort William, 28 branches, 18 reporting 1,178 members;

Kingston, 27 branches, 15 reporting 1,010 members; Niagara Falls, 26 branches, 16 reporting 3,819 members; Peterborough, 26 branches, 12 reporting 410 members; St. Catharines, 26 branches, 14 reporting 592 members; Stratford, 26 branches, 16 reporting 1,700 members; Brandon, 26 branches, 18 reporting 1,089 members; Lethbridge, 25 branches, 18 reporting 1,675 members; Belleville, 23 branches, 19 reporting 1,494 members; Sydney, 22 branches, 14 reporting 1,526 members; Sarnia, 22 branches, 19 reporting 936 members; Brockville, 21 branches, 13 reporting 522 members; Guelph, 21 branches, 15 reporting 516 members; North Bay, 21 branches, 16 reporting 1,697 members. The cities which were included in this class in 1919, and which have been dropped owing to their local branch unions falling below 20 are Kitchener and Welland, while Lethbridge, Belleville, Sydney, Brockville and Guelph have increased their local branches sufficiently to place their names in the list.

BENEFITS PAID BY CENTRAL LABOUR ORGANIZATIONS.—Of the 101 international organizations in Canada, 71 have made payments during 1920 on account of benefits to members. The report contains a table showing the disbursements made for this purpose among the whole membership, the total expenditure being \$19,463,610, an increase of \$3,913,558 as compared with the payments made in 1919. The amount expended for each class of benefit was as follows:

Death benefits	\$10,718,687
Unemployed and travelling benefits	75,844
Strike benefits	6,393,313
Sick and accident benefits	1,557,876
Old age pensions and other benefits	717,890

Only one of the non-international organizations, the Federated Association of Letter Carriers, reported payments for benefits, having spent \$12,000 for death claims.

BENEFITS PAID BY LOCAL BRANCHES.—

A statement is also published in the report showing the amount paid in benefits for the year 1920 by local branch unions in Canada to their own members, the disbursements aggregating \$324,155, a sum of \$258,938 less than that reported in 1919. The payments made on account of the benefits indicated were as follows:

Death benefits	\$80,950
Unemployed benefits.....	8,322

Strike benefits	38,689
Sick benefits	149,947
Other benefits	46,247

A COMPLETE TRADE UNION DIRECTORY.

—As a directory of trade unions, the report is very complete, containing as it does particulars not only of every known local trade union in Canada, but also a list of all central organizations, together with the names and address of the chief executive officers for the year 1921.

THIRD CONVENTION OF INTERNATIONAL RAILWAYMEN'S CONGRESS

A SUMMARY of the proceedings of the third conference of the International Railwaymen's Congress, held in London on November 29-30, 1920, has just been issued by the International Labour Office, Geneva. Thirty-five delegates, representing 1,357,000 workers and nine countries were present, the countries represented being Austria (membership 86,000), Belgium (membership 83,500), Denmark (membership 10,000), France (membership 100,000), Germany (membership 300,000), Holland (membership 20,500), Luxemburg (membership 7,000), Sweden (membership 40,000), and the United Kingdom (membership 510,000). The Federation of Scandinavian Locomotive men, with a membership of 9,500, was also represented. Previous meetings were held at Milan in 1900, and in Paris in 1906. The Railway workers' organization forms a section of the International Transport Workers' Federation, the constitution of which now allows a large measure of autonomy to its constituent sections. The other sections holding their own conferences are the International Seamen's and the International Dock and Waterside Workers' organizations. Mr. R. Williams, President of the International Transport Workers' Federation, occupied the chair. The secretary was Mr. Edo Fimmen, also secretary of the International

Federation of Trades Unions and of the International Transport Federation.

The Rt. Hon. J. H. Thomas, in welcoming the delegates to Great Britain, emphasized the need for international brotherhood, which would have prevented such calamities as the late war. Labour, he said, was no longer insular, or national, and was now ready to help in the solution of the world's problems. In England the amalgamation of the various railway unions had resulted in the securing of a higher standard of living for the workers, had reduced working hours, and increased wages, and now the workers were about to enter upon a struggle for a share in control and management, and to hold the government to a promise it had already made.

HOURS OF LABOUR.

Referring to the decision of the International Labour Conference at Washington that an 8-hour day should be worked on the railways, several delegates described how this decision had been applied in their own countries.* Several countries, it was stated, had

* An account of the measures taken in various countries to carry out the recommendations of the Washington Conference was given in the LABOUR GAZETTE for March, 1921, page 362.

attempted to evade the obligation to conform with the decision, and in many countries reactionary forces were said to be at work to defeat it. In Switzerland a referendum had been taken, and the 8-hour day was approved by a large majority of the people. The French delegate, M. Bidegaray, stated that in France the principle had been accepted, but the railwaymen had to be increasingly on the alert to frustrate attempts to avoid giving it effect. In Germany, it was stated by Delegate Scheffel, a general 8-hour day was established in an Act passed after the Revolution. This act applied not only to state railways, but to privately owned concerns, and provided that with certain exceptions employees must work 208 hours per month. A strong movement, however, had been organized by their opponents to lengthen the working day, owing to the large annual deficit on the State-owned railways; German workers, the delegate said, were fully prepared to work longer hours, but only in furtherance of socialization. He was opposed to setting up the equivalent of works councils on the railways. These councils were too narrow in their scope, and substituted co-partnership for management and administration by labour.

M. J. Bowens (Belgium) reported good progress in Belgium in the movement for establishing a 48-hour week, with not more than 10 hours on any one day. The 8-hour day, however, was not yet established.

Delegate Temschik (Austria) stated that the number of railway workers in Austria had declined from about 300,000 before the war to about 105,000, the length of railway lines having decreased from 20,000 to 5,000 kilometres. The Reparations Commission had recommended the lengthening of the working day and the reduction of the staff, with a view to economy in administration.

Delegate Moltmaker (Holland) stated that railway workers were exempted from the provisions of the general 8-

hour law passed in 1918, and instead were required to work 96 hours in a fortnight.

Delegate Franzen (Sweden) reported that in the Scandinavian countries (Sweden, Norway and Denmark) an 8-hour day, or a month of 208 hours was provided by law for all workers except those on the railways, and for most of the latter, but the railwaymen wished to shorten the working day to 7 hours. The Swedish Government had appointed a joint committee to supervise the State railways.

Delegate Eick (Luxemburg) reported that an 8-hour day was established in Luxemburg on the day following the Armistice. Works councils were established by law, with direct workers' representation.

STANDARDIZATION OF WORKING CONDITIONS.

Delegate Moltmaker (Holland) advocated the adoption of a uniform international standard in regard to the wages, hours of labour and social status of railwaymen. He suggested that the losses suffered on the railways in each country should be divided internationally.

Delegate Thomas (United Kingdom) characterized such proposals as impracticable and Utopian. The annual deficit on English railways alone was £38,000,000. It was impossible, in his opinion, to impose the same standards, for instance, in England and Austria.

Delegate Scheffel (Germany) said that German railway workers aimed at the combination of all transport workers in one Traffic Union, which would embrace all those engaged in transport, including sailors, canal workers, railwaymen, and air transport workers. Already, by agreements made with the Government, the number of wage classes in existence had been reduced from 23 to 7, while other agreements related to hours, legal status, holidays, sickness, etc.

Delegate E. G. Anderson, (United Kingdom) stated that in England the number of grades on the railways had been brought down from about 700 to 100. The object of the railwaymen was to standardize upwards to the highest point, if possible. Average rates of wages had already been reached. Difficulties in standardizing had risen owing to the existence of hybrid grades, or men who do a little of two or more kinds of work, but these hybrid grades were being eliminated to some extent.

Delegate Moltmaker (Holland) re-

commended that as international wage standards were for the present out of reach, information should be collected on existing practice in regard for instance to sickness insurance, holidays with pay, courts of arbitration in disputes. Such information would form a basis for future action.

A motion was passed urging upon the governments of the various countries represented "the necessity of adopting all safety appliances in order to reduce the loss of life from accidents among railway servants."

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE FOUR WEEK PERIOD OF MARCH 1 TO MARCH 26, 1921

REPORTS from Employment Offices to the Dominion headquarters of the Employment Service of Canada for the four week period ended March 26, show that approximately the same number of placements were made during the period as during the preceding four week period. The offices reported that 19,374 applicants were referred to regular positions and that 13,842 placements were effected. This compares with 13,875 placements made during the preceding four weeks.

During the period under review regular placements were reported by weeks as follows:—

Week ended March 5.....	3,468
Week ended March 12.....	3,423
Week ended March 19.....	3,368
Week ended March 26.....	3,583

In addition 5,040 casual jobs (employment of a duration of less than one week) were supplied and were reported by weeks as follows:—

Week ended March 5.....	1,181
Week ended March 12.....	1,227
Week ended March 19.....	1,478
Week ended March 26.....	1,154

Placements in casual work during the

preceding period totalled 5,165, representing a decrease during the present four weeks of 125 placements.

The accompanying table presents in some detail the work of the offices for the four week period ended March 26. It will be noted that at the beginning of the period (February 28) there were 37,067 applicants unplaced, in comparison with 34,779 unplaced on March 26, after allowance had been made for cancellations and placements. The number of vacancies remaining unfilled on February 28 was 7,662, while the unfilled vacancies on March 26 totalled 8,953. On comparing the above with the figures for the corresponding period of last year it will be of interest to note that the number of applicants unplaced on March 27, 1920, totalled 23,891, while the vacancies remaining unfilled on this date totalled 11,842.

During the period at present under review, the number of applications registered at the offices was 31,502, of which 25,071 were men and 6,431 were women. The number of vacancies notified by Employers to the Service during this period totalled 22,265, of which 14,759 were for men and 7,506 were for women. When compared with

the preceding period, this is an increase of 5,176 vacancies.

The accompanying chart presents in graphic form the number of applications, vacancies and placements, week by week, since the beginning of October, 1919. It will be noted that for the

period the curve for applications has a slightly downward tendency while the curve for vacancies shows on the whole an increase. Placements maintained the same relative position at the end of the period as at the end of the preceding four week period.

EMPLOYMENT CONDITIONS IN CANADA FROM MARCH 26 TO APRIL 16, 1921, AS REPORTED BY EMPLOYERS

WEEKLY reports from employers to the Dominion headquarters of the Employment Service of Canada during the four weeks from March 26 to April 16 inclusive showed declines for the first two weeks totalling 19,479, followed in the two latter weeks by gains aggregating 11,321 persons, the result being a net loss for the whole period of 8,158 employees.

The change reported for each week as compared with the preceding week is as follows:—

Week ending March 26, a decrease of 6,083 persons or 1.0 per cent.

Week ending April 2, a decrease of 13,396 persons or 2.2 per cent.

Week ending April 9, an increase of 8,357 persons or 1.4 per cent.

Week ending April 16, an increase of 2,964 persons or .5 per cent.

In the different districts employment conditions experienced fluctuations. For the first week all provinces with the exception of British Columbia reported declines, Ontario leading with a total

of 3,164 persons. For the second week British Columbia and Alberta reported small increases, all others showed losses, those in Quebec totalling 10,223 persons with Ontario next in order. In the third week the Eastern provinces without exception reported increases in employment, Quebec leading with a total of 7,536 persons, while the Prairie provinces registered considerable contractions. For the fourth week all provinces except New Brunswick, Manitoba and Saskatchewan reported increases over the previous week.

The summary of returns by industrial groups shows that employers in Lumber and its Products reported additions to staff during all four weeks: this was largely a seasonal trend due to the reopening of saw mills. Other groups reporting additions to staff in the main were Telephones, Local Transportation, Tobacco, Fish Canning and Packing and Water Transportation. Losses were sustained throughout the entire period by Textiles, Coal Mining, Railway Transportation and Rubber Products.

The contraction in Logging, due to the closing of winter camps, was to some extent offset by the resumption of river work. Contraction in Textile firms showed most noticeably in Ontario and Quebec. The losses in Railway Transportation were distributed through all districts. The depression in Coal Mining continued in the Maritime Provinces, while in Alberta a fairly serious decline in the first week of the period was changed in the second week to an increase, which in the third week again showed an adverse balance due to temporary release of employees; in the

fourth week there was again a small increase. In British Columbia increases were registered in all weeks with the exception of the second, the balances being slight. The losses in Rubber Products were confined to Ontario and Quebec.

The gains in the Lumber and Lumber Products group were confined to the saw mills section almost wholly, the most noticeable increases occurring in Ontario and British Columbia. Tobacco manufacturing experienced a considerable increase in activity chiefly the Province of Quebec. The marked increase in employment in Fish Canning and Packing was of course a seasonal development affecting only the coastal regions, both Atlantic and Pacific. In Trade there was on the whole very little change: a slightly more favourable of employment prevailed in wholesale business.

Employment during the four weeks under review was much more unfavourable than during the same period in 1920, the index number (with the week of January, 1917, as a base) standing at about 85.5 as compared with approximately 102 at the same time last year. All provinces shared in this depression, but the contractions in Ontario and Quebec were the most serious. The heaviest losses occurred in the Manufacturing group, chiefly in Iron and Steel products, Textiles and Lumbering. Other groups showing considerable losses in this respect were Logging, Railway Transportation, Railway Construction and Maintenance and Transportation. It should be noted that a good deal of the fluctuation in Iron and Steel Products was due to the tempor-

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF MARCH, 1921,
AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of March, 1921, and is based on returns received from 1,563 labour organizations with a combined membership of 206,901 persons. For all occupations reporting, 16.48 per cent of the members were unemployed as compared with 16.12 per cent in February, 1921, 3.13 per cent in March, 1920, 5.0 per cent in March, 1919, 1.39 per cent in March, 1918, and 2.07 per cent in March, 1917. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions mak-

ing returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that the percentage of unemployment figures have reference only to those unions reporting.

The accompanying chart shows the curve of unemployment by quarters for 1916-17-18, and by months for 1919, 1920 and to March of this year. A similar chart was reproduced in the February, 1921 issue of the LABOUR GAZETTE, on page 214, and also in other previous issues. It will be seen that while there was a nominal decline in the percentage of unemployment for January (due to very slight recovery from the holiday and inventory losses, recorded at the close of December) the curve again mounted steeply in the two

following months, the percentage of idleness standing at 16.48 for the period under review.

That the percentage of unemployment showed a nominal increase over the preceding month may be attributed to increased slackness in the manufacturing and mechanical industries, particularly in metals, machinery and conveyances, and also in transportation. In the last two, the unemployment is partly a reflection of a temporary shutdown for the Easter season in railroad shops. Some improvement was noted in the building and construction group. In comparison with the returns for March of preceding years, the increase in unemployment was of a general character, occurring in all groups of industries.

Table I on this page summarizes the returns by provinces. Trade unionists in Ontario, Alberta and British Colum-

bia showed slightly greater activity than in February, but in all other provinces conditions were not as good. As compared with the figures for the corresponding month in preceding years, unemployment was more pronounced in every section of the country.

The percentages reported unemployed in the different occupations and industries are indicated in table 2 on page 707.

Unemployment in the manufacturing and mechanical industries, as reported by 374 organizations with a combined membership of 51,997 persons, was more prevalent than in the preceding month, and also than in March of previous years, 14.40 per cent of the members being out of work as compared with 11.13 per cent in February 1921, 1.93 per cent in March 1920, 4.18 per cent in March 1919, .91 per cent in March 1918 and 1.2 per cent in March 1917.

As mentioned previously, part of this increase in unemployment occurred in the metals, machinery and conveyances sub-group, where moulders, blacksmiths, machinists and other tradesmen were affected by the closing of railroad shops for the Easter season. In addition, there was less activity in the clothing and laundering, pulp, paper and fibre, woodworking and furniture, leather, boots, shoes, and rubber, glass bottle blowing, jewellery and oil refining groups, both as compared with February, 1921 and with March of preceding years, with the exception of clothing, in which the percentage for March, 1917, exceeded that reported for the period under review. The percentage out of work in the food, tobacco and liquor industry was considerably smaller than in the preceding month, but it was somewhat larger than in March of preceding years, with the exception of 1919 when the figures were practically the same. The same is true also for workers in the textile, carpet and cordage groups. In printing, publishing and paper goods, there was less inactivity than in February, but the percent-

age out of work was larger than in March of preceding years.

In addition to the total unemployment there was considerable short time for moulders, blacksmiths, boilermakers, pattern makers, metal polishers, machinists, steel and tin workers, bakers, confectioners, textile workers, tailors, garment workers, paper makers, printers, musical instrument, boot and shoe workers.

Reports from 658 organizations for transportation workers, with an aggregate membership of 79,444 persons, indicated that 10.84 per cent of the members were out of work as compared with 9.52 per cent in February, 1921, 1.79 per cent in March, 1920, 3.04 per cent in March, 1919, .37 per cent in March, 1918, and .99 per cent in March, 1917. These increases in unemployment occurred almost entirely among steam railway employees, whose returns constituted about 85 per cent of the entire group membership reporting. As stated above, workers in this industry, notably carmen, were largely affected by temporary shutdowns on the railways. In addition there was slightly less activity for teamsters and chauffeurs than in February and also than in March of previous years. Street and electric railway employees and navigation workers, however, were more fully employed than in the preceding month. In the former sub-group the percentage of unemployment was exceeded by those reported in March 1918 and 1919, but on the other hand it was larger than in March, 1920 and 1917. Navigation workers, however, were less fully employed than in March of any other year of the record with the exception of 1919. Reports were also tabulated from 8 locals of longshoremen showing 586 of the 2,208 members unemployed, a percentage of 26.5 as compared with 23.4 per cent in February, 1921, 20.7 per cent in March, 1920, 20.1 per cent in March, 1919, 13.4 per cent in March 1918, 4.5 per cent in March, 1917. These returns, on account of the casual nature

of longshore work are not included in the accompanying tabulations. As in the case of the manufacturing group, a large number of unions classified in transportation showed a good deal of short time.

In the mining, quarrying and refining of ores group, returns were tabulated from 36 unions with a combined membership of 11,453 persons showing 12.06 per cent of idleness as compared with 9.01 per cent in February, 1921, .65 per cent in March, 1920, 1.87 per cent in March, 1919, .40 per cent in March, 1918 and .80 per cent in March, 1917. Miners, particularly in Nova Scotia were not as fully employed as in any of the above months, while there was also less activity for quarry workers as represented by two organizations. A large number of miners were working only part time in addition to those entirely out of work.

The percentage of unemployment among workers in building and construction was 25.67, as compared with a percentage of 31.38 in the preceding month and with 9.88 per cent in March, 1920, 16.45 per cent in March, 1919, 7.63 per cent in March, 1918, and 7.47 per cent in March, 1917.

Bricklayers, masons and plasterers, carpenters and joiners, painters, decorators and paper hangers, tile layers, lathers and roofers, steam, shovel and dredgemen, hod carriers and building labourers, were somewhat more fully employed than in the preceding month, but in most cases, the percentages out of work were larger than in March of previous years.* Electrical workers, plumbers and steam fitters, and bridge and structural iron workers, showed greater slackness than in any of the months used in this article for comparative purposes. The percentage out of work among granite and stone cutters was more pronounced than in February and also than in March, 1917 and 1919, while it was exceeded by those reported for March, 1920 and 1918. Consider-

able short time was registered in all of the above organizations.

The percentage out of work in the public employment group stood at 5.06, as compared with 3.54 per cent in February, 1921, 1.66 per cent in March, 1920, .07 per cent in March, 1919, 4.7 per cent in March, 1917, and with no unemployment in March, 1918. This increase in slackness may be attributed to decreased activity for civic employees, some of whom also reported short time.

Logging and lumber workers, as registered by 7 organizations showed an unemployment percentage of 60.75 as compared with 65.64 per cent in February. Figures for March of previous years are not available. The slight decline in the percentage of unemployment reflected increased activity in sawmills, as well as the commencement of river drives. Fishermen, as reported by 4 unions were more fully employed than in the preceding month, but the percentage out of work was very much larger than in March of previous years.

Unemployment in the group of miscellaneous trades, as recorded by 136

unions with a combined membership of 13,092 persons, was slightly more prevalent than in any months used in this article for comparative purposes, 10.04 per cent of the members being out of work as compared with 9.05 per cent in February, 1921, 3.66 per cent in March, 1920, 4.74 per cent in March, 1919, 1.25 per cent in March, 1918 and 2.11 per cent in March, 1917. Retail clerks as indicated by 4 associations, showed no unemployment as compared with small percentages in previous tabulations. Hotel and restaurant employees, musicians and theatre employees and unclassified workers registered larger percentages of unemployment than in February and also than in March of preceding years. Barbers were slightly more active than in the preceding month, but the percentage out of work exceeded those reported in March of other years. The percentage of idleness among stationary engineers and firemen was larger than in February and also than in March, 1918 and 1917, but there was less unemployment than in March, 1920 and 1919. Some short time was reported in these unions. The tabular statement on pages 708-709 presents the returns in some detail.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES, MARCH, 1921

REPORTS from 15 cities showing the number of civic employees temporarily engaged and the wages paid these persons during the month of March showed an increase of less than one-half of one per cent in the number of employees and of nearly 11 per cent in the wages paid, as compared with the preceding month. In March, 1921, 12,132 persons were temporarily employed and the wages amounted to \$918,024.95 as compared with 12,077 employees and an aggregate payroll of \$827,691.32 in the preceding month.

In comparison with the returns for the same period in 1920, there was a slight increase in the number of employees and a decline of about three per cent in the wages paid, there having been 12,079 employees with a total payroll of \$947,236.79 in March of last year.

Hamilton, London, Winnipeg, Regina, Edmonton and Victoria registered increases in the number of persons temporarily employed as compared with both February, 1921, and March, 1920. At Toronto and Saskatoon there were

gains in the former, with declines in the latter comparison. On the other hand, Brandon and Vancouver showed decreases as compared with the returns for the preceding month with gains as compared with March of last year. At St. John, Montreal, Ottawa, Moose Jaw and Calgary there were reductions in both cases.

As to wages, Toronto, Hamilton, London, Winnipeg, Brandon, Regina, Ed-

monton and Victoria recorded increases as compared with the preceding month and also with the corresponding month of last year. Saskatoon registered a gain in comparison with February, but a decline as compared with March 1920. On the contrary, St. John and Vancouver showed losses in the former with gains in the latter comparison. At Montreal, Ottawa, Moose Jaw, and Calgary there were decreases in both cases.

EMPLOYMENT IN THE BUILDING TRADES DURING MARCH, 1921, AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 56 cities, showed an increase during March as compared with the preceding month, the value rising

from \$3,216,085 in February to \$6,610,703 in March, an increase of \$3,394,618 or nearly 106 per cent. All provinces reported increases in this comparison, that of \$2,701,083, or nearly 214 per

cent in Ontario being the most pronounced.

As compared with the figures for the corresponding month in 1920 there was a decline of \$1,549,457 or nearly 19 per cent, the value for March of last year having been \$8,160,160. In this comparison New Brunswick, Ontario and British Columbia showed increases, while of the declines registered in the other sections of the country, that of \$738,830 or 77.7 per cent in Alberta was the largest.

Of the larger cities, Montreal, Toronto and Winnipeg reported increases in the value of the permits issued in comparison with the returns for February, with declines as compared with the corresponding month in 1920. Vancouver showed gains in both cases.

Of the smaller centres, Sydney, St. John, Belleville, Galt, Guelph, Hamilton, London, Niagara Falls, St. Catharines, Sarnia, Welland, Windsor, Woodstock, Moose Jaw, Saskatoon and Point Grey registered increases as compared with figures for both February, 1921, and March, 1920.

The returns from 35 cities formerly used in this report (which are distinguished by asterisks and which are also tabulated separately for statistical purposes) showed that the total value of the building permits issued by these cities was \$5,789,237 as compared with \$2,831,156 in February. There was, therefore, an increase of \$2,958,081 or 104.5 per cent as compared with the returns for the preceding month. In comparison with the corresponding month of last year, however, there was a decline of \$1,767,674 or 23.4 per cent, the value for March, 1920, having been \$7,556,911.

RECENT CHANGES IN WAGES AND HOURS OF LABOUR IN CANADA

THE following is a summary of the principle changes in wages during recent months, of which information has reached the Department. It will be seen that most of the changes were reductions, but in certain cases increases are shown, these having been provided for by agreements previously entered into. In the case of certain important industries, particularly Pulp and Paper, and Building and Construction, little information has been given, owing to the fact either that wage changes are still being negotiated, or that the employees are now on strike. No reference is made to reductions announced by employers but not agreed to by employees. Also, in many cases wages have remained as they were.

In comparing conditions with those in the United States it is noted that considerable reductions have been effected there in some industries, and negotiations are still being carried on in others. In the Textile, Clothing, Printing, and Meat Packing Industries, wage reductions have recently been put into effect, and on Railway and Steamship Lines, and in the Building Trades, these are still being negotiated. Early in May, the United States Steel Corporation, although having recently announced that wages would remain unchanged, put into effect a reduction of wages, reducing selling prices at the same time, with certain exceptions. All these reductions have not been confined to unorganized, or imperfectly organized, trades, but, in many cases, have been accepted by Trade Unions.

The United States Railroad Labour Board announced, on May 17, its decision that "prevailing conditions justify to an extent yet to be determined, a readjustment downward of the wages of the employees of the carriers which are parties to the disputes already heard by the Board." Pending disputes will be heard in June, and decisions thereon will be effective on July 1.

Metal Trades

PRINCE EDWARD ISLAND.—*Charlotte-town*: Moulders' wages in one firm have been reduced 10 per cent, the old rates being 50-65 cents per hour (averaging $52\frac{1}{4}$ cents per hour), and the new rate 47 cents per hour; apprentices, old rate, 17 cents, per hour, new rate, $15\frac{1}{2}$ cents per hour. Another firm has made the following reduction in hourly rates:—machinists, from 50 cents to $48\frac{1}{2}$ cents, fitters, from 48 cents to 40 cents, patternmakers, from 43 cents to 37 cents, moulders, from 60 cents to 55 cents, boilermakers, from 46 cents to 28.8 cents.

NOVA SCOTIA.—*Amherst*: One firm has reduced wages 10 per cent for moulders and machinists; the old rate of moulders being 75-78 cents per hour, the new rate, 68-72 cents per hour; machinists, old rate, 72-77 cents per hour, new rate, 65-70 cents per hour; specialists, old rates, 50-65 cents per hour, new rates, 45-58 cents per hour. *Halifax*: Wages in the metal trades have been reduced 5 cents per hour, boilermakers being reduced from $72\frac{1}{2}$ cents to $67\frac{1}{2}$ cents, electricians, blacksmiths, machinists, riveters, sheet metal workers, etc., from $72\frac{1}{2}$ cents to $67\frac{1}{2}$ cents, patternmakers, from 75 cents to 70 cents, and labourers, from $47\frac{1}{2}$ cents to $37\frac{1}{2}$ cents. *New Glasgow*: Wages in all the metal trades were reduced 20 per cent by one firm on February 20, 1921, by another on May 1, 1921, in the latter case the old rates being from \$3.50 \$4.00 per 10 hour day. *Sydney*: Wages in the steel works, were reduced 20 per cent, the old rate being, minimum, \$3.85 per day, average, \$5.30 per day. *Sydney Mines*: 20 per cent reduction in all metal trades February 20, 1921.

NEW BRUNSWICK.—*Moncton*: One firm has reduced the monthly wages of automobile mechanics from \$120 to \$100. and

of garage men from \$70 to \$65. *St. John:* The wages per week of metal workers were reduced 10 per cent on March 14, the old rate being from \$22-\$40, and the new rates from \$19-\$32.50.

QUEBEC.—*Montreal:* One firm reduced the wages of machinists and fitters in January, 1921, from 70 to 60 cents per hour, and in the same month, another firm raised the wages of boilermakers from 70-72½ cents per hour. In January, 1921, the Montreal Harbour Commission reduced the hourly rates of machinists from 70 cents to 65 cents, of fitters from 70 cents to 68 cents, of carpenters on ship construction from 60 cents to 55 cents, and of ship watchmen, per day, from \$4.25 to \$4.00. The City of Montreal raised the wages of blacksmiths, per hour, from 60 cents to 65 cents, of millwrights, and machinists, from 70 cents to 72 cents; and reduced the wages of electric linemen, per month, from \$115 to \$110, of fitters, per hour, from 70 cents to 55 cents. Iron moulders were reduced from 85 cents per hour in 1920 to 80 cents per hour in 1921, still working 9 hours per day. *Quebec:* One foundry in Quebec reduced the rate of second class machinists in January, 1921, from 50 cents to 45 cents per hour. *St. John's:* The City of St. John's increased the wages of blacksmiths in January 1921 from 70 cents to 75 cents per hour. One firm reduced wage rates per hour as follows: blacksmiths, old rates (1920) 55-63 cents, new rates (January, 1921), 48-55 cents; cabinet makers, old rates, 50-60 cents, new rates, 44-50 cents; carpenters, old rates, 50-55 cents, new rates, 44-48 cents; electricians, old rates, 40-50 cents, new rates, 35-44 cents; millwrights, old rates, 55-60 cents, new rates, 44-53 cents. *Sorel:* One firm decreased the hourly rates of 90 labourers from 30 cents to 25 cents, and of 20 machinists, from 45 cents to 40 cents. Another firm cut wages of all classes 25 cents per day, on March 7, 1921, increasing hours from 9 to 10. *Three Rivers:* One firm reduced the hourly rates in January 1921, as follows:—moulders, old rates, 78-87 cents, new

rates, 70-75 cents; machinists, old rates, 60-70 cents, new rates, 50-65 cents; labourers, old rate, 42 cents, new rate, 36 cents. *Upper Bedford:* One firm cut wages 20 per cent on January 10, most of the work being piece work.

ONTARIO.—*Belleville:* One firm reduced the hourly rate of boilermakers, in January, 1921, from 65 cents to 55 cents. *Brantford:* One firm reduced the hourly rates of labourers in January, 1921, from 45 cents to 40 cents. Another firm reduced the wages of machinists in January, 1921, the old rates being 70-85 cents per hour, the new rates, 68-77 cents. A third firm reduced the rates of machinists on April 6, the old rates being 82-85 cents per hour, the new rate, 70 cents per hour. *Fort William:* One firm reduced wages of all employees 10 per cent on February 1, 1921. *Hamilton:* One firm reported, on February 18, 1921, a general reduction of 17½ per cent. Another firm, in January, 1921, reduced the hourly rates of boilermakers from 65 cents to 60 cents, and of labourers from 45 cents to 40 cents. *London:* One firm in January, 1921, reduced the hourly rates of machinists and fitters from 76 cents to 68½ cents, and of moulders from 75 cents to 67½ cents. Another firm, in January, 1921, reduced the hourly rates of machinists from 70 cents to 62 cents, of moulders from 67½ cents, to 64 cents and of blacksmiths from 47½ cents to 43 cents. Another firm reduced all piece work rates 12½ per cent in 1920. *Midland:* Boilermakers' union reported the following reductions in hourly rates on January 5, 1921:—Ship builders, old rates, 80-85 cents, new rate, 70 cents; helpers, old rate, 47½ cents, new rate, 40 cents. *Ottawa:* One firm reduced the wages of common labour on the 7th of May, 1921, from 40 cents to 35 cents per hour, and of handy men, from 45 cents to 40 cents per hour. In all machine shops the wages were reduced 10 per cent, on May 1, 1921, the old rates being:—Machinists, 64-71 cents; blacksmiths, 48-60 cents; blacksmith's helpers, 34-40 cents; moulders and core makers, 70 cents; cleaners, 42 cents. *Sault Ste.*

Marie: One firm reduced the wages of steel workers and associated trades 20 per cent in January, 1921. *Toronto:* One firm reduced the wages of all employees 10 per cent February 16, 1921.

BRITISH COLUMBIA.—*New Westminster:* One firm reduced the hourly rates of employees in January, 1921, as follows:—Moulders, from 86½ cents to 78 cents; machinists, from 91¾ cents to 82 cents. Another firm reduced the wages of moulders, the old rates being, 86½-90 cents, and the new rates, 78 3-8-82 cents, and of labourers, the old rate being 60-63 cents, and the new rates, 54-58 cents. *Vancouver:* One firm reduced the wages of all employees 10 per cent on January 24, 1921. Another firm reduced wages in January, 1921 as follows:—Machinists, moulders and boilermakers from \$6.90 to \$6.27 per day, labourers, from \$4.75 to \$4.33 per day. *Victoria:* One firm reduced the rates of boilermakers, per day, from \$7.00 to \$6.40. One firm reduced the rates of machinists, per day, from \$6.72 to \$6.20, and another firm, from \$6.60 to \$6.20.

Shipbuilding

ONTARIO.—*Port Arthur:* One firm reduced the wages of all classes in May, 1921, 17 per cent, 383 employees being affected. The old rates per hour were 47-90 cents, and the new rates 39-75 cents, hours per week being increased from 48 to 55. *Toronto:* In January, 1921, one firm reduced hourly rates as follows:—Riggers, from 77½ cents to 60 cents; ship carpenters, and caulkers, from 85 cents to 75 cents, plumbers, riveters, and machinists, from 90 cents to 75 cents; and blacksmiths, from 88 cents and \$1.00 to 75c.

BRITISH COLUMBIA.—*Vancouver:* One firm reduced the wages, per day, of employees, in January, 1921, as follows:—Caulkers, from \$7.98 to \$7.50; derrickmen, from \$6.84 to \$6.00; shipwrights, from \$7.00 to \$6.50; steel caulkers and riveters, from \$6.24 to \$6.00, riggers, from \$6.24 to \$5.80. Another firm, on March 2, 1921, reduced the daily rates

as follows:—Caulkers, from \$8.10 to \$7.50; shipwrights, from \$7.02 to \$6.50; machinists, from \$6.40 to \$6.00, and labourers, from \$4.26 to \$4.00. *Victoria:* About February 4, 1921, wages of all crafts were reduced by one firm 50 cents per 8 hour day, the highest classes now (after reduction) being:—caulkers, wood, \$7.90; anglesmiths, \$7.70; patternmakers, \$7.35 and electric welders, \$7.00. Acetylene welders and burners, blacksmiths, boilermakers, chippers and caulkers, electricians, engineers, machinists, pipefitters, plumbers, riggers, riveters, shipfitters, toolsmiths, etc., \$6.20; carpenters, coppersmiths, millwrights, shipwrights, ship joiners, sheet metal workers, \$6.80; painters, \$5.70; practically all remaining employees, including labourers, helpers and specialists, receiving between \$4.00 and \$5.00 per day. There were 325 men affected.

Foods, Drinks and Tobacco

Wages of employees in the meat packing industry in Montreal, Toronto, Chatham and Hull were reduced 12½ per cent in March, 1921.

QUEBEC.—*Montreal:* Wages of sugar refiners were 30 cents per hour January 3, 1921, when the refinery reopened, the rate when operations ceased in October, 1920 having been 42 cents per hour.

ONTARIO.—*Hamilton:* Wages of tobacco workers were reduced 10 per cent on January 10, 1921.

ALBERTA.—*Calgary:* Early in 1921, wages of meat packers in one firm were reduced 5 cents per hour, 184 employees being affected. On May 16, 1921, a further cut of 10 cents per hour went into effect for all employees. In one flour mill wages per hour were reduced on May 1, 1921, as follows:—Millers, from 82½ cents to 72½ cents; packers, from 72½ cents to 62½ cents; common labour, from 57½ cents to 52½ cents. In another flour mill wages were reduced as follows:—Millers, from \$175 to \$160 per month; assistant millers, from \$140 to \$125 per month; packers, from 62½

cents to 50 cents per hour, and common labour, from 57½ cents to 45 cents per hour.

BRITISH COLUMBIA.—*New Westminster:* Wages of labourers in a distillery were reduced in January, 1921, from \$25 to \$24 per week. *Vancouver:* The wages of bakers have been reduced at different times, February 1, 1921, April 1, 1921 and May 1, 1921; the old rates were from \$30 to \$39 per week, and the new rates from \$28.50 to \$37.50. The wages of bakery drivers were likewise reduced, the old rates ranging from \$30 to \$35 per week, and the new rates from \$20.50 to \$31.50. Bakers work a 44-hour week; drivers work a 55 hour-week, and receive a commission.

Textiles

The wages of about 3,500 cotton mill employees at Marysville, N.B., Milltown, N.B., Cornwall, Ont., and Hamilton, Ont., were reduced 12½ per cent, reduction effective January 24, 1921.

QUEBEC.—*Three Rivers:* One firm reduced wages January 10, 1921, by removing the 10 per cent advance granted in 1920, reducing the average wage per year from \$833 to \$754.

Clothing, Boots and Shoes

QUEBEC.—*Montreal:* On February 19, 1921, one firm reduced wages of coat makers 15 per cent. Wages per week of hat makers have been reduced as follows, hours remaining 44 per week; cutters reduced from \$44 to \$40; operators, \$38.50 to \$33.50; blockers, \$33 to \$30. Wages per week of clothing workers have been reduced as follows: Cutters, pressers and operators reduced from \$45 to \$40, finishers from \$35 to \$30; finishers, female, from \$27 to \$24. In the boot and shoe industry, one firm reduced wages on February 14, 1921, 12 per cent, reduction affecting 400 workers. Another firm has reduced weekly wages 5 per cent; the 1920

rate having been: cutters, \$24; lasters, \$30; finishers, \$22.50.

ONTARIO.—*Almonte:* Two firms reduced wages of knitting mill workers 25 per cent, one on March 1, 1921, the other on May 9, 1921. *Ottawa:* one firm reduced wages of garment workers 15 per cent on April 1, 1921. *Sault Ste. Marie:* One firm reduced wages of garment makers on February 14, 1921, old weekly rates being \$36 and \$24, and new, \$33 and \$22.50.

MANITOBA.—*Winnipeg:* One firm reduced wages on March 1, 1921, weekly rates of seamstresses being reduced from \$15 to \$14.25 and dressmakers from \$21.50 to \$20.40.

Printing Trades

ONTARIO.—*London:* Wages of hand and machine compositors were \$35 per week in 1920, and were increased to \$39 by March 1, 1921; job pressmen, both cylinder and platen were increased from \$27.50 to \$34; web pressmen, news, were increased from \$30 to \$34; web assistants were increased from \$15 to \$28; feeders, cylinder press, from \$14 to \$22. Electrotypers were increased from \$34 to \$36. Bookbinders' weekly rates were increased as follows: finishers and rulers from \$30 to \$35; forwarders from \$30 to \$33; bindery girls from \$10 to \$16.50. In every case hours remained the same, whether 44 or 48.

MANITOBA.—*Winnipeg:* Stereotypers' rates were increased on May 1, 1921, from \$41 to \$44 per week, 15 workers being affected. News printers, night, were increased on January 1, 1921, from \$48 to \$51, and news printers, day, on January 1, 1921, from \$45 to \$48, 130 workers being affected. On May 1, weekly wages of 30 web pressmen—journeymen were increased from \$41 to \$44; and of 6 web pressmen—charge-men—from \$48.50 to \$50. On May 1, 1921, weekly hours of job printers—night—were reduced from 45 to 41, of job printers—day, of printing pressmen and of bookbinders, from 48 to 44, in

every case weekly wages remaining the same.

Pulp and Paper

QUEBEC.—*Three Rivers*: One firm reduced wages 15 per cent on March 7, 1921, reduction affecting about 150 workers.

Woodworking

NOVA SCOTIA.—*Amherst*: One firm reduced wages 10 per cent on February 7, 1921, previous to which date, wages per hour were as follows: boys, 25 cents; labourers, 34 to 40 cents; inside men and bench hands, 45, 50 and 60 cents. Another firm on February 7, 1921, reduced wages of yard men, which had been \$3.50 per 9-hour day, 15 per cent; and of inside men, which had been \$3.75 to \$4.50 per 9-hour day, 7 per cent.

NEW BRUNSWICK.—*Moncton*: On January 17 one firm reduced wages 15 per cent, 40 men being affected.

ONTARIO.—*Hamilton*: One firm reduced hourly rates of cabinet makers, the 1920 rates being 50 to 55 cents, and the rates in January, 1921, 45 to 50 cents. *Ottawa*: Wages of wood workers in all factories were reduced 10 per cent on April 15, 1921; the rates in force with one firm before reduction were 57-60 cents per hour, and after reduction the men were receiving 47-51 cents and 54 cents per hour. *Stratford*: one firm on April 11, 1921, reduced wages of management, office staff, foremen and men 5 to 8 per cent; wages in factory affecting 180 men were before reduction, 20-75 cents per hour, and after, 19-68 cents, and for women, before reduction 27 to 33 cents per hour, and after, 25 to 30 cents. *Toronto*: One firm on January 15, 1921, reduced rates of 17 piano workers on piece work 10 per cent. *Windsor*: On December 1, 1920, one firm reduced wages of employees, piano workers, 20 per cent; and another firm reduced wages of employees, cabinet makers, from 75 to 60 cents per hour.

BRITISH COLUMBIA.—*Vancouver*: One

firm reduced wages of employees, upholsterers, from \$6.80 to \$6.00 per day, the latter being the rate in January, 1921.

Rubber and Leather

QUEBEC.—*Montreal*: One firm in 1921 reduced wages of employees $7\frac{1}{2}$ per cent, wages previous to reduction having been: operators, 54 cents per hour, labourers, 36 cents, both working a 55-hour week.

ONTARIO.—*Toronto*: One firm on March 8, 1921, reduced wages of harness makers 10 per cent and of collar makers 5 per cent. Rate previous to reduction was 55 cents per hour.

Chemicals

NOVA SCOTIA.—*Sydney*: One firm reduced wages of 50 labourers, the 1920 rate being $42\frac{1}{2}$ cents per hour, and the rate in January, 1921, 38 cents per hour. Another firm reduced wages of all employees 20 per cent on February 16, 1921.

ONTARIO.—*Sulphide*: One firm reduced wages of employees by 5 cents per hour on February 1, 1921.

Transportation, Forwarding, Storage

QUEBEC.—*Montreal*: Wages of long-shoremen were reduced on January 1, 1921, from 70 to 60 cents per hour, and of ship liners on April 16, 1921, from 65 to 60 cents per hour, both classes working 10 hours.

ONTARIO.—*Hamilton*: One firm reduced wages of 10 chauffeurs from \$20 to \$17 per week, and of 5 chauffeurs from \$22 to \$19 per week, the latter rates being effective in January, 1921. *Ottawa*: Wages of coal drivers were reduced from \$4.00 to \$3.50 per day, with a 50-hour week in June, July and August, effective May 13, 1921. *Port Arthur*: Wages of 50 elevator employees were reduced on April 15, 1921, from 60 to 50 cents. *Toronto*: Wages of Marine Engineers No.

I have been reduced 10 to 15 per cent for the season of 1921.

BRITISH COLUMBIA.—*New Westminster*: One firm has increased wages of chauffeurs from \$5 to \$5.50 per day and reduced wages of labourers from \$5.50 to \$5 per day, latter rates in effect in January 1921. Another firm reduced wages of 4 automobile mechanics from 70 to 65 cents per hour, the latter rate being effective in January, 1921. *Vancouver*: Wages of deck hands on tugs have been reduced 10 per cent. One steamship company has reduced wages of licensed officers 25 per cent and of unlicensed officers 15 per cent.

Mining, Metals

ONTARIO.—*Cobalt*: 700 metal miners and millmen were affected by a reduction of 75 cents per day effective April 1, 1921. The new rates per day are as follows: Machine runners, \$4.50; helpers, \$4.00; muckers, \$3.75.

BRITISH COLUMBIA.—*Anyox*: Wages of metal miners reduced 25 cents per day, effective April 1, 1921. *Grand Forks* and *Sandon-Slocan* district: Wages of metal miners reduced 50 cents per day, effective January 1, 1921. *Roseland* and *Kimberly* (miners) and *Trail* (smelters): Wages reduced for men on day wages, 55 cents per day, and for men on monthly pay roll, \$15 per month.

Mining, Coal

ALBERTA.—Certain small companies recently reduced wages of employees from 60 to 50 cents per hour, affecting about 200 employees.

BRITISH COLUMBIA.—*Vancouver Island*: Coal miners' wages have been reduced twice, on February 1, 1921, and on May 1, 1921. The rates, for one class being in 1920, \$3.00 per day, reduced 40 cents on February 1 and 26¼ cents on May 1, 1921; and for the other class, \$3.15 per day in 1920, reduced 43 cents on February 1, 1921, and 27½ cents on May 1, 1921.

Building and Construction

PRINCE EDWARD ISLAND.—*Charlottetown*: Wages per hour in building trades were reduced in the Spring of 1921, as follows, all working 54 hours: Wages of stone masons reduced from 90 cents to 80-90 cents per hour; bricklayers, from \$1.00 to 90 cents; stonecutters, from 65 to 60 cents; plasterers, from 75 to 60 cents; carpenters, from 50 to 45 cents; sheet iron workers, from 65 to 60 cents; painters, from 45-50 to 45 cents; electrical workers, from 45 to 40 cents; cement finishers, from 40 to 35 cents; cement mixers, from 35 to 30 cents; tile layers, from 55 to 50 cents; teamsters, Trade Union minimum rates, from 60 to 50 cents, prevailing rates, from 75 to 65 cents; labourers, from 35 to 30 cents.

NOVA SCOTIA.—*Amherst*: One firm reduced wages of masons in January 1921, from 80 to 60 cents per hour. *Halifax*: One firm reduced wages of masons in January 1921, from 90 to 75 cents per hour, and of labourers from 45 to 40 cents per hour. One firm on February 16, 1921, reduced wages per hour of employees as follows: Carpenters reduced from 66 to 60 cents; mechanics, from 60-70 to 60 cents; handymen, from 50-60 to 50 cents; labourers, from 40 to 37½ cents. Hours were increased from 9 to 10 per day, and board was reduced from \$8 to \$7 per week. *Sydney*: Wages per hour were reduced by May 1, as follows: stone masons, bricklayers and stonecutters, from \$1.00 to 95 cents; cement workers, from 60 to 55-60 cents, all these trades working 48 hours; ordinary labourers, from 40 to 37-40 cents, working 54 hours.

QUEBEC.—*Montreal*: Bricklayers have accepted a reduction from \$1.00, in 1920, to 90 cents in May, 1921, working 9 hours. Cement finishers' wages have been reduced from 75 to 65 cents per hour, hours remaining 8 per day.

ONTARIO.—*Sault Ste. Marie*: One contracting firm, about January 1, 1921,

reduced wages of employees 10 per cent. In the Spring, 1921, wages of bricklayers were reduced from \$1.15 to \$1.02½ per hour, men working an 8-hour day.

MANITOBA.—*Winnipeg*: In the Spring of 1921, the following changes in hourly rates were made: sheet metal workers, reduced from 90 to 82½ cents; bricklayers, from \$1.25 to \$1.15; marble setters, from \$1.20 to \$1.10; and painters, from 87½ to 81 cents. Approximately 900 men were affected.

ALBERTA.—*Calgary*: On May 1, wages for building labour were reduced from 60 to 50 cents per hour.

BRITISH COLUMBIA.—*Vancouver*: Wages per day of 8 hours in building trades have been reduced as follows: carpenters, from \$7.50 to \$6.50; bricklayers, masons and plasterers, from \$9.00 to \$8.00.

Lumbering

NOVA SCOTIA.—*Sydney*: In January, 1921, one firm reduced wages of sawmill labour from 40 to 38 cents per hour.

NEW BRUNSWICK.—Wages in the bush averaged \$60 per month with board in January, 1921, as compared with \$75-85 per month with board in the Fall of 1920.

ONTARIO.—*Fort Francis*: Wages in the bush dropped in January, 1921, from \$70 to \$45 per month. *Iroquois Falls*: Wages of bushmen per month with board fell from \$75-\$85 in the Fall of 1920, to \$45-\$60 in January, 1921.

South Temiskaming: Wages of shanty-men per month were \$75-85 in the Fall of 1920, and while wages of employees retained were not reduced, new men were engaged in January, 1921, at \$55-\$65 per month.

ALBERTA.—*Edmonton*: Wages of 500 lumber mill employees, including bushmen, were reduced 15 per cent, reduction reported in May 1921.

BRITISH COLUMBIA.—*Fernie*: Wages of loggers including sawyers, teamsters, etc., which were \$4.50-\$6.00 per day in the Fall of 1920, depending on the camp, have been reduced to an average of \$3.50 per day. *New Westminster*: Wages of 100 shingle makers were reduced 20 per cent on January 8, 1921. *Vancouver*: Wages of loggers were reported reduced from \$6.00 to \$4.00 per day; in sawmills, wages of Orientals were reduced from 45-58 cents per hour to 22-45 cents, and of white labour, from 45 cents-\$1.00 per hour to 35-90 cents.

Miscellaneous

ALBERTA.—*Calgary*: Rate for common labour which was 60 cents per hour in September, 1920, was reduced to 50 cents in January, 1921, and again to 45 cents in May, 1921. *Edmonton*: Wages of 125 hotel and restaurant cooks have been reduced 25 per cent. *Lethbridge*: Wages of common labour have been reduced 10 cents per hour. *Medicine Hat*: Wages of common labour have been reduced from 50 to 45 cents per hour since January.

RECENT INDUSTRIAL AGREEMENTS

THE following agreements and schedules of wages and working conditions have recently been received by the Department. In the case of each agreement the rates of wages in the important occupations are given, together with the significant points as to working conditions and a summary of other information of general interest.

Building and Construction

TORONTO, ONT.—**MASTER PAINTERS, FIRMS, COMPANIES OR CONTRACTORS, AND BROTHERHOOD OF PAINTERS AND DECORATORS, No. 151.** Agreement in effect from March 28, 1921, to March 31, 1922.

Wages, per hour—Journeyman, 75

cents. Hours of labour, eight per day, four hours on Saturday.

Overtime, time and one-half, except when three shifts are being worked, when overtime shall be straight time. Sundays and holidays, double time. Travelling expenses to be paid on outside jobs.

Transportation - Steam Railways

CANADA.—THE RAILWAY ASSOCIATION OF CANADA AND THE BROTHERHOOD OF LOCOMOTIVE ENGINEERS, THE BROTHERHOOD OF LOCOMOTIVE FIREMEN AND ENGINEMEN, THE ORDER OF RAILWAY CONDUCTORS, THE BROTHERHOOD OF RAILROAD TRAINMEN, THE ORDER OF RAILROAD TELEGRAPHERS, AND THE UNITED BROTHERHOOD OF MAINTENANCE OF WAY EMPLOYEES AND RAILWAY SHOP LABOURERS.

For the text of this agreement see page 668.

Transportation—Electric Railways

OTTAWA—OTTAWA ELECTRIC RAILWAY COMPANY AND AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, No. 279.

Agreement as summarized in September, 1920 LABOUR GAZETTE, page 1231, as in effect from May 29, 1920 to May 1, 1921, has been renewed and will continue effective until May 1, 1922.

SASKATOON, SASK.—BY-LAW REGULATING WAGES AND WORKING CONDITIONS OF CITY OF SASKATOON MUNICIPAL STREET RAILWAY. By-law to be in force from March 21, 1921 to January 1, 1922.

Two-men cars: Wage scale (retroactive to January 1, 1921) per hour—1st 6 months, 50 cents; 2nd 6 months, 52 cents; 3rd 6 months, 56 cents; 4th 6 months, 58 cents; 3rd year and thereafter, 60 cents. Training students, 5 cents per hour above schedule. Sundays, time and one-quarter. Holidays, time and one-half. Snow-sweeper or work car men, 5 cents extra per hour up to

ten hours; thereafter, time and one-half.

Motormen or conductors having been suspended or discharged and later found not guilty of conduct warranting suspension to be re-instated and paid for all time lost.

No discrimination against motormen or conductors for being or not being union members.

Regular runs to conform as nearly as possible to nine hours; runs calling for ten-hour day may be selected by those desiring and entitled to same.

Usual regulations regarding furnishing and equipment of street cars.

Motormen and conductors having been in service for one year continuously prior to May 1, 1921, to be entitled to one week's holiday with pay during succeeding year, and after two years' service, to two weeks' holiday.

Absence through illness, not exceeding two weeks, to be paid for at regular rate, on approval of a committee of three employees.

Uniforms to be supplied by City.

Proper officials of City at all times to treat with motormen and conductors or a committee of same on any subject concerning their interests.

Complaints or grievances to be heard by proper officials of the City; and any employee failing to get satisfaction may appeal to Mayor, Commissioner or City Council.

Motor Conductors on one-man Cars: Wage scale (to take effect from the time the cars are first operated by one man): per hour—1st 6 months, 60 cents; 2nd 6 months, 62 cents; 3rd 6 months, 66 cents; 4th 6 months, 68 cents; 3rd year and thereafter, 70 cents. Training students, 5 cents extra per hour. Clauses governing rates for Sundays, holidays and sweepers and general clauses are similar to those given above for motormen and conductors, with the exception that in the case of

the hours clause, a working day is to be eight hours when possible.

Mechanical Department: Wage Scale (retroactive to January 1, 1921): Per hour—skilled mechanics, painter and carpenter, armature winder, 73½ cents; junior mechanics, blacksmith, 68½ cents; pitman, general workers, 58½ cents; car cleaners and helpers, 53½ cents. Night foreman, \$145 per month.

Overtime and Sunday work, time and one-half, except in the case of trackmen and greasers whose additional pay shall be determined by the Superintendent.

Shop employees who have been in service one year or more may be promoted or have pay increased at discretion of council. In event of men being taken on, City reserves right to pay wages according to ability.

Holidays and sick leave as in the case of motormen and conductors.

Municipal Employment—(Not Elsewhere Specified)

SASKATOON, SASK.—BY-LAW REGULATING WAGES AND WORKING CONDITIONS OF PUMPING PLANT AND ELECTRICAL DEPARTMENT OF THE CITY OF SASKATOON. By-law to be in force from date of final passing, with any wage increases contained therein retroactive to January 1, 1921.

Outside Electrical Workers: Hours of labour: eight and one-half per day; four and one-half hours on Saturdays; excepting meter readers and wiring inspector whose hours shall be eight per day and four on Saturdays. Hours of are and tungsten patrolmen in accordance with their necessary duties.

Minimum wages: Per month—Meter readers and collectors, \$142.50; meter repairer and tester, \$161; electrical wiring inspector, \$170: Per hour, sub-line foreman, 96½ cents; linemen, 91 cents; wiremen, 80½ cents; are patrolmen, 74¾ cents; meter installers, 75 cents; are trimmers, 70 cents; tungsten patrol-

men, 63¼ cents: Apprentice linemen: 1st 3 months, 60 cents; thereafter, 1st 6 months, 62½ cents; 2nd 6 months, 65 cents; 3rd 6 months, 67½ cents; 4th 6 months, 70 cents; last nine months of 3 years' period, 72½ cents. Overtime, including Saturday afternoons, time, and one-half; Saturdays after 5.30 p.m. and Sundays and holidays, double time.

Tradesmen employed by the Line Department to be paid recognized union rate and work union hours, if not permanent employees of the Department and provided for in this agreement.

Power House Workers: Hours of labour, nine per day, four and one-half hours on Saturdays. Overtime, to 10 p.m., time and one-half; thereafter and Sundays and holidays, double time. Workers on monthly basis not to work over eight hours per day except in event of break-down of plant. When duties demand Sunday labour, one day off in seven to be allowed if possible, or if not overtime to be paid for seventh day.

The Electrical Engineer may dismiss workers without notice when work is completed or worker proves unsatisfactory.

Minimum wages: Per month, chief engineer, \$209.90, engineer in charge of shift, \$163.90, spare engineers, 1st 12 months, \$152.50; after 12 months, \$163.90; boiler room attendants operating automatic stokers, turbine attendants, \$142.50. Per hour: skilled mechanics, 74½ cents; blacksmith, 69½ cents; mechanics' helpers, 59½ cents; foreman boiler cleaner, 69½ cents; boiler cleaners, ash and coal handlers, 59½ cents. Per month, chief electricians, \$181.10; draftsman, \$163.90; coal controller, \$158.10; store-keeper, \$130.

Tradesmen employed at power house to be paid recognized union rates and work union hours if not permanent employees of the Department.

Switchboard operators, per month, \$122.50 to \$152.50, with three increases,

to be granted upon recommendation of the Electrical Engineer.

Pumping Station Workers: Monthly workers not to work over eight hours per day except in event of breakdown of plant.

Overtime to be paid for seventh day in event of Sunday labour.

Hours of labour, 9 per day.

City Engineer may dismiss any worker without notice when work has been completed or if worker proves unsatisfactory.

Minimum wages at pumping station and filtration plant, per month: chief engineer, \$204.10; assistant chief engineer, \$175.35; shift engineers, \$188.10; spare engineers, first 12 months, \$147.50; thereafter, \$158.10; fireman, \$137.50; oilers and cleaners, \$122.50. Tradesmen employed on temporary work to be

paid union rates and work union hours.

Overtime rates time and one-half to 10 p.m., thereafter, double time.

Vacations: All monthly employees excepting chief engineers, wiring inspector, draftsman, construction foreman and meter readers, fourteen days' holidays with pay after one year's service. The above-mentioned, after one year's service, twenty-one days' holidays with pay. No overtime to be paid to these employees. Hourly workers, in the service for one year continuously prior to May 1, one week's holidays with pay, and in service two years continuously prior to May 1, two weeks' holiday with pay. Sick leave to the extent of two weeks to be allowed, paid at regular rate. Workers temporarily laid off to be entitled to the above benefits on a *pro rata* basis. Sick pay to be granted only on approval of a committee of five employees.

FAIR WAGE CONTRACTS, APRIL, 1921

DURING April the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to six fair wage contracts, of which five were awarded by the Department of Public Works, and one by the Department of Marine and Fisheries. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Docking, repairing and renewal, and painting of Tug "Helena." Name of contractor, Halifax Shipyards, Limited, Halifax, N. S. Date of contract, April 6, 1921. Amount of contract, \$25,200.

Superstructure of a Strauss Trunnion Bascule Bridge, Burlington Channel, Ont. Name of contractor, The Hamilton Bridge Works, Hamilton, Ontario. Date of contract, April 8, 1921. Amount of contract, \$22,896.

Construction of timber pilewood wharf, McLaren's Landing, Ont. Name of contractor, J. S. Leitch, Toronto, Ontario. Date of contract, April 11, 1921. Amount of contract, unit prices.

Laboratory and interior fittings in Educational Block, R. M. C. Kingston, Ont. Name of contractor, McKelvey and Birch, Limited, Kingston, Ont.

Date of contract, April 22, 1921.
Amount of contract, \$20,257.

Substructure of bridge over St. John River between Edmunston, N. B., and Madawaska, Maine. Name of contractors, J. R. Burpee and His Majesty, and The State Highway Commission of Maine. Date of contract April 20, 1921. Amount of contract, unit prices.

DEPARTMENT OF MARINE AND FISHERIES.

Construction of a lightkeeper's dwelling at Lepreau, N. B. Name of contractor, W. F. Fitzgerald, St. John West, N. B. Amount of contract, \$5,975.

POST OFFICE DEPARTMENT.

The following is a statement of payments made in April for supplies ordered by the Post Office Department sub-

ject to the Regulations for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions.

Nature of orders.	Amount of orders
Making metal dating stamps and type and other hand stamps and brass crown seals.....	\$ 1,282.36
Making and repairing rubber stamps, daters, etc.....	210.59
Supplying mail bag fittings.....	9,364.50
Making up and supplying letter carriers' uniforms, etc.....	13,601.38
Repairing letter boxes, etc.....	11.75
Supplying mail bagging.....	72,627.05

PRICES, RETAIL AND WHOLESALE IN CANADA, APRIL, 1921

THE movement of prices continued downward, the most important declines, however, being seasonal changes appearing in grains, butter, cheese milk and eggs. Hogs were down, but cattle and beef were slightly higher. Sugar also showed a slight advance. In materials, there were numerous declines in leather, textiles, metals and implements, and in building materials.

In retail prices, the average cost of a list of staple foods in sixty cities was \$12.74 for April as compared with \$13.23 for March, \$15.99 for April, 1920, \$13.55 for April, 1919, \$12.57 for April, 1918, and \$7.51 for April, 1914. The chief changes for the month were in eggs and in potatoes, decreases in these commodities accounting for a fall of 36 cents out of 50 cents in the budget. Sugar and butter showed slight increases, meats were practically unchanged and there were slight decreases in rolled oats, rice, prunes and evaporated apples. In fuel, coal was slightly lower as is usual in the spring for a short time. Rent showed

a slight increase in the average and further increases for May were reported.

In wholesale prices the index number was down to 253.7 as compared with 263.1 for March, 353.1 for April, 1920, 279.6 for April, 1919, 269.4 for April, 1918 and 136.7 for April 1914. The chief decreases were in Grains and Fodder, Dairy Products, Fruits and Vegetables, Textiles, Hides, Leather, Boots and Shoes, Metals, Fuel and Lighting, Building Materials and House Furnishings.

The table of retail prices and rentals shows the prices at the beginning of April of over one hundred staple foodstuffs, groceries, coal, wood and coal oil, and the rent for 6-roomed houses in some sixty cities throughout Canada having a population of 10,000 or over. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of com-

modity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these have been published each month since the beginning of 1910, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915 when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts exclusively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences or with incomplete conveniences.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, those being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by va-

rious authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were considered to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices

*December only.

is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding months back to 1913.

Retail Prices

Meats showed less change than during recent months, prices of beef being steady. Lard and pork products were lower. Eggs showed considerable decreases in most of the cities. Milk was lower in St. John's, P.Q., Montreal, Kingston, London, Moose Jaw and New Westminster. Butter was slightly lower in some of the cities, but in others there were slight increases. Cheese averaged lower in some of the cities, but higher in others. Soda biscuits, flour, rolled oats, cornmeal, barley and rice tended downward. Beans were slightly lower and onions declined in many of the cities. There was a general decline in potatoes throughout the Dominion. Evaporated apples and prunes averaged slightly lower. Jam and canned fruit tended lower. Sugar showed a slight increase in most of the localities, less than half a cent per pound. Cream of tartar was lower in many cities. Anthracite coal was lower in several of the cities east of Windsor. Bituminous coal declined in several of the cities. Wood showed little change. Rent was up at Peterborough and Chatham, but down at Stratford.

Wholesale Prices

GRAINS AND FODDER.—Wheat No. 1, Manitoba Northern, fell from \$1.99 to \$1.79 per bushel at the beginning of the month and later to \$1.70. Ontario winter wheat had fallen from \$1.80 to \$1.50 at Toronto. Oats at Winnipeg fell from 47 to 43 cents. American corn at Toronto fell from 96 to 73 cents per bushel. Flaxseed at Winnipeg fell from \$1.72 to \$1.48 per bushel. Peas fell from \$1.65 to \$1.35 per bushel. Rye fell from \$1.45 to \$1.35 per bushel. Hay was \$2.00 higher at Toronto at \$26.00 per ton. Straw was firmer at \$12.50. Bran fell from \$36.00 per ton to \$31.00 and shorts from \$36.00 to \$33.00.

ANIMALS AND MEATS.—Cattle advanced at Toronto from \$9.50 to \$10.00 per hundred pounds for choice butchers. At Winnipeg choice cattle fell from \$8.50 to \$8.00 per hundred, but rose to \$8.25. Beef, dressed hindquarters, rose from 23 cents per pound to 24 cents. Barrelled beef fell from \$30.00 to \$25.00 per barrel. Veal was down from 20-23 cents per pound to 16-19 cents. Hogs fell from \$14.00 per hundred pounds to \$10.75 in Toronto. Bacon fell from 40 cents per pound to 38 cents. Lard dropped from 18½ cents per pound to 15½ cents. Sheep were down from \$10.00 per hundred pounds to \$9.50. Fowl in Montreal fell from 38 cents per pound to 35 cents.

DAIRY PRODUCTS.—Butter, finest creamery, at Montreal had fallen from 58 to 55 cents during March, and during April fell to 52 cents, by the last week when a further decrease set in, resulting in a fall to 32 cents by the first of May. Cheese fell from 30 cents per pound to 25 cents. Eggs fell from 38 cents per dozen at Toronto to 34 cents, but by the

INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES FOR APRIL, 1921, MARCH, 1921, APRIL, 1920, 1919, 1918, 1917, 1916, 1915, 1914 AND 1913

(Average price 1890-1899 = 100)

(*) Preliminary figures. (†) Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1916.
‡ Revised.

end of the month had risen to 39 cents. Milk at Montreal fell from 33c. per gallon to 29 cents. At the end of the month in several other cities prices for the spring were set lower.

FISH.—Salmon trout and white fish were up to 22 cents and 25 cents per pound for the spring catch at Toronto. Halibut was down to 10 cents per pound on the Atlantic Coast. First reports of the spring catch of the Lunenburg fleet indicated a good catch for the season. Stocks of dry cod on the market caused weakness and the price was down to \$6.00 per quintal. The stocks of pickled fish were not large, but the prices were easier, salt herring falling 50 cents per barrel, being down to about \$6.00.

FRUITS AND VEGETABLES.—Winter apples were firmer at \$6.50-\$10.00 per barrel. Potatoes at Toronto and Montreal fell from \$1.15 per bag to 80 cents. Lemons were down from \$4.75 per box to \$4.25. Beans were easier at \$2.50 per bushel.

MISCELLANEOUS FOODS.—Oatmeal fell from \$4.90 to \$4.50 per bag. Tapioca fell from 8½ cents per pound to 7 cents. Flour, spring wheat patents, fell from \$10.50 per barrel to \$10.00. Tea was again lower, some grades falling 10 cents per pound. Chocolate was lower, one brand falling from 38 cents to 32 cents per pound. Sugar advanced 50 cents per hundred pounds at Toronto, that is from \$10.89 per hundred pounds to \$11.39. Glucose, molasses, honey and cream of tartar were down.

TEXTILES.—The wool market continued dull. Yarn fell from \$1.00 to 95 cents per pound. Raw cotton at New York was slightly firmer. Coloured cottons averaged lower. Raw silk at New York showed firmness, Japan filatures rising to \$6.40 per pound as compared with \$5.97½ in March and \$6.35 in January. Jute was slightly firmer, but hessians averaged lower. Flax fibre fell from 50 cents per pound to 40 cents.

HIDES, LEATHER, BOOTS AND SHOES.—Calfskins advanced from 7 cents per pound to 11 cents. Leather continued to fall, oak sides being down from 67 cents to 64 cents per pound, harness leather, from 63 cents to 59 cents per pound, and waxed split from 40 cents to 35 cents per pound. Boots were down 10 per cent.

METALS AND IMPLEMENTS.—Pig iron fell from \$41.80 per ton to \$36.80. Black sheets were down from \$6.75 per hundred pounds to \$5.75 and galvanized sheets from \$9.60 to \$8.85. Tin plates fell from \$27.00 per box to \$24.50. Brass, quicksilver, tin and zinc were down, but silver rose from 57 cents per ounce to 59 cents. Axes and soldering coppers declined.

FUEL AND LIGHTING.—Anthracite coal fell from \$15.25 per ton to \$14.25 at Montreal. Connellsville coke fell from \$5.50 per ton to \$5.00 at the ovens. Coal oil fell from 27 cents per gallon to 25 cents.

BUILDING MATERIALS.—In lumber, pine, box boards, fell \$2.00 per M. at Ottawa. Lath fell from \$13.50 per M. to \$13.00 at Toronto. At Victoria, B.C., rough lumber and shiplap fell \$1.00 per M. and flooring fell \$5.00 per M. Building paper, plain, fell from \$1.65 to \$1.45 per roll. Iron pipes, nails, and sash cord were down. Linseed oil, turpentine, shellac and window glass declined.

HOUSE FURNISHINGS.—In furniture there have been considerable decreases, particularly in goods containing plate glass which has fallen steeply. The decreases reported averaged 20 per cent. In kitchen furnishings sad irons declined from \$2.45 per set to \$2.18.

DRUGS AND CHEMICALS.—Bleaching powder, brimstone and caustic soda declined.

MISCELLANEOUS.—Hops and malt declined. Pulp, ground wood, fell from \$50.00 per ton to \$45.00.

PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes show the movements in prices in other countries as compared with the movement in Canada.

The United Kingdom

The Ministry of Labour reported on April 1, that the downward movement in retail prices was continuing, the cost of food for a workingman's family being 138 per cent above the corresponding figure for July, 1914. On March 1, the percentage increase was 149. Decreases occurred during the month in eggs, butter, margarine, milk and potatoes with smaller reductions in flour, bread, sugar, tea and bacon. There was no change in rents reported during the month. Clothing was estimated at between 220 and 230 per cent in cost above the level of July, 1914. Fuel and light rose to about 145 per cent above the pre-war level as compared with 140 per cent on March 1. The decline in the cost of clothing was shown by the figures for the three months February, March and April. For these months the percentage increases over the prices for July, 1914, were about 255, 240 and 225 respectively.

When the average increases in the cost of these items are combined in proportion to their importance in a working-class budget and allowance is made for the changes in the prices of soap, soda, house furnishings, tobacco, fares and newspapers, the increase in the cost of living since July, 1914, is estimated at 133 per cent as compared with 141 per cent on March 1.

Retail prices of food at the end of April were calculated to be only 132 per cent above July, 1914, a decrease during the month of seven per cent.

The index number of "The Economist" indicated a further decline in wholesale prices during the month of April. The downward movement began in April, 1920, and except in July, was

maintained throughout the year. During April, 1921, the number dropped 163 points, and stood at a point 41 per cent below the level for March, 1920, but 92 per cent above the level for July, 1914. The sharp declines in textiles which have been recorded for several months were stopped in April and a slight advance occurred. In all other groups there were decreases.

New Zealand

The index number of retail prices of foods in New Zealand decreased 3.4 per cent in March as compared with the preceding month. The highest point in the retail price movement since July, 1914, was reached in December, 1920, but the index number fell to about the same level as in July-August, 1920, being 69 per cent above the pre-war level.

The decline in wholesale prices began in October, 1920, and in the following January the index number had fallen 58 points, all groups of commodities contributing to the decrease with the exception of building materials and coal. In the case of the latter commodity, a rise of 3 per cent offset to some extent the decline in other groups.

India

The Department of Statistics at Calcutta reported a decrease in February in the index number of wholesale prices of 75 commodities, continuing the decline begun in September. The price of sugar advanced considerably during the month, but in all other groups prices fell, cotton and cotton manufactures, oils, pulses and cereals, building materials and manufactured articles showing important declines.

France

The French Ministry of Labour publishes a quarterly index number of retail prices of food, fuel and lighting in towns with a population of more than

April.....	191.511	11.3749	174.404	75.1
May.....	10.8208	166.658

a. Average for year. b. Quarter beginning in specified month. c. 230 commodities, 1890-1909: 272, 1910-1914: 271, 1915-1921.

10,000, the basis of comparison being prices in 1910. The figure for the first quarter of 1921 shows the first decline since 1916, and is 4.8 per cent below the index number for the previous quarter, but 329 per cent above the level of prices in the third quarter of 1914.

In Paris, the monthly index numbers recorded a decrease in June, 1920, but the upward movement, continued with this exception until December, when a decline set in. In March, the index number was 6.1 per cent lower than in the preceding month, and 259 per cent higher than in July, 1914.

Wholesale prices in France have fallen steadily since last September according to the index number calculated by the French Statistical Office.

Holland

In Holland, the retail prices of 20 articles have been declining since October, 1920, the index number in February having fallen 22 points below that for January. In Amsterdam, the cost of food for a working-class family shows a decrease in March, 1921, of 0.3 per cent compared with the cost in the preceding month. As compared with 1913, the increase in the cost of food in Amsterdam is estimated at 99 per cent.

The downward movement in wholesale prices in Holland began in July, 1920, the index figure for February, 1921, being about 34 per cent below the figure for July, 1920, and about 89 per cent above that for July, 1914.

Italy

The Italian Ministry of Labour and Social Welfare publishes an index number of retail prices of 21 articles in the most important towns, the latest figures available being for October, 1920, when the highest point during the year was reached. The index number for that month was 407 per cent above that for the year 1913 and about 6 per cent above that for September, 1920.

The Municipal Labour Office at Rome reported an increase of 2.7 per cent in

the cost of food in March as compared with February prices, the increase over the first half of 1914 being estimated at 286 per cent. If the cost of clothing, fuel, lighting, rent, etc., is taken into consideration, the increase over the preceding month is 1.4 per cent and 284 per cent above the pre-war figure.

In Milan, the increase in March in the cost of food is estimated by the Municipal Labour Office to have been 4.5 per cent above the cost in February and 489 per cent higher than in the first six months of 1914. When other items are included in the calculation, such as fuel, lighting, rent and clothing, a somewhat smaller increase appears, the percentage increases above the preceding month and above the pre-war figure, being 0.4 and 468 respectively.

The index number of wholesale prices in Italy calculated by Professor Bachi reached the high mark for the year in November, 1920, and a decline of 6 points below it is recorded in January. Textiles, minerals and metals are largely responsible for the decrease, but vegetable foods have also declined slightly. Animal foods have increased 18 points since November and a large increase is recorded in the group of miscellaneous vegetable products.

Sweden

The Swedish Department of Social Affairs reports a decrease in March of 9 points in the index number of the cost of food, fuel, and light, the level of retail prices of these commodities being estimated at 153 per cent above that for July, 1914, as compared with 162 per cent in February. At the end of each quarter an estimate is made of the changes in the total family expenditure including rent, clothing, taxes and other items. On April 1, 1921, this calculation showed an increase of 149 per cent as compared with July, 1914, but a decrease of about 8 per cent from the level of the previous quarter.

The decline in wholesale prices, which began in October, 1920, continued dur-

ing March, a drop of 25 per cent occurring during the month in the prices of coal and coke. There was an increase in the group of vegetable food-stuffs due to higher prices for meat and rye. Hides and leather fell below the level of 1914.

Finland

The index number of the cost of living in Finland is reported to have declined 90 points in February, 1921, below the level in December, 1920, when the highest point of the year was reached. Food prices are falling more rapidly than prices of other commodities, but declines are also shown in clothing and fuel. Rents are reported considerably higher. The level of food prices was 100.6 per cent and the general level of the cost of living 912.7 per cent higher than in July, 1914.

Germany

Wholesale prices in Germany were estimated by the *Frankfurter Zeitung* in April, 1921, to be 14 times as high as in July, 1914, but there has been a general decrease since December, 1920. There has been a rapid decline in the textiles group, the index number for April, 1921, being 21 per cent below that for January, 1920, but prices were still 22 times as high as before the war. Increases in the prices of milk and eggs almost offset the fall in the prices of other foods during the month.

United States

Retail prices of food in the United States continued to decline according to the index number published by the Bureau of Labour Statistics at Washington. The downward movement begun in August, 1920, brought the figure for March to 156, as compared with 158 for February and 100 for the year 1913.

The index number of wholesale prices show declines to have been general during the months of March and April. The Bureau of Labour Statistics and the Federal Reserve Board reported index numbers in March to be 162 and 150 respectively, the corresponding figures for February being 167 and 154,

as compared with 100 in 1913, in each case. Both *The Annalist* and *Bradstreet's* show increases in March, but report declines in April. Dun's index number has indicated a continuous decline since May, 1920, amounting to 36.7 per cent. On May 1, this index number reached the lowest point since November, 1916. It is stated, however, that more stability has developed in certain markets within recent weeks and there is now a disposition to hold prices firmer in some quarters. The largest decline during April was in meats, and represented a falling off of nearly 11 per cent. All foodstuffs declined 5.2 per cent. Bradstreet's index number for May 1 showed a decrease, metals and naval stores being up, but all the other groups were down.

A calculation as to changes in the average cost of living in the cities throughout the United States up to March, 1921, by the National Industrial Conference Board, New York, an association of employers indicates that the cost of all items in that month was 68.7 per cent above July, 1914, food being up 56 per cent, rent 71 per cent, clothes 74 per cent, and sundries 85 per cent. Since July, 1920, food had fallen 30 per cent, clothing 37 per cent, and all items $17\frac{1}{2}$ per cent, while fuel and rent were higher. Fuel, however, fell 9 per cent since November, 1920.

The Massachusetts Commission on the Necessaries of Life issues monthly the results of a calculation as to the changes in the cost of living. The March figures showed a decline of 17.9 per cent since July, 1920, when the peak was reached. The index number for all groups fell to 145.1 for March as compared with 158.6 for February, 171.5 for January and 202.6 for July, 1920. The index number for the clothing groups fell to 208.2 for March as compared with 219.9 for January and 290.9 for July, 1920. The other groups showed little change, increases in rent offsetting a slight decrease in fuel in March.

FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE FIRST QUARTER OF 1921

ACCORDING to information received by the Department the industrial accident record for the first quarter of 1921 shows 196 fatal accidents reported during that period as compared with 329 during the previous quarter and 303 in the corresponding quarter of 1920. Of these fatalities, 70 occurred in January, 63 in February and 63 in March of this year as against 85 in January, 101 in February, and 116 in March of last year. In the steam railway service group, during the quarter, there were 38 deaths reported; in lumbering, 31; and in mining and quarrying, 28.

In addition to the accidents reported as occurring during the quarter, the Department also received information of 19 additional fatal accidents pertaining to the year 1920, thus bringing the total industrial fatalities for that year up to 1,189 instead of 1,170 as reported in the March issue of the LABOUR GAZETTE. These accidents have been noted in a supplementary statement at the end of this article.

The following statement does not necessarily include all the fatal industrial accidents that may have occurred, but it has been prepared from information received from all sources available.

FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1921

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
METALS, MACHINERY AND CONVEYANCES—				
Moulder at steel plant.....	Hamilton, Ont.....	Jan. 10	54	Internal hemorrhage while raising mould.
Employee at car foundry.....	Fort William, Ont.....	" 12	33	Fell from car.
Employee at foundry.....	Hamilton, Ont.....	" 14	40	Struck by falling casing when hook gave way.
Fitter.....	Stellarton, N.S.....	" 27	39	Crushed between engines.
Employee at machinery plant.....	Toronto, Ont.....	" 28	36	Struck by falling mould.
Employee at boiler works.....	Port Colborne, Ont.....	Feb. 1	63	Cut finger; infection.
Millwright.....	Montreal, Que.....	" 4	49	Fall of ladder.
Labourer with railway company....	Rainy River, Ont.....	" 7	29	Caught in shafting.
Workman at furnace factory.....	Port Colborne, Ont.....	" 7	Crushed by falling casting.
Crane operator at wire plant.....	Hamilton, Ont.....	" 16	Crushed by bundle.
Employee at steel works.....	Sault Ste. Marie, Ont....	" 18	Caught between locomotive and coke hopper.
Millwright at steel plant.....	Sault Ste. Marie, Ont....	Mar. 24	Crushed between car and platform.
Workman at steel car plant.....	Hamilton, Ont.....	" 3	40	Crushed between steel and car.
Labourer at steel car plant.....	Niagara Falls, Ont.....	" 9	Crushed by crane.
Repairman at railway shop.....	Montreal, Que.....	" 4	Placed hand on fuse; electrocuted.
Repairman at railway shop.....	Charlottetown, P.E.I....	" 9	53	Chain broke letting tender fall.
Workman at locomotive works.....	Kingston, Ont.....	" 25	41	Cut head; infection.
FOODS, TOBACCOS AND LIQUORS:				
Elevator man at brewery.....	Montreal, Que.....	Jan. 22	32	Fell down elevator shaft.
Driver for milling company.....	Canifton, Ont.....	" 25	68	Fell from wagon.
Workman at cigar factory.....	London, Ont.....	Feb. 19	Crushed under press.
Fireman at confectionery plant.....	London, Ont.....	Mar. 4	59	Fell down into boiler room.
Employee at candy factory.....	Winnipeg, Man.....	" 12	25	Poisoned; drank Columbia spirits.
CLOTHING AND LAUNDERING:—				
Operator at laundry.....	Winnipeg, Man.....	Mar. 7	16	Caught in extractor basket.

FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1921—Continued.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
PULP, PAPER AND FIBRE:—				
Fireman at paper plant.....	Espanola, Ont.....	Jan. 12	24	Buried under coal.
Screen tender.....	Port Alice, B.C.....	Feb. 16	30	Clothes caught in moving shaft.
Workman at paper plant.....	Sault Ste. Marie, Ont.....	Mar. 14	26	Struck on head by log.
WOODWORKING AND FURNITURE:—				
Employee of sash factory.....	Granby, Que.....	Jan. 18	Shaft broke—struck by falling pulley
CLAY, GLASS AND STONE:—				
Labourer at cement plant.....	Point Anne, Ont.....	Jan. 4	36	Struck on head by belt.
Foreman at cement plant.....	Montreal East, Que.....	Feb. 21	46	Caught in line shaft.
Employee at glass works.....	Thorold, Ont.....	Mar. 27	48	Electrocuted while inserting switch to start motor.
PAINTS, OILS, CHEMICALS AND EXPLOSIVES:—				
Porter at drug plant.....	Montreal, Que.....	Jan. 28	35	Explosion of steam boiler.
Foreman at drug plant.....	Montreal, Que.....	" 31	50	Explosion of flashlight powder.
Workman at salt works.....	Goderich, Ont.....	" 29	37	Fell off ladder.
Crane operator at chemical plant.....	Niagara Falls, Ont.....	Mar. 9	21	Caught between travelling crane and girder.
STEAM RAILWAY SERVICE:—				
Brakeman and fireman (2).....	Turtle, Ont.....	Jan. 1	Collision.
Brakeman.....	South Devon, N.B.....	" 13	Frightened horse; struck by piling from load.
Brakeman.....	Hogarth, Ont.....	" 18	43	Fell under cars.
Brakeman.....	Englehart, Ont.....	" 19	Fell from van.
Fireman.....	Ottawa, Ont.....	" 18	Struck by engine.
Workman.....	York, Ont.....	" 7	40	Struck by engine.
Car Inspector.....	Kenora, Ont.....	" 16	Fell from van; run over.
Sectionman.....	Romeo, B.C.....	" 14	55	Buried by snowslide.
Sectionman.....	Redditt, Ont.....	" 26	35	Struck by engine.
Sectionman.....	Galt, Ont.....	" 28	44	Cut thumb; infection.
Sectionman.....	Eddy, B.C.....	" 29	35	Crushed under snow plough.
Engineer.....	Boston Bar, B.C.....	Feb. 6	42	Rockslide caused derailment.
Watchman.....	Cathedral, B.C.....	" 8	25	Jumped from train and run over.
Car cleaner.....	Montreal, Que.....	" 11	45	Crushed between cars.
Sectionman.....	Near Williams, Ont.....	" 16	18	Train struck hand car.
Sectionman.....	Palmerston, Ont.....	" 21	69	Crushed between cars.
Fireman.....	Burlington Jct., Ont.....	" 18	25	Run down by train.
Special agent.....	Turcot West, Que.....	" 20	49	Run down by train.
Brakeman.....	New Liskeard, Ont.....	" 26	Fell between wheels while applying brakes.
Labourer.....	Lucerne, B.C.....	" 24	51	Snowslide.
Operator, fireman, roadmaster (3).....	Mount Resplendent, Alta.....	" 24	Snowslide.
Yardman.....	Pt. St. Charles, Que.....	" 28	29	Crushed between cars.
Sectionman.....	China Bar, B.C.....	Mar. 1	30	Rockslide.
Sectionman.....	Lachine, Que.....	" 2	20	Fractured skull; jumped to avoid train at viaduct.
Sectionman.....	Sioux Lookout, Ont.....	" 16	42	Struck by train.
Section foreman.....	Dorr, B.C.....	" 16	21	Struck by train.
Carman.....	Toronto, Ont.....	" 4	Struck by car.
Carman.....	Port Arthur, Ont.....	" 4	Strain.
Trainman.....	St. John, N.B.....	" 4	Fell from trestle.
Checker.....	Woodstock, Ont.....	" 12	Struck by train.
Engineer.....	Urguhart Siding, N.S.....	" 18	59	Derailment; engine struck open switch
Foreman.....	Grant, Ont.....	" 20	36	Burned.
Brakeman.....	Marysville, Ont.....	" 21	Struck by train when leaning out of window.
Storekeeper.....	St. Thomas, Ont.....	" 24	28	Struck by engine.
Signalman.....	Vaudreuil, Que.....	" 21	Derailment of motor rail car.
NAVIGATION:—				
Marine engineer.....	Cornwall, Ont.....	Jan. 29	39	Fell into open hatchway.
Stevedore.....	St. John, N.B.....	Feb. 15	42	Fell through hatch.

FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1921—*Continued.*

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
MISCELLANEOUS TRANSPORT:—				
Carter.....	Winnipeg, Man.....	Jan. 4	68	Crushed by horse.
			Over	
Teamster.....	Aerial, Alta.....	" 4	21	Upsetting of a load of coal.
			Over	
Teamster.....	St. Albert, Alberta.....	" 7	21	Up setting of a load of hay.
Teamster.....	Wardner, B.C.....	" 20	32	Fell from load.
Driver of motor truck.....	St. Stephens, N.B.....	Mar. 1	60	Truck skidded and overturned.
Teamster.....	St. John, N.B.....	" 17	75	Fell from wagon.
MINES, SMELTERS AND QUARRIES:—				
Miner.....	Stellarton, N.S.....	Jan. 4	21	Fall of rock from roof.
Miner.....	Little Bras d'Or, N.S.....	" 4	40	Slipped on travelling slope.
Miner.....	Blairmore, Alta.....	" 5	18	Caught between delivery belt and chute.
Miner.....	South Wellington, B.C.....	" 18	Fall of roof.
Miner.....	Queens Co., N.B.....	" 30	Crushed by descending cage.
Brusher.....	Dominion No. 11, N.S.....	" 3	Fall of rock.
Labourer at mine.....	Thetford Mines, Que.....	" 19	23	Crushed between heavy stones.
			Under	
Rope rider.....	Bellevue, Alta.....	" 25	21	Crushed between moving cars.
Workman at quarry.....	La Tuque, Que.....	" 5	19	Premature blast.
Miners (2).....	Mountain Park, Alta.....	Feb. 1	Gas explosion.
Miner.....	Nordegg, Alta.....	" 5	21	Crushed by falling coal.
			Over	
Miner.....	Commerce, Alta.....	" 13	21	Caught between cage and shaft.
Mining engineer.....	Brule, Alta.....	" 22	47	Fall of rock.
Coal miner.....	Bankhead, Alta.....	" 25	Fall of coal.
Messenger.....	Thetford Mines, Que.....	" 5	13	Fall of rock.
Rope rider.....	Coal Creek, B.C.....	" 26	19	Suffocation; cave-in.
Miner.....	Westville, N.S.....	Mar. 8	47	Fall of rock from roof.
Miner.....	Canmore, Alta.....	" 21	21	Fall of rock.
Miner.....	Goldenville, N.S.....	" 28	Fall of rock.
			Over	
Miner.....	Lethbridge, Alta.....	" 28	21	Drowned.
Coal Miner.....	Pinto, Sask.....	" 29	36	Clay fell from roof of mine.
Shooter and loader.....	New Waterford, N.S.....	" 1	28	Fall of stone from roof.
Driller.....	Creighton Mine, Ont.....	" 10	30	Fall of rock.
Labourer.....	Thetford Mines, Que.....	" 25	21	Struck by falling stone.
Mucker.....	Thetford Mines, Que.....	" 30	25	Fall of rock.
Machine helper.....	Sudbury, Ont.....	" 11	31	Fall of rock.
Quarryman.....	Wentworth, N.S.....	" 9	33	Crushed by fall of rock.
BUILDING AND CONSTRUCTION:—				
Driller with power commission.....	Stamford, Ont.....	Jan. 5	24	Crushed under car.
Labourer with power commission.....	Stamford, Ont.....	" 15	32	Struck by train.
Road superintendent.....	Thamesville, Ont.....	" 6	59	Struck by train.
Labourer with contractor.....	Toronto, Ont.....	" 13	52	Fell off ladder.
Labourer with power commission.....	Stamford, Ont.....	Feb. 2	Fell from bridge.
Employees at road construction (2).....	Yonge Mills, Ont.....	" 8	69-40	Premature blast.
Workman with dredging company.....	St. Catharines, Ont.....	" 17	Fell off scaffold.
Steam fitter.....	Vancouver, B.C.....	" 20	55	Valve lifted and steam caused strangulation.
Steam fitter.....	St. Pierre aux Liens, Que.....	" 23	25	Fell off scaffold.
Workman with power commission.....	Stamford, Ont.....	" 21	Run over by work train.
Foreman with power commission.....	Stamford, Ont.....	" 22	30	Struck by car—fell off trestle.
Fireman with power commission.....	Stamford, Ont.....	" 22	25	Collision—burned.
Labourer with power commission.....	Stamford, Ont.....	" 22	Collision—burned.
Employee with power commission.....	Stamford, Ont.....	Mar. 12	30	Pinned under a pile of lumber.
Employee of power commission.....	Niagara Falls, Ont.....	" 18	65	Collision of work trains.
Labourer.....	Thorold, Ont.....	" 8	30	Struck by derrick.
Painter.....	Ottawa, Ont.....	" 22	45	Fell off ladder.
Bridge foreman.....	Hearst, Ont.....	" 30	Burned in boarding car.
Workman at pier construction.....	South Devon, N.B.....	" 24	50	Fall.
Labourer.....	Twin Falls, Ont.....	" 29	45	Crushed by bucket.

FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1921—Continued.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
LUMBERING:—				
Tree feller.....	Port Arthur, Ont.....	Jan. 4	Struck by falling tree.
Chokerman.....	Mission, B.C.....	" 6	34	Struck by snag.
Millman.....	Northumberland Co., N.B.....	" 8	58	Drawn into barker knives.
Labourer.....	Vancouver, B.C.....	" 12	43	Crushed by log from carriage.
Labourers, (2).....	Bevan, B.C.....	" 13	30-31	Tree fell causing pile of wood to upset on men.
Loader.....	Nesto, Ont.....	" 14	30	Struck by tree.
Woodsmen.....	Restigouche Co., N.B.....	" 22	37	Fell from log landing.
Superintendent.....	Kitchener, B.C.....	" 24	35	Struck by falling log.
Log cutter.....	Yahk, B.C.....	" 24	Struck by falling tree.
Labourer.....	Sault Ste. Marie, Ont.....	" 24	32	Fell off log-dump.
Workman.....	Webbwood, Ont.....	Feb. 2	23	Crushed under log.
Workman.....	Howardville, Man.....	" 12	28	Struck by misplaced shaft.
Loader.....	Ladysmith, B.C.....	" 8	35	Fell and crushed between logs.
Bushman.....	Timmins, Ont.....	" 14	40	Struck on head by log.
Tie maker.....	Pritchard, B.C.....	" 16	30	Struck by falling tree.
Bushman.....	Kashaborn, Ont.....	" 14	Struck on head by tree.
Bushman.....	Sioux Lookout, Ont.....	" 25	36	Struck on head by tree.
Lumberman.....	Shabagua, Ont.....	" 14	Struck by falling tree.
Employee at sawmill.....	Windsor, Que.....	" 16	22	Stomach punctured; stick caught and flew back from saw.
Logger.....	Stave Falls, B.C.....	" 28	45	Struck by snubbing line.
Workman.....	Mississauga Ont.....	" 19	Struck on head by cable.
Labourer.....	Haliburton, Ont.....	Mar. 4	46	Struck by log.
Lumberman.....	Lindsay, Ont.....	" 5	Sleigh slewed and load upset.
Lumberman.....	West Bay, Ont.....	" 17	Struck by falling tree.
Sawyer.....	Widewater, Alta.....	" 16	21	Struck by tree.
Workman.....	Grand River, Ont.....	" 11	60	Drowned while clearing logs from waste weir.
Feller.....	Headquarters, B.C.....	" 22	39	Struck by falling limb.
Sawmill worker.....	Woodville Mills, P.E.I.....	" 11	37	Dam broke while at water wheel.
Sawmill worker.....	Belle River, P.E.I.....	" 7	67	Septic poisoning; struck by breaking belt.
Sawmill worker.....	Ellsroft, Alta.....	" 14	27	Struck by plank.
PUBLIC UTILITIES:—				
Operator with power commission.....	Erindale, Ont.....	Jan. 7	31	Fell from headgate.
Lineman with power commission.....	Galt, Ont.....	" 29	21	Fell from pole.
Labourer at gas works.....	Montreal, Que.....	" 29	42	Fell into gas trap.
Messenger with telegraph company.....	Ottawa, Ont.....	" 18	51	Struck by train.
Power house attendant.....	Port Alice, B.C.....	Feb. 28	52	Tree fell demolishing pump house.
Lineman.....	Kamloops, B.C.....	Mar. 23	Electrocuted.
PUBLIC AND MUNICIPAL EMPLOYMENT:—				
Fireman.....	Ottawa, Ont.....	Jan. 29	Burned at a fire bustion.
Labourer.....	Wilsonville, Ont.....	" 29	30	Crushed under gravel.
Fireman.....	Winnipeg, Man.....	Feb. 3	Suffocated in fire.
Handyman.....	North Temiskaming, Q.....	" 21	29	Fall from scaffold.
AGRICULTURE:—				
Farmers, (2).....	Near Brantford, Ont.....	Jan. 5	50-50	Crushed by falling beam.
Farm hand.....	Bowmanville, Ont.....	" 8	44	Struck by swinging door.
Farmer's helper.....	Hemmingford, Que.....	" 12	40	Struck by falling tree.
Farmer's helper.....	Glen Sandfield, Ont.....	" 18	54	Crushed in threshing machine.
Rancher.....	Abbotsford, B.C.....	" 9	38	Explosion while blasting stumps.
Farmer.....	Lacadie Station, Que.....	Feb. 4	Struck by train.
Barn foreman.....	Gleichen, Alberta.....	" 10	21	Overturning of wagon.
Engineer at farm.....	Near Chatham, Ont.....	" 22	47	Caught in machinery.
Farm hand.....	Cote St. Paul, Que.....	" 16	25	Struck by falling tree.
Farmer's helper.....	Giffard, Que.....	" 18	Struck by falling beam.
Farmer.....	Ste. Adele, Que.....	Mar. 5	55	Fell from top of barn.
Farmer.....	Stoke Centre, Que.....	" 16	Struck by a belt.

FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1921—*Continued.*

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
FISHING AND HUNTING:—				
Fishermen (4).....	Pacific Ocean.....	Mar. 13	Vessel wrecked.
MISCELLANEOUS TRADES:—				
Labourer.....	Half Island Cove, N.S....	Jan. 4	Fell down stairs (died Mar. 29).
Trucker at electric bulb factory...	Toronto, Ont.....	" 15	55	Crushed by descending elevator.
Grain buyer.....	Jenner, Alta.....	" 31	21	Burned; explosion of kerosene.
Window cleaner.....	Toronto, Ont.....	Feb. 5	39	Fall.
Sign erector.....	London, Ont.....	" 10	50	Struck by falling timber.
Window cleaner.....	Toronto, Ont.....	Mar. 8	73	Fell from ladder.
Millman.....	King Co., N. B.....	" 12	19	Caught in a rotary carriage.
Mechanic.....	Near Steveville, Alta....	Feb 7	Under 21	Discharge of a gun

SUPPLEMENTARY LIST OF FATAL INDUSTRIAL ACCIDENTS REPORTED FOR 1920.

Trade or Industry.	Locality.	Date	Age.	Cause of fatality.
Logger.....	Stave Falls, B.C.....	Mar. 1	36	Struck by shingle bolt.
Timberman.....	Reserve Mines, N.S....	Apr. 30	Fall of rock (died Jan. 10, 1921).
Trainman.....	York Co., N.B.....	May 10	36	Embankment caved in sending engine into river.
Smelterman.....	Galetta, Ont.....	Aug. 9	Asphyxiated
Labourer at municipal quarry.....	Grimsby, Ont.....	Sept. 17	Struck by box; fell into pit.
Labourer at steel plant.....	Collingwood, Ont.....	" 3	65	Burned by acid.
Driver.....	Caledonia Mines, N.S....	" 27	20	Jammed between tub and roof. (Died Apr. 22, 1921).
Trainman.....	Westmoreland, Co., N.S.	Oct. 12	21	Pinned under derailed engine.
Trainman.....	Restigouche Co., N.B....	" 20	33	Run over by engine.
Miner.....	Comox, B.C.....	" 25	21	Struck by coal.
Woodsmen.....	Northumberland Co., N. B.	Nov. 7	22	Struck by falling tree.
Labourer.....	Sydney, N.S.....	" 18	37	Fell from ladder (died Jan. 30, 1921).
Labourer.....	York Co., N.B.....	" 25	19	Buried under embankment.
Labourer.....	Gloucester Co., N.B....	Dec. 4	Fell striking back on stump.

MIGRATION AND SETTLEMENT DURING THE FIRST QUARTER OF 1921

IMMIGRATION.—The following statements compiled from information furnished by the Department of Immigration and Colonization give details as to the total immigration into Canada during the first quarter of 1921. For purposes of comparison the figures for the previous quarter and for the corresponding quarter in 1920 are also given:

STATEMENT OF IMMIGRATION TO CANADA DURING
THE FIRST QUARTER OF 1921.

	British	From U.S.A.	Other countries	Totals
1921				
January.....	987	1,751	1,515	4,253
February.....	1,380	1,936	2,012	5,328
March.....	4,865	4,292	1,852	11,009
	7,232	7,979	5,379	20,590
Last quarter, 1920.....	14,265	9,317	9,300	32,882
First quarter, 1920.....	8,774	8,786	2,055	19,615

The table on page 749 gives the nationality, sex and destination of all immigrants entering Canada during the first quarter of 1921.

HOMESTEAD ENTRIES.—During the first quarter of 1921 there were 769 homestead entries recorded in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia, as compared with 1,310 for the last quarter of 1920, and 815 for the corresponding quarter of 1920. The statement opposite shows the number and nationality of those who took up homesteads in the various provinces during the first quarter of 1921.

RECENT LEGAL DECISIONS AFFECTING LABOUR

THE three legal decisions which are summarized below have reference respectively to the power of municipalities to grant bonuses to retiring employees, the liability of an employer

for an injury to an employee during meal hour, and the liability of an employer for an injury to a workman placed in a dangerous position.

A municipality may grant reasonable bonuses to retiring employees without express power to do so

The Finance Committee of the City Council of Edmonton, acting on a report of the city commissioners, had recommended the payment of a bonus of \$1,000 to each of three employees on their retirement from the service of the city. An elector of Edmonton then brought an action against the city and the city treasurer asking for an injunction to restrain them from paying these bonuses. A temporary injunction was granted and the matter was afterwards referred by agreement to the Appellate Division of the Supreme Court of Alberta for final judgment.

The only specific reference in the Edmonton charter to the question of granting bonuses to retiring employees is contained in section 57 which reads as follows: "The Council may grant any officer of the city, who has been in the service of the city, including its previous existence as a town, for at least twenty years, and who, while in such service has become incapable through age or illness of efficiently discharging the duties of his office, a sum not exceeding his aggregate salary for the last three years of his service as a gratuity upon his dismissal or resignation."

The plaintiff contended that inasmuch as the statute had expressly given power to grant a gratuity in specified cases there must be implied the prohibition against the granting of one in any other case which does not come within the words of the section. In the opinion of the court the legislature in passing this section was not considering the or-

dinary case of a comparatively small gratuity, but what it was obviously intending to do was to authorize the payment of an extremely large bonus or gratuity where an official had served for 20 years, and age or illness prevented further efficient service. With respect to one of the retiring employees, who was a city commissioner and who resigned on account of his ill health, the court held that he might be considered an officer within the meaning of this section, and that as he had served for 21 years and resigned on account of his health his bonus might be authorized by the section. The other two gratuities, however, were not authorized within the meaning of the section. The court held that that only meant that in their case the council had not especial authority to give them as much as three years' salary. In considering the question whether the city council had a general power to grant reasonable gratuities to its employees the court pointed out that by section 221 the council was authorized to "make by-laws and regulations for the peace, order, good government and general welfare of the City of Edmonton." Under a similarly wide clause it had been held elsewhere that some such payments could be lawfully made. It was further held by the court that as the City of Edmonton carried on business undertakings or so-called "utilities" which used formerly to be carried on by private business companies, it was the law of trading corporations rather than that of municipal corporations that

might be more properly applied. Under the law of trading corporations a gratuity to employees in the case of joint stock companies can be given without express powers. The principle was quoted from another judgment "that where there are directors of a trading company these directors necessarily have incidentally the power of doing that which is ordinarily and reasonably done in every such business with a view to getting either better work from their servants or with a view to attracting customers to them."

The court was of the opinion that this principle ought properly to be ap-

plied to municipal corporations which carry on such operations as are conducted by the City of Edmonton. The only possible doubt would seem to lie in the fact that the servants in question were retiring from the service, but the payment was held to be proper on account of the probable encouragement to employees generally, to those who still remained in the service and not merely those who at the moment received the gratuity. The judgment of the court, therefore, was that the injunction should be dissolved and the action dismissed with costs. (*Alberta—Bellamy vs. City of Edmonton.*)

A workman injured during meal hour at a place permitted by employer and under control of foreman may recover compensation under Quebec Act

A painter was injured by the explosion of a gasoline stove when he was taking his lunch in a tool shed near the building on which he was employed. He brought an action in the Superior Court at Montreal for compensation against his employer under the Quebec Workmen's Compensation Act. It was claimed by the employer that the stove in question was in a shed separated from the house where the work was being done, that it was not for the use of the employees, that the accident did not occur in the course of employment but during the hour of lunch, which the plaintiff should have taken at home or in a restaurant and not at the place of work, or at least if he chose the latter place he did so at his own risk.

It was held by the court that it was the regular practice for the men to take their lunch in the tool shed and that the stove was used by the men with the knowledge and consent of the defendant to warm up their dinner and to heat water for their tea.

The judgment was in part as follows: "The act governs injuries to workmen

rising out of accidents happening by reason of or in the course of their work. The term 'work' is treated in our jurisprudence as being synonymous with 'employment,' and it is settled that the employment is not broken by an interval of rest, and still less so by time taken for a meal, particularly if the meal is taken upon the works, or, in case of an outside contract such as now in question, at a place permitted by the employer and under the control of a foreman. The accident upon which this action is based happened during the interval for dinner and at a place designated by the defendant in the usual way as the place where the workmen should take their meals, and under the supervision of a foreman, and it, therefore, comes within the ambit of the plaintiff's work."

The plaintiff's action was accordingly maintained and the defendant was condemned to pay him the sum of \$103.95 and \$33 per annum from February 4, 1919, and costs. (*Quebec—Boucher vs. Bourdon.*)

Employers are not entitled unnecessarily to expose their servants to danger

A labourer under the instruction of a foreman was excavating earth beneath a frozen surface when the top crust fell and injured him. He brought action in a court in Alberta against his employer for damages for personal injuries under the Common law.

At the close of the evidence for the plaintiff, the case was taken from the jury and the action dismissed on the ground that there was no evidence of negligence. The plaintiff appealed against this judgment and the case was heard in the Appellate division of the Supreme Court of Alberta. It was held by the Court, with one judge dissenting, that in this class of work the foremen were under a legal duty to go further in the way of anticipating danger than the day labourers under

their control could be expected to do; that the jury could have properly held that by having a man watching above and giving warning when the crust was about to break the accident would have been avoided, and that the jury could have reasonably held that a prudent foreman would have anticipated the moment when the frozen crust was about to fall and warned the workmen. The opinion in another case was cited that "Employers are not entitled unnecessarily to expose their servants to danger which they can escape only by constant vigilance and unfailing alertness." It was therefore held that the trial judge erred in withdrawing the case from the jury. The appeal was therefore allowed with costs and a new trial was ordered. (*Alberta—Dickey vs. Canadian National Railways.*)

THE LABOUR GAZETTE

JUNE, 1921

Number 6

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

This issue of the LABOUR GAZETTE contains a review of the First Annual Report of the Director of Technical Education for Canada, issued by the Department of Labour, and a summary of recent labour legislation in the provinces of Ontario, Alberta and British Columbia.

At the beginning of May, unemployment among trade unions was 16.27 per cent of the total membership as compared with 16.48 at the beginning of April and 2.52 at the beginning of May, 1920. According to returns received from over 5,000 firms there was a slow but steady improvement in the volume of employment, although conditions as compared with the same month in 1920 were noticeably less favourable.

The cost of the weekly family budget of staple foods continued to decline, averaging \$12.25 at the beginning of May as compared with \$12.68 in April, \$16.65 in May, 1920, \$13.53 in May, 1919, and \$7.42 in May, 1914. The index number of wholesale prices for May fell to 247.3, as compared with 253.7 for April, 356.6 for May, 1920, 284.1 for May, 1919, and 136.3 for May, 1914.

The time loss due to industrial disputes was greater than during April and also greater than during May, 1920. There were in existence during the month 45 strikes, involving about 8,238 workpeople and resulting in a time loss

of 163,520 working days. At the end of the month there were on record 26 strikes involving about 6,709 workpeople.

Proceedings under the Industrial Disputes Investigation Act

During the month of May the Department received four applications for the establishment of Boards of Conciliation and Investigation, and further appointments were made in connection with applications which had been received during previous months.

Proposed Joint Council in Calgary build- ing trades

A meeting of representatives of employers and employees in the building trades of Calgary, Alberta, was recently held for the purpose of considering the formation of a joint industrial council along the lines approved at the Joint Conference of the Building and Construction Industries held at Ottawa on May 3-6. The proposal was favourably received and a sub-committee was appointed to draft a constitution for ratification at a future meeting.

District 18, U.M.W. of A. given full local autonomy

A conference of representatives of the local unions of the United Mine Workers of America of District 18 was held at Calgary during the month

of June for the purpose of considering the restoration of local autonomy to the District. At this conference full autonomy was restored to the District by the International Executive which had been administering its affairs since July, 1919. A constitution was adopted and steps are now being taken for the election of district officers.

Safety rules for cold storage plants in Alberta Following conferences with representatives of companies operating refrigerating plants the Alberta Workmen's

Compensation Board has made regulations for the protection of employees in these plants, which become operative on July 1. The regulations provide that a safety valve must be attached to all refrigerating machines to relieve the pressure when it reaches or exceeds 250 pounds; that another valve be attached to provide an escape for ammonia fumes in case of fire; that gas masks of a type approved by the Board be provided for workmen entering rooms in which ammonia is in use; and that employers must test their safety valves and other apparatus for the prevention of accidents at least once a year, and gas masks once a month, and submit to the Board a report of the tests in each case.

Dominion Coal Workers' Relief Association The organization by the employees of the Dominion Coal Company of

Nova Scotia under the name of the Dominion Coal Workers' Relief Association, was noted in the LABOUR GAZETTE for May, 1919, page 502. At the conclusion of the second year of its existence the organization reports a membership of 6,128, an increase of 766 over the previous year, three-fourths of the employees of the company being now members of the Association. During the past year the amount of sick benefit paid weekly was raised from \$6 to \$9 for the first six months, from \$3 to \$4.50 for the following six months, and from \$2 to \$2.25 for the two years thereafter. One hun-

dred dollars from the company and \$50 from the government are also paid in death benefits, the widow further receiving \$8 a month for five years and \$3 a month for each child under the age of 14 years. The receipts of the Association are made up of weekly contributions from the employees of \$1 per month and 25 cents a month per member from the company, together with a further grant from the Provincial Government, the amount of which is proportionate to the quantity of coal raised. During the past year the total revenue was \$122,718, of which sum \$83,753 was from members' contributions, \$20,596 from the Dominion Coal Company, \$13,546 from the Provincial Government and \$4,824 from interest. The financial statement shows an estimated surplus at the end of the financial year, after allowing for liabilities incurred for the families of deceased members, of \$84,320. The excess of income over expenditure and liabilities was about \$50,000.

Canadian National Council on Child Welfare

A meeting of the provisional executive of the Canadian National Council on Child Welfare was held at Ottawa on May 30, at which a basis of organization was approved and a permanent executive was appointed. It was decided to hold a meeting of the Council in Montreal in the autumn. It was recommended that sub-committees be appointed on child hygiene, the child in industry, education and recreation, the neglected delinquent and defective child and the ethical development of the child.

The following officers were elected: President, Mr. J. Arthur McBride, Montreal; vice-presidents, Miss Elizabeth Breeze, Vancouver, and Mrs. William Todd, Orillia; secretary, Miss Charlotte Whitton, Toronto; treasurer, Mme. Jules Tessier; executive, five to be appointed in October, Mrs. Richard Hooper, St. John; Mrs. N. C. Smillie, Ottawa; Dr. R. E. Wodehouse, Toronto; Rev. E. Thomas, Toronto, and a representative from the Trades and Labour Congress.

Wage reductions in Great Britain in 1921

According to London press despatches the British Minister of Labour recently gave particulars of the wage reductions which have been carried into effect in Great Britain during the first four months of the current year. Nearly all of these reductions were agreed upon after conferences of Joint Industrial Councils, or, where these did not exist, between employers' associations and trade unions. The total number of workers affected is estimated at 1,750,000, fifty-one trades being represented. The reductions fell under one of the three following categories: (1) Reductions under agreements whereby wages vary in accordance with the Ministry of Labour's index number for "cost of living." Under this head came 650,000 railway workers, with a wage reduction of 4 shillings per week; over 200,000 wool workers, with 4 reductions of 10 per cent on base rates, totalling 12 shillings per week for men, and 8 shillings per week for women; civil engineering trades, with a reduction of 1d. to 3d. per hour; 50,000 hosiery workers, with a reduction in their bonus of 1d. in the shilling. (2) Reductions made in accordance with sliding scales based on the selling price of the commodity. The chief example under this head was the iron and steel industry in which about 125,000 workers were affected by reductions ranging from 22 per cent to 66 per cent on standard rates, equivalent to a reduction of $7\frac{1}{2}$ per cent to 20 per cent on current earnings. (3) Reductions by agreements between employers' associations and trade unions. Under this head came 250,000 workers in shipyards, with a reduction of 6 shillings per week for time workers and 15 per cent for piece workers. Reports from other sources indicate that the 12 months' wages agreement in the cotton trade has expired. The increase given on May 6, 1920, was 70 per cent on standard rates, which was equivalent to 28 per cent on the wages current at the time. A decrease is now proposed of 95 per cent on standard rates, equi-

valent to 6 shillings in the pound on a full week's wage. The wages now being paid are 215 per cent above the standard rates.

National Building Trades Agreement in Great Britain

The National Wages and Conditions Council for the Building Trades of Great Britain which met in London, on April

22 and May 5 and 6, issued the following joint statement with reference to negotiations for changes in wages: "The National Wages and Conditions Council has considered the references to it of the notices pending for alterations of wages and conditions, and although, owing to the complexity of the matters submitted, the council has not yet completed its labours, it has arrived at the following decisions and adjourned until May 31, when it expects to be in a position to complete the business. The council had before them the fact that upon the present day cost of living there is warrant for a reduction under the sliding scale of 3d. per hour, but as an interim award the reduction indicated in the following resolution has been given: 'The council agreed that the wages of craftsmen and labourers be reduced 2d. per hour as and from May 16, and that the wages of labourers be reduced a further 1d. per hour as from July 1, and that this meeting stands adjourned until May 31, when the difference between the rates of craftsmen's and labourers' wages will be further considered and decided.' In the interim, a joint committee of employers and labourers, with a representative of the National Federation of Building Trades Operatives, shall meet to inquire into the operation of any reduction of labourers' wages and the effect such reduction would have on the lower paid districts in order that the minimum shall not fall below an agreed amount. It was further agreed that both parties in the meantime shall endeavour to arrive at a recommendation as regards hours of work, which will be considered at the July meeting of the council."

The Agreement applies to the whole of England, Scotland and Wales and is the first which has been come to in the Industry on a national basis, the previous methods of negotiation being on a district basis. Consideration of the employers' application for an extension of the 44-hour working week was adjourned to May 31.

Joint Industrial Councils for Railways in Great Britain It is announced that the three British railwaymen's unions,—the National Union of Railwaymen, the Associated Society of Locomotive Engineers and Firemen, and the Railway Clerks' Association—have signed an agreement with the companies, which provides that when the railways are de-controlled joint councils of officials and employees are to be formed to deal with various questions. The carrying out of the agreement is conditional as to its main provisions on the understanding that the Railways Bill to be introduced in the House of Commons shall contain no other reference to management or conditions of service than those embodied in the agreement; that is to say, the demand for representation on boards of directors made by the railwaymen's leaders will be forgone in favor of joint councils of officers and elected employees. The precise functions of the joint councils are not yet determined, but will be generally on the lines of Clause 16 of the Whitley Report. The new agreement provides for the continuation of the Central and National Wages Boards until otherwise determined by twelve months' notice not to be given until January 1, 1922. Each of the parties to the agreement will have separate representation on the boards. In default of agreement between the unions concerned and the individual railway companies on the questions of rates of pay, hours of duty, and conditions of service, matters in dispute will be referred to the Central and National

Wages Boards, provided that the constitution for that body does not prejudice any rights to raise any point relative to the issue. In dealing with matters of discipline, it has been agreed that employees shall be permitted to state their case, to call witnesses, and to advance extenuating circumstances before the officials of the company before a final decision is arrived at. Cases of doubt will be placed before the higher officials of the company and a right to appeal in writing to a superior officer is provided for. If an employee desires, he can be heard in person and be accompanied as spokesman by a fellow-workman in his own grade, or by a headquarters' official of his trade union. The details of the joint council scheme are being handled in detail by a committee composed of six representatives of the companies and six of the unions which met in London on May 20 to work out details and which, after reporting progress, adjourned to May 30.

Non-manual workers seek recognition in industrial disputes

At an emergency conference of the National Federation of Professional, Technical, Administrative and Supervisory Workers of Great Britain resolutions were passed as follows: (a) Expressing disapproval of the neglect to call into co-operation professional and supervisory workers in initiating proposals for changes in the industries in which they are involved, although when a dispute takes place the support of staff workers was expected by both sides, and demanding that representatives of such workers should participate in all conferences and negotiations between employers (or the State) and employees which involved non-manual workers, and: (b) expressing the opinion that satisfactory wages and conditions of employment can only be established by negotiation and agreement between the employers and the organizations representing the workers.

Industrial re-habilitation laws of United States Congress

The *International Labour Review* for February, 1921, contains a resumé of legislation enacted by the United States congress in respect to industrial rehabilitation. This legislation comprises the Vocational Education Act, and its amendment, of 1917, the Vocational Rehabilitation Act of 1918 and its amendment of 1919, and the Industrial Rehabilitation Act of 1920, (see LABOUR GAZETTE, August 1920, p. 1025) administered by the Federal Board of Vocational Education, established under the Act of 1917, and composed of the Secretary of Labour, the Secretary of Agriculture, the Secretary of Commerce, the United States Commissioner of Education, and three citizens appointed by the president to represent respectively agricultural, manufacturing and commercial, and labour interests.

Kansas Court of Industrial Relations

According to a recent report of the presiding judge of the Kansas Court of Industrial Relations, (see LABOUR GAZETTE March, and May, 1920, pages 300 and 550) the Court tried 26 formal lawsuits during the first year of its operation, and in every case its findings were accepted by both parties, and there was no appeal. He states that the work in the mining industry, during that period, was hampered by the bitter opposition of radical labour leaders, but, "nevertheless, during the whole year from February 1, 1920, to February 1, 1921, no strike of coal miners had been called by union leaders," and the production of coal in Kansas in 1920 "is at least 20 per cent greater than in 1919." During the year two small strikes were called in Kansas by members of the miners' board. The parties guilty of calling these strikes were prosecuted in the District Court, the jurisdiction of the Industrial Relations Court being confined to the matter of industrial controversy and investigations into industrial conditions.

Educational programme for American labour

An educational programme to help establish a better understanding between workers and employers has recently been adopted by the Executive Council of the American Federation of Labour. It aims to: (1) Minimize unemployment and the "turnover" in industry by scientific study of labour needs, seasonal occupations, working conditions with special reference to the human element in industry, and the processes of production; (2) amend immigration laws to provide for elastic regulation of immigration, based on labour supply and demand; (3) educate employers to the view that only through trade unionism can industry be stabilized and radicalism eliminated; (4) repeal "oppressive and restrictive legislation" now in effect and prevent enactment of similar laws in the future, on the theory that such legislation causes unrest instead of curing it; (5) establish joint industrial councils in the various industries, made up of an equal number of representatives of employers and workers, to consider all problems relating to their particular industry and act in an advisory capacity to the industries themselves, the public and legislative bodies; (6) maintain wages at present levels; (7) "humanize" industry by awakening the worker's personal interest in his work.

Arbitration bill for Germany

A conciliation and arbitration measure recently introduced in the German Reichstag provides for the establishment of joint conciliation and arbitration commissions composed of employers and workers. These commissions shall include local and regional commissions, and at the head of the organization shall be the Federal Conciliation and Arbitration department (Reichseinigungsamt). No strike or lockout may be declared before an appeal has been made to a commission. The decision of the commis-

sion, however, shall not be binding upon either party, except in public utilities such as gas, electricity or waterworks, and in certain agricultural cases. A strike or lockout may be declared only after a vote has been taken by secret ballot, and by a three-fourths majority of the voters, and this decision may take effect only after a definite interval of time.

Proposed

National Council of Labour of Italy

In 1902, a Supreme Council of Labour was constituted by the parliament of Italy. This body has been subject to

criticism on the grounds that its powers were purely consultative and its membership included no direct representatives of the classes concerned. Various schemes for its reform have been proposed. On November 10, 1920, Signor Labriola, Minister of the Department of Labour, introduced a bill, the main features of which were as follows: (1) The preservation of the consultative character of the existing Council but with power to propose bills to the Government on its own initiative; (2) power to conduct inquiries in regard to the cost of production in industrial establishments; (3) power to act as arbitrator in serious economic disputes; (4) creation of a section for industries administered by the state; (5) elimination of all members other than class representatives; (6) election by general vote of members of organizations; (7) equality of class representation; (8) election within each class by the system of proportional representation.

This scheme was opposed in the Chamber of Deputies by various parties as inadequate. The trade unionists especially criticized it because it failed to give the Council any powers of decision

and because only representatives of opposing interests, namely, employers and workers, were eligible for membership. The bill was referred to a Commission of the Chamber of Deputies, which is engaged in framing counter-proposals based on the various political and labour points of view.

Compulsory arbitration abolished in Norway

The Norwegian Government recently decided not to renew the "provisional" Compulsory Arbitration Act, which has been in force since 1916. It was passed in that year, largely in order to deal with widespread disputes in the engineering, mining and superphosphate industries, the introduction of such a measure having been the subject of agitation ever since 1909. The Act was renewable annually, and the period expired on April 1. The decision to allow it to lapse is stated to be largely due to its unsatisfactory working in the industrial conflicts of the past year.

Jottings

At the International Conference on the Welfare of Women and Children which will be held at Geneva during the last week of June under the auspices of the League of Nations, Mrs. Obed Smith, wife of the Canadian Immigration Commissioner, London, England, has been appointed by the Dominion Government to represent Canada.

A Department of Labour has recently been established at Bombay, India, with Mr. Findlay Sharras, formerly Director of Statistics in India, as Labour Commissioner. This department was set up after consultation with the chairman of the British Industrial Court, and is intended for intelligence purposes and to help in the settlement of disputes.

At a recent conference of labour leaders of the United States it was decided

to establish a resident workers' college at Katona, N.Y., to be known as the "New Brookwood". The object of this college is to provide for the American labour movement, from the ranks of the workers, a body of trained, responsible and liberally educated men and women.

At the Sixth National Convention of Industrial Engineers, held at Milwaukee on April 27 to 29, a discussion took place on the question of a better term for "Welfare Work" that would cover all the activities carried on by employers for the betterment of their employees and that would not be so objectionable to the workers. The term "Mutual Service" was finally agreed upon.

The United States Bureau of Mines has recently issued a report which indicates that fewer lives were lost in metal mine accidents in the United States during 1919 than in any previous year for which accident statistics have been compiled. In 1919, the number of men killed was 468 and the number injured was 31,506, as compared with 646 killed and 42,915 injured in 1918. For every 1,000 men employed in 1919 during a full-time year of 300 working days 3.43 men were killed and 231.18 men were injured.

The annual report of the Wholesale Branch of the French Co-operative So-

cieties for 1920, shows that in spite of the fall of prices in that year the turnover of the branch has continued to increase. The turnover in the year 1913 was 12,163,974 francs; in 1918, 59,510,505 francs; in 1919, 121,406,362 francs; in 1920, 165,930,377 francs.

The Japanese Government has passed a regulation prohibiting night work for all female workers under 14 years of age, in the employ of the Tokyo Central Telephone Bureau. This new regulation will affect more than 400 children. It is expected that similar improvements will be introduced in all government telephone bureaus throughout Japan.

In accordance with the recommendation made at the Washington Conference (League of Nations) the Japanese Government has prohibited the use of white phosphorus in the manufacture of matches.

The Department for Social Affairs of Sweden has declined to recommend the ratification of the Washington Convention (League of Nations) in regard to the 8-hour working day, but has proposed the retention of the 48-hour week, with a daily maximum of 9 hours and maximum overtime per annum increased from 150 to 200 hours.

INDUSTRIAL CONDITIONS DURING MAY, 1921

I.—General Review

The month was characterized by a gradual improvement in the industrial situation as a whole, without distinctive movements in any groups, apart from the usual seasonal variations in dairying, fish canning, water transportation, build-

**The Labour
Market**

ing construction and automobile manufacturing. The upward tendency was continued with fair regularity throughout the entire month. Compared with the situation in the same month last year, conditions generally were strikingly less favourable in practically all lines of industry. Logging declined in

the usual way with the ending of river operations, and where summer cuts were under way the tendency was to employ fewer workers than normally. Lumber and lumber products maintained the average of the previous month, with some slight expansion in sawmill work and carriage manufacturing. On the whole the manufacturing industry changed very little, although some upward tendencies were observed. Fish canning and packing on both coasts maintained a fair average, salmon plants in British Columbia operating under better conditions. Meat, cereal and flour plants showed only minor changes, but dairying registered the usual seasonal increase. Iron and steel products showed improvement in some lines, varying between localities. Automobile plants experienced the usual seasonal expansion, though on a moderate scale. Ship yards in both East and West were operating on a slightly lower level than in April. The textile group also varied, net changes being relatively small. There was a slight improvement in the leather industries, and rubber products benefited by the seasonal demand for automobile tires. Railway transportation, construction and maintenance recovered to some extent the losses of the previous month, but in common with other lines the situation compared unfavourably with that of the corresponding month of last year. Water transportation continued the movement of the previous month, involving further shifting of activity from Maritime ports to St. Lawrence and upper lake points, but Great Lakes traffic was much below normal. On the west coast there was little change. The coal mining situation in Nova Scotia was eased somewhat as a result of the re-opening of navigation to summer ports, combined with the coal strike in Britain. In Alberta and British Columbia fields conditions were less favourable. The usual development of activity in metalliferous mining at this time of the year was less marked than usual.

The loss of time on account of industrial disputes was greater than during April, 1921, or May, 1920. There were in

Strikes

existence at some time or other during the month 45 strikes, involving 8,238 workpeople and resulting in an estimated time loss of 163,520 working days, as compared with 19 strikes, 3,697 workpeople and 57,071 working days in April, 1921; and 79 strikes, 13,856 workpeople and 159,972 working days in May, 1920. On May 1, there were on record ten strikes affecting 942 workpeople. Thirty-five strikes were reported as having commenced during May, as compared with ten during April, 1921. Four of the strikes commencing prior to May and fifteen of the strikes commencing during May were reported terminated, leaving 26 strikes, involving 6,709 workpeople on record at the end of the month.

The departmental index number of wholesale prices stood at 247.3 for May as compared with 253.7 for April, 356.6 for May, 1920, 284.1 for May, 1919, 275.8 for May, 1918, 243.8 for May, 1917, 183.3 for May, 1916, 147.4 for May, 1915 and 136.3 for May, 1914. The chief changes for the month were decreases in dairy products, animals and meats, grain and fodder, textiles and in building materials. There was a slight general recovery in the prices of lead, zinc, quicksilver, antimony and tin. Iron products continued to ease off gradually. All the groups were lower than a year ago and nearly all were lower than two years ago.

In retail prices the average cost of a list of 29 staple foods in 60 cities at the first of May was \$12.25 as compared with \$12.68 for April, \$16.65 for May, 1920, \$13.53 for May, 1919, \$12.66 for May, 1918, \$11.82 for May, 1917, \$8.37 for May, 1916, \$7.34 for May, 1915, and \$7.42 for May, 1914. The total for foods, fuel and rent in the 60 cities averaged

\$22.84 in May as compared with \$23.31 in April, \$26.44 in May, 1920, \$21.92 in May, 1919, \$20.67 in May, 1918, and \$14.19 in May, 1914. The chief changes for the month were decreases in eggs,

milk, butter and potatoes, with slight decreases in nearly all the other items. Coal, wood and coal oil averaged slightly lower. Rents averaged higher in Quebec and Ontario.

II.—Industries and Trades

Logging

ACTIVITY in the logging industry in the Maritime provinces experienced the usual decline incident to the completion of river driving. At New Glasgow there was a small amount of cutting and hauling of pulp wood by contract, but conditions in general were unsettled. The drive in the upper St. John valley was very small this year; there was some rafting on the St. John, Restigouche and Miramichi rivers. Elsewhere in this district operations were on a very minor scale. In Quebec and Ontario the month saw the completion of nearly all river work. This condition prevailed generally at St. Lawrence points and through Northern Ontario. The Port Arthur-Sudbury zones reported very active conditions prior to the end of the month. In Manitoba, more especially at The Pas, an abnormally late season caused a late drive, and not until the third week of the month were operations in full swing. At Prince Rupert and Fraser River points logging was abnormally dull.

Mining

In the coal districts of the Maritime provinces conditions were still below normal, but at many points a marked improvement over the previous month was recorded. Examples were the Sydney Mines, the Springhill Mines, the Joggins Mines, and those at Westville, where at the end of the month the industry was running at about normal for

this year. The depression of last month was continued in the Glace Bay district, at Inverness and especially in the Stelarton fields. The British coal strike and the re-opening of navigation combined to relieve what was a rather serious situation in both provinces. The mines at Minto shared less in the revival of activity, and were working only two or three days per week, largely because of lack of orders. In Alberta, where the factors which influenced Maritime coal fields favourably had little effect, conditions were not so good. Canmore and Hillcrest fields, however, were exceptions. The Brazeau, Taber, Blairmore and Coleman fields all were running considerably below normal. In British Columbia most fields changed very little during the month, but the Cumberland and Fernie districts showed increased activity. In Northern Ontario, metalliferous mining was still abnormally slack. Nickel mines at Nickelton, Copper Cliff and Coniston were operating with greatly reduced staffs. In the precious metals, the Cobalt field showed little change, but at Timmins, Porcupine and Schumacher there was increased activity. In British Columbia the Kimberley, Rossland and Anyox districts were operating under slightly better conditions, but the gold mines at Stewart were running on greatly reduced staffs, and the Trail silverlead mines were considerably below normal. Quarries in the Maritime provinces showed slightly greater activity, in anticipation of building demands. The Quebec asbestos fields, with a few exceptions, were much below normal, staffs in some cases having been reduced fifty per cent.

The Manufacturing Industries

In the Maritime provinces fish and lobster canning maintained about normal activity for the time of the year. Sugar refineries varied; at Dartmouth considerable reduction of staff took place toward the end of the month, while at St. John mills were noticeably busier. Candy manufacturing showed little change. Flour mills and biscuit factories in Quebec were rather better situated than in April but were still much below normal. Sugar refineries varied; one large plant in Montreal decreased its staff in about the same proportion that another factory increased. Candy manufacturing was rather duller than in the previous month. Packing companies experienced little change, the balance of employment in Montreal and Hull plants being favourable on the whole. In Ontario, meat packers and abattoirs, with a few exceptions, reported slightly less favourable conditions. Dairy companies, on the other hand, registered the usual seasonal increases in production. Cereal and flour mills varied between localities; thus flour mills at Keewatin showed no change while oatmeal mills at Peterborough worked on greatly reduced staff and flour mills at Port Colborne experienced slightly better conditions. In sugar refining the outstanding feature in this province was the shut down of the Chatham plant and the continuance of abnormally depressed conditions at the Wallaceburg factory. Canning plants at Leamington showed greater activity over the previous month, but were still considerably below normal. Candy, confectionery and biscuits firms, in the main, were duller than in the previous month, but the majority were running at about their average for this year, especially in Toronto and London. Starch plants at Cardinal and Fort William showed practically no change, and were running at about normal. In Manitoba, flour mills in the Winnipeg district regained their losses of the previous month and showed average ac-

tivity. Grain elevator companies showed a slight decline in line with the previous month. Packing plants and milk factories exhibited slightly greater activity. In Saskatchewan the flour mills at Moose Jaw were running with slightly reduced staffs. In Alberta packing plants continued to decline slightly; dairies, on the other hand, continued to show improvement. In British Columbia, sugar refineries at Vancouver were running on about the same basis as in the previous month. Canneries on the Skeena, and indeed generally, were running toward the end of the month with greatly increased staffs, incidental to the usual seasonal increase in their products.

The situation in the Maritime provinces in the iron and steel industries was moderately favourable. Steel car manufacturing in New Glasgow showed no change. IRON AND STEEL PRODUCTS.

Rolling mills at Sydney experienced a minor decrease in activity, while steel furnaces made additions to staff. Forging plants continued to show slackness, while in shipyard work there was a moderate expansion. At Trenton a rolling mill and nut and bolt mill were operating with only part of staff employed. A large order for rails forecasted increased activity at Sydney. Railway shops at Sackville were still running on part time only. In Quebec conditions in this industry were still considerably below normal on the average. The shipyards at Montreal and Three Rivers reduced staff considerably, but at Sorel more workers were taken on. Engine and boiler works in Montreal showed no change, while machinery plants in that city varied slightly, some larger firms being rather more active. Similar firms in Sherbrooke were running with slightly reduced staffs. Structural iron works at Lachine and Montreal also were somewhat slacker. Forging shops in Montreal varied, some of the smaller firms giving evidence of decreased productivity. Stamped and enamelware plants in the same district were in slightly better condition. In

Ontario the general situation was very similar. Agricultural implement firms in Brantford, Hamilton, Orillia, Smith's Falls and Toronto showed fairly general decreases in staffs. Tool plants in St. Catharines and Galt experienced practically no change, though much below normal for this year. Engine and boiler factories at Galt and Toronto were working under somewhat improved conditions, but machinery plants at Peterboro, Hamilton and Toronto slightly decreased their working strength. Forging shops in Oshawa and Swansea were in much the same situation; rolling mills in Toronto and Sault Ste. Marie added to their staffs and were consequently more active. Wire factories at Leaside and Hamilton showed practically no change, though one large plant in Hamilton reduced staff almost 50 per cent. Hardware plants in Hamilton were operating on a slightly better basis, while safe and vault firms were slacker. Shipbuilding at Midland and Toronto experienced minor declines. Automobile plants in Chatham, Ford, Oshawa and Walkerville exhibited the usual seasonal increase in production, though on a much smaller scale than is usual. Car works in Hamilton and Oshawa reported slightly reduced staffs. The locomotive works at Kingston continued to decrease staff and at the end of the month closed down. In Winnipeg structural iron plants varied, the changes being slight but on the whole unfavourable. Rolling mills at Selkirk showed considerable additions to staff with proportionately increased activity. The ship repairing and shipbuilding industries at Victoria and Vancouver showed less volume of work and were running on reduced staffs.

The leather industry in Quebec showed only minor changes as compared with the previous month.

LEATHER AND RUBBER PRODUCTS. Shoe firms in Montreal varied, the majority having increased staffs in different proportions, while in a few cases there were reductions. In the cities of Quebec and St. Hyacinthe conditions were not so favour-

able. Rubber factories in Granby were still much below normal, though reporting little change from previous month, and much the same condition prevailed in this industry in Montreal. At St. Jerome still further reductions in staffs took place. In Ontario the leather situation was parallel to that in Quebec. London factories showed both increased and decreased activity, the net difference being small as compared with the previous month; Galt and Toronto firms increased their staffs, and similar expansions on a small scale occurred in tanneries at Kitchener, London and Toronto. Toronto rubber factories were still much below normal, but tire plants were running under more favourable conditions than in the previous month. Much the same situation obtained in Kitchener, with the increases in the tire section rather larger. At Bowmanville tire manufacturing failed to recover. At Guelph the rubber industry was operating on a much more favourable basis than in the previous month, but in plants at Port Dalhousie and Merriton considerable reductions in staff took place.

In the Maritime district the lumber industry as a whole was below normal. At

LUMBER PRODUCTS. Plaster Rock, N. B., lumber mills showed increased activity over the

previous month and at Moncton mills were operating longer hours with reduced wages. Lumber yards were reported as stocking, an unusually early development. At New Glasgow several sawmills ceased operating. In both provinces wood-working factories were fairly active. There was comparatively little change in the lumber situation in Quebec. In Hull, small additions to staffs were reported. At Levis wooden shipbuilding had fallen off slightly. At Sayabec and Quebec the mills were taking on additional workers. There was no change reported in the Breakeyville mills. In Ontario, wood-working plants at Chatham, London, Toronto and Pembroke, manufacturing wooden parts for agricultural implements, phonographs, barrels, etc., showed a tendency to slack-

ness. Office and household furniture factories at Newmarket, Stratford and Brantford also were on a less favourable basis than in the previous month. Lumber mills at Arnprior, Byng Inlet, Pembroke, Keewatin and Rockland showed considerably increased activity; in some cases large additions to staff were made. The Fort Francis mills showed moderate contractions in this respect. At Orillia carriage factories experienced to some extent the usual seasonal expansion, but not up to the normal for this year. At The Pas in Manitoba a marked increase in activity in lumber mills occurred, co-incident with the opening in full of river operations. In British Columbia timber scaled during the month of April had totalled 156,936,663 feet of all species, Douglas fir leading by a 50 per cent margin. During the month of May sawmills at Chemainus, Golden, New Westminster and Vancouver exhibited lessened activity, and at Fraser Mills there was a 50 per cent reduction in staff. At Wardener on the other hand there was a decidedly more favourable situation.

In the Maritime Provinces conditions in this industry varied. Paper mills at

PULP AND
PAPER
PRODUCTS.

Murray, N.S., showed a substantial enlargement of staff, while at Bathurst the pulp mills considerably reduced their

working force. In Quebec the situation changed very little as compared with the previous month. Slight seasonal expansions were reported from Hull, Shawinigan Falls, Beauharnois, Usine, St. Laurent, East Angus, La Tuque, Bagotville, Buckingham and River Madeleine. At Three Rivers a marked increase in activity occurred; mills at Jonquière, Cap Magdeleine and Windsor Mills showed no change. Decreases in number of workers employed occurred at Donnacona, St. Jerome, Chicoutimi, Kenogami and Val Jalbort mills. In Montreal the same was true of news pulp and paper firms. In Ontario there were no changes in mills at Iroquois

Falls, Sault Ste. Marie, Sturgeon Falls, Espanola, Thorold and Dryden. Slightly greater activity prevailed at Ottawa and Hawkesbury, but at Cornwall conditions were less favourable than in the previous month. The beaver board industry at Thorold continued to decline slightly. Printing and publishing in Ottawa showed little change, while in Toronto conditions varied, the increases and decreases being all of a minor character. In the Prairie Provinces the printing trades showed only slight variations, practically all being below normal. British Columbia pulp and paper mills reported only minor changes, those at Port Alice and Woodfibre operating on a slightly less favourable basis, while at Powell River and Ocean Falls small additions to staffs occurred. Printing and publishing experienced a slight depression in Vancouver.

Cotton mills at Yarmouth reported somewhat lessened activity, while at Truro

hosiery and knit goods
TEXTILE manufacturing expanded
PRODUCTS. slightly. Cotton mills
at Marysville and St.

John, N.B., showed slight reductions in staffs, while the same industry at Milltown increased its operations slightly. In Quebec variations in this industry were all of a minor nature. Minor expansions in hosiery and knit goods were exhibited by mills at St. Hyacinthe, while at St. Jerome there were corresponding contractions. Thread, yarn and cloths' mills at Lachute, St. John's, Three Rivers and Montmorency Falls reported minor reductions in staffs, but several Montreal mills and mills at Sherbrooke increased their operations slightly. A number of garment and personal furnishings firms in Montreal showed increased activity, but in other Montreal firms and at Ontario, Que., at St. John's less favourable conditions prevailed. Bedding factories in Montreal were operating with slightly increased staffs. Much the same situation obtained in Ontario. Cordage firms at Brantford and Welland showed practically no

change, although still much below normal. Carpet factories at Toronto reported some improvement, while at Guelph conditions were less favourable. Bedding factories in Toronto were much the same as in the previous month. Garments and personal furnishings factories varied; decline in business occurred at Hamilton, London and Toronto plants, while ladies' wear factories in Toronto showed improvement. Thread, yarn and cloth mills changed very little; there were minor decreases in staffs of mills at Welland, Hamilton, Cornwall and Preston. Factories in this line at Almonte and Hespeler showed slightly greater activity. Hosiery and knit goods firms in the main experienced slight depressions, chiefly at Dunnville, Galt, Hamilton, Paris and Brantford. Some mills in Hamilton and Toronto were exceptions. In Alberta somewhat lessened activity prevailed, noticeably in garment factories at Edmonton.

In Nova Scotia oil plants there was toward the end of the month some slackness, more especially at
MISCELLANEOUS. Dartmouth. At St. John the broom and brush industry was only slightly below normal, while brass and copper plants showed increased activity. The aluminum plants at Shawinigan Falls operated under slightly more favourable conditions, while the nickel plant at Deschenes remained practically shut down. The can factory at Montreal and plants manufacturing non-ferrous metal products were on the whole a little better than normal, while aluminum plants in Montreal exhibited no change and the carbide plant at Shawinigan Falls slightly decreased its staff. Musical instrument and electrical appliance firms in Montreal to some extent were operating under slightly less favourable conditions, but paint works were increasing their output in anticipation of building demands. The light, heat and power industry in Montreal expanded noticeably, but no change in this line occurred at Quebec. Tobacco and cigars on the

whole showed moderate increases, more especially in Montreal. Glass factories in Montreal showed marked improvement. In Ontario, the electrical appliances industry was rather less active than in the previous month, and musical instrument plants noticeably so. Electric power production at Hamilton and Toronto showed only minor changes; much the same situation prevailed in the case of tobacco and kodak factories. At Sarnia there were still further reductions in the staffs of oils firms, through of a minor nature only. Gas manufacturing and safety razor shops at Toronto also exhibited slight declines. At Welland the carbide plant and at Niagara Falls the cynamid factory were operating under slightly duller conditions. Aluminum plants at Toronto improved slightly, but the majority of brass and copper firms showed contractions in payrolls. The nickel industry at Copper Cliff expanded slightly, but silver plants at Toronto remained somewhat below normal. Glass factories improved noticeably during the month, and cement plants to a lesser degree. Electric power production in Manitoba showed minor contractions. In British Columbia there were slight increases in activity in this line, while oil plants at Ioco showed a small reduction in staff, as also the copper smelters at Anyox.

Construction

The value of building permits in 56 cities during April amounted to \$12,502,330, as compared with \$6,610,703 in March representing an increase of about 89 per cent. In May, the Canadian Pacific, Grand Trunk and Canadian National Railways reported an increase in the volume of employment afforded by railway construction, including maintenance of way, there being a net gain of about 5,900 persons reported. The Canadian Pacific showed the largest increase totalling about 4,700 persons, with the Canadian National figures at 1,100 and the Grand Trunk reporting a nominal increase only. There was some im-

provement in the general situation with respect to building operations, mainly through the commencement of contracts which had been deferred the previous month because of wage disputes or in anticipation of lower prices for materials. Supplementing this expansion was a considerable increase in the amount of work on highways. But in comparison with normal years the gain was slow. In the Maritime provinces, at Amherst, New Glasgow and Sydney, conditions were not favourable. At Halifax and Moncton, however, there was towards the end of the month a marked improvement in the building situation. Municipal work, mainly in paving and bridge construction as it affected large contracting firms, chiefly in Montreal, showed that on the whole there was a fair amount of improvement though conditions were still below normal. In Ontario, work upon contracts was slow in commencing and a similar analysis of large firms in Toronto, Hamilton, Ottawa and Windsor indicated only slight expansions in activity. In many cases industrial disputes retarded the usual increase in activity. Public highway work, as reported from Toronto, showed little change, the number of employees being still much below normal. The situation in Western Canada was very similar; improvement in the situation was very gradual and on a small scale.

Transportation

The gross earnings of the Canadian Pacific Railway in April were \$13,761,840, as compared with \$15,929,416 in the same month last year. The gross earnings of the Canadian National Railway in May were \$7,794,059, as compared with \$8,305,860 in May, 1920. During May the number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways in railway operations, including general offices, train and engine crews, station

employees, sleeping, parlor, and dining car employees, showed a small gain totaling about 800, nearly all due to additions to Canadian Pacific staffs. A nominal reduction in the staff of the Canadian National was offset by correspondingly small additions in the case of the Grand Trunk. Water transportation showed movements along the lines indicated in the previous month, mainly a further slackening of work in Maritime winter ports and the transferring of activity to St. Lawrence and upper lake ports. In the Maritime Provinces there was increasing activity in coastal shipment of coal. Longshore activities in this district fluctuated, several ports showing slightly increased activity towards the end of the month. At Quebec expansion proceeded steadily during the month, while stevedoring at Montreal maintained approximately the same level. Street railway transportation in Montreal and Quebec registered a slight expansion. In Ontario, activity at lake ports increased noticeably, but at many points was reported not as good as last year. In some localities railways were reducing staffs following the reopening of water transportation. Lake Superior ports reported navigation much duller than usual. Street railway transportation in Hamilton, London, Toronto and Ottawa showed slight gains over the previous month. In Manitoba electric railways decreased slightly the number of employees. In Alberta additional workers were taken on. On the Pacific coast no marked changes occurred in the volume of shipping. Electric railway transportation in Vancouver expanded slightly, but in Victoria lesser reductions occurred.

Trade

Throughout the Dominion both retail and wholesale trade improved slightly, in varying degrees according to locality, but no marked advances occurred.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

PROCEEDINGS FOR THE MONTH OF MAY, 1921

DURING the month of May the Department received four applications for the establishment of Boards of Conciliation and Investigation, and further appointments were made in connection with applications which had been received during previous months.

Applications Received

During the month of May applications for the establishment of Boards were received as follows:

(1) From the employees of the London Street Railway Company, being motormen, conductors, barnmen, trackmen and linemen, members of Division No. 741, Amalgamated Association of Street and Electric Railway Employees of America. A Board was established, Mr. J. M. Donahue, London, being appointed a member on the nomination of the employees concerned. The Board was not completed, however, as, through the mediation of an officer of the Department, who was in the locality, negotiations between the parties were renewed and an adjustment reached of matters in dispute.

(2) From the employees of the Ottawa Gas Company, being members of Federal Labour Union No. 16517, American Federation of Labour. A Board was established, Messrs. G. D. Kelley and Wm. Lodge, Ottawa, being appointed members on the nomination of the company and employees respectively. A chairman had not been named at the close of the month.

(3) From the employees of the Canadian Pacific Railway Company, Port McNicoll, Ont., being clerks, freight handlers, etc., members of Lodge No. 1506, International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. At the close of the month this dispute was receiving the attention of a

special officer of the Department in the locality, looking towards an adjustment without Board reference.

(4) From the freight handling staffs of the Canadian Pacific Railway and the Grand Trunk Railway (including the Canadian National Railways), Montreal Wharf. Through the mediation of an officer of the Department in the locality a settlement of this dispute was effected and the establishment of a Board rendered unnecessary.

Other proceedings under the Act

During the month of May other proceedings under the Act took place as follows:

(1) A Board was established in connection with the dispute between the Canadian National Railways and certain of its employees in the Stores Department, Fort Rouge, Winnipeg, being members of Victoria Lodge No. 1326, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The Board was composed as follows: Mr. R. W. Craig, K.C., Winnipeg, chairman, appointed on the joint recommendation of the other two members, Messrs. C. E. Dafoe and T. J. Murray, Winnipeg, nominees of the company and employees respectively.

(2) The Board established to deal with the dispute between the Niagara, St. Catharines and Toronto Railway Company and certain of its employees being members of Local Div. No. 846, Amalgamated Association of Street and Electric Railway Employees of America, was completed by the appointment of Mr. D. Dick, Jr., Welland, as chairman. Mr. Dick was appointed by the Minister in the absence of a recommendation from the other two members, Messrs. Geo. D. Kelley and Jos. Gibbons.

(3) A Board was established to deal with the dispute between the Toronto and York Radial Company and certain of its employees on the Metropolitan, Mimico and Scarboro Divisions, being linemen, wiremen, train despatchers, operators, etc., members of the Toronto Branch of the Canadian Electrical Trades Union, Mr. Louis Braithwaite, Toronto, being appointed a member on the recommendation of the employees concerned. The Board had not been completed at the close of the month.

(4) A change was made in the Board established to deal with the dispute between the Canada Steamship Company, operating on the Great Lakes of Canada, and its employees, being firemen, oilers, wheelmen, watchmen, deckhands, cooks, stewards, etc., members of the Sailors, Firemen and Cooks' Union of Canada. Mr. A. E. House, Midland, Ont., who had been appointed a member on the recommendation of the employees concerned, found it ne-

cessary to resign, and Mr. D. K. Kennedy, Midland, Ont., was nominated by the employees in his stead. In the absence of a recommendation from the employing company, Lt. Col. G. E. Burns, Montreal, was appointed a member of the Board by the Minister as representing the company. The chairman had not been named at the close of the month.

(5) A Board was established in connection with the dispute between the Algoma Eastern Railway, Sudbury, Ont., and certain of its employees, being members of Division No. 4, Railway Employees' Department, American Federation of Labour. The Board was composed as follows: Rev. Father Brennan, Espanola, Ont., chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Mr. Basil Campbell, appointed by the Minister in the absence of a recommendation from the company, and Mr. Fred Brancroft, Oakville, Ont., nominee of the employees concerned.

COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS

THE Cost of Living Commission appointed on January 21, 1919, to determine every three months the changes in the cost of living for coal miners on Vancouver Island, and to report the amount by which wage rates should therefore be increased or decreased, forwarded its report for the quarter ending March 31, 1921,* to the Department, on May 2, 1921. The Commission consisted of Mr. Matthew Gunness, replacing Mr. John McAllister, formerly representative of the miners; Mr. Tully Boyce, representing the operators; and Mr. D. T. Bulger, Fair Wages Officer of the Department of Labour, Chairman.

As in previous investigations, forms were sent out to the merchants and deal-

ers with whom the majority of miners are accustomed to trade in the various localities. The forms contained the same list of groceries, provisions, meats, etc., that was used on previous occasions. The method of computing the changes for the period under review was the same as used for previous adjustments, namely, to determine the percentage of increase or decrease, as the case may be, of prices of March 31 over December 31, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase, or decrease, as an equivalent to cover similar increases or decreases in clothing, etc. A decrease of 8.75 per cent was ascertained, which amounted to a decrease in wages of 26.14 cents per day where the base rate was \$3 per day, and 27½ cents per day where the base

*For previous orders see LABOUR GAZETTE, March, 1921, page 356, and various preceding issues.

rate was \$3.15, the decrease in wages to become effective May 1, 1921, and to apply to all underground service, clerical and office employees.

Retail price list returns were made by general merchants and seven retail dealers in meats in the towns of Nanaimo, Ladysmith, Cumberland, Courtenay, South Wellington, Union Bay, Bevan and Cassidy. Substantial decreases were noted in the prices of sugar, jams, mollasses and syrups, lard, ham, bacon and butter. Slight decreases in canned and evaporated vegetables, evaporated fruits, canned meats, soaps and all flours and meals other than Standard Patent Flour. Very slight advances were found in Standard Flour, cheese, pickle and vinegar. Slight advances were noted in fresh

beef and pork, but this was offset by slight decreases in mutton and veal.

Through an error in applying the proper amount for a reduction during the previous quarterly investigation the Commissioners found that an excess of four and three quarters ($4\frac{3}{4}$) cents per day was deducted from the day rate of the mine employees. To correct this error, the Commissioners recommended that an equivalent number of days at the rate of four and three quarters ($4\frac{3}{4}$) cents per day be granted this quarter to all mine employees corresponding to the number of days worked by each during the quarter ending March 31, 1921, the method and manner of said distribution of such amounts due the employees to be arranged between the companies and their employees in manner mutually satisfactory.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1921

THIRTY-FIVE strikes, involving 7,296 employees were reported as having commenced during May. There were in existence at some time or other during the month 45 strikes, involving approximately 8,238 employees. The total time loss on account of industrial disputes was estimated at 163,520 working days, as compared with 57,071 working days in April, 1921, and 159,072 in May, 1920. The time loss occasioned by the 35 strikes which began in May was 141,272 working days, while a loss of 22,248 working days is charged to the 10 strikes that commenced prior to May. Termination was reported in the case of four strikes which commenced prior to May. Fifteen strikes commenced during May terminated during the month, leaving the following 26 strikes, involving 6,709

workpeople, on record on May 31: Mill workers, Chipman, N.B.; mine, mill and tramline workers, Stewart, B.C.; bricklayers, Calgary; building trades, Hamilton, Moose Jaw and Ottawa; carpenters and painters, Sault Ste. Marie; plumbers, Windsor; stonecutters, Montreal; employees of steel and coal companies, Sydney; machinists, Orillia; pattern-makers, Brantford; upholsterers, Toronto; machine operators, Thorold; paper mill employees, Fort Frances; pulp and papermakers, Iroquois Falls, and Sault Ste. Marie, Espanola and Sturgeon Falls; printing trades, Vancouver; photo-engravers, Montreal and Ottawa; printers, St. Hyacinthe and Vernon, B.C.; printers, bookbinders and pressmen, Halifax and Hamilton, and leather workers at Toronto.

Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—The strike of coal miners in Cumberland County, N.S., which commenced on March 14, terminated on May 25. Work was resumed under the same conditions, practically, as prevailed prior to the strike, but on the understanding that if higher prices for coal were received, the men would benefit accordingly. Three hundred metalliferous miners at Stewart, B.C., struck on May 11 against a reduction in wages. The prevailing rate was \$6 to \$6.25 per day and the proposed reduction would decrease this rate to \$4.75 and \$5.50 per day. This strike remained un-terminated.

BUILDING AND CONSTRUCTION.—Seventeen strikes, involving 2,903 employees, with an estimated time loss of 59,387 working days, was the approximation for this group during the month. The strikes in this group, with few exceptions, were all in protest against wage reductions. Ottawa, Hamilton, Windsor and Moncton were particularly affected, as in these cities nearly all the building trades were out at some time or other during the month. The proposed reductions averaged about 10 cents per hour. In some cases, a refusal to increase wages was the cause of striking. In Ottawa about 1,400 employees were on strike involving the following trades: carpenters, painters and paperhangers, plumbers and steamfitters, plasterers, steam and operating engineers, bricklayers and masons, and labourers. In Hamilton, about 500 were reported as on strike, involving bricklayers and masons, plasterers and lathers, carpenters, tinsmiths and sheet metal workers, electrical workers and painters. The trades on strike at Windsor were car-

penters, tinsmiths, sheet metal workers and plumbers, totalling to about 400 employees.

METALS, MACHINERY AND CONVEYANCES.—The strike of yard employees at Sydney, which began on November 22, 1920, remained un-terminated. The latest strikes in this group were those of machinists in Orillia and Prince Rupert.

WOODWORKING. — Forty-eight woodworkers in Kincardine struck against an average wage reduction of 3¼ cents per hour. Work was resumed on May 30, some of the strikers being replaced by other workers and the wage schedule established at from 35 cents to 60 cents per hour.

PULP AND PAPER.—This group had the greatest time loss during the month. Six strikes, involving 3,647 employees with a time loss of about 69,709 working days occurred in these industries. A general action toward reduced wages as attempted, with few exceptions, by the employers, was the cause of the strikes. These proposed reductions as applied to Canadian mills entailed wage decreases of from 7 to 30 per cent. The district centering around Sault Ste. Marie had 2,000 employees on strike. Other centres on strike were: Iroquois Falls, 638 employees; Fort Frances, 229 employees; Hull, 250 employees, Kenogami and Jonquieres, Que., 430 employees.

PRINTING AND PUBLISHING.—Throughout Canada and the United States the printing trades launched a campaign for the 44-hour week. It resulted in general strikes in this industry. In Canada, during the month, there were 10 strikes, involving 887 employees and an approximate time loss of 19,619 working days. In some Canadian centres, there were other contributory causes, but in the main, the 44-hour week was the chief cause.

STRIKES AND LOCKOUTS DURING MAY, 1921

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
Strikes commencing prior to May, 1921			
LUMBERING:—			
Mill Workers, Chipman, N.B.	Commenced March 14. In protest against a longer working day and a reduction in wages. Unterminated.	56	1,400
MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.:—			
Coalminers, Cumberland County, N.S.	Commenced March 14. To enforce the Montreal agreement regarding wages. Settled by negotiations; work resumed May 5.	50	950
BUILDING AND CONSTRUCTION:—			
Carpenters, Sydney, N.S.	Commenced April 15. Against a reduction in wages. Settled by negotiations; work resumed May 14.	68	748
METALS, MACHINERY AND CONVEYANCES:—			
Employees of steel and coal companies, Sydney, N.S.	Commenced November 22. For increased wages and improved working conditions. Unterminated.	150	3,750
Patternmakers, Brantford, Ont.	Commenced February 21. Against a reduction in wages. Unterminated.	9	225
WOODWORKING:—			
Upholsterers, Toronto, Ont.	Commenced January 24. Against increased hours and a reduction in wages. Unterminated.	8	200
Woodworkers, upholsterers and finishers, Kincardine, Ont.	Commenced April 25. Against a reduction in wages. Partly settled by replacement of strikers; work resumed May 30.	50	1,200
PULP AND PAPER:—			
Machine operators, Thorold, Ont.	Commenced February 8. Against a reduction in wages, and for union recognition. Unterminated.	100	2,500
Papermakers, Kenogami and Jonquiere, Que.	Commenced April 19. Against a reduction in wages. Work resumed May 31.	430	10,750
PRINTING AND PUBLISHING:—			
Pressmen, London, Ont.	Commenced April 20. In protest against discharge of employee. Information received indicates conditions no longer affected.		
LEATHER:—			
Shoe workers, Toronto, Ont.	Commenced April 26. Against a reduction in wages. Unterminated.	21	525
Strikes commencing during May, 1921			
MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.:—			
Mine, mill and tramline workers, Stewart, B.C.	Commenced May 11. Against a reduction in wages. Unterminated.	300	5,400
RAILWAY, CANAL AND HARBOUR CONSTRUCTION:—			
Structural steel erectors, Saskatoon, Sask.	Commenced May 2. Against a reduction in wages. Settled by arbitration of Council of Industry, Winnipeg. Work resumed May 11.	25	200

STRIKES AND LOCKOUTS DURING MAY, 1921.—*Continued.*

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
BUILDING AND CONSTRUCTION:—			
Bricklayers, Calgary, Alta.	Commenced May 16. In protest against discrimination of union member. Terminated.	25	350
Building trades, Hamilton, Ont.	Commenced May 2. Against a reduction in wages. Terminated..	503	12,575
Building trades, Moncton, N.B.	Commenced May 3. Against a reduction in wages. Settled by negotiations; work resumed May 10.	165	990
Building trades, Moose Jaw, Sask.	Commenced May 9. Against a reduction in wages. Terminated..	12	240
Building trades, Ottawa, Ont.	Commenced May 2. Against a reduction in wages. Terminated..	1,400	35,000
Carpenters, Sault Ste. Marie, Ont.	Commenced May 9. Against a reduction in wages. Terminated..	8	160
Ironworkers, (ornamental), Winnipeg, Man.	Commenced May 2. Against a reduction in wages. Settled by arbitration; work resumed May 11.	84	672
Painters, Sault Ste. Marie, Ont.	Commenced May 2. Against a reduction in wages. Terminated..	15	375
Painters and paperhangers, Regina, Sask.	Commenced May 14. Against a reduction in wages. Settled by negotiations; work resumed May 31.	27	378
Plasterers, Regina, Sask.	Commenced May 16. Against a reduction in wages. Settled by negotiations; work resumed May 20.	22	110
Plumbers, Belleville, Ont.	Commenced May 2. For increased wages, closed shop and recognition of the union. Settled by negotiations; work resumed May 11.	11	88
Plumbers and steamfitters, Welland, Ont.	Commenced May 5. Against a reduction in wages. Settled by negotiations; work resumed May 12.	6	33
Plumbers, tinsmiths, sheet metal workers and carpenters, Windsor, Ont.	Commenced May 2. Against a reduction in wages. Plumbers' strike unterninated.	392	4,448.
Stonecutters, Montreal, Que.	Commenced May 2. For increased wages. Terminated.	82	2,050
Stonecutters, Winnipeg, Man.	Commenced May 14. Against a reduction in wages. Settled by negotiations; work resumed May 31.	68	952
Structural iron workers, Banff, Alta.	Commenced May 3. Against a reduction in wages. Settled by mediation of Joint Council of Industry, Winnipeg. Work resumed May 20.	15	218
METALS, MACHINERY AND CONVEYANCES:—			
Machinists, Orillia, Ont.	Commenced May 9. Employees objected to being taken off their own work and having to divide up on other work. Terminated.	22	440
Machinists, Prince Rupert, B.C.	Commenced May 10. Against reduction in wages. Settled by negotiations; work resumed May 17.	20	110
PULP AND PAPER:—			
Paper mill employees, Fort Frances, Ont.	Commenced May 2. Against a reduction in wages. Terminated.	229	5,725
Papermakers, Hull, Que.	Commenced May 2. Against a reduction in wages. Settled by negotiations; work resumed May 17.	250	3,250
Pulp and papermakers, Iroquois Falls, Ont.	Commenced May 11. Against a reduction in wages. Terminated.	638	11,484

STRIKES AND LOCKOUTS DURING MAY, 1921.—*Continued.*

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
PULP AND PAPER—Continued.			
Pulp and paper workers, Sault Ste. Marie, Espanola and Sturgeon Falls, Ont.	Commenced May 11. Against a reduction in wages. Unterminated.	2,000	36,000
PRINTING AND PUBLISHING:—			
Compositors, etc., Vancouver, B.C.....	Commenced May 2. For increased wages and 44-hour week. Unterminated.	250	6,250
Photo-engravers, Montreal, Que.....	Commenced May 2. For shorter hours. Unterminated.....	100	2,500
Photo-engravers, Ottawa, Ont.....	Commenced May 2. Against a reduction in wages. Unterminated..	25	625
Printers, Peterborough, Ont.....	Commenced May 2. For increased wages and shorter hours. Settled by negotiations; work resumed May 16.	31	372
Printers, Regina, Sask.....	Commenced May 5. Against a reduction in wages. Settled by negotiations; work resumed May 12.	81	486
Printers, St. Hyacinthe, Que.....	Commenced May 2. For increased wages. Unterminated.....	10	140
Printers, Vernon, B.C.....	Commenced May 2. For shorter hours. Unterminated.....	12	300
Printers, bookbinders, pressmen, etc., Halifax, N.S.	Commenced May 2. For shorter hours. Unterminated.....	42	1,050
Printers, bookbinders and pressmen, Victoria, B.C.	Commenced May 2. For shorter hours. Settled by negotiations; work resumed May 14.	36	396
Typesetters, pressmen and bookbinders, Hamilton, Ont.	Commenced May 2. Alleged violation of agreement by employers. Unterminated.	300	7,500
TRANSPORTATION:—			
Coal drivers, Ottawa, Ont.....	Commenced May 7. Demanding wage scale of 1920 as well as Saturday afternoons off with full pay during May, June, July and August. Settled by negotiations; work resumed May 13.	90	405

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING APRIL, 1921

THE following details with regard to strikes and lockouts in the United Kingdom during April, 1921, based on returns from employers and workpeople, are taken from the May issue of the *British Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.—The number of trade disputes, involving a stoppage of work, reported to the Department as beginning in

April, was 44, as compared with 42 in the previous month and 134 in April, 1920. By far the most important of these disputes was that involving about 1,150,000 coal miners throughout Great Britain, which began on April 1, and was still in progress at the end of the month. In the 43 other disputes beginning during April, about 10,000 workpeople were directly involved and about

1,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition to the numbers involved in new disputes, over 15,000* workpeople were involved, either directly or indirectly, in 54 disputes which began before April and were still in progress at the beginning of that month. The total number of disputes in progress in April was thus 98, involving nearly 1,200,000 workpeople, and resulting in a loss, during April, of over 23,000,000 days.

CAUSES.—Apart from the coal mining dispute, 26 of the 43 new disputes, directly involving about 7,000 workpeople, arose out of proposed reductions in wages; 7, directly involving nearly 2,000 workpeople, on other wages questions; and 10, directly involving over 1,000 workpeople, on other questions.

RESULTS.—During April settlements were effected in the case of 17 new disputes, directly involving about 3,000 workpeople, and 18 old disputes, directly involving about 4,000 workpeople. Of these disputes, 2, directly involving nearly 1,000 workpeople, were settled in favour of the workpeople; 14, directly

involving about 1,000 workpeople, in favour of the employers; and 19, directly involving over 5,000 workpeople, were compromised. In the case of 7 disputes, directly involving over 2,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in progress in April.	Aggregate duration in working days of all disputes in progress in April.
	Started before April 1.	Started in April.	Total.		
Building.....	12	4	16	4,000	59,000
Mining and Quarrying.....	6	4	10	1,154,000	23,060,000
Metal, Engineering and Shipbuilding.....	10	9	19	5,000*	100,000
Woodworking and Furnishing.....	6	3	9	4,000	34,000
Other Trades.....	20	24	44	9,000	139,000
Total, April, 1921...	54	44	98	1,176,000	23,392,000
Total, March, 1921..	63	42	105	31,000*	469,000
Total, April, 1920...	84	134	218	140,000	880,000

*Considerable numbers of other workers are reported to have been rendered idle as a result of the strike of ship joiners, but the information at present available is insufficient to enable a trustworthy estimate of the total number to be made.

THE BRITISH COAL STRIKE

IN the LABOUR GAZETTE for May (pages 677 and 678) there was a review of the negotiations carried on throughout April in connection with the coal strike in Great Britain. During May, various suggestions for a solution of the problem were made by owners and others, but no settlement was reached.

On May 7, a new development occurred when a manifesto was issued by the Transport Workers' Federation and the National Union of Railwaymen. This manifesto announced that the dockers had been instructed not to handle imported coal and that the railwaymen

were not to move such coal if it was loaded by non-union labour. The trouble arose over the refusal of the dockers at Glasgow to handle a cargo of Welsh coal shipped from Cardiff to the Caledonian Railway. It was reported to have been mined before the strike under a contract signed before the strike. This coal was loaded by volunteer labour, but, when an attempt was made to forward it by rail, the signalmen refused to work the signals. It was claimed that by this action the signal men were acting contrary to the orders of their own union since the National Union of Railwaymen

had adopted a resolution to handle all coal intended for public utilities. However, this situation did not develop into strike action, for, at its executive meeting on May 14, the National Union of Railwaymen did nothing more than re-affirm its embargo on imported coal. The instructions of the National Union of Railwaymen and Transport Workers' executives were obeyed apparently only in such districts as approved of them, and where this occurred the Government seemed to have no difficulty in securing volunteer labour to handle and move foreign coal. On May 31, at a joint conference of the National Union of Railwaymen and the Transport Workers' Federation it was decided to remove the embargo on imported coal.

Meanwhile, unofficial conferences among coal owners, miners and Government representatives continued. Finally, after nearly a month had elapsed since the last formal definite negotiations, Mr. Lloyd George invited the coal owners and miners to a conference on May 27. In opening this conference, the Prime Minister repeated the Government's offer to grant £10,000,000 to help the coal industry over the period during which a permanent settlement would be negotiated. He strongly urged both sides that if they could not see an immediate prospect of agreeing as to figures, they should "agree as to the machinery for determining the figures." Proposals for a temporary settlement leading to a permanent agreement were handed by him to both parties. These proposals provided for a gradual scaling down of wages until they reach an economic level which the industry is capable of sustain-

ing, based on the grant of £10,000,000 from the National Treasury, and surrender by the owners of the standard profits for three months in the districts where Government assistance is required. The Government grant, however, will not be given until arrangements for continuing the agreement have been arrived at between the contending parties. As regards the permanent scheme, it was declared in the proposals that the controversy be settled by one of the three following methods:

- (1) That a National Wage Board should be set up, composed of equal numbers of representatives of the coal owners and miners, over which a neutral chairman with a casting vote should preside.
- (2) That a Tribunal of three persons should be established to decide the matters at issue.
- (3) That the questions in dispute should be referred to a single arbitrator.

The decision of the body or person selected should be binding upon both parties for a period of 12 months and thereafter subject to three months' notice upon either side.

The determining body shall decide:

The wage to be paid at the end of the temporary period.

In arriving at the decision upon this question regard should be had to:

- (1) The capacity of the industry in each district to pay.
- (2) The provision of a subsistence wage to the lowest paid worker.
- (3) The possibilities of increasing output.

The amount of the minimum standard wage in each district.

The proportion of profit to wages in the distribution of the proceeds of the industry.

The determining body must report within two months.

At the end of the month the owners and miners' executive were considering these proposals and the methods of permanent settlement.

DRAFT CONVENTIONS AND RECOMMENDATIONS OF FIRST AND SECOND INTERNATIONAL LABOUR CONFERENCES BROUGHT BEFORE CANADIAN PARLIAMENT

THE Draft Conventions and Recommendations of the League of Nations International Labour Conference which was held in Washington, D.C., from October 29 to November 29, 1919,* and of the International Labour Conference which was held at Genoa, Italy, from June 15 to July 10, 1920,† were brought before the Dominion Parliament by the Minister of Justice on May 28. At the same time the Minister of Justice submitted a statement on behalf of the Government concerning these Draft Conventions and Recommendations in the terms following:—

“During the period which has elapsed since the conclusion of the Treaties of Peace two annual Conferences have been held of the International Labour Organization which was formed by the member states of the League of Nations under the authority of Part XIII of the Treaties of Peace. The first Conference was held in Washington, D.C., in October-November, 1919, and the second Conference in Genoa, Italy, in June-July, 1920. At the Washington Conference six Draft Conventions and six Recommendations were adopted and were afterwards referred by the Secretary-General of the League of Nations to the member states for acceptance or otherwise. The Genoa Conference, which was devoted entirely to matters affecting seamen, resulted in the adoption of three Draft Conventions and four Recommendations, which were also duly transmitted through the League of Nations to the Canadian Government and to the other governments concerned.

“Following is a list of the Draft Conventions and Recommendations of the Washington Conference:—

1. Draft Convention limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week.

Draft Convention concerning unemployment.

Draft Convention concerning the employment of women before and after childbirth.

2. Draft Convention concerning employment of women during the night.

3. Draft Convention fixing the minimum age for admission of children to industrial employment.

Draft Convention concerning the night work of young persons employed in industry.

Recommendation concerning unemployment.

Recommendation concerning reciprocity of treatment of foreign workers.

Recommendation concerning the prevention of anthrax.

Recommendation concerning the protection of women and children against lead poisoning.

Recommendation concerning the establishment of Government Health Services.

Recommendation concerning the application of the Berne Convention of 1906, on the prohibition of the use of white phosphorus in the manufacture of matches.

“Following is a list of the Draft Conventions and Recommendations of the Genoa Conference:—

Draft Convention fixing the minimum age for admission of children to employment at sea.

Draft Convention concerning unemployment indemnity in case of loss or foundering of the ship.

*See LABOUR GAZETTE, December, 1919, p. 1425.

†See LABOUR GAZETTE, October, 1920, p. 1316.

Draft Convention for establishing facilities for finding employment for season.

Recommendation concerning the limitation of hours of work in the fishing industry.

Recommendation concerning the the limitation of hours of work in inland navigation.

Recommendation concerning the establishment of national seamen's codes.

Recommendation concerning unemployment insurance for seamen.

"In connection with the above mentioned Draft Conventions and Recommendations, it is required by paragraph five of section 405 of the Treaties of Peace that each of the member states of the International Labour Organization shall, within a period of one year from the closing of the session of the Conference, or under exceptional circumstances, 'at the earliest practicable moment, and in no case later than eighteen months from the closing of the session of the Conference, bring the Recommendation or Draft Convention before the authority or authorities within whose competence the matter lies, for the enactment of legislation or other action.'

"Of the six Draft Conventions adopted by the Washington Conference, five have been found to fall within provincial authority, and the obligation of the Government of Canada under paragraph five of section 405, above mentioned, has already been fulfilled by the reference of these respective Conventions to the provincial authorities*. The five Draft Conventions in question are as follows:—

(1) Limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week.

(2) Concerning employment of women before and after childbirth.

(3) Concerning employment of women during the night.

(4) Fixing the minimum age for admission of children to industrial employment.

(5) Concerning the night work of young persons employed in industry.

"In the opinion of the Minister of Justice, the proposals of these five Draft Conventions 'involve legislation which is competent to Parliament in so far as Dominion works and undertakings are affected.'

"Four of these five Draft Conventions deal with the employment of women and children in industry, and may be considered as having little reference to Dominion works and undertakings. The Draft Convention limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week is of more importance on account of the various classes of works and undertakings in which the Dominion Government is engaged, including those in which government employees take part and others which are being executed under contract. This Draft Convention is at present receiving the attention of the Government and the subject will be made one of further investigation in the interval between this and the next session of Parliament.

"The Draft Convention of the Washington Conference concerning Unemployment is regarded as falling within federal jurisdiction. The principal object of this Convention is the establishment of a national system of employment agencies under the control of a central authority. The provisions of the Employment Offices Co-ordination Act, chapter 21, Statutes of Canada, 1918, may be largely utilized for the purpose of carrying out the proposals of this Draft Convention except with respect to a section of the Convention referring to Unemployment Insurance, which, at the present time, has no application to Canada.

"With respect to the six Recommendations of the Washington Conference, the Minister of Justice has advised that four of these deal with subjects within the competence of the Dominion Parliament and that the fifth, namely, the Recommendation concerning the protection of women and chil-

*See LABOUR GAZETTE, November, 1920, p. 1491.

dren against poisoning, involves legislation which the provincial legislatures have power to enact and apply generally (except in respect of Dominion works and undertakings), whilst the sixth Recommendation, namely, that concerning Unemployment, contains four proposals, three of which are within federal authority, and the fourth competent to the provincial legislatures alone. The four Recommendations which are deemed to be within federal authority deal respectively with the following subjects:—

Recommendation concerning the reciprocity of treatment of foreign workers.

Recommendation concerning the prevention of anthrax.

Recommendation concerning the establishment of Health services.

Recommendation concerning the application of the Berne Convention of 1906 on the prohibition of the use of white phosphorus in the manufacture of matches.

“By reference to the text of the Recommendation concerning reciprocity of treatment of foreign workers, it will be observed that the execution of the same involves agreements between the countries concerned. No agreement has yet been made by Canada with any foreign country on this subject and it would appear that the obligations of Canada under the Treaties of Peace would be fulfilled for the present if the Recommendation were brought before Parliament and laid on the table of the House.

“The Recommendation concerning the prevention of anthrax and the Recommendation concerning the establishment of Health Services have both been and are receiving attention in the Department of Health. The subject of anthrax is also to receive attention at the next meeting of the International Labour Conference, which is to be held in Geneva in the month of October next.

“With respect to the Recommendation concerning the application of the Berne Convention 1906 on the Prohibition of the use of white phosphorus

in the manufacture of matches, the Parliament of Canada has already legislated on this subject in 1914, and Canada has since adhered to the Berne Convention.

“With respect to the Recommendation concerning Unemployment, Article 2 thereof regarding the recruiting of bodies of workers in other countries and consultation with employers and workers in each country in the industries concerned, the whole subject of Immigration is at present engaging the attention of a special commission of the International Labour Conference, which is to report next fall. The Canadian Government is represented on this commission, and it is felt that the decision of Canada on the Recommendation concerning Unemployment should await the completion of the work of the Immigration Commission. With respect to paragraph three of this Recommendation, which proposes the establishment of Unemployment Insurance, either through a government system or through a system of government subventions to associations whose rules provide for the payment of benefits to their unemployed members, the subject of Unemployment Insurance is at present being studied in the Department of Labour and it is intended to give further consideration to this subject in the interval before the next session of Parliament.

“The Draft Conventions adopted by the Seamen’s Conference at Genoa last summer were three in number relating respectively to (1) the establishment of facilities for finding employment for seamen; (2) fixing a minimum age of of fourteen for the admission of children to employment at sea; and (3) concerning unemployment indemnity in case of loss or foundering of ships. There were also four Recommendations adopted relating respectively to (1) the limiting of hours of work in inland navigation; (2) the limiting of hours of work in the fishing industry; (3) unemployment insurance for seamen; and (4) the establishment of national seamen’s codes.

“The Deputy Minister of Justice has advised that the proposals contained

in the Recommendation concerning the limitation of hours of work in the fishing industry fall within provincial jurisdiction and copies of his opinion have been transmitted to the provincial governments. The Deputy Minister of Justice holds with respect to the other three Recommendations and to the three Draft Conventions of the Genoa Conference that the proposals therein contained are within federal jurisdiction. The proposals referred to have received attention in the Department of Marine, and it is evident that if the same are to be adopted certain amendments will be required in the Canada Shipping Act. A comprehensive revision of the Canada Shipping Act has been in contemplation for some time past, and it is proposed that the points raised in the Draft Conventions and Recommendations of the Genoa Conference shall receive attention in connection therewith between this and the next session of Parliament.

"Under the terms of the Treaties of Peace no obligation rests upon the member states of the International Labour Organization to ratify the individual Conventions and Recommendations which may be adopted at the annual Conferences; but whilst we are not bound in this country to ratify any decisions that are not regarded as being in the public interest, it is nevertheless intended by the Government that each of these proposals shall be considered on its merits and with due regard to all of the interests affected. Canada is a party to the Treaties of Peace which brought the International Labour Organization into existence. The Government, the employers and workers of Canada have each been respectively represented at the two Conferences which have already taken place, and it is intended that we shall take our further part in the working out of the high purposes of social justice and humane conditions of labour for which the Organization was founded.

"The Draft Conventions and Recommendations in question are hereby being brought before Parliament in accordance with the requirements of paragraph five

of article 405 of the Treaties of Peace, and the texts of the Draft Conventions and Recommendations are themselves being laid on the table of the House."

The opinion of the Deputy Minister of Justice with reference to federal and provincial jurisdiction respecting the matters dealt with in the recommendations of the Genoa Conference is given in the following letters:—

DEPARTMENT OF JUSTICE, CANADA,

Ottawa, March 3, 1921.

Sir:—

Referring to your letter of the 28th January last, enclosing copies of the draft conventions and recommendations which were adopted by the International Labour Conference during its second meeting held in Genoa, Italy, from the 15th June to 10th July, 1920, and were lately received by the Government pursuant to the provisions of Article 405 of the Labour Part of the Treaty of Versailles and to the analogous provisions of the Treaty of St. Germain, from the Secretary-General of the League of Nations, I have had under consideration the questions submitted as to whether the proposals of these conventions and recommendations are to be regarded as within Dominion or Provincial competence, and also as to the procedure which the Government should follow in order to carry out its engagements as respects these draft conventions and recommendations under the provisions of the said Treaties. I propose to deal with the several draft conventions and recommendations in the order in which they appear in the official report.

1. *Recommendation concerning the limitation of hours of work in the fishing industry.*

My letter to you of the 17th February last (our registry file 2585-20) deals specifically with this recommendation.

2. *Recommendation concerning the limitation of hours of work in inland navigation.*

This recommendation is divided into five parts; which may be conveniently referred to as "proposals".

As to the 1st: I think the enactment of legislation to give effect to this proposal is within the exclusive authority of the Dominion.

As to the 2nd: This proposal, in relation to Canada, involves the necessity of entering into a convention with the United States for the attainment of the objects pointed to, and I am of the opinion that the Dominion alone is competent to carry out this part of the recommendation. Adequate legislative authority to provide for the performance of the obligations of Canada under such a convention is conferred upon the Parliament of Canada by sec. 132 of the British North America Act, 1867.

As to the 3rd: This proposal simply indicates the general lines of policy which the legislation referred to in the first proposal, and the inter-

national conventions referred to in the second proposal, should follow or embody.

As to the 4th: The question of what is inland navigation, as distinguished from maritime navigation, is one to be determined by the Dominion alone in connection with the legislation required to give effect to the proposals of this recommendation, and by the Dominion in conjunction with the United States in connection with the proposed international convention to limit the hours of work of persons employed in inland navigation or international waterways.

As to the 5th: The report referred to in this part of the recommendation should, of course be made by the Dominion Government.

3. Recommendation concerning the establishment of National Seamen's Codes.

The desideratum of this recommendation is that each member of the International Labour Organization shall undertake "the embodiment in a seamen's code of all its laws and regulations relating to seamen in their activities as such." I have assumed, though the recommendation is not explicit upon the point, that the word "seamen" as used in this definition refers to persons engaged in maritime navigation, and if this be a proper assumption, I think the Dominion alone is the competent authority to give effect to this recommendation. Its legislative powers in that behalf may be referred to several of the classes of subjects enumerated in sec. 91 of the British North America Act, 1867. Most of our legislation affecting seamen in their activities as such is to be found in the Canada Shipping Act, R.S.C. chap. 113, and its amendments, and the Merchants Shipping Act, 1894, as amended, but there are also some provisions touching seamen in the Criminal Code and in the Immigration Act, chap. 27 of the Statutes of Canada, 1910, as amended by chap. 12, 1911, and chap. 25, 1919, and may be also in some other statutes of Canada. It would seem to be necessary in order to carry out this recommendation, to consolidate these different provisions, or at all events such of them as are within the legislative authority of the Parliament of Canada, in one statute.

I am of the opinion that the proposals of (4), the draft convention fixing the minimum age of admission of children to employment at sea, (5) recommendation concerning unemployment insurance for seamen, and (6) draft convention concerning unemployment indemnity in case of loss or foundering of the ship, involve legislation which is competent to the Parliament of Canada in virtue of its exclusive legislative authority in relation to "navigation and shipping" (sec. 91 (10)). I must add, however, in regard to the draft recommendation concerning unemployment insurance for seamen, that the granting of Government subventions to industrial organizations whose rules provide for the payment of benefits to their unemployed members, as an alternative method of carrying out this recommendation, involves no question of constitutional jurisdiction, and is therefore as competent to the Provinces as it is to the Dominion.

7. Draft Convention for establishing facilities for finding employment for seamen.

The legislation now on the statute books enables the Dominion, in so far as legislation for the purpose is required, to implement all the proposals of this convention.

The proposals of Articles 2 and 3 are fully answered by the provisions of sections 137, 138 and 139 of the Canada Shipping Act read in conjunction with sec. 322 and sections 248, 249 and 251 of the same Act, which, in effect, prohibit any person, other than a shipping master or deputy shipping master, from hiring, engaging, supplying or providing seamen to be entered on board any ship (other than certain excepted classes of ships) and prescribe appropriate penalties for any breach of the statutory prohibition. These provisions have been in force for many years, so that the question of licensing private agencies carrying on the work of finding employment for seamen as a commercial enterprise for pecuniary gain pending the adoption of measures for the abolition of such agencies does not arise. The existing Dominion-Provincial employment service which has been co-ordinated on a national basis, under the provisions of the Employment Offices Co-ordination Act, chap. 21 of the Statutes of 1918, as amended by chap. 25 of the Statutes of 1920, and the regulations made thereunder, may be utilized to give full effect to the proposals of Articles 4, 5 and 8 of the conventions with respect to the establishment of public facilities for finding employment for seamen, but subject, of course, to the provisions of the Canada Shipping Act, by which authority to hire, engage, supply or provide seamen, is confined to the shipping masters and their deputies. The two services may be adequately articulated for the purpose of carrying out these proposals by regulations made under the authority of the Employment Offices Co-ordination Act, and departmental instructions to shipping masters and their deputies.

The principles set forth under Articles 6 and 7 of the convention may be realized by means of departmental instructions to shipping masters and their deputies.

Article 9 of this convention contemplates that each country shall decide for itself whether provisions similar to those in this convention shall be put in force for deck-officers and engineer-officers. This, of course, is a question of policy for the determination of the Dominion Government. Some legislation would doubtless be necessary in order to apply similar provisions to such officers.

Finally, as to Article 10, the Dominion Government is the proper authority to communicate to the International Labour Office all available information, statistical or otherwise, concerning unemployment among seamen, and concerning the work of its seamen's employment agencies.

With respect to the procedure in the case of the conventions and recommendations which are within the provincial sphere, I think the procedure adopted in connection with the draft conventions and recommendations of the International Labour Conference which was held at Washington in 1919, should be followed, namely,

the view of the Dominion Government on the question of constitutional competence should be embodied, upon the report of the Minister of Justice, in the form of an Order-in-Council and a duly certified copy of the order transmitted, with accompanying copies of such draft conventions and recommendations, through the Secretary of State for Canada, to the different lieutenant-governors for the consideration of their respective governments with a view to such legislative action in line with the proposals of such conventions and recommendations as each Government may be advised to take.

I have the honour to be,
Sir,
Your obedient servant,
(Sgd.) E. L. NEWCOMBE,
Deputy Minister of Justice.

The Deputy Minister,
Department of Marine
and Fisheries,
Ottawa.

DEPARTMENT OF JUSTICE,
Ottawa, February 17th, 1921.

Sir:—

Referring to your letter of the 14th December, last, submitting a copy of the draft recommendation of the International Labour Conference,

held at Genoa last summer, proposing that each member of the International Labour Organization should enact legislation limiting the hours of work of all workers employed in the fishing industry, with such special provisions as may be necessary to meet the conditions peculiar to the fishing industry in each country, with a request for my opinion as to whether the proposed legislation comes within the sphere of the legislative authority of the Dominion or of the Provinces, I have the honour to state that, in my opinion, the draft recommendation involves legislation which it is competent for the Provinces to enact and apply generally and comprehensively, with relation to the inland fisheries, and in the case of the deep sea fisheries, subject to this limitation, that an obligation to observe the statutory regulations outside provincial territorial limits may be imposed upon employers and employees who are British subjects residing within the provincial jurisdiction whilst absent without an intention not to return, but not upon other persons.

I have the honour to be,
Sir,
Your obedient servant,
(Sgd.) E. L. NEWCOMBE,
Deputy Minister of Justice.

E. Hawken, Esq.,
Acting Deputy Minister,
Department of Marine and Fisheries,
Ottawa, Ont.

RECENT LABOUR LAWS OF ONTARIO, ALBERTA AND BRITISH COLUMBIA

THE present article is a summary of the various laws bearing directly or indirectly on labour matters which have been recently enacted by the provincial legislatures of Ontario, Alberta and British Columbia. Legislation recently enacted in the provinces of New Brunswick, Quebec and Saskatchewan was summarized in the May issue of the LABOUR GAZETTE.

Ontario

The Ontario Legislature was in session from January 25 to May 3, 1921, and passed a number of laws of interest to industrial workers including new acts relating to firemen and to prison labour and amendments to existing legislation

regarding factories, minimum wages, employment offices, mothers' pensions, etc.

The Fire Departments Two-Platoon Act provides for the adoption of the two-platoon system by permanent fire departments in cities having a population of 10,000 or over. Two systems of work are given in the Act either of which may be followed. According to the first a platoon may be twenty-four consecutive hours on duty and the following twenty-four consecutive hours off duty. The second plan gives one platoon ten consecutive hours day work while the other platoon takes the remaining fourteen hours night work, the two platoons changing every seven days from day to night duty. No deductions from holidays or salaries may be made by reason

of the application of the Act to any municipality.

The Extramural Employment of Sentenced Persons Act provides that the Lieutenant-Governor in Council may authorize the employment of prisoners outside the gaol limits.

The Factory, Shop and Office Building Act was amended in several respects. The minimum age for the employment of children in shops is raised from twelve to fourteen years except in cases where members of an employer's own family work in a shop attached to the house in which they live. The factory inspector is charged with the duty of reporting to the Minimum Wage Board any violation of that section of the Minimum Wage Act which directs that notices of the orders of the Board be posted in the establishments concerned. The inspector may also direct the provision of seats for female employees where he considers that the work or any portion of it can be efficiently performed while such employees are seated. Finally a clause is added which states that nothing in the Factory, Shop and Office Building Act shall be deemed to authorize or excuse the employment of any child, youth, young girl or woman contrary to the provisions of the Adolescent School Attendance Act.

An amendment to the Trades and Labour Branch Act authorizes the Lieutenant-Governor in Council to make regulations for the establishment of a Provincial Employment Service Council and local Employment Service Councils. Provision may also be made by regulation for advancing the amount of their travelling expenses to the place of employment to persons who have procured such employment through the Ontario Government Employment Bureaus. Advances may only be made, however, on condition that the employer agrees to reimburse the agency.

The scope of the Stationary and Hoisting Engineers Act was widened to include gas plants, all steam plants of over twenty-five horse-power, hoists in quarries and steam boilers working at a pressure of twenty pounds or over

which are used for portable or industrial work. The provision which required candidates for examination who are not British subjects to have completed one year's residence in Canada is replaced by a clause requiring such candidates to have made application for naturalization and to have the proper residence qualifications for becoming Canadian citizens. The section which permitted an uncertificated person to take charge of a steam plant for thirty days in cases of emergency is replaced by a new one which provides that any person may perform the duties of an engineer for a period not exceeding fourteen days in case the engineer has absented himself without having given seven days' notice.

The Minimum Wage Act was amended to extend the powers of the Board, permitting it, upon petition of employers or employees, or of its own motion, to vary or suspend any of its orders or to revise them in accordance with special or changed conditions in any industry or establishment, and also to make different orders for the same industry or industries in different localities in the Province when differing conditions justify such action.

A number of changes were made in the Mothers' Allowances Act, its benefits being now extended to a mother of two or more children under 14 years of age, whose husband has deserted her and has not been heard of for five years, and to a mother whose husband is an inmate of any asylum for the insane in Canada. A mother with only one child under fourteen years of age may receive an allowance under the Act, as amended, if she has a permanently disabled husband or an invalid child over fourteen years of age residing with her. A foster mother of two or more orphan children may also receive assistance. The Commission is authorized to deal with special cases and to enter into reciprocal arrangements with the other provinces with regard to the payment of allowances. Another clause of the amending Act provides that the age limit for children towards whose support allowances are paid shall be raised from 14 to 16 years

on the coming into force of the Adolescent School Attendance Act or any part thereof. Section 3 of this Act which comes into force on September 1, 1921 compels attendance at school until the age of 16 years.

Alberta

The Legislature of Alberta which met on February 15th and was prorogued on April 19th, 1921, passed laws dealing with workmen's compensation, regulation of factories, and pensions for provincial police.

The amendment to the Workmen's Compensation Act which comes into force on July 1st, 1921, makes many changes in the scale of compensation. Where permanent total disability results from the injury a weekly payment equal to fifty-five per cent of the average weekly earnings of the workman during the twelve months previous to the injury replaces the flat rate of \$10 per week. Temporary total disability is for the period of its duration compensable at the same rate. In cases of permanent partial disability the weekly payment is fifty-five per cent of the difference between the average weekly earnings of the workman before and after the accident, but the board may, at its discretion, substitute a lump sum for the weekly payments when the impairment of earning capacity does not exceed ten per cent. In no other case may commutation of the periodical payments be made except on application of, and by agreement with, the beneficiary. The allowance to a widow or invalid widower is raised from \$30 to \$35 per month, while that payable to children who are the sole dependants is fixed at \$12.50 per month for each child under 16 years of age instead of \$10 with a maximum amount of \$50 instead of \$40 as formerly. Where the only dependants are persons other than those above mentioned they may receive a sum proportionate to the pecuniary loss which they have sustained, but not exceeding \$30 per month to a parent or parents, or \$65 in all. A new clause provides that where the work-

man leaves no widow, or the widow subsequently dies, a sister, aunt or foster mother who takes charge of the household may while so doing receive the same compensation as if she were the widow of the deceased workman. The amount which may be taken into account in computing average earnings of the workman may not exceed \$2,000 per annum. The amendment further permits the workmen in any industry or a majority of them as well as the employer, to make application to be brought or to have their industry brought within the scope of the Act. It also extends the benefits of the Act to all public employees.

The Factories Act was amended with regard to the section dealing with the appointment and powers of the Minimum Wage Committee. The Lieutenant-Governor in Council is authorized to continue the existing Committee or change its personnel. The Committee is empowered to recommend the classification of employees according to locality and make recommendations concerning minimum wages and hours of labour. It may further recommend the division of occupations into classes as regards apprenticeship and also the period and conditions of apprenticeship. The amendment repeals that clause of the Act defining the word "apprentice" as meaning a person who has been engaged in his occupation for less than one year.

The Police Pensions Act provides that the Pension Fund established under the Alberta Provincial Police Act, 1917, shall be wound up and a new pension benefit fund established by the Commissioner of Police. The Commissioner is authorized to deduct 3 per cent from the pay of members of the force under 50 years of age and 5 per cent from that of members 50 years of age and over. Upon retirement after a service of seven years or more but less than 12 years a member will receive an allowance of one month's pay for each completed year of service computed at the rate, or the average rate, of pay received in the year of his retirement. After a service of twelve to fifteen years or fifteen to

twenty years, the allowance is one and a half and one and two-thirds months' pay respectively. After twenty years of service every member of the force receives for life an annual pension equal to one-half the annual pay he was receiving at the time of his retirement, and after twenty-five years' service a life pension equal to three-fifths of such annual pay. A member in either of the last two classes who has been less than three years in the rank at which he retires will be paid according to the rank from which he was last promoted. Any policeman who becomes physically or mentally unfit for further duty may receive a compassionate allowance ranging from \$200 up, according to length of service. Provision is made for dealing with special cases.

British Columbia

In British Columbia during the session which opened on February 8 and closed on April 2, 1921, a number of measures of interest to labour were enacted. Among these were laws giving effect to the draft conventions and recommendations of the first International Labour Conference held at Washington in 1919 pursuant to the provisions of the Treaty of Versailles. These laws which come into force on proclamation by the Lieutenant-Governor in Council concurrently with, or after, the coming into operation of similar laws in the other provinces of the Dominion, deal with employment of women during the night and before and after childbirth, night-work of young persons employed in industry, minimum age for employment of children and limitation of hours of work in industrial undertakings. In each case industries carried on by members of one family only are exempt from the working of the Act. Other legislation passed during the session included amendments to the Acts relating to employment agencies, minimum wages, coal mines regulation and mothers' pensions.

The Night Employment of Women Act prohibits the employment of any woman between the hours of 8 p.m.

and 7 a.m. in any industrial undertaking. Exception may be made in cases of emergency and to prevent loss through deterioration of raw materials. In seasonal undertakings or where exceptional circumstances demand it the night period may be reduced by the regulations to ten hours on sixty days of the year. The law does not apply to agricultural, horticultural and dairying industries.

The Maternity Protection Act forbids the employment of any woman in any industrial or commercial undertaking during the six weeks following her confinement, and permits her, on production of a medical certificate, to leave work for six weeks prior to the probable time of confinement. The Act also limits the right of the employer to dismiss such woman during her absence.

The Night Employment of Young Persons Act prohibits the employment of young persons under 18 years of age in any industrial undertaking between 8 p.m. and 7 a.m. The Lieutenant-Governor in Council is empowered to make regulations suspending the operation of the Act in case of serious emergency or where the nature of the process demands continuous work.

The Employment of Children Act forbids the employment of boys under fourteen and girls under fifteen years of age in any industry. Employers must keep a register of all employees under 16 years of age.

The Hours of Work Act limits the working hours of persons employed in industrial undertakings to eight per day and forty-eight per week, subject to certain exceptions. Employers and employees may agree that in order to obtain a shorter day on one or more days of the week longer hours, but not more than nine per day, may be worked on the remaining days, provided that the weekly limit of forty-eight hours is not exceeded. Exception is also made in case of accident or emergency and change of shifts. Where continuous processes are carried on by a succession of shifts a maximum of fifty-six hours per week on the average is provided for. The Lieutenant-Governor in Council is empowered to make regulations govern-

ing permanent and temporary exceptions, and giving agreements between employers and employees concerning hours of labour the force of regulations.

The Employment Agencies Repeal Act compels every person, firm, corporation or association keeping any office or agency for procuring work or employment for persons seeking work to keep a complete record of all transactions and make monthly returns in writing to the General Superintendent of the Government Employment Service. The records must be open to inspection by any authorized person.

The amendment to the Minimum Wage Act strengthens those clauses which protect apprentices and physical defectives from being employed at a lower wage than that fixed by the Board. Special licenses may be issued by the Board in the case of women over 18 years of age who enter a trade or industry where apprentices are not usually employed, but who are not sufficiently experienced to qualify as experienced employees. The number of employees holding special licenses who are permitted to be employed in any establishment is now placed at one-seventh of the whole instead of one-tenth as formerly, and the aggregate number of employees holding special licenses and employees under eighteen years of age employed in any one establishment is limited to thirty-five per cent of the total number of employees. The amending Act further provides that a copy of the *British Columbia Gazette* purporting to contain a copy of an order

of the Board shall constitute sufficient evidence of the making of such order.

The Coal Mines Regulation Act was amended to forbid any lamp or light other than a locked safety lamp to be used underground in any mine after July 1, 1921. The rule which directs the watering or treating of roads in dusty sections of a mine now applies to all mines.

By an amendment to the Mothers' Pensions Act, a widow, deserted wife, or the wife of an inmate of a penal institution or insane asylum may not benefit unless her husband was a resident of the Province at the time of his death, desertion of his wife or committal to the penitentiary or asylum. A clause providing for the payment of a pension to a mother whose husband, while domiciled in the Province, becomes totally incapacitated through accident or illness replaces the former clause which extended the benefits of the Act to a mother residing in British Columbia at the time of her husband's disablement through illness or accident.

The section of the Attachment of Debts Act which relates to attachment of wages was amended to exempt \$60 of a debt due a workman in respect of his wages instead of \$40 as formerly. Exemption of wages due for a period of less than one month shall be in proportion.

An amendment to the Public Schools Act compels attendance at school until the age of fifteen years instead of 14 years.

TECHNICAL EDUCATION IN CANADA

First Annual Report of the Director of Technical Education for Canada

THE First Annual Report of the Director of Technical Education for Canada for the fiscal year ending March 31, 1920, has recently been issued by the Department of Labour. For convenience, especially in connection with the tabulation of statistics, the report covers the school year ending June 30.

Technical education under the Federal Technical Education Act is held to apply to any education or training which will fit a boy or girl for useful employment in any chosen vocation with the exception of those vocations such as the professions (involving a degree), elementary and high school teach-

ing, agriculture, and nursing, for which education and training have already been provided.

With the exception of Prince Edward Island, where the demand for vocational training apart from agriculture is not great, the report states that the enactment of the Technical Education Act and the appointment of a Federal Director have given a decided impetus to the work in all the provinces, but the increased cost of building and equipment will no doubt adversely affect this development, and there is also difficulty in securing properly qualified teachers. As the separate provinces, with the exception of Ontario and Quebec, could not support the burden of providing a training school for these teachers, the suggestion is made that a single institution be established for the whole of Canada for the training of teachers for technical schools.

Out of \$700,000 available for distribution among the provinces under the Technical Education Act the sum of \$273,788 was paid during the fiscal year. There were in all the provinces 138 vocational schools with 1,810 teachers and an enrollment of 60,546 pupils. The report contains a detailed account of the work carried on in all these schools embodied in reports of the various provinces. Two appendices are included in the report, one containing a typical agreement between the federal and provincial governments, and the other the Vocational Education Act of Saskatchewan.

The report of the proceedings of the first National Conference on Technical Education, which was held at Ottawa on October 25-26 last, has also been recently issued by the Department of Labour. An account of the Conference appeared in the LABOUR GAZETTE for November, 1920, on page 1500.

WORKMEN'S COMPENSATION IN ALBERTA

Annual Report of the Board for 1920

THE third annual report of the Workmen's Compensation Board of Alberta covers the operation of the Act for the calendar year 1920. When the Workmen's Compensation Act came into operation on August 1, 1918 (see LABOUR GAZETTE, August, 1918, page 658), it applied only to the mining industry, but its scope was enlarged later, and during 1920 it included practically all industries where manual labour was employed, with the exception of retail stores and railways running outside the Province. During the past year the following administrative changes were introduced: assessments were made on estimated instead of actual payrolls, employers being required to forward their payrolls at the end of the year and not monthly, as formerly; the inspection of establishments coming within the scope of the Act was placed directly

under the jurisdiction of the Workmen's Compensation Board and removed from that of the Factory Inspector; various additional safety regulations were made throughout the year; clerical help and travelling salesmen, formerly excluded as not being exposed to the hazards of the industry, were brought within the scope of the act; the maximum of \$2,500 for which the Board was liable for compensation was abolished, and compensation was allowed for an indefinite period in such cases as that of a widow whose husband had been killed in an industrial accident, payments of compensation being henceforth made as long as she lives, or until she remarries, when she will receive \$480 in final settlement of her claims.

The total number of employers coming within the scope of the act during the year was 2,698. The number of per-

sons employed on December 31, 1920, in mining and allied industries (schedule 1), was 12,347, the wages earned by this group during the year being approximately \$19,380,475; while the number of persons employed in all other industries coming under the act (schedule 2) was 26,531, earning yearly wages estimated at \$37,939,779. These figures do not include Federal or Provincial government employees. The total amount of assessments levied during the year was \$443,126 (assessments collected during the year, including outstanding dues paid, amounted to \$445,310). With interest, and with the balance of \$250,560 carried forward from 1919, the fund collected by assessments totalled \$710,744. Of this amount \$194,965 was paid out for claims, \$37,978 was spent in administration of mine rescue work, and \$48,104 for expenses and equipment, leaving a balance of \$429,695. The amounts authorized to be collected under the Medical Aid provisions of the Act are 2 cents per day for industries coming under schedule 1 (mining group), and 1 cent per day for other industries. Collections from this source during 1920 amounted with interest to \$65,546, and together with the balance of \$19,420 from the preceding year, totalled \$84,966. Of this amount \$48,970 was paid out in medical and hospital services and \$6,855 in expenses, leaving a balance of \$29,140. A total balance thus remained for assessments and medical aid of \$458,336, which was available for estimated liabilities.

The number of accidents reported during the year was 6,418, of which 2,690 were in the mining group (schedule 1), and 3,728 in other industries (schedule 2). The number of claims disposed of by payment of compensation was 3,089. Of 81 fatalities during the year, 33 came under schedule 1, and 48 under schedule 2. The total expenditure during the year arising out of fatalities was \$21,733. Permanent partial disability resulted in 33 cases under schedule 1, and in 47 under schedule 2. Temporary total disability resulted in 2,549 cases under schedule 1, and in 3,541 cases under schedule 2, while

temporary partial disability resulted in 75 cases under schedule 1 and 92 under schedule 2. The total expenditure in connection with non-fatal accidents was \$173,231. The number of claims disposed of without payment of compensation was 545. In 1681 cases no claims for compensation were received, while 1,826 cases were still under consideration of the Board at the close of the year. The tables contained in the report correspond in form to those in other provinces, comparison being made easier by such standardization.

Mine Rescue and First Aid Work

The annual report of the Superintendent of Mine Rescue and First Aid Work, which is included in the report of the Board, states that since this work was organized 1,561 men have undergone training with self-contained breathing apparatus, and 1,022 men have taken instruction in first aid in the Province. Mine rescue stations are now in operation at the mines operated by the Canadian Pacific Railway Company, Lethbridge; North American Collieries, Ltd., Coalhurst; Jasper Park Collieries, Ltd., Pocohontas; Chinook Coal Company, Ltd., Commerce; Mountain Park Coal Company, Ltd., Mountain Park; and Brazeau Collieries, Ltd., Nordegg. There are also three mine rescue cars in operation; in Crow's Nest Pass district, at Canmore and Bankhead, and in the Drumheller and Big Valley district. All the mine rescue apparatus at present in use in the Province are of the Proto self-contained breathing type. The complete course of training is for a period of 10 days of two hours each. No person is granted a certificate of competency before he has passed an examination in this work. Arrangements have been made that each member of a trained team is required to take at least three hours training per month in mine rescue and first aid work, for which he is paid 70 cents per hour. Payment is made by the Workmen's Compensation Board on receipt of a time sheet from the superintendent of each mine rescue car and station. These

mine rescue teams are composed of five men, one of whom is captain with full charge of the team. A very rigid medical examination is made of each candidate before he is allowed to join a team. In addition to mine rescue stations resuscitation devices have been installed at the mines of the West Canadian

Collieries, Ltd., Bellevue; the International Coal and Coke Company, Ltd., and the Hillcrest Collieries, Ltd. The Canadian Institute of Mining and Metallurgy has installed a branch library at several of the cars and stations, to which all mine employees and mining students have access.

NOVA SCOTIA ACCIDENT PREVENTION ASSOCIATION

SOME account was given in the LABOUR GAZETTE for February (page 126) of the proceedings of the conference of safety supervisors, held at Halifax in January under the auspices of the Nova Scotia Accident Prevention Association. At the second annual meeting of the latter organization at Halifax on March 23, further information was given as to the progress of safety work in the province. The president, Mr. G. D. Macdougall, of the Nova Scotia Steel and Coal Co. Ltd., occupied the chair.

The secretary, Mr. H. R. Thompson, in outlining the functions of the Association, explained that it was designed to supplement the Workmen's Compensation Act by supplying the employers who are assessed under the act with detailed information with respect to its administration, and by enabling them to discuss all conditions and present their views to the Compensation Board. The rate of assessment depended, he said, upon the amount of compensation paid as the result of accidents occurring in the respective groups, and would therefore be reduced by the further elimination of accidents. The Compensation Act provided that the Board might contribute funds to an approved association for the prevention of accidents, and the Accident Prevention Association having

been approved under this clause was now in receipt of financial support from the Board. The expense incurred by the Association during the past year amounted to less than one per cent of the assessments. A field officer was now engaged in securing the co-operation of individual employers, of whom only a few had come to recognize the necessity for organized accident prevention work, and already an improvement was evident. "Sections" of the Association were being formed in several industries, first-aid classes established in various centres, active safety campaigns conducted in individual plants, and a decided impetus given generally to the work of accident prevention. The largest factor in prevention, the secretary claimed, was education, and measures were now under way for instituting school instruction which would not unduly add to the burden of teachers or scholars.

President Macdougall stated that employers in Nova Scotia were in a favourable position, as the Compensation Board had consented to meet the Association at least once a year to review and discuss the operation of the Act and the administration of the monies obtained from the employers.

Mr. F. W. Armstrong, vice-chairman

of the Workmen's Compensation Board, explained that, owing to under-estimated payrolls or fewer accidents than had been anticipated, somewhat larger surpluses had accumulated in certain groups than had been expected, and in consequence it was intended to make some retroactive payments to employers or credit the amounts to the present year. He also forecasted that reductions in some of the assessment rates would be made. As to "merit rating," by which preference would be given to concerns having the most efficient safety systems, this matter was under consideration, but no equitable plan had as yet been prepared.

Officers for the ensuing year were elected as follows:

President, J. E. McLurg, Halifax Shipyards Limited.

First vice-president, C. C. Curtis, Cape Breton Electric Company, Limited.

Second vice-president, P. L. Spicer, Newville Lumber Company, Limited.

Secretary-treasurer, H. R. Thompson, Canadian Manufacturers' Association.

General Executive Committee—

Class 1. Mining.—A. W. Macdonald (Dominion Coal Co. Limited.)

Class 3. Lumbering and Woodworking.—R. E. Dickie.

Class 5. Metal Trades.—G. D. Macdougall (Nova Scotia Steel and Coal Company, Limited).

Class 6. Miscellaneous manufacturing.—C V. Monaghan (Moir's Limited).

Class 7. Building and Construction.—A. S. Curry (Rhodes, Curry, Limited).

Class 8. Public Utilities.—W. L. Wes-

ton (Nova Scotia Tramways and Power Company, Limited).

Class 9. Transportation.—A. E. H. Chesley (Dominion Atlantic Railway).

Statistics prepared by the Nova Scotia Accident Prevention Association show the number of fatal accidents in the province, from all causes both inside and outside of the industries, during five years to have been as follows:

Yearly period.	Accidentally killed.	
	Total.	14 years of age and under.
Oct. 1, 1914 to Sept. 30, 1915.....	304	Number not known
Oct. 1, 1915 to Sept. 30, 1916.....	328	"
Oct. 1, 1916 to Sept. 30, 1917.....	359	74
Oct. 1, 1917 to Sept. 30, 1918.....	418	75
Oct. 1, 1918 to Sept. 30, 1919.....	294	63
Total.....	1,703	—

The number of industrial fatalities in the province during the three years 1917, 1918, and 1919, as reported in the annual reports of the Workmen's Compensation Board, was 378, or an annual average of 126 deaths of workers engaged in mines, factories and other institutions assessable under the Compensation Act. The annual average of all fatalities, as shown in the above table, being 340.6, it appears that there was a yearly average of about 214 accidental deaths outside of the industries of the province.

REDUCTIONS IN WAGES AND CHANGES IN WORKING CONDITIONS ON RAILWAYS IN CANADA AND UNITED STATES

IN the award of the United States Railroad Labour Board of July 20, 1920, granting increases in wages of approximately 21 per cent (Decision No. 2, Dockets 1, 2 & 3)* the Board did not deal with the question of rules and working conditions established under the United States Railroad Administration, deferring consideration of this matter to a later date. On January 10, 1921, the hearing on this question was begun, and on April 14, 1921, Decision No. 119 (Dockets 1, 2 and 3), was given, setting July 1, 1921, as the date for the termination of the rules and working conditions in force since 1918, and calling upon the management of the railroads and the organizations of employees to appoint representatives to confer upon such rules and working conditions. The Board also issued a statement of principles upon which such rules should be based. The parties to the dispute were directed to proceed with their conferences so that the Board might promulgate the new rules as soon as practicable after July 1, 1921. The following is an extract from the Decision:

"The Labour Board is of the opinion that there is merit in the contentions of each party and has endeavoured to take action which will secure some of the advantages of both courses.

This Board is unable to find that all rules embodied in the National Agreements, orders, etc., of the Railroad administration constitute just and reasonable rules for all carriers parties to the dispute. It must, therefore, refuse the indefinite extension of the National Agreements, orders, etc., on all such carriers as urged by the employees.

This Board also deems it inadvisable to terminate at once its direction of Decision No. 2 and to remand the dispute to the individual carriers and their employees. Such a course would leave

many carriers and their employees without any rules regulating working conditions.

If the Labour Board should remand the dispute to the individual carriers and their employees and should keep the direction of Decision No. 2 in effect until agreements should be arrived at, it is possible that agreements might not be arrived at.

The Labour Board believes nevertheless that certain subject matters now regulated by rules of the National Agreements, orders, etc., are local in nature and require consideration of local conditions. It also believes that other subject matters now so regulated are general in character and that substantial uniformity in rules regulating such subject matters is desirable.

The Board also believes that certain rules are unduly burdensome to the carriers and should in justice be modified. It may well be that other rules should be modified in the interest of employees.

In the meantime the railroad managements had requested the Board to recommend a reduction in wages, as the 21 per cent increase awarded in July 1920, had proved unduly burdensome on the revenues of the railways, and there had since been reductions in the cost of living. On May 31 the Board issued a decision that decreases should be made from July 1, 1921, varying from 5 per cent to 18 per cent of the rates in force, estimated to average 12 per cent and to remove 2-3 of the increase granted in July, 1920.

As the rates of wages, rules, and working conditions on the railways in Canada have been in the main adjusted to conform to those in force in the United States, the railway companies in Canada gave notices in conformity with the various agreements with their employees terminating all such agreements on July 1, 1921, and made arrangements for conferences to adjust the details in accordance with the general changes contemplated.

MEANING OF THE TERMS "OPEN SHOP" AND "CLOSED SHOP"

Summary of a Report for the New Jersey State Chamber of Commerce

(Reprinted from "*Bloomfield's Labour Digest*," Vol. VII, No. 2.)

THE terms "closed shop" and "open shop," which are broadly used in controversy, are so vague and misleading that those using them often mean different things thereunder. Furthermore, they appear on close examination to be entirely inadequate to express the various forms of policy as regards employment of union men and non-union men which obtain to-day. It seems, therefore, timely to analyze the meaning of these terms and suggest a more practicable and appropriate terminology.

Several other terms broadly used in the present controversy are subject to various interpretations. Thus, for example, what is "collective bargaining"? The labour union means under this one thing, the manufacturers' association another, and citizens at large often still something else. Suffice it only to remember the discussion of "collective bargaining" before the President's first Industrial Conference to appreciate the confusion involved. Or what is "the public" that is so often brought into the discussion of industrial issues? Some say it is the element that is neither an employer nor an employee. Others reply, "If this is what you mean by the term, then there is no public, for everybody is either an employer or employee," and add, "The workmen are the real public." Or what does the term "recognition of the union," around which the controversy largely rotates, mean? Some say it means the "closed shop," others that it means nothing, for "how can you refuse to recognize the existence of something which exists and stares you in the face"? And how about the term "union"? Judge Mayor not very long ago ruled the International Association

of Street and Railway Employees out from the Interborough Company of New York City and recognized the benevolent association organized by that company as a "union."

"CLOSED SHOPS" AND "OPEN SHOPS."

The common conception of the closed shop is that it is a shop in which non-union men cannot obtain or retain employment. It is generally thought that every union shop, *i.e.*, a shop in which the union is recognized, is a "closed shop." Instances of union shop where no closed shop obtains are ignored and the term "recognition," "union shop" and "closed shop" are thought synonymous. By way of contrast, all shops that are not "closed shops" in the above sense, and do not involve recognition, are thought to be "open shops," the presumption being that they are open to both union and non-union men without discrimination. The presumption is too sweeping, for it ignores the instances of shops where discrimination works the other way—against union men. Investigation clearly shows that many so-called "open shops" are not "open" and many union shops are not "closed" and that this simple terminology of "closed" and "open" shop is confusing and inadequate.

A practicable terminology would begin with two large classes—the "union shop," in which the union is recognized and admitted to negotiations on behalf of the workmen, and the "non-union shop," in which the union is not recognized and is not admitted to such negotiations; and it would subdivide each class into subclasses according as

they are closed, preferential or open towards the union men or non-union men respectively and according to other important factors. At least nine kinds of shops can thus be indicated.

I. The non-union shop

1. Closed anti-union shop
2. Preferential anti-union shop
3. Open non-union shop without shop committee
4. Open non-union shop with shop committee.

II. The union shop

5. Open indirect union shop
6. Open union shop
7. Preferential union shop
8. Closed union shop of an open union
9. Closed union shop of a closed union.

NON-UNION SHOPS.

In the "closed anti-union shop" union men are not admitted except as a temporary expedient. They must give up membership to be able to obtain or retain their employment. The most apparent type of closed anti-union shop is that enforced by means of individual contracts, which the employees must sign before receiving employment, or a permission to remain, and which contain a clause forbidding membership in the union. But many shops are closed to union men also without such contract.

The "preferential anti-union" type is distinguished by the preference given to non-union men, with the result that the union men are kept in a minority. The lines of demarcation between the preferential and closed type are very slight.

The anti-union shop of the closed or preferential kind obtains in industries which have been or are being organized and where the employer is engaged in keeping the union out. It is the "open shop" which is not open. The employer may want to maintain a true "open shop" and not discriminate, but he cannot do it, for if he did, if he permitted

a large number of union men, and especially the active men, in the shop and allowed the union, through them, to conduct its organizing work, he would soon have the majority, if not all, his men organized, a strike engineered and perhaps union recognition from him secured.

The "open non-union shop" is one in which, alongside with non-recognition, no discrimination is practised. It obtains very largely in industries which have been little, if at all, organized. It obtains also, but usually as the exception or as a temporary condition, in industries where the union had or has some standing. In the latter case it is due either to the exceptional intelligence of the management, which is able to forestall "recognition", or to the protection afforded by the government, as for example, during the war, when, under the supervision of the War Labour Board and other agencies, the principle of "no discrimination" was imposed on both employers and the union; or to the fact that the union has not started its organizing drive. Of its two subclasses, that provided "with shop committee" presents a more evolved type, for the shop committee affords an opportunity of limited collective bargaining and even indirect negotiation between the unrecognized union and the management through the delegates on the shop committee. The open non-union shop is the true union shop, only of non-union character.

UNION SHOPS.

Before starting with the discussion of the five forms of union shop, it may be well to point out that the first two forms which are "open" are prevalent in industries which are competitive only to a slight degree, if at all, and are fairly stable, whereas the "preferential" and "closed" union shops obtain pre-eminently in highly competitive and fluctuating industries.

The "open indirect union shop" is one where the union is recognized only indirectly, as for example, through the

instrumentality of a public agency which acts as the intermediary between the union and the employer, and where no discrimination is practised. It is illustrated by the case of the packing industry in Chicago, where a three-cornered agreement obtains, the government making it with the packers on the one hand and with the unions on the other. The two sides plead their case before the impartial tribunal, constituted by Judge Alshuler, who administers the agreement. They do not deal directly with each other.

THE OPEN UNION SHOP.

In the "open union shop" the union is recognized and yet no discrimination either way is allowed. Prominent instances of the latter are the railways, where about 2,000,000 union men work under the rule of "no discrimination," with their unions generally recognized; many yards in the ship-building industry, of which the Bethlehem Shipbuilding Company is a conspicuous example; the Schenectady plant of the General Electric Company, employing over 20,000 workmen; the American Locomotive Company; some of the street railways and telephone companies; the anthracite mine fields; the Rochester clothing market; the U. S. arsenals and some other national, state and municipal works. In some of these instances the open union shop has been maintained for twenty, thirty years and even longer, without transforming into a closed union shop, and has proved so eminently satisfactory to the union that they emphatically declare that they do not want the "closed shop." The two types of union shop just described are true "open shops," only of union character.

THE PREFERENTIAL UNION SHOP.

The "preferential union shop" is distinguished by the fact that alongside with recognition a preference is tendered to union members. Non-union men can work in the shop, but they must be either better workmen than the union

men or the union must be unable to furnish to the employer the needed quota of workmen. The arrangement is predicated on the consideration of the fact that the union men are parties to the agreement which stabilizes the industry, and ought, therefore, to receive preference. Conspicuous examples of this type are the Chicago Clothing Market, and especially the Hart, Schaffner & Marx establishment, where this arrangement has operated for the last ten years with eminent satisfaction to both sides and has not resulted in the "closed shop" condition. On the other hand, a conspicuous example of its failure and transformation into a "closed union shop" is afforded by its operation in the ladies' garment industry of New York City.

THE CLOSED UNION SHOP.

The "closed union shop" is what is commonly referred to as the "closed shop." It does not necessarily require that a man be a union man before he is hired. Very often the arrangement permits the employer to hire any man he desires but the man must become a member of the union within a certain time, usually a week or two weeks. Men found guilty of serious offence against the union are not admitted to the union, and, therefore, cannot remain in the shop.

The closed union shop must be divided into two classes according as it is enforced by an "open union," which keeps its membership doors wide open, or by a "closed union," which keeps its membership doors fairly closed. The "open union" type of the closed union shop tends to eliminate destructive competition among the workmen by including the competitors in the union. The "closed union" type, on the other hand, tends to do it by eliminating the competitors from the industry. The former tends to extend the benefits of union standards to all the workmen, the latter to impose a special privilege upon a certain group. The former affords to the employer a wider supply of labor, the latter a restricted one.

Typical examples of the closed union shop of an open union are the shop arrangement of the miners in the bituminous coal industry, the ladies' garment workers and the men's clothing workers in New York City. A typical example of the closed union shop of the closed union is the shop arrangement of the United Hatters (a highly skilled trade) and of various crafts in the building industry and some branches of the printing industry. Even the most conspicuous types of open and closed union maintain

a certain degree of elasticity in the margin of their open or closed door, according as the times are "busy" or "slack." And between them are many unions with intermediate forms of "open" or "closed" door. Consequently, there are considerable variations in that respect as between various closed union shops. The closed union shop of the pure closed union represents the extreme point of union shop just as the pure closed anti-union shop represents the extreme of the non-union shop.

MAIN CHARACTERISTICS OF NINE TYPES OF UNION SHOP AND NON-UNION SHOP

Type of shop	Union status	Character of industry in which the type of shop obtains	Character of discrimination, if any, and "closed" or "open" door policy, in regard to union or non-union men
1. Closed anti-union shop.	Nos. 1, 2, 3, 4 Non - recognition of the union.	Nos. 1, 2 In industries which have been or are extensively organized by the unions or de-organized by anti-union employers' associations.	Nos. 1, 2 Discrimination against union men; the closed or semi-closed shop of the employers (the "open shop" that is not open.)
2. Preferential anti - union shop.		Nos. 3, 4 Mostly in industries which have been little if at all organized.	Nos. 3, 4, 5, 6 No discrimination against either union men or non-union men; in the former two types enforced by the employer, in the latter two enforced jointly by the employer and the union; a true open shop (not the one usually referred to) of non-union character in the former two cases, of union character in the latter two.
3. Open non-union shop without shop committee.			
4. Open non-union shop with shop committee.			
5. Open indirect union shop.	Nos. 5, 6, 7, 8, 9 Recognition of the union.	Nos. 5, 6, 7, 8, 9, in organized industries.	Nos. 5, 6 Especially in those which are competitive only to a slight degree, if at all, and fairly stable.
6. Open union shop.			
7. Preferential union shop.		Nos. 7, 8, 9 Especially in those which are highly competitive and unsteady (seasonal).	Nos. 7, 8, 9 Discrimination against non-union men; the closed or semi-closed shop of the union.
8. Closed union shop of an open union.			
9. Closed union shop of a closed union.			

EMPLOYMENT OF DISABLED SOLDIERS AND INDUSTRIAL WORKERS

Action taken in Great Britain, Germany, Austria and France

VARIOUS solutions to the problem of finding employment for disabled soldiers have been attempted in a number of countries since the end of the war. In some cases disabled industrial workers are also included in the plans. The International Labour Office has published in "Studies and Reports, Series E, No. 2", an account of the steps that have been taken to deal with this subject in the United Kingdom, Germany, Austria and France. The number of men disabled by the war was officially estimated at 1,170,000 for the United Kingdom, 1,500,000 for France and 1,400,000 for Germany. These figures are scarcely comparable, however, as in the United Kingdom and in France they are based on physical incapacity while in Germany they are based on vocational incapacity.

In the United Kingdom the national scheme proposed by the government is a purely voluntary one and it applies to disabled ex-Service men only. In Germany the principle of compulsory employment in the case of severely injured men has been adopted, and the law applies to disabled workmen as well as ex-soldiers, and even to other disabled men not belonging to these two classes. In Austria there is compulsory employment for disabled ex-Service men, and while the employment of disabled workmen is not compulsory, if they are so employed they are counted with the ex-Service men to make up the required proportion. In France final action has not yet been taken, but two bills have been proposed both of which provide for the compulsory employment of disabled ex-soldiers.

The problem of the organization of employment of disabled ex-soldiers was considered by the Inter-Allied Conference which met at Brussels in September, 1920. Recommendations were made for the enactment of laws providing for their compulsory employment both by

private employers and public authorities with effective penalties for their infringement; for compulsory notification by employers of vacancies for which such disabled men would be eligible; for payment of current wages to disabled men; for the compilation of statistics showing the number of disabled men, their distribution among the various industries and the nature of their disabilities, and for the prevention of begging and hawking by disabled ex-Service men.

The essential features of the British scheme, the German and Austrian acts and the French bills are outlined below.

The United Kingdom

The national scheme for the employment of disabled ex-Service men which was proposed by the British Government in September, 1919, has for its object to ensure the permanent absorption of disabled men into industry as well as their equitable distribution among the several branches of industry. The benefits of the scheme were extended to all ex-Service men who are adjudged by the local employment committee to be incapacitated from following their normal occupation. The number of disabled men who would come under the scheme was estimated at about 800,000, or one-twentieth of the total number of workers estimated at 16,000,000. All private employers and public authorities were accordingly invited to co-operate in the national scheme by undertaking to employ one disabled ex-Service man for every 20 workers. The names of all co-operating employers were placed on the King's Roll.

The wages of disabled men who have undergone a course of vocational training are governed by agreements between the trade advisory committees and the employers under the supervision of the Ministry of Labour. According to the

British *Labour Gazette*, up to May 13, 25,486 certificates had been issued to employers under the scheme and the undertakings given by these employers covered 280,728 disabled ex-Service men. On April 6, the Minister of Labour stated that, save in very exceptional circumstances, all firms contracting for government contracts to whom the conditions for membership of the King's Roll are applicable, must be on the King's Roll.

Germany

The principle of the compulsory employment by private firms and public authorities of men disabled not only in the war but also in industry generally, has been adopted in Germany. By an act passed on April 6, 1920, every employer with a vacant position is required to give preference before any other candidate to a seriously disabled man suited for the post.

The proportion of disabled men to be employed by each firm is fixed by order of the Minister of Labour, who is also authorized to reserve certain classes of work for certain classes of disabled men, to limit the application of the Act to certain types of work, and set up different percentages for different kinds of work. Regulations provide that public authorities must employ one disabled man if they have not less than 25 nor more than 50 officials, and 2 per cent of their staff if the total exceeds 50 persons.

The law distinguishes three classes of beneficiaries: (1) Disabled soldiers and workmen whose earning capacity is decreased by 50 per cent at least, as shown by the amount of their disability pensions. These men have the full benefit of the provisions of the Act. (2) Disabled soldiers and workmen whose earning capacity is diminished by not less than one-third and not more than one-half. These men do not have the full benefit of the Act, but the Central Relief Office may put individual cases on the same footing as beneficiaries of the first class if owing to their disabilities they are unable to find work without the help of the law. It is not com-

pulsory to employ them, but if a firm does so they are included with those who are compulsorily employed, in calculating the proportion required. (3) Disabled men other than ex-soldiers or workmen. These disabled men enjoy the same conditions of employment as those of the second class if their working capacity is very greatly diminished, if it is considered necessary by the Central Relief Office, to save them from unfair suffering.

The Compulsory Employment Act of Germany contains no provision for the protection of the wages of disabled men, but guarantees are established by other laws, and it is illegal to take into account pensions and war allowances in fixing their wages.

An Arbitration Commission has been set up for the settlement of disputes under this Act, the members of which are appointed by the administration on the nomination of the employers and workers' associations, two permanent members and two substitutes being named by each party. Decisions of the Commission may be declared to have the force of law by the higher administration authority in the case of private employers or may be made binding by the Federal Ministry or by the Central authority of the State in the case of public authorities. Penalties are provided both for the employers and the disabled men for violation of the law, the amount of the fine to be fixed by the Arbitration Commission.

Austria

By an act passed by the Austrian Government on October 1, 1920, the full benefits of compulsory employment are enjoyed by disabled ex-Service men whose working capacity is diminished by at least 45 per cent, and by ex-Service men whose working capacity is diminished by not less than 35 per cent nor more than 45 per cent, if owing to their disability they are unable to find work without the help of the law. Workers injured in industrial accidents in the factory where they are still employed whose working capacity is reduced by

more than 45 per cent, as well as blind workers, are placed on the same footing as disabled ex-Service men in calculating the number of disabled men to be employed compulsorily. Compulsory employment is applied to all branches of industry conducted for profit, the number of disabled men to be employed being fixed at one for twenty workers, and at least one man for every further twenty-five workers. The Ministry of Social Policy, however, may decrease the number of disabled men to be compulsorily employed in certain branches of industry, and may grant complete exemption from the Act in the case of undertakings unsuitable for disabled men. The wage of the disabled man must not be lower than the current wage unless his producing power is proved to be below normal when his wage should correspond to the actual work done, but in any case it should be sufficient for his support.

The administration of the Act is controlled generally by commissions for compensation to disabled men attached to the Ministry of Social Policy, but attached to each commission is a committee for the engagement of disabled men which is especially entrusted with the issue of certificates of industrial capacity. Each of these committees consists of: (1) Representatives of the organizations of the disabled; (2) representatives of the trade associations of employers and workers; (3) a doctor of the Public Health Service; (4) a doctor chosen by the organizations of the disabled; (5) a representative of the Labour Inspection Department. The act establishes two classes of compensatory taxes and fines. Firms which are unable to comply with the provisions of the act owing to the nature of their work are liable to a tax equal to one-quarter, or in some industries one-fifth, the average annual wage of a worker in the undertaking for each disabled man who should have been employed. This tax is said not to be a fine, but it is an implicit recognition of the fact that the employment of disabled men is a charge upon the business and that businesses not subject to this charge have an econo-

mic advantage over others. Employers who should employ disabled men but do not are liable to the ordinary tax augmented by 20 per cent. In case of fraud in connection with this act heads of businesses are liable to a fine not exceeding 20,000 kroners. This act will cease to be in force on December 31, 1924.

France

No act regarding the employment of disabled ex-soldiers is yet in force in France, but two bills regarding their compulsory employment by private firms were introduced, of which one was passed by the Chamber of Deputies on March 25, 1919, and the other was adopted by a commission of the Senate last January. The former bill extends compulsory employment to all disabled ex-soldiers whose incapacity equals or exceeds 40 per cent. The proposal of the commission of the Senate relates only to the disabled whose capacity for earning is less than 40 per cent of the capacity of a normal worker. The bill passed by the Chamber imposes compulsory employment on every employer of more than 5 male, 10 female, workers or 7 workers of both sexes, and the Ministry of Labour is instructed to draw up annually a list of firms subject to this provision. The proportion of disabled men is to be regulated annually by the Ministry of Labour for each class of undertaking. In the bill adopted by the Senate commission the compulsory percentage is fixed at one disabled man per ten employees, but in the case of establishments of less than 50 workers the disabled employees must be capable of full work, while in larger establishments one-fifth of the disabled men should have a working capacity of more than 60 but less than 100 per cent. Both bills compel the employer to pay disabled men a wage not lower than the normal current rate for the trade and district. Both bills impose fines for failure to employ the required number of disabled men, and the Senate bill, like the Austrian act, imposes a tax on employers whose business does not admit of the employment of disabled men.

AGREEMENT IN NEW YORK CLOTHING TRADE

A RECENT issue of *Bloomfield's Labour Digest* contains a summary of an agreement between the clothing manufacturers of New York and the Amalgamated Clothing Workers of America which was reached after a dispute lasting six months. The agreement provides for a 15 per cent reduction in wages coupled with a promise of an increase of 15 per cent in production; no wage reduction for cutters, but workers in cutting rooms will be classified and there will be different wage scales for the different classes of workers, a schedule of wages to be agreed upon and to form part of the agreement; a board of arbitration to be created composed of a representative of the manufacturers' association, a representative of the union and an impartial chairman selected by these two; the following questions to be submitted to the board: the right to discipline workers, the right to introduce new machinery; the employment of apprentices and unskilled labour; a standard of production to be set for each shop through conferences between

the shop chairman representing the union and the manufacturer or his representative and failing agreement the matter to be referred to the board of arbitration; no union delegate to be permitted to enter shop unless accompanied by a representative of the manufacturer and only by permission of the manufacturer or his agent, and only when called upon to adjudicate a dispute or to secure evidence for submission to the board of arbitration; manufacturers to be allowed to hire in open market if the union is unable to supply them within a reasonable time, but such outside workers will have to join the union if they remain in employment; manufacturers to be free to close their plants and introduce new methods and machinery after conference with the board. The board will have to make rules for the discharge of employees. The agreement will remain in force until June 1, 1922, and will continue thereafter unless either party gives notice of a desire to change it 30 days prior to that date.

ARBITRATION IN NEW YORK PRINTING INDUSTRY

Principles Governing Wage Reduction

IN connection with the recent semi-annual adjustment of wages in the printing trades of New York, the arbitrators appointed to adjudicate between the claims of the printers and employers, in awarding a 12 per cent decrease in wages, laid down the principle that the amount of wages to be paid under the new schedule should be determined not only with regard to variations in the cost of living, but also with regard to the economic conditions existing in the industry. The employers had asked for 25 per cent reduction, and the unions for \$7 increase in the present

wage scale; and an interesting feature in the case is the fact that the unions had agreed that any award should be retroactive to the date of termination of the last adjustment, and had guaranteed through their respective organizations, the collecting from individual union employees of any decreased wages due the employers. The case was argued on the basis of an adjustment clause in the existing contracts which provides that the wages may be varied according to the cost of living and the economic conditions of the industry.

The award, as reported in *Bloomfield's Labor Digest* (New York), of May 14, emphasizes the opinion that a decline in the cost of living is not in itself sufficient to justify a reduction in wages. "The arbitrators are of the opinion," they say, "that the existing contract does not mean that a decrease in 'money' wages, still less in 'real' wages, can be justified merely by the fact of a decrease in the cost of living, regardless of the economic conditions of the industry. If exceptional profits, such as seem for instance to have been made in the recent probably unprecedented prosperity of the printing industry, at present existed, the arbitrators might be justified in raising still further the 'real' wages of the employees, by keeping 'money' wages at least the same in the face of a declining cost of living, or even by raising 'money' wages. However, this condition does not appear to exist. There is a real depression in the industry. Therefore, if the 'money' wages of employees were kept the same they would be receiving an advance in 'real' wages in a period when the industry was suffering from a depression. The business

depression, in conjunction with the additional costs due to the 44-hour week, seem to make necessary a reduction in wages, though not a reduction in 'real' wages." Elsewhere the arbitrators point out that "a cut in 'real' wages is a very serious thing for employees. . . . Gains in the standard of living by the mass of workers constitute a fundamental advance of civilization. A lowering of this standard can be granted by those interested in human progress only because of dire necessity, and no such situation has been positively proven from the incomplete tabulation of the cost sheets presented at the hearings." The arbitrators were Professor W. F. Ogden, of Columbia University, New York; Allan T. Burns, of the Carnegie Foundation; and R. B. Fosdick, recently under-secretary of the League of Nations. The Closed Shop Branch of the New York Employing Printers' Association granted the 44-hour week without decrease in wages due to the decrease in hours. Reports indicate that New York was the only important city to make the change in hour schedules without conflict.

APPRENTICESHIP IN NEW SOUTH WALES

THE Government of New South Wales, Australia, has in recent years taken steps to organize a system of apprenticeship on a new basis. In 1918, the New South Wales Board of Trade, an administrative body, was created under the Industrial Arbitration (Amendment) Act, and among other matters, the subject of apprenticeship was placed within its jurisdiction. A committee of the Board was appointed to consider this question, and its report, which deals very fully with the whole subject of apprenticeship, has since been published by the Board. The information in the present article is derived from this report.

In 1912, a Royal Commission reported upon the cause of the decline in the

apprenticeship of boys to skilled trades in New South Wales and the practicability of using technical and trade classes as aids to or substitutes for apprenticeship. The reasons for the decline in apprenticeship were found in the prevalence of the factory or large scale system of production; in the outstanding feature of modern free industrialism that the element of any moral obligation toward the other party in a labour contract, and the element of stability in the master and servant relation have been displaced by the supposed interest which capital has in a momentarily renewed command of labour forces just when they are wanted, and only for the time they are wanted, and by the supposed interest of labour in retaining

every facility for changing masters on sighted policy of parents and boys of accepting the highest wages that can readily be procured at the outset by boys who enter upon unskilled labour rather than skilled trades. The Commission found that technical education is not a substitute for apprenticeship except in some few processes, but merely a valuable aid to apprenticeship; that the interval of two years between the school-leaving age of 14 and 16, the age at which apprenticeship and technical training usually commence, causes mischief and wastage which it is almost impossible to overstate; that an industrial stocktaking in the nature of a definite classification of the skilled trades, and a definite delimitation of what an apprentice to such trades ought to do and ought to be taught was necessary; that the mischief of the improver as a nondescript free lance among industrials was fully recognized; that a system of registration of contracts of apprenticeship and supervising the teaching of the apprentice and his own discharge of duty was necessary and vital; and that a controlled right of transfer of an apprentice from one employer to another should be inaugurated. Acting upon the postulates that the creation and equipment of skilled workers is a national necessity, from both educational and industrial standpoints, and that the authority and organizing power of the state ought to be invoked to bring about a greater diffusion of skill, the Commission recommended principally: (a) that apprenticeship in skilled trades should be made compulsory for future juvenile labour (b) that technical education, if procurable, should be made obligatory on all apprentices; (c) that apprentices should receive additional pay for certified technical study; (d) that an apprenticeship commission should classify, for apprenticeship, trades and branches of trades which can be called skilled; (e) that the Commission should determine with regard to apprenticeship the period, rates of pay, length of attendance at technical classes,

and amount of pay for certified attendance; (f) that the Commission should supervise the carrying out by masters and apprentices of the apprenticeship agreement and transfer from one master to another. They also recommended the raising of the school-leaving age from 14 to 16, stating "If these two years were occupied with a continuance of teaching, boys and girls before they leave school, would, at any rate reach an age in which a little more judgment and a little more appreciation of what it means to be an artisan rather than a labourer might not unfairly be expected; and, moreover, the additional two years spent in the atmosphere of light discipline which exists in our schools would be of great value in its moral effect upon children who are now often prematurely old, not, indeed, in wisdom or judgment, but in the absence of restraint and in a freedom which is a little too free."

The powers and functions of the Board of Trade with regard to apprenticeship are: (a) To determine in what occupations and industries apprenticeship shall be a condition of employment of minors; (b) to prescribe the hours of employment, wages, and conditions of apprenticeship; (c) to determine whether and to what extent there shall be a limitation of the number of apprentices indentured in any trade or calling; (d) to determine to what extent technical education, if procurable, shall be obligatory upon apprentices and their masters; (e) to co-operate with the Department of Education in encouraging young persons to attend technical, trade, and continuation schools; (f) to establish and maintain an apprenticeship register, and record therein all indentures or other contracts of apprenticeship, and protect the contracts and interests of apprentices and all workers of minor age who are learners, and ensure the attendance of apprentices and learners at technical or trade schools; (g) to prescribe standard forms of apprenticeship for different trades and callings, and the manner in which and the persons by whom the making, carrying out, and

transfer of indentures or other contracts of apprenticeship shall be supervised; (h) to control and direct the conditions in all respects of apprenticeship in any industry. The Board is further empowered "to encourage and create councils of employers and employees for the purpose of encouraging the proper apprenticeship of all minors, and to provide for the welfare of juvenile labour."

In the opinion of the committee it is essential to the interests of the industrial and commercial prosperity of the State that the labour of young persons should be regulated with a view to their receiving a better general education than now and to their being adequately trained for technical and trade purposes. The essentials of the old guild system of apprenticeship and any system that may be substituted for it are to be found in the three conditions of supervision, training and opportunity for employment. In the industries in which apprenticeship is still practised there is now, generally speaking, no independent supervision of the apprentice and of the method of training to which he is subjected, and no means by which he can be assured of a reasonable opening in the ranks of the skilled workers of his trade when his period of apprenticeship has come to an end. Further, systematic methods of teaching are not required of the master.

The committee drew up a set of regulations for the consideration of the Board which provided that particulars relating to conditions of apprenticeship and juvenile labour should be furnished to the Board of Trade by employers and secretaries of trade unions; that in certain industries to be specified by the

Board the employer should provide competent instruction for his apprentices, making use of the available technical trade and continuation schools; that minors be permitted to be employed in any of the specified industries for three months on probation; that written contracts for probationers and minors and adult apprentices be made according to standard forms and submitted to the Board of Trade for approval before being executed and registered with the Board; that parties to a contract of apprenticeship in all their mutual relations submit to supervision by the Board of Trade or any person authorized by it, and report to the Board at regular intervals on the proper methods and effect of the teaching and service provided and rendered under the contract; that the proportion of apprentices to journeymen be restricted to one apprentice to every three or fraction of three skilled workers who have been with the same employer without intermission for the preceding six months, a minor on probation to rank as an apprentice but an apprentice who has served four-fifths of his time not to be counted; that any failure of an employer, apprentice, parent or guardian to carry out the terms of the contract should render him liable to a penalty; that at the expiration of the service of any apprentice the employer should deliver up to the Board of Trade any original written contract, and if the conditions have been observed the Board should endorse upon the document a certificate that the apprentice has satisfactorily fulfilled the conditions of apprenticeship.

This report was to be made a basis for the consideration of the question of apprenticeship at a public inquiry to be held by the Board of Trade.

REPORT ON 44-HOUR WEEK IN BUILDING AND IRON TRADES IN NEW SOUTH WALES

WING to industrial unrest in a county of New South Wales due to demands of the labour unions in the iron and building trades for a 44-hour week, the president of the New South Wales Board of Trade was appointed a Royal Commissioner to inquire especially into the advisability of adopting a 44-hour week in these industries and the probable effects of this reduction in hours on the industries concerned.

In his report, recently issued, the Commissioner discussed the world movement for the reduction of hours, and enumerated the trades in Australia in which the working hours have in recent years been reduced below 48. His recommendations were briefly as follows:

That the working hours in the building trades be reduced to 44 per week with five days of eight hours each and four hours on Saturdays, but that when building mechanics are employed in industries conducting continuous processes the ordinary hours of the industry shall be worked, and that the hours of stonemasons working under cover shall be reduced to 40 per week.

He further recommended the formation of an industrial council composed

of representatives of the Building Trades Association and a Federation of Workmen's Unions to devise schemes for the better and more rapid training of skilled mechanics, and for the admission of partially skilled men to skilled occupations; to devise a scheme for unemployment insurance; to consider proposals for improved methods of production; to fix wages and conditions of employment from year to year; and to discuss matters of mutual interest and consider schemes for co-operative production.

With regard to the iron trade, the Commissioner was of the opinion that the employees in these trades were entitled to a reduction of working hours to 44 per week but that the change should not be brought into operation for a period of six months. He considered that the immediate adoption of a shorter working week would cause serious public mischief, but that if employers were given a reasonable time to complete existing contracts and to re-organize their plants and methods the change could be effected without bad results. He also urged formation of an industrial council for these trades as in the building trades.

JUBILEE CONVENTION OF CANADIAN MANUFACTURERS' ASSOCIATION

THE fiftieth annual convention of the Canadian Manufacturers' Association was held in the City of Quebec on June 7-9. The delegates were formally welcomed by the Hon. L. A. Taschereau, premier of Quebec. President J. S. McKinnon, of Toronto, in his presidential address referred to the strides made by Canadian industries during the half century of the existence of the Association. The per capita production of manufactured goods had in-

creased from \$71 in 1881 to \$360 in 1917; a great industrial system had been built up in Canada, employing about 700,000 people, who, with their dependents constitute about 2,000,000 people, directly dependent for their living on manufacturing. Membership in the Association, at first confined mostly to Montreal, Toronto and Hamilton, now covered all parts of Canada, the increase in the four western provinces being especially marked.

The president referred to recent legislation in regard to the reduction of hours, the fixing of minimum wages, workmen's compensation and other social measures and claimed that "the effect of this legislation is to decrease the amount of work done by each individual, to increase the cost of finished products to consumers, and to divert money from capital investment, which would in time increase production and promote employment." These measures were well meant, he believed, but did not take sufficient account of practical economic laws, and the main result was that the consuming public had to pay more for the articles they bought. "Our law makers should relax their efforts;" the president asserted, "in addition to the Dominion, provincial and municipal governments there are numerous commissions and boards, all busily engaged in passing laws, restrictions and regulations." The investment of capital should be encouraged, he continued, whereas, during the past few years taxation had been specially heavy on manufacturing and business interests. The lesson of the past few years was that "the public is master of us all"; employers and employed are partners in production; consequently "profits, wages, benefits and all other factors entering into the cost of production, are subject to the desire and will of the buyers and must be determined accordingly. . . . Wages, cost of distribution, including transportation, interest on money and similar factors must bear a relationship to the cost of production and the selling price of goods, and this relationship is sooner or later determined by the buying and selling of the public." The prevalence of unemployment during the past winter was attributed by the president to "the restriction of export markets, due to exchange conditions, to the disinclination of our buyers to purchase in a falling market, to the unnecessarily large importations of goods from other countries which could have been made in Canada, and to the evil effects of

propaganda, creating labour unrest which in turn hampered the working of productive machinery."

Industrial Relations

The Industrial Relations Committee of the Association, in its report decided on the following course of action with respect to the resolutions passed at the International Labour Conference held at Washington, in November, 1919:

1. To oppose vigorously any legislation giving effect to the following conventions: (a) 8-hour day and 48-hour week. (b) Unemployment insurance. (c) The entire suppression of private employment agencies.

2. To endorse: (a) The prohibition of employment of women six weeks before and six weeks after childbirth. (b) All reasonable restriction of night work for women. (c) The reservation of the execution of public works for periods of unemployment.

The same committee reported that after studying the experience of other countries in regard to unemployment insurance, they found that the various schemes involved a "great danger of doing more harm than good". The committee favoured a centralized system of employment agencies under government control, but not to the entire exclusion of private employment agencies. With regard to questions relating to employment and industrial diseases the Dominion Government took the view that it already had sufficient powers under the Immigration Act and Department of Health Act to give effect to all the Washington Conventions with the exception of that relating to unemployment insurance, and an investigation was now being conducted by the Department of Labour into systems of unemployment insurance and old age pensions. As regards the Washington conventions relating to hours and conditions of labour which were declared to be questions for the provinces, the committee

found that while many of the provinces already have legislation which is in line with some of the less important conventions, such as night work for women and fixing the age for the employment of children in industry at fourteen, no province has passed any 8-hour day law. It is true that 8-hour day bills were introduced in several of the legislatures, including Ontario and Manitoba, but they were not government measures and not seriously pressed. The committee, however, had issued a strong circular pointing out the un wisdom of passing such legislation. The attitude of the Provincial Governments on this question seemed to be that it is impossible for any one province to pass such legislation in advance of the other provinces. This view was concurred in by practically all the labour leaders. Several of the Provincial Governments were understood to be in favour of a Dominion-Provincial conference on the subject, not merely of the 8-hour day, but also unemployment insurance and old-age pensions. The only country, the report stated, which has ratified all the conventions of the Washington Conference in the form in which they were passed, was Greece. As to the most important of the conventions, namely, that relating to the 8-hour day and 48-hour week, the only countries which had made much progress were Great Britain, France, Denmark, Switzerland and Holland. The experience in France and Denmark had been that the falling off in production had been in almost exact ratio to the reduction in hours. The conventions as to the employment of women during the night and fixing the maximum age for children in industry had been ratified by Great Britain and Greece, and in most of the other countries the necessary legislation had been prepared and laid before the various Parliaments. As regards the draft conventions relating to unemployment and reciprocity of treatment of foreign workers, while bills had been introduced in most of the Parliaments, practically none of them had yet become law.

At the request of the Dominion Government the Committee had nominated Mr. S. R. Parsons to serve on the panel created under the labour clauses of the Peace Treaty, composed of equal numbers of representatives of employers, workers and the public, from which might be chosen a board of three, to investigate and report on any infraction of any legislation enacted to give effect to the conventions passed by an International Labour Conference. The committee intimated, however, that in making the appointment the Association was not to be taken as believing in the desirability or practicability of such a commission of inquiry. (The other Canadian representatives on this panel will be Mr. Justice Duff, of the Supreme Court of Canada, and Mr. Jos. Gibbons, of the Street Railway Employees' Association, Toronto.) The committee had found itself unable to approve the proposal made by labour leaders for a second National Industrial Conference similar to that held at Ottawa in September, 1919, and on this view being communicated to the Minister of Labour the proposal was not pressed. The committee strongly condemned the allegations made by many labour leaders and others at the beginning of the season of serious depression and unemployment, that the depression was being deliberately engineered by employers in order to be able to dismiss their employees and re-engage them at lower rates of pay. "As the depression became worse, the falsehood of this accusation became so apparent that it was to some extent dropped, but it has never been formally retracted, and there is no doubt that it has done great mischief in the way of stirring up discontent and bitterness."

At the Building Trades Conference held at Toronto in December, the report continued, it was pointed out to the Minister of Labour that fully 80 per cent of the final cost for building represents actual "pay envelope." In these circumstances it was clear that no improvement could be expected unless and until the workmen, instead of de-

manding increases, should be willing to accept reasonable reductions. At the time of the December conference it was hoped and expected that the spring would see the usual increase of activity in the building trade and that, as a result of the consequent activity in other trades, more and more men would be employed and that the unemployment problem would cease to exist. As a matter of fact, of course, what has happened has been, first, that the wage demands have not moderated, at any rate sufficiently to give any real impetus to the building industry, and, second, many hundreds of men who were kept at work all winter manufacturing goods for which there was no demand, in the hope that orders would come in the spring, have been reluctantly discharged by their employers because the anticipated orders could not be secured. Thus on May 1 there were many thousands more men out of employment in Canada than on January 1.

The committee expressed the hope that much good might result from the second Building Trades conference held at Ottawa on May 3-5, "in the way of more reasonable wage demands, and also in the way of the education of public opinion as to the real cause of want of activity in the building trades."

The committee had recently authorized the inauguration of a bulletin service to furnish news as to developments in the sphere of industrial relations in various countries. Copies of the memorandum issued by the Dominion Labour Department on wages and hours of labour in Canada from 1901 to 1920, had been sent to all members of the Association. The committee's report con-

cludes by expressing the opinion that the extremists and radicals now carry less weight than they did a year ago, and that the public recognized that the continuance of wages at war levels was to a great extent the cause of high prices; and forecasts that the "Open Shop" movement will have far-reaching effects on "one of the greatest obstacles to the lowering of prices and the development of industry, namely, the closed shop in transportation."

Other Committees

The legislation committee reported that it had continued its efforts towards obtaining uniformity of legislation on commercial law throughout Canada. The Transportation Committee reported that high operating costs, high rates and declining prices of materials could not continue without serious results both to the railway companies and the shipping public. A revision of the cost of operating might be expected in the very near future.

Officers for the ensuing year were elected as follows: President, W. S. Fisher, St. John, N.B.; First Vice-president, John R. Shaw, Woodstock, Ont.; Second Vice-president, C. Howard Smith, Montreal; Treasurer, Thomas Roden, Toronto. The following were elected committee chairmen: *Industrial Relations*, S. R. Parsons, Toronto; *Tariff*, Jos. Picard, Quebec; *Transportation*, A. F. Hatch, Hamilton; *Legislation*, C. J. MacFarlane, Toronto; *Membership*, P. E. Joubert, Montreal; *Insurance*, A. Hewitt, Toronto; *Commercial Intelligence*, J. C. McMurray, Toronto; *Publishing*, J. E. M. Stewart, Toronto; *Education*, B. W. Coghlin, Montreal.

ANNUAL CONVENTION OF THE ONTARIO LABOUR EDUCATIONAL ASSOCIATION

THE nineteenth annual convention of the Ontario Labour Educational Association was held at Preston, Ontario, on May 24. There were 130 delegates present. The United Women's Educational Federation of Ontario, which was organized at the last annual meeting of the Association, was also in session. The executive committee reported that six additional Trades and Labour councils had recently affiliated. During the past year the Association had published the work of Dr. J. E. Hett, of Kitchener, "The Nationalization of the Medical Profession", which was being sold at 25c. a copy, all receipts in excess of cost being devoted to the Women's Educational Federation. The Association had also completed arrangements for the inauguration of an up-to-date news letter service, giving reliable information in regard to the doings of labour in both the industrial and political field. During the year the secretary of the Association had done considerable work of a legislative character, having taken up matters of import to the Labour Movement with both the Dominion and Provincial governments, seeking the passage of legislation in the interests of the workers. The executive recommended that the secretary immediately enter upon an extensive campaign to secure the affiliation of all labour bodies in the Province, visiting such centres as possible, as well as the local unions therein, and distributing the Association's literature. One of the big questions of the coming year is the popularizing of the demand for the union label. The executive committee's report was carried unanimously.

With reference to Dr. Hett's book, President Marsh stated that he had been requested by the secretary of the Ontario Medical Association to attend the annual meeting to be held at Niagara Falls from May 31 to June 3, to

discuss the question of how the medical fraternity could meet the views of organized labour in regard to reforms in the medical profession, and how the Ontario Medical Association could co-operate and meet the wishes of those who are engaged in work in the interests of the industrial classes. As President Marsh stated that he would be unable to attend this meeting, it was decided that the secretary should do so in his stead.

The financial report showed about \$2,000 in the treasury after all expenses were paid.

Among the important matters considered was that dealing with the problem of unemployment, and a resolution was sent to the Premier of Canada urging that provision be made to cope with the menacing conditions which it was believed might prevail during the winter of 1921-22. The provincial government will also be urged to take prompt action. Among the other resolutions passed were: The creation of a fair rent court with power to fix an equitable rent based on the cost of construction, to be dealt with by the provincial government; a protest against the introduction of compulsory military service in Canada; a resolution dealing with the housing situation and providing for the erection of workingmen's houses, and the prevention of rent profiteering; the establishment of an eight-hour day in the various industries by the federal and provincial governments; the carrying on of a systematic campaign by the Labour Educational Association in favour of unemployment insurance, old age pensions, and government insurance against sickness; amendment to the Mothers' Allowance Act to provide for mothers with one child coming within its scope; reaffirmation by the convention of its belief in public ownership; defeat of the open shop by insistence on label goods; that arrange-

ments be made with the Public School Teachers' Association for a joint conference with the Minister of Education and a special committee of the Legislature, with a view to the consolidation of the educational system, and better facilities for the children of workers; that the government control of liquors and beer for medicinal purposes be extended to government control for beverage purposes also; abolishment of cadet military training in the public schools; abolishment of home work for scholars, and equality of opportunity for men and women alike, politically, socially, and industrially; freedom of

education; education of the workers to the necessity of voting for working class candidates only in municipal, provincial and federal elections; that efforts be made for the extension of the branches of the Workers' Educational Association in the different cities with courses of study similar to those adopted by the Toronto Association.

The election of officers resulted as follows: President, James Marsh, Niagara Falls, Ont.; vice-president, Dr. J. E. Hett, Kitchener, Ont.; secretary-treasurer, Jos. T. Marks, Toronto.

It was decided to hold the next annual convention at Guelph.

CONGRESS OF INTERNATIONAL TRANSPORT WORKERS

A CONGRESS of the International Transport Workers' Federation was held at Geneva on April 18-22. There were 69 delegates present representing 27 organizations and 12 nationalities. The resolutions adopted dealt with the following subjects among others: The secretariat of the Federation was instructed to conduct an investigation with the object of ascertaining the extent of co-determination secured by various grades of railway workers in matters affecting conditions of employment and management of the various railway systems. The congress congratulated workers of the "subject races" upon their increasingly manifest desire to embrace trade-unionism, and urged all workers to do their utmost while resisting the competition of underpaid Asiatic and coloured labour—to raise the status of members of the "subject races" and to unite with them for the abolition of class-domination, throughout the world. With regard to uniform working conditions in international shipping, the congress instructed the executive committee to approach the international organizations of ship's officers, and where necessary the respective national organizations with the object of establishing national and international relations. The

executive committee was further instructed to institute an investigation into the legal obligations of seamen, to submit a report thereon, and to draft an outline of proposed legislation, in which it should be provided that seamen should not be liable to imprisonment for violation of ship's articles nor be compelled forcibly to fulfil their engagements. It was also instructed that the executive committee should enter into negotiations with the International Organization of Ship Owners and the International Labour Office with the object of introducing the 48-hour working week at sea as well as in port; to open negotiations with the International Organization of Ship Owners for the introduction of a uniform standard wage; to institute an inquiry for the formulation of a standard of accommodation on board ship for the ship's crew; to initiate a movement in favour of the uniform regulation of the minimum and maximum water free-board and the carrying of deck cargoes, an international regulation prescribing the minimum number of qualified seamen per ship to be carried as crew, with the stipulation that seven-eighths of the ship's crew must understand the language of the nation under whose colours the ship sails; to initiate

a movement in favour of an international regulation for the adoption of wireless telegraphy on ships carrying a crew of 40 hands or more; to initiate a movement in favour of indemnification in the event of unemployment or destitution caused by shipwreck, in accordance with the decisions of the general conference, and in favour of insurance against sickness, accidents, and old age. A resolution with regard to uniform working conditions for dock and waterside workers was passed, recommending the executive committee to convene special conferences of these workers of those ports which can be regarded as having special common interest, and to organize within the shortest possible delay a world conference of dock and waterside workers. A resolution was passed urging the workers of all countries to resist attempts to increase hours of labour or to force them to unnecessary overtime, and workers who are working more than eight hours per day were urged to make all possible efforts to reduce their hours of labour. The executive committee was instructed

to enter into negotiations with the international organization of employers to introduce measures which conformed to the "post-labour" registration scheme in vogue at Amsterdam and Rotterdam by which casual workers at the ports receive payments when unemployed either from their employers if enrolled in the first group of preference men, or from the out-of-work fund if in the second group.

The following members were elected to the governing body: Messrs. Jachade and Doring, Germany; Messrs. Williams and J. H. Thomas, Great Britain; Mr. Forstner, Austria; Mr. Lindley, Sweden; and Messrs. Bidegarry and Guinchard, France. The following were the members elected to the executive committee: Mr. R. Williams, Great Britain, Mr. Doring, Germany, Mr. Bidegarry, France, Mr. Lindley, Sweden, and Mr. Forstner, Austria. Mr. Edo Fimmen (Netherlands) was re-elected secretary of the Federation. The headquarters of the Federation was fixed at Amsterdam. The next congress will be held at Vienna in the autumn of 1922.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE FOUR WEEK PERIOD OF MARCH 28 TO APRIL 23, 1921

REPORTS from employment offices to the Dominion Headquarters of the Employment Service of Canada for the four-week period ended April 23, show an increase in the number of placements when compared with the reports for the preceding period. The offices reported that they had made 33,073 references to regular positions and that 23,602 placements were effected. When compared with the 13,842 placements reported during the preceding period this is an increase of 9,760 placements.

During the period under review, placements in regular positions were reported as follows: week ended April 2—4,596; week ended April 9—6,212; week ended April 16—6,399; week ended April 23—6,395. In addition 5,867 casual jobs (employment of a duration of one week or less is termed casual) were supplied and were reported by weeks as follows: week ended April 2—1,325; week ended April 9—1,423; week ended April 16—1,468; week ended April 23—1,660. Placements in casual work during the

preceding period totalled 5,040 representing an increase during the period under review of 836 casual placements.

The accompanying table gives in detail the work of the offices for the four-week period, March 28 to April 23. It will be noted that at the beginning of the period there were 34,799 applicants unplaced, of whom 33,046 were men and 1,733 were women. This compares with a total of 27,209 applicants unplaced on April 23 after allowance had been made for placements and cancellations. The number of vacancies remaining unfilled on March 28 was 8,953 while the vacancies unfilled on April 23, totalled 11,194.

During the period at present under review the number of applications reported by the offices totalled 42,804, of

which 33,685 were from men and 9,119 from women. The number of vacancies notified by employers to the service during this period was 35,791, of which 25,688 were for men and 10,103 for women. When comparing these figures with the corresponding figures for the preceding period it will be noted that there is an increase in registration of 11,302 applications and 13,526 vacancies.

The accompanying chart presents in graphic form the applications, vacancies and placements, week by week, since the beginning of October, 1919. The curves for applications and vacancies show an upward tendency during the period representing an increase from the preceding period. The curve for placements shows on the whole a corresponding increase.

EMPLOYMENT CONDITIONS IN CANADA FROM APRIL 17 TO MAY 14, 1921, AS REPORTED BY EMPLOYERS

WEEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada during the four weeks from April 17 to May 14 inclusive showed a moderate increase in payrolls for the first week, followed in the second week by a reduction of over 10,000 persons. In the third week there was recovery to the extent of approximately 13,000 persons, followed in the last week by another moderate increase. The net result for the whole period was a gain of over 9,000.

The change reported for each week as compared with the preceding week was as follows:—

Week ending April 23, an increase of 3,032 persons or 5 per cent.

Week ending April 30, a decrease of 10,354 persons or 1.7 per cent.

Week ending May 7, an increase of 12,961 persons or 2.2 per cent.

Week ending May 14, an increase of 3,768 persons or 6 per cent.

The downward tendency in the second week and also the recovery which characterized the third week were exaggerated by a temporary shut-down and subsequent re-opening of railway shops, principally in Quebec and Ontario. In the first week all provinces with the exception of Alberta reported increases in employment over the previous week, the unfavourable balance in the province being caused by contractions in payrolls in Coal Mining. Gains in Manitoba and Saskatchewan were so slight, however, that the western provinces as a unit registered a small decline. In the second week all districts with the exception of British Columbia reported decreased employment, Ontario and Quebec registering the largest losses because of the fluctuations in railway shops already mentioned. In the third week all districts without exception showed favourable balances, that of Ontario and Quebec for the same reason again totalling the largest aggregate.

The summary of returns by industrial groups shows that conditions varied from week to week. In the first week the most noticeable gains recorded were in the Logging group, chiefly in Quebec, British Columbia and New Brunswick, closely followed by Lumber and Lumber products in Ontario and British Columbia. The Manufacturing group as a unit showed the largest net gains, due mainly to the expansion of lumber. The only other noticeable increases in this group were in Pulp and Paper, Electric Power production and Tobacco, all chiefly in Quebec. Contractions were recorded in Sugar, Biscuits and Confectionery in Ontario and Quebec, Flour in Manitoba, Glass in Ontario, and Petroleum and Carbide in Ontario and British Columbia. In the Mining group there were reductions in Coal, chiefly in Alberta. Railway Transportation also showed a decline, more especially in the western provinces. Water traffic showed losses in the Maritime Provinces and gains in British Columbia, Quebec and Ontario. In the second week the only item of importance apart from the losses in the Iron and Steel group was a contraction on a much smaller scale in Railway Transportation, but downward movements of lesser importance occurred in Wholesale Trade and Railway Construction and Maintenance. Gains were recorded chiefly in Lumber and Lumber products and on a smaller scale in Logging. The losses in Railway Transportation were reported chiefly in the Maritime Provinces, while Wholesale Trade registered its decline almost wholly in the Prairie Provinces. In the third week the outstanding event was the recovery in the Iron and Steel group as mentioned. Other expansions of importance occurred in Water Transportation, Railway Construction and Maintenance and Lumber, while contractions were recorded chiefly in Pulp and Paper. The gains in Water Transportation were divided between Ontario and Quebec districts and British Co-

lumbia, chiefly the former, signifying a continuance of diminishing activity at winter seaports and the further transference of activity to upper St. Lawrence and Great Lake points. The losses reported in Pulp and Paper showed mainly in the Ontario and Quebec districts. In the fourth week the principal gains were in Lumber and Lumber products and Railway Construction. The only contractions of importance occurred in the Iron and Steel group, although there were slight declines in Textiles and Coal Mining.

Employment during the four weeks under review was much less favourably conditioned than in the same period of

1920, the index number averaging 85.8 as compared with an average of 104.5 at that time last year. All provinces shared in this depression, but the contractions in Ontario and Quebec were the most serious. The heaviest losses occurred in the Manufacturing group, chiefly in Iron and Steel products and Lumber.

The accompanying chart shows the weekly percentage change in the number of persons on payrolls since base week (January 17, 1920) as reported by those employers making returns, the number averaging over 5,200 firms each week. With the exception of the second week, the curve displayed a moderate upward tendency.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF APRIL, 1921, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of April, 1921, and is based on returns received from 1,661 labour organizations with a combined membership of 204,357 persons. For all occupations reporting, 16.27 per cent of the members were unemployed, as compared with 16.48 at the end of March 1921, 2.52 per cent as the close of April, 1920, and 4.44 per cent in April, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that the percentage of unemployment figures have reference only to those unions reporting.

While the percentage of unemployment during April showed very little change since the preceding month, the nominal decline which it registered may be attributed to increased activity in Building and Construction and Lumbering, also in the group of Miscellaneous trades. Manufacturing, particularly in the clothing division, manifested a heavy increase in unemployment, and in Transportation the percentage remained practically stationary.

Table I on this page summarizes the returns by provinces. Ontario and British Columbia registered smaller percentages of idleness than in the preceding month, but in the remaining provinces there was less activity. As compared with returns for April, 1920 and 1919, moreover, the percentage of unemployment in every province was substantially larger.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES.

The percentages of unemployment reported in the different occupations and industries are indicated in Table II on page 85.

Unemployment in the manufacturing and mechanical industries, as reported by 397 organizations with a total membership of 51,351 persons, was considerably more pronounced than in March and also than in April of preceding years, 21.27 per cent of the members being out of work as compared with 14.40 per cent in the previous month and with percentages of 2.28 and 3.17 in April, 1920 and 1919, respectively. The increased slackness in the first comparison occurred largely among the garment workers in Montreal. In addi-

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES.

Month	Manufacturing and Mechanical Industries	Metal, Machinery and Conveyances	Food, Tobacco and Liquors	Textile, Carpets and Cordage	Clothing	Pulp, Paper and Fibre	Printing, Publishing and Paper Goods	Woodworking and Furniture	Leather, Boots, Shoes, and Rubber	Glass Bottle Blowing	Jewelry Working	Oil Refining	Transportation	Steam Railways	Street and Electric Railways	Navigation	Teaming and Driving	Mining, Quarrying and Refining of Ores	Building and Construction	Public Employment	Fishing	Lumbering and Logging	Miscellaneous	All Occupations

tion, there was less activity for workers in textiles, carpets and cordage, pulp, paper and fibre, printing, publishing and paper goods, and oil refining, both as compared with March, 1921, and with April of preceding years. The percentage of unemployment in the metals, machinery and conveyances group showed a nominal decline as compared with the previous month, mainly on account of slightly increased activity for boilermakers and iron shipbuilders. Machinists, however, were not as fully employed, largely on account of temporary shutdowns in railway shops. In food, tobacco and liquors, woodworking and furniture, leather, boots, shoes and rubber, glass bottle blowing and jewelry working the percentages of unemployment were somewhat smaller than in March. But in all these groups the number of members out of work was substantially larger than in April, 1920 and 1919. In addition to the total unemployment, considerable short time was recorded by many of the unions mentioned above.

Reports were tabulated from 662 unions of transportation workers with an aggregate membership of 77,924 persons, indicating that 11.0 per cent of the members were out of work as compared with 10.84 per cent in March, 1921, 1.83 in April, 1920, and 3.52 per cent in April, 1919. The percentage of idleness among steam railway employees, whose returns constituted about 80 per cent of the entire group membership reporting, remained practically the same as in the preceding month, 12.53 per cent of the members being out of work as compared with 12.41 per cent in March. In April, 1920 and 1919, however, the percentages stood at 1.95 and 2.40 respectively. Street and electric railway employees and teamsters and chauffeurs were not as fully employed as in former months used in this article for comparison. Navigation workers, however, registered a smaller percentage of idleness than in March, 1921, and April, 1919, but the number out of work exceeded that recorded for April of last year. Reports were also tabulated from 14 associations of longshoremen with a

combined membership of 7,802 persons, of whom 2,145 members or 27.5 per cent were unemployed, compared with 26.5 per cent in the preceding month, and with percentages of 18.99 and 3.13 in April, 1920 and 1919 respectively. These returns, on account of the casual nature of longshore work, are not included in the accompanying tabulations. A large proportion of the unions reporting indicated a great deal of short time, in addition to the number of members entirely out of work.

In the mining, quarrying, and refining of ores group, returns were received from 36 unions with total membership of 11,134 persons, of whom 2,436 members were out of work. This represents an unemployment percentage of 21.89, as compared with 12.06 in March, 1921, 1.10 in April, 1920 and 2.69 in April, 1919. The greater part of this slackness occurred among mine workers in Nova Scotia, but the miners in Alberta also registered considerable inactivity. Quarry workers and mill and smeltermen, as reported by two unions of the former and one of the latter, showed more unemployment than in any of the months used here for comparison. Many miners were working short time, some of the mines being reported as working only three days a week.

The percentage of unemployment among workers in building and construction was 20.03 as compared with 25.67 per cent in March, 1921, 5.92 per cent in April, 1920, and 12.05 per cent in April, 1919. Bricklayers, masons and plasterers, carpenters and joiners, electrical workers, painters, decorators and paper hangers, tile layers, lathers and roofers and bridge and structural iron workers registered more activity than in March, but in practically every case the percentage of unemployment was larger than in April of previous years. Plumbers and steam fitters, and hod carriers and building labourers reported slight increases in the percentage of idleness as compared with March, while the number out of work in these trades greatly exceeded those indicated for April, 1920 and 1919. Employment for steam shovel and dredgemen was not as

brisk as in the preceding month, nor as in the corresponding month of last year, but there was slight decline in the percentage of idleness as compared with April, 1919. Granite and stone cutters were more fully employed than in any of the three months used in this article for comparison. As in the case of most of the industries mentioned here, a large number of the unions included under building and construction, reported that many of their members were working only part time.

In the public employment group, as indicated by 113 organizations with an aggregate membership of 10,343 persons, the percentage out of work was 3.79 as compared with percentages of 5.06, .43, .01 in March, 1921, April, 1920 and 1919, respectively. The slight decline in slackness in comparison with the returns for March represented greater activity for civic employees, who were not, however, as fully engaged as in April of preceding years.

Logging and lumber workers, as reported by three unions with a combined membership of 8,615 members, showed an unemployment percentage of 46.62 as compared with 60.75 per cent of idleness in March. Figures for April of previous years are not available. This decline in unemployment may be attributed partly to greater activity in the saw mills of British Columbia. Fishermen, as indicated by three unions, also reported less slackness than in March. There was, however, no idle-

ness reported in either April 1920 or 1919 in that group.

Unemployment in the group of miscellaneous trades as indicated by 158 unions with an aggregate membership of 13,772 persons, was less prevalent than in the preceding month, and also than in April, 1919, but the percentage of unemployment exceeded that registered in April of 1920. In this group 4.02 per cent of the members were out of work as compared with 10.04 per cent in March, 1921, 2.49 in April, 1920 and 4.80 per cent in April, 1919. Retail clerks, as reported by four unions, showed no unemployment either for this month or for March, 1921, or April, 1920, as compared with a small percentage in April, 1919. Hotel and Restaurant employees and unclassified workers recorded greater activity than in March. The former, however, were not as fully employed as in April, 1920 and 1919, while in the latter the percentage of idleness was larger than in the preceding year, but smaller than in April, 1919. Musicians and theatre employees registered nominal declines in unemployment as compared with the three months used in this article for comparison. Barbers, stationary engineers and firemen, on the other hand, were less fully employed than in March and also than in April, 1920 and 1919. A large number of these unions reported a substantial amount of short time.

The tabular statement on pages 816-817 presents the returns in some detail.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES, APRIL, 1921

REPORTS from 15 cities showing the number of civic employees temporarily engaged and the wages paid these persons during the month of April showed a nominal decline in the number of employees, with an increase of about 8 per cent in the wages paid, as compared with the preceding month. In April, 1921, 11,950 persons were temporarily employed, and the wages amounted to \$983,935.78 as compared with 12,001 employees and an aggre-

gate payroll of \$909,823.80 in the preceding month.

In comparison with the returns for the same period in last year there was a decline of slightly over 6 per cent in the number of employees with an increase of almost 9 per cent in the wages paid, there having been 12,740 employees with a total payroll of \$904,399.67 in April, 1920.

St. John, Ottawa, Toronto, Hamilton

London, Brandon, Saskatoon and Victoria registered increases in the number of persons temporarily employed as compared with both March, 1921 and April, 1920. In Regina and Moose Jaw there were gains in the former with losses in the latter comparison. On the contrary, Winnipeg and Vancouver recorded declines as compared with the preceding month but increases over April of last year. At Montreal, Calgary, and Edmonton there were decreases in both cases.

As to wages, St. John, Hamilton,

London, Regina, Brandon, Saskatoon, and Victoria recorded increases in the amounts paid as compared with both March 1921 and April 1920. Montreal, Ottawa, Toronto and Moose Jaw registered increases in comparison with the preceding month but declines as compared with April of last year. The reverse is true for Winnipeg, Edmonton and Vancouver, where the wages paid during April of last year exceeded those for the month under review. In Calgary there were losses in both comparisons.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS APRIL 1921, COMPARED WITH MARCH 1921 AND WITH APRIL 1920.

*Revised figures.

EMPLOYMENT IN THE BUILDING TRADES DURING APRIL, 1921, AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 56 cities, showed an increase during April as compared with the preceding month, the total value rising from \$6,610,703 in March to \$12,-

502,330 in April, an increase of \$5,891,627 or slightly over 89 per cent. All provinces showed gains in this comparison, that of \$1,690,379 or almost 43 per cent in Ontario being the largest

As compared with the figures for the

corresponding month in 1920, there was a decline of \$2,413,794 or little more than 16 per cent, the value for April of last year having been \$14,916,124. In this comparison, Prince Edward Island, Nova Scotia, Alberta and British Columbia registered increases, the gain in Alberta of \$726,155 or nearly 134 per cent, being the most pronounced. Of the decreases reported in the remaining provinces, that in Manitoba of \$2,061,760 or slightly over 70 per cent was the largest.

Of the larger cities, Toronto reported increases as compared with the returns for both March, 1921, and April, 1920. In Montreal, Winnipeg and Edmonton there were gains in the former with losses in the latter comparison. On the contrary, Vancouver showed less building activity as indicated by building permits during April than in the preceding month, but the value exceeded that issued for April, 1920.

Of the smaller centres, Charlottetown, Halifax, Sydney, Quebec, Guelph, London, Niagara Falls, Ottawa, Port Arthur, Sault Ste. Marie, Calgary, Point Grey and Victoria registered large increases in both cases.

The returns from 35 cities formerly used in this report (which are distinguished by asterisks and which are also tabulated separately for statistical purposes), showed that the total value of the building permits issued by these cities was \$10,758,398, as compared with \$5,789,237 in March. There was therefore, an increase of \$4,969,161 or 85.8 per cent as compared with the preceding month. In comparison with the figures for April, 1920, however, there was a decline of \$3,153,284 or almost 23 per cent, the value for that month having been \$13,911,682.

FAIR WAGE CONTRACTS, JUNE, 1921

DURING June the Department of Labour received for insertion in the *LABOUR GAZETTE* the following information relative to six fair wage contracts, of which two were awarded by the Department of Public Works, three by the Department of Railways and Canals, and one by the Canadian National Railways. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Supply and installation of post office fittings in public building, Granby, Quebec. Name of contractor, The J. T. Schell Company, Alexandria, Ontario. Date of contract, May 17, 1921. Amount of contract, \$3,977.

Repairs to superstructure of western breakwater, Port Colborne, Ontario. Name of contractor, Port Arthur Construction Company, Limited, Toronto, Ontario. Date of contract, May 7, 1921. Amount of contract, unit prices.

DEPARTMENT OF RAILWAYS AND CANALS

Completion of the construction of section No. 5 of the Welland Ship Canal. Name of contractor, Canadian Dredging Company, Limited. Date of contract, May 28, 1921. Amount of contract, schedule rates.

Construction of a rock fill to protect sliding embankment at Mile 73.7 Sioux Lookout Subdivision, Central District, National Transcontinental Railway. Name of contractor, John Welch, Port Arthur, Ont. Date of contract, October 1, 1920. Amount of contract, cost plus 10 per cent.

Labour only for the erection and completion of a car repair shop at Mission, Ont. Canadian National Railways. Name of contractor, J. H. Simmons, Winnipeg, Man. Amount of contract, \$7,228.

CANADIAN NATIONAL RAILWAYS

Construction of culvert at Mile 36.7, Lake Superior Division, Western Lines. Name of contractor, Claydon Co., Ltd. Date of contract, 1920.

RECENT CHANGES IN WAGES AND HOURS OF LABOUR IN CANADA

THE following is a summary of the principal changes in wages and hours of labour in Canada of which information has reached the Department during the past month, continuing the record published in the LABOUR GAZETTE for May. In certain industries changes are being made about which definite information is not yet available, notably, Pulp and Paper. The situation as regards changes in railway wages is outlined in another article in this issue.

Metal Trades

NOVA SCOTIA.—*New Glasgow*: One foundry reduced wages per hour between January and May, 1921, as follows: blacksmiths, from 50 to 40 cents; machinists, from 55 to 44 cents; pattern-makers, from 55 to 48 cents; moulders, from 62½ to 50 cents; helpers, from 35 to 28 cents.

QUEBEC.—*Sherbrooke*: One firm reduced wages per hour between January and June, 1921, as follows: boiler-makers, from 60 to 54 cents; labourers from 32-35 to 30-32 cents; machinists, from 45-55 to 40-50 cents; pattern-makers, from 45-55 to 40-50 cents; plumbers, from 50 to 45 cents; plumbers' helpers, from 35-40 to 30-35 cents.

ONTARIO.—*Brantford*: One firm reduced wages per hour between January and June, 1921, as follows: machinists, from 65-80 to 55-75 cents, hours reduced from 49 to 48; fitters, from 65-70 to 50-67 cents, hours remaining 48. *Galt*: One firm reduced wages of all employees 10 per cent. Reduction effective in some cases in May, in others in June. *Hamilton*: Wages in one firm manufacturing farming implements have been gradually decreased from January to May, 1921, average earnings per hour being as follows: day workers, 632 men, 56 cents in January; 413 men, 48 cents in May; piece workers, 891 men, 67 cents in

January; 732 men, 55 cents in May; day workers, 11 women, 34 cents in January; 8 women, 31 cents in May; piece workers, 61 women, 45 cents in January; 45 women, 37 cents in May; and in another factory of the same company, day workers, 398 men, 56 cents in January; 305 men, 47 cents in May; piece workers, 400 men, 71 cents in January; 311 men, 60 cents in May; day workers, female, reduced from 32 cents to 30 cents. All firms employing metal polishers have cut wages 5 to 20 per cent, working hours now being 40, 32 and 27 per week. *Toronto*: One firm between January and June reduced wages per hour as follows, all continuing to work 48 hours: 26 moulders' helpers, from 50 to 45 cents; 9 boilermakers' helpers, from 55 to 50 cents; 12 moulders, from 85 to 72-81 cents; boiler-makers and fitters, from 79 to 68½-71 cents; millwrights, from 78 to 63-65 cents; machinists, from 78-82 to 71-74 cents. Another firm during the same period reduced wages of 13 boilermakers from 71-84 to 63-80 cents; boiler-makers' helpers, from 50-63 cents (in August, 1920) to 38-59½ cents; 3 blacksmiths, from 73-81 to 65½-71½ cents; 5 blacksmiths' helpers, from 53-66 to 47½-59½ cents; 14 machinists' fitters, from 77-86 to 63-80 cents; 20 machinists, from 77-86 to 65-80 cents; 14 machinists' helpers, from 50-61 to 45-55 cents; 7 patternmakers, from 88 to 75 cents; 14 moulders, from 90 to 75 cents.

Foods, etc.

ALBERTA.—*Medicine Hat*: Wages of flour mill workers have been reduced 10-15 per cent.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

AGREEMENTS effected between employers and employees and schedules of wages and working conditions received in the Department are published in summary form in the LABOUR GAZETTE each month. In most cases such agreements are signed by both parties, but verbal agreements are included in the record, this term being interpreted to include schedules of rates of wages, hours of labour and other conditions of employment agreed upon between certain of the employees and employers concerned, and in effect though not signed. In the case of each agreement the rates of wages in the principal classes of labour are given, together with an outline of the more important working conditions and other information of general interest. The following is a summary of the more important agreements and schedules recently received by the Department, arranged by industrial groups.

Printing and Publishing

WINNIPEG, MAN.—NEWSPAPER PUBLISHERS OF THE CITY OF WINNIPEG, AND WEB PRESSMEN'S UNION No. 35. Agreement in effect from May 1, 1920 to May 1, 1923. Summary of agreement given in the LABOUR GAZETTE for September, 1920, page 1229.

New wage scale in effect from May 1, 1921, to May 1, 1922; Wages, per week: Apprentices, first year, \$20; second year, \$25; third year, \$30; fourth year, \$35; fifth year, \$40; journeymen, \$44; man in charge, \$50.

WINNIPEG, MAN.—PUBLISHERS OF TWO DAILY PAPERS IN WINNIPEG, AND JOURNEYMEN STEREOTYPERS. Agreement to be in effect from April 1, 1921, to March 31, 1922.

Hours per week: day, eight; night, seven. Overtime, first three hours, time and one-half; thereafter and Sundays and holidays, double time.

Any portion of a day to constitute a day's work. No apprentice to work overtime when a journeyman can be employed.

Wages: Per week—Journeymen, \$44; Apprentices, first year, \$20; \$5 per week increase every year until journeymen's rate is reached or apprenticeship is served. In case of apprentices employed after date of agreement, \$2 per week to be deducted from wages for first six months, being probationary period, this to be refunded as back pay at end of period if work has been satisfactory.

Union reserves right to refuse work from or for unfair offices.

Local conciliation and arbitration provisions of Stereotypers' Union and American Newspaper Publishers' Association to be in force, with this alteration, that there shall be one arbiter selected by each side and a third by them.

Transportation—Electric Railways

WINNIPEG, MAN.—WINNIPEG ELECTRIC RAILWAY COMPANY, AND MOTORMEN AND CONDUCTORS OF THE WINNIPEG ELECTRIC RAILWAY COMPANY, REPRESENTED BY A COMMITTEE. Agreement in effect from May 1, 1921 to April 30, 1922, and thereafter unless 30 days' notice of change be given.

If during term of agreement the Company by reason of something beyond its control is deprived of any considerable portion of its revenue and is thereby unable to pay the wages herein agreed to, the Company shall be set at liberty, on giving thirty days' notice, to terminate agreement in so far as it affects wages.

Wages: Per hour.—Motormen and conductors, first six months, 50 cents; second six months, 53 cents; second year, 57 cents; thereafter, 60 cents. Sundays, 5 cents over scale. Extra men, minimum per week, \$20. Overtime rate, time and one-half. Train-students, 5 cents extra per hour.

Regulations laid down for equipment of cars, seniority, promotion, uniforms, schedules, reports, motor bus operation and special runs.

General Working Conditions: Neither Company nor employees to discriminate against any employee for being or not being a member of the organization represented by committee signing this agreement.

Reasonable leave of absence to be granted on application.

Any employee taking office in the Employees' Organization which requires absence from the Company's employ to retain seniority rights during absence and to be permitted to return upon retirement from office.

Officers of the Employees' Organization to be granted leave of absence on

business of the employees in so far as regular operation of the service will permit.

In case of employees laid off during slack work, youngest men in the service to be laid off first. Men laid off to be given preference when Company requires more men.

Grievances: Company through its officers to meet officers of the Employees' Organization or a committee of employees upon any and all questions arising between the two parties. Complaints and grievances to be adjusted by the traffic superintendent if possible; otherwise, matter to be taken up with Company direct by a committee representing men with grievance. No strike or lockout pending negotiations.

WINNIPEG, MAN.—WINNIPEG ELECTRIC RAILWAY COMPANY AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL No. 1037. Agreement to be in effect from May 1, 1921, to April 30, 1922.

Company if deprived of any considerable portion of its revenues and unable to pay wages as specified here to have liberty to terminate on thirty days' notice agreement affecting wages.

Company not to discriminate against employees for being union members.

Grievances to be stated in writing to the Grievance Committee, who will if necessary take it to proper authorities.

Hours of labour, 44 per week. Saturday afternoon and overtime, time and one-half; after midnight and Sundays and holidays, double time. An employee who has worked overtime not to be laid off to equalize overtime.

Linemen on out of town work to be provided with transportation and board in advance, with no loss of time while absent.

Seniority with efficiency to prevail in all departments.

Wages: Per hour.—Foreman, 98½ cents; troubleman, lineman on emergency truck and sub-foreman, 94½ cents; linemen journeymen, 92½ cents; linemen apprentices, first year, 65½

cents; second year, 73½ cents; third year, 81½ cents. Linemen hired to do out of town work, 98½ cents, or board and 86½ cents; lamp trimmers, first six months, 50 cents; second six months, 60 cents; second year, 70 cents.

WINNIPEG, MAN.—WINNIPEG ELECTRIC RAILWAY COMPANY AND EMPLOYEES, MEMBERS OF THE GAS WORKERS' UNION OF WINNIPEG. Agreement to be in effect from May 1, 1921, until May 1, 1922, and thereafter unless thirty days' notice of change has been given.

If during currency of agreement, by reason of action of Civic Authorities the Company is deprived of ability to pay the wages herein agreed to, Company to be at liberty on giving thirty days' notice to terminate agreement in so far as it concerns wages.

Neither Company, employees nor union to discriminate against any employee for being or not being a union member; foremen not to be union members.

Wages: Per hour—Machine men, 65 cents; front door men, back door men, pipe jumpers, hand stokers and scurfers, fire cleaners, 63 cents; trimmers, boiler men, firemen, scurfers' helpers, boiler cleaner, 55 cents; work fitters, blacksmiths, handyman, 60 cents; yard men and labour in coal cars and gas works 45 cents; coal elevator operators, 53 cents.

Overtime, time and one-half. Sundays, holidays, etc., no overtime if time comes in regular shift.

Employees to have privileges of passes as previously.

Hours of labour, eight per day in gallery; nine for yard men, labourers, etc., 48 and 54 hours per week.

Leave of absence to be granted if reasonable on application to foreman, and to officers for union business. Employees on shift work to change shift as arranged by Company and union.

In case of vacancy men to be given preference by seniority and efficiency.

In case of grievances demanding immediate attention, foremen to confer

with representative of union; employees if not satisfied may appeal to the superintendent, carrying out the orders of the foreman pending the appeal.

Company, through representatives, to meet and confer with representatives of employees on any and all questions arising between Company and employees.

WINNIPEG, MAN.—WINNIPEG ELECTRIC RAILWAY COMPANY AND BARN SHOP AND SHEDMEN REPRESENTED BY A COMMITTEE. Agreement to be in effect from May 1, 1921, to April 30, 1922, and thereafter, unless terminated after thirty days' notice.

Company, if deprived during currency of agreement of any considerable portion of revenues, to be at liberty on giving thirty days' notice to terminate agreement where it affects wages.

Wages: Shops and Car Barns: (See rates for these classes given in agreement between Winnipeg Electric Railway Company and Winnipeg Street Railway Employees' Union in the *LABOUR GAZETTE* for September, 1920, page 1,233.) Car House Inspection and Cleaning: Per hour—Car repair men or car inspectors, first three months, 44 cents; second three months, 46 cents; second six months, 49 cents; third six months, 51 cents; fourth six months, 57 cents. Night and shift work, 2 cents in advance of day scale, except the following rate: fourth six months, 60 cents. Car cleaners, sweepers, stove tenders: day work, 44 cents, night work 46 cents.

Hours of labour: Eight per day; overtime, with certain exceptions, time and one-half. Saturdays, from May to September inclusive, 4 hours except for car maintenance men, who will work when necessary, and not be paid overtime rate. Holidays, time and one-half.

Seniority with efficiency to govern in all departments.

Neither Company nor employees to discriminate against any employee for being or not being a member of the organization represented by committee executing this agreement.

Reasonable leave to be granted on

application to foreman. Employees elected to office in Employees' Organization to retain seniority rights when absent on organization business.

In reduction of staff during slack season, youngest men in service to be laid off first and given preference, efficiency being considered when staff is increased.

Employees to have free transportation.

Officers of Company to meet officers of Employees' Organization on questions arising between them. Complaints and grievances to be adjusted by superintendent or foreman, if possible, or by Company and a committee of men. No lockout or strike to take place in the meantime.

WINNIPEG, MAN.—WINNIPEG ELECTRIC RAILWAY COMPANY AND CERTAIN EMPLOYEES, MEMBERS OF THE INTERNATIONAL ASSOCIATION OF MACHINISTS IN THE GAS DISTRIBUTION DEPARTMENT. Agreement to be in effect from May 1, 1921, to April 30, 1922.

Company, if deprived of any considerable revenue and so unable to pay wages herein agreed to, to be at liberty to terminate wage clause of agreement on thirty days' notice.

Hours of labour, 44 per week; provided that when necessary, any or all will work Saturday afternoons not counting this as overtime.

Grievances: Complaints and grievances to be adjusted by foreman in charge if possible, or by Company and committee representing the men, or by a committee of representatives from different crafts meeting the Company. Pending settlement, no strike or lockout to take place.

No discrimination against employees by Company or employees for being or not being union members, nor for representing fellow employees.

In case of vacancies, men having seniority in Company's service to be given preference, efficiency considered.

Holidays, time and one-half, except when men are on regular shift, which

shall count as straight time up to eight hours, thereafter, time and one-half.

Wages: Per hour—Gas fitter, complaint man, meter setter, main and service foreman, caulker, 72 cents.

LONDON, ONT.—THE LONDON STREET RAILWAY COMPANY AND CERTAIN OF ITS EMPLOYEES. Agreement to be in effect from May 1, 1921, and thereafter with sixty days' notice of change or termination.

Employees to use own judgment about joining the Amalgamated Association of Street and Electric Railway Employees of America. New employees to be considered on probation.

Company to meet and treat with any authorized committee of employees on all matters and grievances affecting them. Any employee suspended or discharged to have right to have case considered by committee of employees and superintendent.

Seniority to govern in selection of runs.

Motormen and Conductors: Wages, per hour—First year, 43 cents; second year, 46 cents; thereafter, 48 cents. Overtime and Sundays, 12 cents above scale. Spares, 12 cents above scale after completion of a schedule day's run or after 10 hours.

Shopmen, Barnmen, Linemen: Wages paid as per schedule attached to and forming part of agreement, which is for individual employees. Sundays, overtime and emergency work, 12 cents per hour additional.

Trackmen: Wages as per schedule for individual employees attached to and forming part of agreement. Sundays and overtime, 12 cents additional. Emergency work after regular schedule, time and one-half.

Arrangements to be made by Company to let men off one day each week when working on Sunday.

Motormen and conductors training students, 3 cents above scale.

Application for leave of absence to be made to superintendent.

Transportation—Water

MONTREAL, QUE.—THE ANCHOR-DONALDSON LINE, LIMITED; CAIRN-THOMSON LINE; CANADA LINE; CANADA STEAMSHIP LINES, LIMITED; CANADIAN GOVERNMENT MERCHANT MARINE, LIMITED; CANADIAN PACIFIC OCEAN SERVICES, LIMITED; CROWN LINE; CUNARD LINE; DIRECT LINE; DONALDSON LINE, LIMITED; ELLERMAN-BUCKNALL STEAMSHIP CO., LIMITED; FURNESS LINE; HEAD LINE; MANCHESTER LINERS; HUDSON'S BAY COMPANY; LEYLAND LINE; NEW ZEALAND SHIPPING COMPANY, LIMITED; SOUTH AND WEST AFRICAN LINES; THE WHITE STAR DOMINION LINE, AND THE SHIPLINERS' ASSOCIATION OF THE PORT OF MONTREAL, LOCAL 2098. Agreement to be in effect from April 16, 1921, until April 16, 1922.

Companies agree to deposit \$500 with an incorporated trust company or other party as trustees, as a guarantee for the due performance by them of agreement.

Working hours from 7 a.m. until noon and from 1 p.m. until 6 p.m., at 60 cents per hour; and from 7 p.m. until 11 p.m., and from midnight until 5 a.m. at 75 cents per hour. Sundays, double time.

Running of grain in pipes to be stopped while men go down in the hold to work. Conditions and rates mentioned in agreement to apply to all ocean steamships coming into Montreal under the Companies' jurisdiction.

In consideration of scale of wages and schedule of hours and other undertakings of the Companies, the shipliners agree to deposit \$500 with an incorporated trust company of other party as trustees as a guarantee for the due performance by them of this agreement; to supply the necessary men to perform the work of shipliners; that shipliners will work under this schedule until end of agreement.

The above mentioned sums of \$500 to be applied by trustees in payment of judgments of any court in the Province in favour of the other party. At expiration of agreement, balance of deposit to be returned to each party.

Companies agree to make up any difference so the shipliners will get a return of not less than 6 per cent on money deposited in trust.

MONTREAL, QUE.—STEAMSHIP COMPANIES AS NAMED IN PREVIOUS AGREEMENT AND THE STEAMSHIP CHECKERS' UNION OF THE PORT OF MONTREAL. Agreement to be effective from the opening until the close of navigation for the season of 1921 and thereafter unless 30 days' notice of change be given in writing.

Wages: Per hour—Checkers, day work, 50 cents; night work, 60 cents. Coopers and gearmen, day work, 49 cents; night work, 59 cents; shedmen, day work, 40 cents; night work, 50 cents. Sunday rate, double time. Checker temporarily in charge of two or more checkers, 5 cents per hour above scale.

MONTREAL, QUE.—STEAMSHIP COMPANIES AS IN TWO PREVIOUS AGREEMENTS, AND SYNDICATED LONGSHOREMEN'S ASSOCIATION OF THE PORT OF MONTREAL. Agreement to be in effect from January 1, 1921 to January 1, 1922.

Companies agree to deposit \$2,000 with an incorporated trust company or other party as a guarantee of due performance by them of this agreement.

Working hours: 7 a.m. until noon, and 1 p.m. until 6 p.m., at rate of 60 cents per hour; from 7 p.m. until 11 p. m., at 80 cents per hour; and from midnight until 5 a.m., at 90 cents per hour. Sunday rate, double time.

Nitrate and bulk sulphur, and grain trimming and bagging: Per hour—day work, 75 cents; evening work, 95 cents; after midnight, \$1.12½. Running of grains in pipes to be stopped while the men go down in the hold to work.

Coal-handling on general cargo vessels, per hour, day work, 65 cents; evening work, 85 cents; after midnight, 97½ cents.

Companies agree if requested to furnish men with the best respirators for use while trimming grain.

The union to deposit \$2,000 with an

incorporated trust company or other party as guarantee of performance of agreement; to supply necessary men to perform work of longshoremen; to have each member sign a personal contract with the Company.

The two deposits of \$2,000 to be applied in payment of judgments of any Court in Province of Quebec in favour of the other party. At expiration of agreement, each deposit with accrued interest to be returned to party entitled thereto, Companies agreeing to make up difference that longshoremen may receive not less than 6 per cent on money deposited in trust.

Building and Construction

SASKATOON, SASK.—MASTER PAINTERS, AND BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, No. 227. Agreement to be in effect from March 31, 1921 to March 31, 1922. Notification of change to be given by either party by January 15.

Wages: Per hour—80 cents. Hours of labour, 8 per day, 4 on Saturdays. Overtime until midnight, time and one-half, after midnight, double time. Regular night work, time and one-quarter. Sundays and holidays, double time.

Country work, expenses out and in once a month; extra board over \$7. No overtime pay.

No employee to be allowed to contract for or do work on his own behalf while working for his employer.

WINNIPEG, MAN.—GENERAL CONTRACTORS' SECTION OF THE WINNIPEG BUILDERS' EXCHANGE, AND BRICKLAYERS' AND MASONS' INTERNATIONAL UNION No. 1 OF MANITOBA. Agreement to be in effect from May 1, 1921 to April 30, 1922.

Object of agreement, to stabilize the industry and prevent any lockout or strike, and ensure a peaceable adjustment of grievances and disputes.

A joint arbitration committee to be formed of three members of each party, to investigate into and try to settle disputes, settlement to be binding on both parties.

No strikes to be participated in until matter has been brought before joint arbitration committee, committee to be called within 48 hours, decision to be reached within following 48 hours.

Hours of labour, 8 per day, 4 on Saturday. Overtime (except on shift work) up to 10 p.m., time and one-half; thereafter and Saturday afternoons, Sundays and holidays, double time. Shift work, 7½ hours per day.

Wages: Per hour—Bricklayers and masons, \$1.15.

Extra car fare for work outside limit of regular city fare; or failing car service, walking time of three miles per hour to be allowed.

Men sent out of town to have transportation paid. Travelling time to be paid at regular rate.

Foreman to be good standing union member, and to receive 10 cents per hour above journeymen's rate. This does not apply unless at least three members are employed.

WINNIPEG, MAN.—GENERAL CONTRACTORS' SECTION, WINNIPEG BUILDERS' EXCHANGE, AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, DISTRICT COUNCIL, WINNIPEG, LOCALS 343 AND 2655. Agreement to be in effect from May 1, 1921, to April 30, 1922.

Object of agreement, to stabilize the industry and prevent any lockout or strike, and ensure a peaceable adjustment of grievances and disputes.

No strikes to be participated in until matter has been brought before the Joint Arbitration Committee, committee to be called within 48 hours, decision to be reached within following 48 hours. This Committee to be formed of three members of each party, who shall investigate into and try to settle disputes, settlement to be binding on both parties.

Contractors to give preference to members of the Union, all other things being equal.

Hours of labour, 8 per day, 4 hours on Saturdays.

Overtime, time and one-half over 12 hours, Sundays and holidays, double time.

Wages: Per hour, 90 cents.

Car fare to be paid on work outside limit of regular car fare.

Men sent out of town to have transportation paid. Travelling time to be paid at regular rate.

EDMONTON, ALTA.—EDMONTON GENERAL CONTRACTORS' ASSOCIATION AND EDMONTON DISTRICT COUNCIL OF CARPENTERS. Agreement to be in effect from May 1, 1921, to April 30, 1922, notice of change to be given by January 1, 1922, otherwise agreement to be in force for another year.

Each body to have equal representation on any committee having business in connection with agreement.

Minimum wages, carpenters, 85 cents per hour.

No work Saturday afternoon, except to preserve life and property.

Hours of labour, eight per day, four hours on Saturday.

Overtime, after eight hours, time and one-half. Holidays, double time. No work on Labour Day.

In double shift, single time pay to govern, no man to work more than eight hours in twenty-four at straight time rate.

Coal Mining

BRULÉ MINES, ALTA.—THE BLUE DIAMOND COAL COMPANY LIMITED, AND THE BRULÉ COMMUNITY CLUB OF BRULÉ. Agreement (open shop) signed April 27, 1921.

General committee to be formed of seven members from various sections of the workers—three of whom to be chosen to act as a pit committee, and four as a welfare committee. Pit committee to settle grievances or disputes. In event of pit boss and employees failing to agree on the point at issue, matter to be referred to a joint conference of the pit committee and mine superintendent, and failing settlement, to the general manager. Pending settle-

ment of disputes, miners, mine labourers and all parties to continue to work.

Miners to have privilege of appointing their own check-weighman, same to render account of all coal weighed or checked and to allow cars to be tared from time to time and machine to be tested, to deduct from wages of contract miners amounts designated from time to time.

In abnormal places, miner to receive minimum district rate. A man on rock work to be considered and paid as a rock miner. A driller using an air drill to be paid machine runner's wages. A man engaged on work in both rock and coal to be classed as rock or coal miner, depending on whether more loose rock or loose coal is handled. This applies also to brushing. Average district rate of wages to be paid.

Arrangements to be made concerning doctor and hospital.

Employees before absenting themselves from work except through sickness to arrange with pit boss or foreman.

Rate for wet places to be in accordance with district rates except when extra remuneration is now provided for in contract rates.

Dockage Clause:

Twenty-eight pounds of coal to be added to tare of every car to offset refuse in coal. Any man loading fifty pounds of rock or bone in a car to lose one hundred pounds of coal; one hundred pounds of rock or bone, to lose four hundred pounds of coal; one hundred and fifty pounds of rock or bone, to lose whole car. Mine manager to give warning of offences and cause a record of same to be kept.

Forepoling or lagging to be paid forepoling price; side-lagging to be paid 36 cents per lineal yard.

Price for new work to be settled by a joint committee, who in case of failure to agree shall select an independent chairman.

No sub-contracting to be allowed in any mine operated by the company.

In case of local or general suspension

of mining, engineers, firemen and pumpmen to continue to work and protect the company's property.

Single shift system to be adhered to in rooms and pillars. Company to supply each miner with an equal turn of cars. Overtime, scale rate per hour.

Civic schedules

WINNIPEG, MAN.—CITY OF WINNIPEG AND VARIOUS CLASSES OF EMPLOYEES. Schedules of wages and working conditions for 1921.

LIGHT AND POWER DEPARTMENT.

Station Maintenance, wireman.—Hours of labour, eight per day, four on Saturdays. Overtime up to 48 hours, exclusive of Saturday afternoons, straight time. Before reducing hours, temporary men to be laid off. Then week to be reduced to five days of eight hours; no extra men to be hired until schedule hours are resumed, when men with previous service shall be given preference.

Members of permanent staff after twelve months' service, one week's holiday with pay; after two years, two weeks.

Employees to be paid fortnightly.

Overtime, time and one-half. After midnight and Sundays and holidays, double time. Employees who have worked overtime not to be laid off to equalize overtime worked.

Seniority with efficiency to prevail.

Wages: Per hour—Apprentice, initial rate 35 cents, increasing 5 cents per hour every six months up to last six months of fourth year, 80 cents; helper 70½ cents; journeymen, 85½ cents; charge hand, 87½ cents; foreman, \$1.04½.

Draft of agreement for fiscal year to be submitted by employees on or before January 1; draft to be considered by the City and a Committee of employees; failing agreement, difference to be referred to the Joint Council of Industry; pending decision, no strike

to take place. This procedure to be followed in case of all disputes.

Meter Department Staff.—Hours of labour, reduction of staff, holidays and overtime as for Light and Power Department.

Men sent out of town to have transportation and board in advance, and no loss of time.

Wages: Per hour—Apprentice, initial rate, 35 cents, with increase of 5 cents per hour every six months up to last six months of fourth year, 80 cents; journeyman, 85 cents; specialist, 92½ cents; journeyman's helper, 63 cents; foreman, \$1.01½.

Submission of schedules and settlement of disputes as for Light and Power Department.

Operating Staff.—Hours of labour and holidays as in two previous agreements.

Overtime over 48 hours, time and one-half for first four hours; double time thereafter for time worked over first regular eight hours of shift, such time not to be deducted from regular 48 hours.

Provision made for relief work and assistant operators.

In case of vacancies on the staff, preference to be given to competent journeymen employees.

Periods for preparation for operators moved to stations where they have not previously operated: At power house, 2 weeks; at terminal station, 2 weeks; at all other stations, 1 week.

Power House and boiler room employees, hours of labour, 8 hours per day, City to have right to divide this into shifts. Sundays, holidays, and after midnight, double time; other overtime, time and one-half.

Wages: Per hour—Coal trimmer, 55 cents (minimum weekly wage of \$26.40); boiler washer, 58 cents (minimum weekly wage, \$27.85); boiler washer's helper, 53 cents (minimum weekly wage of

\$25.45); ash conveyor man, \$5.00 per day; truck driver, 56 cents per hour (minimum weekly wage, \$26.50 for 48-hour week, with right to overtime) electrical helper, 55 cents per hour; labourers going rate of wages in city.

The above are minimum rates.

Grievances to be presented to foreman; if not then adjusted, to be referred to next highest official, and so on until Commissioners are reached.

Promotions to be made from the staff if possible, efficiency and seniority being considered.

Employees after one year to receive full pay for sick time, such not to exceed three weeks in any one year.

Men employed the year round to be allowed one week's holiday per year with pay, after six months' continuous service.

Employees in service 3 months during 1921 or during previous year, and not under higher classification to be paid as helpers.

Domestic and Personal Services (including amusements)

CALGARY, ALTA.—RESTAURANT PROPRIETORS, AND HOTEL AND RESTAURANT EMPLOYEES' UNION No. 597. Agreement to be in effect from May 1, 1921 to May 1, 1922.

Class A.—Wages: minimum per week—waiters and waitresses on counters, \$23; on tables, not collecting checks, \$16.50; on tables, collecting checks, \$15.50; miscellaneous regular employees, \$15.00; other miscellaneous employees, \$12.00.

Hours of labour, straight shift on counter, eight and one-half, with one-half hour for a meal on employer's time, six days a week.

One split shift on the counter in each house, split shift to consist of 8½ hours over spread of 12 hours, with 30 minutes for meal on employer's time, six days a week.

Day on tables, 8½ hours straight, or a split over a spread of 12 hours, six days a week.

Extra time on counter, 75 cents per hour.

Class B.—Wages: Per week—Waiters on tables or counter, minimum, \$21; miscellaneous employees, regular help, \$15; miscellaneous extra help, minimum \$12; waitresses on tables, minimum, \$16; on counters, minimum, \$18; waitresses less than 8 hours, or overtime, per hour, 50 cents.

Hours of labour: 8½ over spread of 12 hours, with 30 minutes for a meal, 6 days a week.

General Conditions.—All scales to include three meals while working.

No union member to walk out until shift is completed. Member desiring to quit while on shift must have permission of employer.

Business agent to have privilege of visiting employees on duty after notifying employer; visits to be timed when employees are not busy.

In houses with mixed crews preferences must not be shown by putting girls in place of boys when boys can be had, or vice versa.

When conditions exist not covered by this scale, wages to be left to agreement made by employer, business agent and executive board, with approval of Union.

Union members to have preference of employment.

Linen for special uniform to be furnished by employee and laundered by employer.

PRICES, RETAIL AND WHOLESALE, IN CANADA, MAY, 1921

THE movement of prices, both wholesale and retail, continued downward during May, but in wholesale prices there were slight reactions in some lines indicating that the fall which had been in process since May, 1920, had been arrested in these lines and further considerable decreases were not to be expected. These conditions were mainly apparent in grain, some textiles, and metals, with the exception of iron and steel. On the other hand the declines in eggs, butter and cheese, all partly seasonal, were considerably accentuated.

In retail prices the average cost of a list of 29 staple foods in sixty cities at the first of May was \$12.25 as compared with \$12.68 for April; \$16.65 for May, 1920; \$13.53 for May, 1919; \$12.66 for May, 1918; \$11.82 for May, 1917; \$8.37 for May, 1916; \$7.34 for May, 1915; and \$7.42 for May, 1914. The total for foods, fuel and rent in the sixty cities averaged \$22.84 in May as compared with \$23.31 in April; \$26.44 in May, 1920; \$21.92 in May, 1919; \$20.67 in May, 1918; and \$14.19 in May, 1914. The chief changes for the month were decreases in eggs, milk, butter and potatoes, with slight decreases in nearly all the other items. Coal, wood and coal oil averaged slightly lower. Rents averaged higher in Quebec and Ontario.

In wholesale prices, the departmental index number stood at 247.3 for May as compared with 253.7 for April; 356.6 for May, 1920; 284.1 for May, 1919; 275.8 for May, 1918; 343.8 for May, 1917; 183.3 for May, 1916; 147.4 for May, 1915; and 136.3 for May, 1914. The chief changes for the month were decreases in dairy products, animals and meats, grain and fodder, textiles, and building materials. There was a slight recovery in the prices of lead, zinc, quicksilver, antimony and tin. Iron products continued to ease off gradually. All the groups were lower than a year ago and nearly all were lower than two years ago.

The table of retail prices and rentals shows the prices at the beginning of May of, over one hundred staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada having a population of 10,000 or over. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these have been published each month since the beginning of 1910, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915 when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts exclusively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second

class is of houses in fair condition less desirably located, but still fairly central without modern conveniences.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, those being the items for which statistics have been obtained each month and published in the *LABOUR GAZETTE* since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to

show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding months back to 1913.

Retail Prices

In meats the movement was downward in pork products. Mutton and veal were slightly lower in some localities but sirloin steak averaged slightly higher throughout except in Nova Scotia and Alberta. Eggs were down in all the cities, averaging 4 cents and 5 cents per dozen lower. Milk averaged lower, decreases appearing in all the provinces except Manitoba and British Columbia. There was a general decline in creamery butter, but dairy butter averaged higher in some of the provinces. Early in the month, however, a very steep decline occurred throughout the country causing much lower levels than were indicated by the statistics for the first of May. Bread averaged lower, being down in Halifax, St. John, Thetford Mines, Hull, Ottawa, Belleville, Hamilton, Chatham, Port Arthur, Fort William, Medicine Hat, and Nelson. Soda biscuits, flour, rolled oats and rice

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF

if purchaser supplies can prices are lower, about 35c.

were slightly lower. Tapioca showed a considerable decrease. Potatoes were again lower, being down in all the provinces. Jams and canned fruits showed a number of decreases. Marmalade and corn syrup were also down. Sugar was again fractionally lower. Tea and coffee averaged slightly lower in a number of the cities east of Winnipeg. Wood and coal oil declined somewhat. Rent was higher in Charlottetown, Quebec, Sherbrooke, St. John's, Montreal, Hull, Ottawa, Brantford and Stratford.

Wholesale Prices

GRAINS AND FODDER.—Wheat, Manitoba No. 1 Northern, rose from \$1.78 per bushel at the end of April to \$1.92 at the end of May. Ontario winter wheat at Toronto rose from \$1.55 to \$1.60. Barley at Winnipeg advanced from 75c. per bushel to 79c. Oats at Winnipeg fell from 43c. to 41c. per bushel, but advanced later to 45c. Flaxseed had fallen to \$1.48 per bushel at Fort William, but advanced to \$1.80. Rye advanced from \$1.35 to \$1.40 per bushel at Toronto. Hay was lower at Montreal at \$23.00 per ton. Straw was easier at \$12.00 at Toronto. Bran and shorts fell \$2.00 per ton at Toronto, being down to \$29.00 and \$31.00 respectively.

ANIMALS AND MEATS.—Cattle at Winnipeg fell from \$9.00 per hundred pounds to \$8.25. At Toronto, cattle eased off from \$10.00 to \$9.50 per hundred pounds. Beef, dressed, forequarters, fell from \$10.00-14.00 per hundred pounds to \$9.00-11.00. Hogs at Toronto were down from \$10.75 per hundred pounds to \$8.25. Dressed hogs were down from 21c. per pound to 15c. Bacon fell from 38c. to 35c. and ham from 34c. to 33c. per pound. Lard declined from 15½c. per pound to 12½c. Sheep fell from \$9.50 per hundred pounds to \$8.00. Fowl were down from 35c. per pound to 33c. at Montreal and turkeys from 61c. to 59c.

DAIRY PRODUCTS.—Finest creamery butter at Montreal had fallen from 52 to 37c. per pound at the beginning of May and by the middle of the month was down to 27½c. but recovered slightly, reaching 31c. in the last week. Dairy butter fell from 48c. to 26c. per pound at Toronto. Cheese fell from 25c. per pound to 16½c. Eggs fell from 37c. per dozen to 34c. at Montreal. Milk was down from \$2.90 per eight-gallon can to \$2.50 at Toronto. At Montreal milk fell from 29c. per gallon to 25c. toward the end of the month.

FISH.—Halibut was down from 10c. per pound to 8c. on the Atlantic coast. At Toronto lake trout fell from 22c. per pound to 19c. The catch of cod on the Atlantic coast was reported to be good and better markets in Europe were expected. The market for canned lobsters was reported still quiet.

FRUIT AND VEGETABLES.—Lemons and oranges were slightly firmer. Evaporated apples advanced to 14-15c. per pound. Currants fell from 18c. per pound to 17c. Prunes were down to 9½c. per pound at Toronto. Potatoes were unchanged at the lower levels reached at the end of April at 80c. per bag at Toronto and Montreal. Beans eased off to \$2.40 per bushel. Onions were slightly firmer at Montreal at \$3.00 per bag.

MISCELLANEOUS FOODS.—Flour was 50c. per barrel higher at \$10.50 per barrel. Soda biscuits were lower at 15c. per pound. Rolled oats and rice declined. Sugar was 50c. per hundred pounds lower at \$10.89. Honey was higher at 20c.

TEXTILES.—Beaver cloth and a line of woollen underwear declined. Raw cotton averaged slightly higher at New York at \$12.85 per hundred pounds. Several lines of manufactured cottons were reduced about 12½ per cent. Raw silk, Japan, was lower. Jute fell

(*) Preliminary figures. (†) Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

‡ Revised.

from 9.72c. per pound to 9.16c. Hessians had fallen to 10.40c. per yard but advanced to 10.55c.

HIDES, LEATHER, BOOTS AND SHOES.—Calfskins advanced from 11c. per pound to 13c. Horsehides advanced from \$2.00 to \$2.25 each. Leather continued to decline, Spanish sides falling from 62c. per pound to 57c., oak sides from 64c. to 60c., and harness leather from 59c. to 54c.

METALS AND IMPLEMENTS.—Iron bar, galvanized sheets, wrought iron scrap, and steel bar were lower. Antimony, lead, quicksilver, spelter, and tin recovered slightly. Crowbars and soldering coppers declined.

FUEL AND LIGHTING.—Bituminous coal at Montreal fell to \$8.50 per ton. Connellsville coke was down to \$3.25-\$3.75 per ton at the ovens. Gasoline fell from 38c. per gallon to 36c. Coal oil fell from 25c. per gallon to 22c.

BUILDING MATERIALS.—Spruce deals at St. John fell from \$32.00 per M. to

\$30.00. Lath fell from \$13.00 per M to \$12.00 at Toronto. Birch was down from \$75.00 per M to \$65.00 and hard maple from \$60.00 to \$50.00. British Columbia fir fell \$3.50 at Winnipeg. Iron pipe and red lead declined. Linseed oil advanced from 75c. per gallon to 84c. and turpentine from 90c. per gallon to \$1.15. Benzine was down from 38c. to 36c. per gallon. Resin and shellac were lower.

HOUSE FURNISHINGS.—No further changes were reported.

DRUGS AND CHEMICALS.—Brimstone, soda ash, and quinine were lower. Methylated spirits fell from \$2.20 per gallon to \$1.65.

MISCELLANEOUS.—Muskrat skins fell from \$1.25 to 95c. each. Pulp and paper markets continued weak, and newsprint paper was reported down to 4¾c. per pound toward the end of the month. Rope advanced 1c. to 25½c. per pound. Crude rubber advanced slightly at New York to 18c. per pound.

PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest information available as to the movement of prices in other countries as compared with Canada.

United Kingdom

At the first of May the prices of the principal articles of food in the United Kingdom were reported by the Ministry of Labour to be 132 per cent above the level of July, 1914, as compared with 138 per cent a month before. All the articles of food included in the record were down except fish, but butter, margarine, eggs, bacon, and milk showed the largest reduction. Rents were found to be up about 44 per cent, clothing 210 per cent, fuel and light 150 per cent, all

items 128 per cent. At the beginning of June the Ministry reported that food prices had fallen to a level only 118 per cent above prices in July 1914.

Italy

At Rome the Municipal Labour Office reported that the level of food prices in April was 11.8 per cent higher than the month before and 332 per cent higher than in 1914. All items were found to be 311 per cent higher than in 1914. For Milan the Municipal Labour Office reported the cost of living in April to be 478 per cent higher than in 1914, having increased 1.7 per cent over the previous month. The Municipal Statistical Office for Florence reported the cost of living in April, 1921, to be 385 per

cent higher than in April, 1914, food being up 421 per cent.

Belgium

The *Revue du Travail* reported that the cost of living at the middle of March was 334 per cent greater than in April, 1914, for families with an income below 5 francs per day in 1910. For families with between 5 and 8 francs per day the increase was 335 per cent and for families with incomes of 8 francs and over the rise was 340 per cent.

Germany

The official journal of the German Labour Office for April 15 has published for the first time an official index number showing the changes in the cost of living in Germany as a whole. The basis of computation is the cost of the necessities of life for a family of five persons, man, wife, and three children aged 12, 7, and 1½ years respectively. The budget used includes food, fuel, light, and rent of two rooms and kitchen. For April, 1921, the index number was reported to be 794 per cent higher than before the war.

United States

Wholesale prices continued to fall, the index numbers for May showing lower

levels than for April. The index number of retail prices of food calculated by the United States Bureau of Labour Statistics indicated that food was downward. The Bureau has also issued a statement as to the changes in the cost of various items in several of the principal cities in the United States in May, 1921, as compared with previous dates back to 1914. The cost of all items in New York was found to be 81.7 per cent higher than in 1914, food being 42.5 per cent higher, clothing 159.5 per cent, rent 42.2 per cent, fuel and lighting 95.9 per cent, furniture, etc., 156.5 per cent, miscellaneous 117.6 per cent. The highest point in the record was reached in June, 1920, when the increase in all items was found to be 119.2 per cent. The decrease from June, 1920, to May, 1921, was found to be 17.1 per cent. The decrease from December, 1920, to May, 1921, was found to be 9.8 per cent. In Chicago and Philadelphia the increases since 1914 were slightly less than in New York. In Detroit the cost of living in June, 1920, was up 136 per cent and in May, 1921, only 93.3 per cent, a decrease of 18.1 per cent. In the other cities the decreases since June, 1920, were between 13 per cent and 18 per cent, in most cases slightly more than one-half the decrease having occurred since December, 1920.

RECENT LEGAL DECISIONS AFFECTING LABOUR

THE two legal decisions summarized below have reference to the workmen's compensation law of Quebec, one dealing with the right of action of an

employee hired in Quebec but injured in Ontario, and the other dealing with the case of a youth employed illegally on a machine.

An employee hired in Quebec and injured in Ontario has rights of action under Quebec law*

A railway employee, whose contract of employment was made in Montreal, lost a leg in a collision when riding on

a handcar near Cornwall, Ontario. The Workmen's Compensation Board of Ontario awarded him compensation, but notwithstanding this he brought action against the Company in the Superior Court of Quebec at Montreal, claiming \$668 damages for temporary complete

*In a similar case mentioned in the *LABOUR GAZETTE*, February 1921, pp. 265-6, it was ruled that a workman hired in Ontario and injured when working in Quebec had the right to bring action under Quebec law.

incapacity and \$2,500 as capital of an annual rent for permanent partial incapacity, alleging inexcusable fault against the company.

It was pleaded for the defence that as the accident occurred in the province of Ontario the plaintiff's claim was submitted to the Ontario Workmen's Compensation Board, and under the award of the Board the plaintiff had received compensation from time to time. It was submitted that under these circumstances the Workmen's Compensation Act of Quebec did not apply and that the award of the Ontario Workmen's Compensation Board was binding even in the province of Quebec.

It was held by the Court that the law of the place of contract not the law of the place where the accident occurred applied in this instance. The plaintiff

resided in Montreal and he was engaged in Montreal by a company whose headquarters were there. The fact that he met with an accident in the course of his work outside of the province of Quebec did not take from him his rights of action under the Quebec Workmen's Compensation Act. The submission of the claim to the Ontario Workmen's Compensation Board was without the plaintiff's consent, and the award of that Board could not be held to be binding in Quebec. The Court declared that the plaintiff had failed to prove inexcusable fault, but awarded him \$668 for temporary complete incapacity and a capital of \$2,025 for permanent partial incapacity, with costs, the amount the plaintiff had received under the Ontario Board to be deducted from this judgment. (*Quebec—Gongami vs. Grand Trunk Railway Company.*)

An employer is guilty of inexcusable fault if he neglects to guard a dangerous machine, and puts on such machine youths under legal age

A young boy of thirteen years suffered the loss of two fingers of his left hand when employed on a perforating machine which was unguarded. The father of the boy brought an action against the employer on his behalf, claiming \$5,000, and the Superior Court of Quebec awarded him \$2,571.32.

The employer appealed against this judgment and the appeal was heard in the Court of King's Bench. The opinion of the Court was that there were two principal questions to decide. (1) Was the injured boy an apprentice in the sense of the Workmen's Compensation law? (2) In employing a youth of fourteen years on a machine reputed to be dangerous did the appellant commit an inexcusable fault? The word "apprentice" is not defined in this law and it was necessary to decide whether he comes within this class by taking into account his capacity, age, wages, etc. The Court held that the injured boy was an apprentice, that the compensation should be calculated according to the current wages of the lowest paid workers in this class of work. This was done by

the Court of first instance and the loss of capacity was fixed at 25 per cent.

With regard to the second question, no tribunal has yet defined the meaning of the term "inexcusable fault". It was held by the Court that the employer was guilty of three faults, first in employing at this task a youth without experience and of an age prohibited by law, secondly, in not having equipped this dangerous machine with a guard and thirdly, in not having profited from the experience of a former accident on a similar machine which had occurred in this establishment. It was declared by the Court that when an employer knows that a machine is dangerous, which can be rendered less dangerous, he should not put on this machine youths below a certain age, and when he deliberately violates all his obligations in this regard, he commits an inexcusable fault.

The judgment of the Court of first instance was therefore confirmed. (*Quebec—Monarch Electric Company, Limited, vs. Grignon.*)

THE LABOUR GAZETTE

JULY, 1921

Number 7

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

This issue of the **LABOUR GAZETTE** contains an article on Apprenticeship in Canada, and a summary of the proceedings of the recent annual convention at Denver, Colorado, of the American Federation of Labour.

At the beginning of June unemployment among trade unions was 15.46 per cent of the total membership as compared with 16.27 per cent at the beginning of May, and 2.88 per cent at the beginning of June, 1920. Many of the unions reported also a large percentage of their members as working on short time. According to returns received from about 5,200 firms employment conditions remained practically stationary during June. At the end of the month, however, the temporary shutdown of railway shops made conditions less favourable. Employment for the month was at a much lower level than during the corresponding month of 1920.

The cost of the weekly family budget of staple goods continued to decline, averaging \$11.16 at the beginning of June as compared with \$12.25 in May; \$16.92 for June, 1920; and \$7.35 for June, 1914. The index number of wholesale prices for June fell to 242.6 as compared with 247.6 for May; 349.3 for June, 1920; and 135.3 for June, 1914.

The time loss due to industrial disputes during June was less than during

either May, 1921, or June, 1920. There were in existence during the month 44 strikes, involving 8,083 workpeople and resulting in an estimated time loss of 161,910 working days. At the end of the month there were on record 26 strikes involving about 5,943 workpeople.

Proceedings under the Industrial Disputes Investigation Act

During the month of June the Department received reports from five Boards of Conciliation and Investigation appointed to deal with disputes between: (1) the Canadian National Railways and certain of its employees in the Stores Department, Fort Rouge, Winnipeg, Man., being members of Victoria Lodge No. 1326, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; (2) Toronto and York Radial Company and certain of its employees on the Metropolitan, Mimico and Scarboro Divisions, being linemen, wiremen, train dispatchers, operators, etc., members of the Toronto Branch of the Canadian Electrical Trades Union; (3) Algoma Eastern Railway, Sudbury, Ont., and its employees of various classes, members of Division No. 4, Railway Employees' Department, American Federation of Labour; (4) Ottawa Gas Company and certain of its employees, being members of Federal Labour Union No. 16517, American Federation of Labour, and

(5) New Brunswick Power Company, St. John, N.B., and certain of its employees, being motormen and conductors, electrical power house employees, etc., members of Division No. 663, Amalgamated Association of Street and Electric Railway Employees of America.

Six applications were received for the establishment of Boards and further appointments and decisions were made in connection with applications which had been received during previous months.

League of Nations Society of Canada At a meeting held in Ottawa on May 31, 1921, the League of Nations Society of Canada was formed. It was a very representative gathering and included many of the most prominent leaders in Canadian public life. His Excellency the Governor-General of Canada presided and in his opening address spoke strongly along the lines of world peace and stated that one of the objects of the meeting was to find an alternative to war. Other speeches along the same line were made by Sir George Foster, Sir Robert Borden, Hon. Dr. Beland, M.P., and others. The Marquis of Hartington, who was present, stated that it had been his privilege to be present at the drafting of the covenant of the League of Nations, and that he had later helped to organize the League of Nations Union in Great Britain, which had been started in June, 1920, since when thirty or forty meetings had been held, each of which had been well attended.

The following resolution was carried unanimously: "That the meeting proceed to the organization of the League of Nations Society of Canada with the following objects: (1) To promote international peace; (2) to furnish information about the League of Nations, its principles, its organization and its work; (3) to study international problems and Canada's relations thereto as a member of the British Commonwealth and the League of Nations; (4) to foster mutual understanding, goodwill and habits of

co-operation between the people of Canada and other countries in accordance with the spirit of the League of Nations; (5) to promote the establishment of provincial or local associations, clubs, or other bodies having like objects, and to co-operate with any existing organizations for such purposes."

The following officers were elected: Honorary presidents; Rt. Hon. Arthur Meighen, Hon. W. L. Mackenzie King, and Hon. T. A. Crerar; president, Rt. Hon. Sir Robert Borden; vice-presidents, the lieutenant-governors of Ontario, Quebec, Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island, Saskatchewan, Alberta; Rt. Hon. Sir George E. Foster, Rt. Hon. Charles J. Doherty, Hon. Newton W. Rowell, K.C., Hon. Dr. H. S. Beland; hon. secretary, Vincent C. Massey, Toronto; hon. treasurer, A. J. Brown, K.C., Montreal.

A nominating committee was appointed with instructions to transmit to the president a list of the persons suggested as members of the general committee of the society. The general committee will then be selected from the persons so recommended by a small committee, of which Sir Robert Borden will act as chairman. In order to secure the active participation of women in the work of the Society it was decided that communications should be sent to the heads of the various women's organizations in Canada, for the purpose of obtaining their advice and co-operation. It was also decided to secure the aid of the churches, to which end communications will be addressed to the heads of the various churches with as little delay as possible.

Recent Ontario Laws Affecting Education

The summary of recent labour legislation in Ontario which appeared in the June issue of the **LABOUR GAZETTE** did not include laws dealing with education, some of which may be of interest.

The Continuation Schools Act was amended to provide free tuition for resident and county pupils and also on

certain conditions for other pupils. Where the board of a continuation school in a town separated from the county has notified the county clerk that the continuation school is open to county pupils on the same terms as continuation schools in municipalities not separated are open to such pupils, the council shall pay eighty per cent of the cost of the education of such pupils at such continuation school and the pupils are admitted without fee. The same conditions regarding free tuition and contribution by the county council in question towards cost of maintenance of pupils apply in cases where the board of a continuation school in a town not separated from the county, or in a village or township, has notified the clerk of any county adjacent to that in which the continuation school is situated that such school is open to pupils resident in such adjacent county on the same terms as to county pupils.

The Vocational Education Act is chiefly a consolidation of previous legislation, but contains a new clause providing for the appointment by an advisory committee for vocational schools or departments of schools, of one or more qualified officers to bring the work of such schools or departments to the attention of employers and employees, to make arrangements between the latter and the schools or departments for the holding of part time or co-operative classes, and, in general, to act as co-ordinating officers between the local industries and the schools or departments.

Group Insurance for Manitoba civil servants Group insurance is being put into force by the Manitoba Government for the benefit of its employees, the contract being entered into with four Canadian companies. Life insurance amounting to \$1,750,000 will be distributed among the 1,200 civil servants of the province, the annual cost to the government being approximately \$32,000. All employees over six months in the service will benefit by the insurance, which operates on a

graduated scale running up to \$3,000 for those in the service less than 10 years. The maximum amount of \$3,000 will be given those with 10 years service or over.

Federated Shop Crafts may make agreements with U. S. Railways An important decision in favour of union labour was rendered in June by the United States Railway Board maintaining the right of union labour to negotiate agreements with the United States railroads through the Federated Shop Crafts acting for all employees comprising these crafts. A number of railroads had refused to deal with the Federation, the railroads upholding their right to conduct negotiations and sign agreements with each craft separately. Three test cases were recently brought before the Railroad Labour Board and the Board decided that an agreement between the Federated Shop Crafts and a carrier should, if the Federation so elected, apply to all employees in those crafts.

In Canada the practice of railways making one agreement with the Federated Trades rather than separate agreements with the various crafts has been followed since the formation of the Railway Association of Canada, through which the majority of the railways have been parties to the agreement entered into on their behalf by the Association with the Federated Trades.

Proposed abolition of British Agricultural Wages Board On June 8 the British Government announced its decision to repeal at the earliest possible date the provisions of the Agriculture Act guaranteeing minimum prices for wheat and oats. This also involved the repeal of the provisions relating to minimum wages for agricultural workers, including the abolition of the Agricultural Wages Board and district wage committees. The price of wheat, however, continued to be fixed until August 13, and the government agreed to pay £4 per acre in respect of this year's oat crop, and £3 per acre in respect of

this year's wheat crop. In lieu of giving the four years' notice as provided in the Act, the government decided to allocate a capital sum of £1,000,000 for the furtherance of agricultural education and research.

On June 14, a delegate conference of the Agricultural Section of the Workers' Union was held in London and a resolution was passed declaring their determination to fight for the retention of the Wages Board. Similar resolutions were passed by the National Union of Agricultural Workers and by many local branches of the unions. Arrangements were also made to hold meetings of protest in the various districts.

At a meeting of the Central Landowners' Association the following resolution was carried: "That in the event of the Agricultural Wages Board and District Wage Committees being discontinued, it is eminently desirable that voluntary wage conciliation councils, representative of all farm or agricultural estate employers and workers, and all rural workers, be formed in every county."

Application of unemployment insurance to agricultural workers

A committee appointed by the British Agricultural Wages Board in December, 1920, to inquire into the extent to which the Unemployment Insurance Act might be made applicable and beneficent to agricultural workers, have issued a report (CMD 1344). The conclusions of the committee are: (1) That there is general opposition both by employers and workers to the inclusion of agriculture under the general provisions of the Unemployment Insurance Act, 1920; (2) that there is no evidence that a special scheme for agriculture under the Act would, or would not, be acceptable to employers or workers, and that, in any case, the information at present available as to the incidence of unemployment in agriculture is insufficient for the preparation of such a scheme; (3) that there is no evidence of such general agreement as

would be necessary for the consideration of a voluntary scheme of insurance against unemployment, outside the Act, and independent of state aid.

The committee stated that in their opinion there was little or no unemployment among skilled workers and when it existed it was among the unskilled or inefficient workmen.

Unemployment Insurance Bill, Great Britain

A bill was recently introduced in the British House of Commons to amend further the Unemployment Insurance Acts, the Amending Act, which became law in March last not having been found adequate to meet the increased amount of unemployment. The Act of March, which was summarized in the April issue of the LABOUR GAZETTE on page 550 was framed on the assumption that the rate of unemployment would not exceed an average of 9½ per cent., whereas it has risen to 23 per cent. with the result that the unemployment fund had decreased from 23½ million pounds in March to 8½ millions in June. The new bill proposes to make the following changes: (1) To reduce the rate of benefit from 20s. a week to 15s. in the case of men, and from 16s. a week to 12s. in the case of women, with corresponding reductions in the case of juveniles, who are entitled to benefit at half the adult rates; (2) to increase the joint contributions of employers and employed from the rates of 11d. for men and 9d. for women, as provided by the Act of 1921, to 1s. 3d. and 1s. 1d. respectively, with corresponding increases in the case of juveniles; (3) to increase the "waiting days" from three to six; (4) to give power to the Minister to provide, in case of necessity, for two periods of benefit of not more than six weeks each provided, up to July 2, 1922, by the Act of 1921; (5) to suspend the provisions of the Act of 1920 with reference to special schemes for particular industries; (6) to increase the borrowing powers of the Unemployment Insurance Fund from £10,000,000, as at present provided, to £20,000,000.

**Conference of
London
boroughs on
unemployment**

At a conference of representatives of 16 metropolitan borough councils, which was held at Bethnal Green, England, on June 13, to consider the problem of unemployment, resolutions were passed demanding that as unemployment was a national problem the government should deal with it at the expense of the Imperial exchequer and provide useful work or adequate maintenance; that the cost of all local relief works should be borne nationally, and that all grants made by Boards of Guardians for the relief of distress should be refunded from the Imperial exchequer. It was further decided that meetings should be held in the boroughs represented with a view to concerted action, and that the Prime Minister be requested to receive a deputation in support of the resolutions.

**Summer
schools for
industrial
workers**

In various issues of the LABOUR GAZETTE reference has been made to the labour colleges which have been established, and other educational facilities which have been provided, in Great Britain, the United States, Belgium and Canada to enable industrial workers to secure a broader education than might otherwise be possible. In addition to these measures, summer schools are being inaugurated in Great Britain and the United States. These summer schools combine to some extent the idea of study and of recreation, and are designed to meet the needs of workers who desire to increase their knowledge upon broad industrial problems and in the more general field of education, and who also need some form of vacation, but cannot afford time for both at the expense of their pay envelope.

In Great Britain, the Labour Research Department of the Labour Party has arranged a summer school for two weeks commencing August 20, for the purpose of conducting investigations into certain questions of paramount importance to the labour movement. The first week will be devoted to consideration of trade

union problems; the second week will be primarily for members of the University Labour and Socialist movement. Among the people who will lecture are R. H. Tawney, G. D. W. Cole, Beatrice and Sidney Webb, H. H. Slessor, Arthur Greenwood, H. N. Brailsford, C. M. Lloyd, R. Page Arnot and Bernard Shaw. The school, however, will not be confined to study alone, and accommodation has been obtained at Herne Bay, near the sea shore, which provides ample facilities for social activities and healthy recreation. The inclusive charge for each week is £3 15s.

In the United States a general educational course for the benefit of women workers is being carried on during the present summer at Bryn Mawr College, the directors having loaned the college for a "Summer School for Women Workers in Industry." Women workers are defined as those working with the tools of their trade, and not in a supervisory capacity. Two groups of studies are offered, literature and history, and economics and law. The students live under the same conditions as Bryn Mawr undergraduates. Seventy students are in attendance this year, all holding scholarships and chosen by local committees from industry at large. The school is being managed by a joint administrative committee made up of representatives of the directors, faculty and alumnae of the college, together with representatives of women workers in industry. Miss Mary Anderson, Director of the Women's Bureau of the Federal Department of Labour, has assisted the committee in an advisory capacity.

**Labour and
the Personnel
Research
Foundation**

As noted in the summary of the proceedings of the annual convention of the American Federation of Labour, appearing elsewhere in this issue, the Federation has decided to participate in the work of the Personnel Research Foundation. This organization was instituted at Washington, D.C., early in the present year under the auspices of the National

Research Council for the purpose of collecting the elements for a "science of employment." The attitude of labour towards this movement, as defined in the report of the Executive Council of the Federation, is one of friendly co-operation. "The earlier errors of those who sought to adjust employment regulations by mathematical rules and to increase production by stop-watch methods, have been discarded by all except a few of the less intelligent engineers and employers. Management, having discovered the importance of the human element in production, has turned in a direction that makes the co-operation of the trade union movement not only advisable but inevitable." It is claimed that the trade union movement is developing a "sense of management," and that labour is willing to co-operate in meeting the problem of employers in their endeavour to secure the goodwill of the workers. The Foundation will be concerned with such questions as employment, absenteeism, placement and replacement, and methods of finding and recording the causes and extent of labour turnover, and other lesser causes of the economic waste which adds to the cost of production, and which, it is claimed by the report, is in reality more the fault of the management than of labour. The workers in fact, are keenly interested "in guarding against unscientific methods, and methods which operate to place unwarranted blame for faults upon the workers and which seek to place upon them all the burden of improvement."

Apprenticeship in France

The development of an improved apprenticeship system is at present engaging the attention of employers' and workers' organizations in France. The number of apprentices required by each trade being ascertained by noting the losses resulting from death or withdrawals, the Union of Engineers, Boilermakers and Smelters, for example, fixes the proportion of apprentices to the total number of workers at 6 per cent. for engineers, 8 per cent. for boilermakers and

8 per cent. for smelters. In addition to reasonable wages substantial bonuses are proposed to be granted apprentices at the end of each year and on the conclusion of the period of their indenture. In the Paris district it is proposed to institute courses of vocational training, and to recruit apprentices through the agency of propaganda organizations which would supply young people with attractive pamphlets describing conditions in the several trades.

"Social Attachés" for Germany and Norway

The German government has recently appointed a "social attaché" to the German embassy at Brussels. The creation of this office at the various embassies was first suggested at the 1920 convention at Amsterdam of the International Federation of Trade Unions, the trade unions proposing to reserve to themselves the right of proposing candidates for such positions. The chief duty of social attachés is to study and report upon the employment situation both in their own country and in the country to which they are appointed, so that emigration and immigration might be regulated in accordance therewith, and useless migration of labour prevented. They are also to report on labour legislation and general labour conditions; collaborate in drafting conventions between governments in relation to labour, and even take the initiative when they consider it necessary; and exercise supervision of the individual interests of immigrant workers of their own nationality.

Similar appointments to certain Norwegian legations abroad have lately been approved by the Norwegian parliament. The demand for the creation of these positions was originally put forward in Norway by organized labour.

Co-operative Union Congress

The fifty-third Congress of the Co-operative Union, which includes almost all co-operative societies in Great Britain and Ireland, was held

at Scarborough on May 16, 17 and 18. The most important item on the agenda was the question of a formal political alliance between the Co-operative Party, the Labour Party, and the Parliamentary Committee of the Trades Union Congress. After an animated debate, the Scarborough Congress rejected this proposed alliance by 1686 votes against 1682. The Congress adopted by a large majority a resolution in favour of a policy of conciliation in Ireland and the granting of a measure of self-government which would be acceptable to the Irish people. The resolution called upon the Government to institute immediately an impartial inquiry regarding the circumstances attending the destruction of a number of co-operative creameries in Ireland. The Congress also adopted resolutions against the application of the Corporation Profits Tax to co-operative societies; in favour of raising the embargo on Canadian cattle; and against the protectionist tariff in the "key industries" and anti-dumping bills. A resolution was also adopted declaring that international commercial relations, organized on a co-operative basis for the benefit of the workers of all countries, were essential for the economic restoration of impoverished peoples and the establishment of permanent peace between nations, and therefore the efforts made by the International Co-operative Alliance to develop trade between co-operative organizations in different countries should be approved and supported.

Jottings

It is stated that Premier Stewart of Alberta will shortly call a conference of provincial, civic and labour officials for the purpose of taking preparatory measures to cope with the probable unemployment in the province during the coming winter.

The Trades and Labour Council of Hull, Quebec, at a recent meeting, suggested to the Dominion Trades and Labour Congress that they endeavour to secure a uniform Workmen's Compensa-

tion Act for all the Provinces of Canada. It was claimed that the Quebec Act was unsatisfactory in many respects.

At the recent annual meeting at Calgary of the National Council of Women it was announced that a national bureau of information on Canadian manufactures would be established at Ottawa, under the direction of Mrs. J. C. Sears, for the purpose of furthering the "Buy in Canada" movement. The bureau will study prices and compare articles manufactured in other countries with those made in Canada and serve as a channel between the manufacturer and buyer. The plan generally has the endorsement of the Minister of Finance and the Canadian Manufacturers' Association.

The Trades and Labour Council of Victoria, B.C., is opposing an effort by the Chamber of Commerce to open the retail stores on Saturday nights.

The Executive Council of the American Federation of Labour has prepared a statement, soon to be issued in pamphlet form, upon the subject of education in relation to labour.

The British Court of Appeal recently granted an injunction in restraint of the expulsion from their union of two carpenters who had been expelled on the ground of their participation, alleged to be contrary to the constitution of the union, in a copartnership scheme established by Lord Leverhulme for the employees of his firm. The trial judge had dismissed the application for an injunction, but the Court of Appeal reversed this decision.

The Chicago Association of Commerce recently established a "Trade Court" for the adjustment of commercial disputes. The new tribunal is modelled on similar institutions in Europe which are stated to have been successful in settling business disputes out of court. The first case brought before the Court on May 4 related to a dispute over

2,000,000 folding cartons, acceptance being refused on the ground that they were not according to sample.

A number of laws designed to raise the standard of public education have lately been passed in the State of California. These provide for state aid for every district sufficient to raise the salary of teachers to at least \$1,200 a year; transforming a number of normal schools into teachers' colleges; authorizing creation of junior colleges equivalent to first two years of the State university; placing normal schools under control of state Department of Education.

The Federation of German Trade Unions (*Deutsche Gewerkschaftsbund*) which includes the Christian Trade Unions, the Unions of Commercial Employees and the Civil Servants' Unions, has founded in Berlin a people's bank entitled "*Bankverein für Deutsche Arbeiter A. G.*," the object of which is to strengthen the economic forces of the affiliated unions and to supply credit to the commercial enterprises connected with them. The necessary capital, amounting to ten million marks, has been contributed by the unions concerned.

The German Teachers' Union, which has a membership of 130,000, decided at its last general meeting to adopt all the principles of the trade unions. The Union of Teachers will affiliate itself with the Federation of Non-manual Workers and will devote itself to propaganda in support of co-operation between the manual workers' and non-manual workers' unions.

An experimental disinfecting station for the purpose of disinfecting imported goods against anthrax has now been built at Liverpool and will shortly be

opened. It is proposed as a beginning to deal only with East Indian goat hair and with Egyptian wool and hair. Importation of these goods will be allowed at Liverpool only, and the goods will be taken immediately to the disinfecting station. It is proposed that the disinfecting station shall be self-supporting, the cost being covered by a charge on the materials disinfected.

At the 21st conference of the British Labour Party, held at Brighton in June, the membership was reported to be 4,256,674; affiliated trade unions number 126; trades councils, 418; Socialist societies, five.

An exhibition known as the "Co-partnership Exhibition" is to be held at the Crystal Palace, London, from September 1 to October 22, under the auspices of the Labour Co-partnership Association, of which the joint presidents are the Rt. Hon. Lord Robert Cecil, K.C., M.P., and William A. Appleton, C.B.E., with the object of illustrating the progress made in developing co-partnership and profit-sharing schemes, and other means of promoting industrial peace. The exhibition will contain the productions of businesses having schemes for co-partnership, profit-sharing, or welfare work. An International Co-partnership Congress in connection with the exhibition will be held on September 5 and 6. During the exhibition conferences and lectures will be held dealing with the following and other subjects: Co-partnership and Trade Unionism, Industrial Welfare, and Industrial Administration.

In connection with the International Co-operative Alliance Congress at Basle, Switzerland, on August 13-20, a summer school will be opened, providing courses

on English and Swiss co-operation. This will be conducted on international lines and will be open to co-operators of all countries. The English Co-operative Union has held co-operative summer schools at various centres in England and Wales for the past nine years.

Austria and Czecho-Slovakia have now adopted the Berne convention of 1906 prohibiting the use of white phosphorus

in the match-making industry. Up to the present the following states have signed this convention: Germany, Austria, Czecho-Slovakia, Denmark, Spain, France, United Kingdom, Italy, Luxemburg, Norway, Netherlands, Poland, Sweden, Switzerland and Tunisia. Canada adhered to this convention in 1914.

INDUSTRIAL CONDITIONS DURING JUNE, 1921

I.—General Review

Although there has been during the month a slight improvement in the industrial situation, unusual fluctuations have occurred and the situation remains unsettled. On the

The Labour Market

whole, there has been little change. A few industries, such as building construction, lumbering, and railway construction and maintenance have exhibited fairly regular though slight upward tendencies. Declines in fish canning and packing and increased activity in vegetable and fruit canning dairying and hotel service were seasonal reactions. Compared with the situation in the same month last year, conditions were still much less favourable in practically all lines of industry. Logging varied with the demand for pulp wood cutters, but exhibited on the whole a downward movement. Lumber and lumber products tended to continue the minor gains of the previous month. The manufacturing industries as a group fluctuated greatly because of temporary shut-downs in railway shops with consequent reopenings affecting the iron and steel groups, especially in Quebec and Ontario. Textile firms tended to decrease the number of employees, more especially in garments and personal furnishings. In leather products, conditions were slightly more favourable than in the previous month. Water transportation fluctuated; on the whole there was a certain

amount of increase, more especially at St. Lawrence and Great Lakes ports. The situation in the coal fields, more especially in Nova Scotia, has been eased somewhat, but there have been no large gains.

The loss of time on account of industrial disputes during June was less than during either May, 1921, or June, 1920.

Strikes

There were in existence at some time or other during the month 44 strikes, involving 8,083 workpeople and resulting in an estimated time loss of 161,910 working days, as compared with 45 strikes, 8,238 workpeople and 163,520 working days in May, 1921; and 66 strikes, 15,793 workpeople and 185,732 working days in June, 1920. On June 1, there were on record 27 strikes affecting 5,649 workpeople. Seventeen strikes were reported as having commenced during June, as compared with 35 during May, 1921. Nine of the strikes commencing prior to June and nine of the strikes commencing during June were reported terminated, leaving 26 strikes, involving 5,943 workpeople on record at the end of the month.

In prices the movement continued downward, but as in May, not so steeply as during the latter part of 1920 and the early part of the present year.

Prices

The chief decreases were in live stock and meats, fish, miscellaneous foods, with

smaller decreases in textiles, leathers, and building materials. In fruits and vegetables lemons showed a considerable advance. The index number stood at 242.6 for June as compared with 247.3 for May; 349.3 for June, 1920; 284.1 for June, 1919; 280.6 for June, 1918; and 135.3 for June, 1914.

In retail prices of foods the average cost of a weekly family budget in sixty cities at the first of June was \$11.16 as compared with \$12.25 for May; \$16.92 for June, 1920; \$13.72 for June, 1919;

\$12.77 for June, 1918; and \$7.35 for June, 1914. One-half of the decrease of \$1.09 for the month in foods was in butter, the cost of which for three pounds fell 59c. Eggs were down 3c. per dozen and cheese between 3c. and 7c. per pound. There were slight decreases in nearly all the other items, beef being down $\frac{1}{2}$ c. per pound, the other fresh meats 1c. per pound, salt pork and bacon 3c. per pound. Coal and coal oil were down slightly, but rents averaged slightly higher.

II.—Industries and Trades

Logging

THE logging industry of the Maritime provinces experienced little change during the month, the bulk of river driving having been completed. In Quebec and Ontario, with very few exceptions, firms continued to discharge employees. Those points principally affected were La Tuque, Cap Madelaine, Hull, Fort Frances, Braeside and Otawa. In British Columbia some moderate increases were reported, noticeably at Yak. Timber scaled in this province during May totalled 170,049,733 feet as compared with 156,936,663 feet in April, all species, Douglas fir accounting for slightly over 50 per cent.

Mining

In Nova Scotia the coal situation improved slowly, no marked advances occurring. At Sydney Mines, Westville, Inverness and Glace Bay there was moderate expansion during the month. At Minto conditions were not so favourable. In Alberta and British Columbia, where the coal mining industry has been improving, gains were reported from a number of fields, notably at Canmore. The Hillcrest field showed little change. Non-metalliferous mining exhibited very little change, but minor increases were noted in practically all provinces. Quebec asbestos mines showed slight varia-

tion, the balance being favourable. In metalliferous mining the changes were even slighter in extent and the balance remained practically unchanged; silver, gold, lead, and zinc properties in Northern Ontario and British Columbia fluctuated from week to week.

The Manufacturing Industries

The fishing season in the Maritime provinces being practically over, the majority of firms in that industry closed down for the year. In Quebec, Ontario and the West there was lessened activity in abattoirs and meat plants. In the Dominion as a whole the outstanding feature in this group was the seasonal resumption of activity in fruit and vegetable canning, with the related increase in production by sugar refineries. The fruit areas of western Ontario and British Columbia were chiefly affected. Sugar refineries at St. John, Montreal, Wallaceburg and Vancouver showed increased activity. Flour and cereal mills at Montreal, Keewatin, Toronto and Peterborough maintained slightly larger staffs. Biscuit and candy firms showed increases in Montreal and decreases in Toronto. Dairies continued to show gains in all provinces. In British Columbia there was marked activity in salmon canning plants, more especially

at Steveston, Rivers Inlet and Prince Rupert.

Apart from the fluctuations in Ontario and Quebec railway shops, there were slight declines in other groups. Engineering plants at Amherst were running below normal, but the mills at Sydney showed activity. A large government order for rails steadied this industry in the Maritime district. Ship yards in Quebec reported smaller staffs than the previous month. Plumbing supplies and forgings in Montreal varied, the former being in a less favourable position on the whole. Railway shops varied greatly because of temporary shutdowns extending over a period of one week; this movement chiefly affected the Ontario-Quebec district. Agricultural implement firms in Toronto, Brantford and Hamilton either showed no change or else reported slightly lessened activity. Wire factories at Hamilton and rolling mills at Sault Ste. Marie were slacker, and almost all ship yards in the province cut down their payrolls. Bridge and structural iron firms in Hamilton and Walkerville were working under rather better conditions this month. This branch of the industry in Manitoba also was favourably affected, but rolling mills were less busy. Reduced staffs were common to all the British Columbia ship yards.

Trunk, bag and patent leathers in the Maritime provinces showed a noticeable decline in production, but shoe factories at St. John, Halifax and Amherst reported increasing business. In the Province of Quebec boot and shoe firms, especially in Montreal, showed small but uniform gains throughout, and this industry appears to be gaining steadily. The same applies to factories in Ontario, more especially at Toronto and London. Tanneries in the latter city also showed a decidedly favourable balance of business, but trunk and bag

plants throughout the province were slack. Montreal rubber factories varied, many showing reduced staffs. Rubber firms in Guelph were slack, and also tire factories in Toronto.

A number of New Brunswick firms increased slightly the volume of their business, notably at Campbellton and Plaster Rock. Much the same situation prevailed in Nova Scotia, mills at Ingramport being favourably affected. In Ontario conditions varied; Fort Frances mills showed no change; carriage factories at Orillia reduced staffs; furniture plants at Stratford and Kitchener changed but little. In Quebec, mills at Cabano increased their activity, at Restigouche there was little change, and at St. Pâcôme conditions were slightly below normal. At The Pas in Manitoba also conditions were unfavourable, but in British Columbia there was on the whole increased production. The plant at Fraser Mills reopened, and at North Vancouver additions to working force were made. At Golden conditions varied but on the whole were favourable. Shingle, box and saw mills at Swanson Bay reported slackness.

The pulp industry, which is located principally in the Quebec-Ontario district, varied considerably, but on the whole showed moderate gains. In the Maritime district small expansions were made, largely through the reopening of mills at Liverpool. Mills at Hull, Three Rivers and Chicoutimi showed activity, while at Windsor Mills reductions were made in payrolls. In Ontario, mills at Thorold and Cornwall produced more actively, while at Ottawa there was some slackness. The latter was true also of mills at Ocean Falls in British Columbia. Elsewhere there was little change. The printing trades in Montreal, Toronto, Winnipeg and Vancouver were rather more active and staffs were increased.

IRON AND STEEL PRODUCTS.

LUMBER PRODUCTS.

LEATHER AND RUBBER PRODUCTS.

PULP AND PAPER PRODUCTS.

The textile industry is situated mainly in Quebec and Ontario. Montreal and Toronto garment factories with some exceptions showed increased business. Carpet factories at Toronto and Guelph also were working under favourable conditions. At St. Hyacinthe the underwear plant was quite busy, but bedding and glove firms in Montreal were laying off hands. Cotton mills at Maritime points and in Montreal and Sherbrooke reported greater activity. Knit goods firms in Montreal were favourably situated as compared with Toronto and Hamilton firms in the same line, the latter finding it necessary to reduce staffs. Laundries in all provinces showed increased activity, largely of a seasonal nature.

The cement industry in Quebec was slightly less active. In Ontario, the oil refineries at Sarnia, the cyanamid plant at Niagara Falls, gas and fuel firms at Hamilton and gas plants in Toronto all showed slight reductions in staffs, indicating production below normal. Brass, bronze and copper plants in Sarnia showed fairly substantial reductions. The tobacco industry in both Quebec and Ontario increased somewhat its operations, more especially in Montreal, while in the Western provinces slightly lessened activity was shown.

Construction

In June the Canadian Pacific, Grand Trunk and Canadian National railways reported an increase in the volume of employment afforded on railway construction, including maintenance of way, there being a net gain of about 5,300 persons involved. The largest increase was registered by the Canadian National Railways, amounting to 3,800: an increase of 1,000 was shown by the Canadian Pacific and about 400 by the Grand Trunk. These increases were spread uniformly over the whole of the month.

The value of building permits in fifty-six cities during May amounted to \$13,233,543 as compared with \$12,502,330 in April, representing an increase of a little less than 6 per cent. The building and construction industry as a whole showed only slightly increased activity, principally in the province of Ontario. In highway work this province also showed the greatest activity. The Maritime provinces and Quebec showed nominal expansions only, and in Manitoba the only increases in activity were displayed by a few Winnipeg construction firms. In the Maritime provinces St. John and New Glasgow displayed rather greater activity than other centres. An analysis of reports from large contracting firms in Montreal, Quebec, Toronto, Hamilton, Windsor and Ottawa showed varying conditions, tending toward slight improvement. Through the Western provinces this industry was still at a low ebb, the usual summer activity being slow to appear. In some British Columbia centres conditions were better, noticeably in the case of certain irrigation companies. Railway construction and maintenance this month has shown fair expansion in the Western provinces: in other parts of the Dominion little change occurred.

Transportation

The gross earnings of the Canadian Pacific Railway in May were \$13,892,044, as compared with \$16,459,986 in May, 1920. The gross earnings of the Canadian National Railways in June were \$7,895,548, as compared with \$7,776,539 in the same month last year. During June the number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways in railway operation, including general offices, train men and engine crews, station employees, sleeping, parlour and dining car employees showed a small net gain over the payrolls reported at the end of May. An increase of about 700 persons was reported by the Canadian Pacific, and the Grand Trunk reported an increase of about 100, but these were offset by

a reduction in the Canadian National staff of approximately 500. Electric railway transportation varied between provinces but on the whole showed little change. In St. John there was some reduction in staff; in Montreal and Winnipeg there were additions. In British Columbia centres this branch of industry experienced only slight variations. Elsewhere there was practically no change. The volume of water transportation was irregular, both West coast and Great Lake ports showing small increases in

the main, as against an unsettled condition at upper St. Lawrence and Atlantic ports.

Trade

Trade, both wholesale and retail, exhibited little change throughout the month. There was on the whole a tendency, more especially in retail, toward moderate expansion, exemplified by conditions in some large departmental stores in Montreal, Toronto and Winnipeg.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

PROCEEDINGS FOR THE MONTH OF JUNE, 1921, WITH TEXTS OF BOARDS' REPORTS

DURING the month of June the Department received reports from five Boards of Conciliation and Investigation appointed to deal with disputes between (1) the Canadian National Railways and certain of its employees in the Stores Department, Fort Rouge, Winnipeg, Man., being members of Victoria Lodge No. 1326, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; (2) Toronto and York Radial Company and certain of its employees on the Metropolitan, Mimico and Scarboro Divisions, being linemen, wiremen, train despatchers, operators, etc., members of the Toronto Branch of the Canadian Electrical Trades Union; (3) Algoma Eastern Railway, Sudbury, Ont., and its employees of various classes, members of Division No. 4, Railway Employees' Department, American Federation of Labour; (4) Ottawa Gas Company and certain of its employees, being members of the Federal Labour Union No. 16517, American Federation of Labour and (5) New Brunswick Power Company, St. John, N.B., and certain of its employees, being motormen and conductors, electrical power house employees, etc., members of Division No. 663, Amalgamated Association of Street

and Electric Railway Employees of America.

Six applications were received for the establishment of Boards and further appointments and decisions were made in connection with applications which had been received during previous months.

Applications Received

During the month of June applications for the establishment of Boards were received as follows:—

(1) From the employees of the New Brunswick Power Company, St. John, N.B., being motormen and conductors, electrical powerhouse employees, etc., members of Division No. 663, Amalgamated Association of Street and Electric Railway Employees of America. The personnel of the Board and the text of the Board's report appear in the present article.

(2) From the employees of the Niagara, St. Catharines and Toronto Railway, being street railway workers. As a Board was already in existence dealing with questions between this company and the same class of employees, this dispute was referred to that Board for attention.

(3) From the employees of the Canadian Pacific Railway and the Western Stevedoring Company, Fort William, Ont., being freight handlers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Twin Lodge, No. 605. Investigation of this dispute by an officer of the Department showed that no dispute existed as against the Canadian Pacific Railway Company. In view of this fact, and also that negotiations were in progress between the Western Stevedoring Company and these workmen looking towards a settlement, no further action was taken by the Department of Labour.

(4) From the employees of the Toronto Suburban Railway Company and certain of its employees, being linemen, operators, wiremen, etc., members of the Canadian Electrical Trades Union, Toronto Branch. A Board was established, Messrs. George D. Kelley, Ottawa, and H. E. Manning, Toronto, being appointed members on the nomination of the company and employees respectively. The chairman had not been named at the close of the month.

(5) From the employees of various companies in St. John, N.B., being scowmen and lumber handlers, members of Local Division 272, International Longshoremen's Association. In the Minister's view this dispute was not one which fell within the scope of the I.D.I. Act for investigation.

(6) From the employees of the Canadian National Railways, Western Lines, being ditcher engineers, watchmen and firemen, members of the International Brotherhood of Steam Shovel and Dredgemen. This application was under consideration at the close of the month.

Other Proceedings under the Act

During the month of June other proceedings under the Act took place as follows:—

(1) The Board established to deal with the dispute between the Canada Steam-

ship Company, operating on the Great Lakes of Canada, and certain of its employees, being firemen, oilers, wheelmen, watchmen, deckhands, cooks, stewards, etc., members of the Sailors, Firemen and Cooks' Union of Canada, was completed by the appointment of Mr. T. Trueman Black, Toronto, as chairman. Mr. Black was appointed on the joint recommendation of the other two members of the Board, Lt.-Col. Geo. E. Burns, Montreal, and Mr. D. L. Kennedy, Midland, Ont.

(2) Although the employers had refused consent to the establishment of a Board in connection with the dispute between the Ottawa Branch of the Association of Canadian Building and Construction Industries and certain of their employees, members of the Ottawa District Council of the United Brotherhood of Carpenters and Joiners, a subsequent request was made to the Minister of Labour by the Mayor of Ottawa for the assistance of the Department in securing a settlement of the question of wages and other matters affecting the various branches of the building trades, which had led to the tying up of building operations in general. The Minister acceded to this request and Mr. Gerald H. Brown, Acting Deputy Minister of Labour, convened meetings of the parties concerned. The matters in dispute involved proposed wages reductions and, in some cases, the employers' desire to withdraw from the closed shop arrangement which had been in existence last year and to substitute an open shop agreement. Several meetings were held and settlements were secured with the carpenters, also with the painters, stone cutters and stationary engineers, although at the close of the month no definite settlement had been reached with the masons, bricklayers and plumbers.

(3) Board procedure was discontinued in connection with the dispute between the Toronto Electric Commissioners and certain of the employees of the Toronto Hydro Electric System, being linemen, operators, etc., members of the Canadian Electrical Trades Union, To-

ronto Branch, in view of the ruling received from the Department of Justice that it was doubtful whether the dispute was one which fell within the scope of the I.D.I. Act.

(4) Action was deferred by the Department of Labour in connection with the application which had been received for a Board to deal with the differences between the Canadian Pacific Railway

and certain of its employees, being freight handlers, etc., members of Lodge No. 1506, International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station employees, investigation by an officer of the Department having shown that this was not a dispute as against the Canadian Pacific Railway Company, the Western Stevedoring Company being the employer.

Report of Board in Dispute between the Canadian National Railways and certain of its employees in the Stores Department, Fort Rouge, Winnipeg, Man.

A REPORT was received from the Board established to deal with the dispute between the Canadian National Railways and certain of its employees in the Stores Department, Fort Rouge, Winnipeg, Man., being members of Victoria Lodge, No. 1326, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The Board was composed as follows: Mr. R. W. Craig, K.C., Winnipeg, chairman, and Messrs. C. E. Dafoe and T. J. Murray, Winnipeg. The report was unanimous and suggested, as a settlement of the dispute, a new classification of the trades involved.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between Canadian National Railways (Employer) and certain of its employees in the Stores Department, Fort Rouge, Winnipeg, being members of Victory Lodge 1326, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Employees).

To The Honourable G. D. Robertson,
Minister of Labour, Ottawa.

Sir,—

The Board of Conciliation and Investigation established herein under date of

May 9, 1921, has the honour to report as follows:

Acting upon your appointment and direction referring the above mentioned dispute to the Board constituted under the above Act, the Board had its first meeting on Friday, the 20th inst., and arranged to commence its sittings with the parties to this dispute on Wednesday, May 25. Meetings of the Board have been held daily on and since that date, and the Board is pleased to be able to report that, after carefully enquiring into this dispute and all matters affecting the merits thereof, certain suggestions made by the Board have been adopted by the parties interested, and what we believe to be a fair and amicable settlement of the dispute has been arrived at. The facts and issues involved were briefly as follows:

Early in December, 1920, ten truckers, employees of the Stores Department of the Canadian National Railways at Fort Rouge, Winnipeg, under a schedule which became effective on January 1, 1920, were discharged without notice and without cause. Up to the time of such discharge, these men had been paid 57¼c. and 59c. per hour in accordance with the terms of the said schedule. Several days later, seven of these men were re-engaged filling the same positions and doing the same work which they had filled and done prior to their discharge. Since

such re-engagement, these men have been paid 48½c. an hour, this being the rate paid to labourers. The other three men did not apply for re-engagement on these terms. Their places were filled by others who were employed and paid as labourers. At various intervals since their re-engagement, these seven men have been restored to their status and pay as truckers and other men engaged as labourers to take their places in the lumber yard at labourers' pay. The men referred to were engaged principally in loading and unloading lumber for the Stores Department in the Fort Rouge yards. The employees claimed that the action of the Company was a direct violation of their agreement, that the wages of the discharged truckers in the interval between their discharge and their subsequent promotion from labourers to truckers should be made up to them and that the employees who took their places should also be classified and paid as truckers on the rates set out in the schedule. The employees further claimed that the Company had failed to give the thirty days' notice required under the terms of the schedule before altering same in this manner. The representatives of the Company claimed that they had not violated the schedule, that the men employed in the lumber yard could not be classed as truckers but as ordinary labourers, and that the Company was fully justified in employing such men as labourers. The men discharged and re-engaged and their successors had accepted the employment as labourers at the ordinary labourers' rate, and that if the schedule had been intended to cover labourers as a class, it would have so specified. They claimed that the Company had not changed a schedule condition, and that therefore thirty days' notice was not required, the discharge of the truckers being by way of reduction of staff as truckers and their re-engagement as labourers being outside the schedule altogether.

The representatives of the Company were Mr. A. A. Tisdale, Assistant Gene-

ral Manager, Mr. A. E. Cox, General Store Keeper, and Mr. F. McDowell, District Store Keeper. The men were represented by Messrs. A. Dawson and George Partridge, President and Secretary respectively of the above Lodge, E. T. Heelis, Chairman of the Protective Committee of the Lodge, and H. Carr, the General Representative of the Grand Lodge.

There was considerable discussion as to the interpretation of clause nineteen of the schedule, which reads as follows:

Truckers shall do general labouring work. Clerical work of any description will not be demanded of this class of worker while rated as a trucker.

The men claimed that this clause defined the duties of truckers and brought the lumber yard employees under the classification of truckers, whereas the Company contended that this clause was not a definition but an express reservation at the instance of the Company, making it possible for them to call upon men usually handling trucks to do whatever general labour might be required of them, and that the lumber yard employees could only be classed as common labourers, the men on the other hand contending that their employment required skill beyond that of a common labourer, and that they could only be classified as truckers. Decisions bearing upon this point handed out at various times by the United States Railroad Labour Board and Boards of Adjustment were filed on both sides.

The suggestion of the Board that a new classification of lumber yard employees in the Stores Department should be agreed upon in some form of classified labour incorporating this additional classification in the schedule and making same retroactive was finally adopted by both sides and made the basis of the settlement set out in the letters interchanged between the parties, copies of which are forwarded herewith.

The position of both parties was fairly

and ably maintained by the respective representatives, and the Board is pleased to record the friendly spirit which prevailed throughout.

We, the members of the Board, have the honour to be

Your obedient servants,

(Sgd.) R. W. CRAIG,
Chairman.

(Sgd.) C. E. DAFOE,
(Sgd.) THOS. J. MURRAY.

Winnipeg, Man.,
June 2, 1921.

Brotherhood of Railway and Steamship Clerks,
Freight Handlers, Express and Station Employees,
Victory Lodge, No. 1326.

Winnipeg, June 1, 1921.

Mr. A. E. Cox,
General Storekeeper,
Canadian National Railways,
Winnipeg.

Dear Sir,—

Confirming the arrangement arrived at with you to-day, concerning the dispute which has been before the Board of Conciliation, it is understood that a new classification is to be added to the existing schedule, and it is to be called Sorters and Labourers. This classification is to include those employed in and around

lumber yard at Fort Rouge Stores, and their duties are to be loading and unloading cars of lumber, rails and scraps. It is to be provided that these employees will not be called upon to work in or around the General Stores. The rate for this classification is to be 51½c. per hour for the first six months and 53c. per hour thereafter.

It is further understood that the employees who were laid off on or about the 8th day of December last, and who subsequently were taken on again, are to be paid at the regular truckers' rates, viz.: 57¼c. and 59c. per hour from the time they were so laid off, until they again commenced to receive truckers' rates.

All the new employees who have been engaged in the lumber yard since the 8th day of December last shall be paid at the new rates above mentioned, viz.: 51½ and 53c. per hour from the date of employment. It is further understood that the existing schedule shall be considered as amended to incorporate the foregoing arrangement, and that the new classification and new rates above mentioned shall form the basis for negotiating rates of pay for lumber yard employees in connection with the next schedule.

Confirming the foregoing outline of our arrangement.

For the Employees,
(Sgd.) EDWIN T. HEELIS,
Chairman, Committee.

For the Company,
(Sgd.) A. E. COX,
General Storekeeper, Western Lines.

Report of Board in Dispute between the Toronto and York Radial Company and certain of its employees on the Metropolitan, Mimico and Scarboro Divisions

A REPORT was received from the Board established to deal with the dispute between the Toronto and York Radial Company and certain of its employees on the Metropolitan, Mimico and Scarboro Divisions, being linemen, wiremen, train despatchers, operators, etc., members of the Toronto Branch of the Canadian Electrical Trades Union. The Board was composed as follows: Mr. A. Purvis, Toronto, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. F. H. McGuigan, appointed by the Minister in the absence of a recommendation from the Company, and Louis Braithwaite, nominee of the employees. The report

was signed by the chairman and Mr. McGuigan, who were not favourable to the consideration of the employees' demands at the present time. Mr. Braithwaite did not concur in this view and presented a minority report.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The Toronto and York Radial Company (employer), and certain of its employees on the Metropolitan, Mimico and Scarboro Divisions, being linemen, wiremen, operators, dispatchers (train), section foremen,

sectionmen, etc., being members of the Canadian Electrical Trades Union, Toronto Branch (employees).

Toronto June 27, 1921.

The Hon. G. D. Robertson,
Minister of Labour, Ottawa, Ont.

The Board of Conciliation and Investigation appointed by you to enquire into the difference between the above parties, composed of Messrs. Allan Purvis, chairman, F. H. McGuigan, representing the Company, and Louis Braithwaite, representing the employees, has the honour to and respectfully submits the following:

On March 8 last representatives of the employees submitted a draft of an agreement covering working conditions and rates of pay to Mr. W. H. Moore, manager of the Company, requesting a meeting, which was granted, and a committee of the employees met Mr. Moore and Superintendent Wilson on March 22. After presentation of the employees' demands, Mr. Moore declined to enter into any agreement, giving as his reason the pending change in the ownership of the railway, which had previously been arranged.

The Employees' Committee protested against delay on this ground, claiming that the change of ownership might not be consummated for several months.

At the preliminary meeting of the Board on June 15 to discuss and consider methods of procedure, by reason of the Company's refusal to be a party to the request for a board of conciliation, it was decided that such representatives of the Company as necessary for a complete understanding should be present at the hearings. Invitations were, therefore, extended to Messrs. Moore and Wilson, who kindly consented to attend.

At the opening of the enquiry on June 16, Messrs. W. H. Moore and C. L. Wilson represented the Company, and Messrs. J. T. Gunn, B. Pennock and J. Black, the employees.

Mr. Moore stated that his Company's position was substantially as recited in his letter to the Deputy Minister of Labour on April 11 last, marked Exhibit "A" attached to this report.

At the request of Mr. Moore, Mr. Pope secretary of the Hydro Electric Commission for Ontario, was also present, although having no direct connection with the proceedings, but will have an active interest as soon as the change of ownership occurs. He was, therefore, allowed to address the Board, during which he emphatically endorsed the position taken by Mr. Moore against entering into an agreement until the transfer of the property was completed.

After stating the attitude of the Company, these officers asked leave to withdraw, as they did not desire to participate in the proceedings under the circumstances. This was granted, but later, the Board, finding it necessary that representatives of the Company should be present, it was arranged with Messrs. Wilson and Boyd to attend.

It seems important to state that no agreement governing working conditions or rates of pay has ever existed between the Company and its employees, the officers having always dealt with the employees individually, and it is gratifying to note that, although recent requests for increases have not all been complied with, the relations between them have not been affected, but remain as amicable and friendly as heretofore.

The employees, however, contend that their wages are much lower and hours of service longer than similar positions with other electric companies operating in and adjacent to the city of Toronto, and that their wages should be proportionate to the cost of living and the service required of them, without fully considering the ability of the Company to meet their demands, either from resources or earnings.

The Company submitted a copy of its financial return for the years 1919 and 1920, marked Exhibit "B." Upon this showing they claim they have over-

reached the limit in the matter of increased wages, as the operations of the past two years show serious deficits resulting from the limitation of rate of passenger fares to two cents per mile, under the Ontario Railway Act, dated 1906. (Exhibit "C").

Exhibit "D" shows working hours per day and rates of wages in 1914 and 1921, also proposed demands.

The working conditions of the agreement submitted embody many of the prevailing practices on this railway, the most important differences appearing under the headings "Shift Employees" and "General Employees" which provide an eight-hour day for the former and nine-hour day for the latter, with a largely increased premium for overtime, namely, time and one half and double time. The clauses referred to are shown in Exhibit "E" Nos. 1 and 3, and 1 and 2 respectively. The employees' representatives submitted copies of the LABOUR GAZETTE in support of their demands showing awards of working conditions and rates of pay made by Boards dealing with similar disputes on other electric railways in Ontario. On the Toronto and York Radial railway the prevailing practice is eight, nine, ten and twelve hours, with straight time paid for overtime.

The employees examined did not press very strongly for reduction in hours, although they stated that a shorter working day would be preferable.

When certain of the employees requested an increase in wages, hours of work were increased in lieu of same, thereby increasing their earnings proportionately. In some cases they are paid for more hours than actually worked; for instance, if time consumed over a working day is fifteen minutes, time paid for is not less than one hour. In the case of outside workers, after the day's work is started, should bad weather stop the work, they are paid for a full

day. This applies to hourly men as well as monthly men.

In the matter of two weeks' leave of absence with full pay each year for monthly men, the company have in the past granted this, and it was shown that in many cases men working on hourly rates were paid for time off sick, and arrangements made for leave of absence for short periods in the same manner to many of the older employees, although having no general rule or agreement to do so, all such cases being dealt with on their merits.

The number of employees is necessarily limited owing to the varying service, and occasionally results in overlapping of duties, as for instance, "special repairmen" relieving operators in sub-stations, and "linemen's helpers" doing the work of a regular lineman. This interchange of duties evidently results to mutual advantage.

While the Board recognizes the fact that the employee is entitled to wages which will enable himself and family to live in reasonable comfort, to which every workman is justified in aspiring, we are called upon to decide a difference between a public utility company and its employees, surrounded by difficulties resulting from the limitations as previously outlined. Our conclusions must, therefore, be based on the evidence submitted, and, after giving very careful consideration to same, we are of the opinion that the employees' demands should not be considered at the present time, and that no change should be made in existing working conditions or rates of pay.

Mr. Louis Braithwaite, representing the employees, not fully concurring, will submit minority report.

(Sgd.) A. PURVIS,
Chairman.

(Sgd.) F. H. McGUIGAN,
Representing the Company.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of differences between the Toronto and York Radial Railway Company (employer), and its employees, being linemen, operators, bonders, wiremen, armature winders, substation repairmen and section men, members of the Canadian Electrical Trades Union, Toronto Branch (employees).

The Honourable G. D. Robertson,
Minister of Labour, Ottawa.

Sir,—

I cannot concur in the report made by my colleagues on the Board of Conciliation established to deal with this dispute, and I reject *in toto* the reasons advanced by them for making the recommendations contained in the report.

Evidence was given by officers of the Company on the first day of the public sittings of the Board why they objected to being a party to the Board, namely, that the circumstances under which they are, due to the impending change in the ownership of the road, prevent them from doing anything in the matter of increased wages or reduced hours.

This was also contained in letters sent by Mr. W. H. Moore to the Department, and copies of which were forwarded to each member of the Board.

To argue, then, as my colleagues do, that the peculiar situation prevents them from making any recommendations to settle the dispute is in my opinion a farce of the Act, for if that view were correct, the Board should not have proceeded to take evidence from the employees and the management as it was a waste of time and an expense to the taxpayer.

In my opinion, the duty of the Board is clearly outlined in Section 23 of the Act, which states "In every case where a dispute is duly referred to a Board it shall be the duty of the Board to endeavor

to bring about a settlement of the dispute . . . and the Board may make all such suggestions and do all such things as it deems right and proper for inducing the parties to come to a fair and amicable settlement of the dispute."

The action of my colleagues merely amounts to an evasion of their responsibility in this respect, as no effort was made by them to bring about an amicable settlement between the two parties, and their recommendations leave the dispute in the same position as it was prior to the establishment of the Board which, I submit, in my opinion, is not in accord with the spirit or the letter of the Act, and will not be conducive to either industrial harmony or increased public belief in the efficacy of the Act.

The evidence submitted by the employees, and admitted by the management to be substantially correct, showed a somewhat startling state of affairs. The hours worked by the employees involved vary from forty-eight (48) hours per week to, in certain cases, an average of eighty-four (84) hours per week, excluding overtime. One man's evidence showed ninety-six (96) hours normally one week and seventy-two (72) hours normally the following week, the difference being due to a continuous twenty-four (24) hour shift to allow for change of shifts at each week end.

Evidence submitted by the employees showed that in certain cases employees had received four (4) cents per hour increase in the period 1914 to the present time, and that, when the management were requested by the employees to give an increase of wages, the only way the management could see their way clear was by increasing the men's hours at the same rate of pay. This was done and men who were working fifty-six (56) hours per week were increased to eighty-four (84) hours per week, similar procedure taking place in the case of an employee who left the service of the company in 1916 to go overseas and who at the time of his leaving received pay at the rate of thirty-five (35) cents per hour.

Upon returning from overseas three years and nine months later and going back to his position with the Company he was placed at the same hourly rate, no allowance being made for the increased cost of living during the period he was away.

Upon making complaint to the management he was unable to support his family on the wages paid, his hours were increased from an eight-hour shift to a twelve-hour, at the same hourly rate. It was admitted by the Company's representative before the Board that these arrangements whereby the men received more money did not cost any additional expenditure to the Company as it was merely dividing three men's work and wages between two men.

The evidence contained in the LABOUR GAZETTE of August, 1920, and September, 1920, shows, in the case of the local Toronto Hydro system wage rates for the same class of labour are nearly double and a much less number of hours work per week; for the Toronto Street railway and the Toronto Niagara Power Company approximately the same wage rates as obtain on the Hydro, and in the August GAZETTE the report of a Board dealing with the dispute between the Toronto Suburban Railway and its employees awarded considerably higher hourly rates to the same class of labour employed thereon.

It should be pointed out that the Toronto Suburban railway is a similar railway to the Toronto and York Radial, as it consists of a radial railway running from Toronto through several towns and villages within fifty miles of Toronto. The Toronto and York railway also runs from Toronto through several towns and villages within fifty-five miles from Toronto, and is subjected to the same climatic strains and operating conditions.

The evidence shows in general the wage rates of the Toronto Suburban railway vary from seven and a half to twenty-four cents per hour higher than in the

Toronto and York Radial railway, and I therefore recommend that the rates as near at present in force on the Toronto Suburban railway be adopted by both employees and employer in this dispute as a means of providing a fair and just settlement to both parties, and will, in my belief, lead to greater harmony and efficiency in the operation of the railroad.

The rates on the Toronto Suburban railway are as follows:

TORONTO SUBURBAN RAILWAY:

Line foreman	74c. per hour.
Linemen	69c. "
Linemen's helpers	52c. "
Bonders	69c. "
Sub-station operators \$155 per month for week of 63 hours, or 50c. per hour.	
Section foremen	\$120 per month.
Section men	45c. per hour.

TORONTO STREET RAILWAY AND HYDRO:

Wiremen and repair men....	79c. per hour.
Armature winders	79c. "
Armature winders, helpers...	45c. "

TORONTO SUBURBAN RAILWAY:

Train dispatchers	\$160 per month.
(On steam railways, \$220, up).	
General labourer	45c. per hour.

All overtime after the normal working day be paid at the rate of time and one-half, except on Sundays and holidays, when overtime rates be paid at the rate of time and three-quarters.

Regarding the change of hours asked for, I recommend that all those at present working on an eight-hour basis remain as they are and that linemen, bonders, armature winders, wiremen, substation repair men, section men and general labour be placed on a nine-hour basis; and I recommend that, in the case of the operators who are at present on a twelve-hour day, seven-day week basis, provision be made for reliefs so that each employee affected shall receive one day off in seven (7); and further, that the question of reduction in hours, in conformity with the practice with other electrical companies in this district, from a twelve-hour basis be taken up by a com-

mittee of the employees or representatives and the present management or the incoming management to see if possible whether a reduction in the enormous number of hours worked by certain of these employees cannot be made consis-

tently with the good and efficient operation of the road.

All of which I have the honour to submit, this ——day of June, 1921.

(Sgd.) LOUIS BRAITHWAITE,

Member representing the employees.

Report of Board in Dispute between the Algoma Eastern Railway, Sudbury, Ont., and certain of its employees

A REPORT was received from the Board established to deal with the dispute between the Algoma Eastern Railway, Sudbury, Ont., and certain of its employees of various classes, members of Division No. 4, Railway Employees' Department, American Federation of Labour. The Board was composed as follows: Rev. Father Brennan, Espanola, Ont., chairman, and Messrs. Basil Campbell, Sault Ste. Marie, Ont., and Fred Bancroft, Oakville, Ont. The report was unanimous and was accompanied by advice that an amicable working agreement had been effected as a result of the Board's efforts.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The Algoma Eastern Railway Company (employer), and its employees of various classes, members of Division No. 4, Railway Employees Department, American Federation of Labour (employees).

To the Hon. G. D. Robertson,
Minister of Labour, Ottawa.

The Board of Conciliation and Investigation appointed by you to enquire into the dispute between the Algoma Eastern Railway Company and its employees, as outlined above, held its first sitting in the Court House in Sudbury, June 17, 1921.

The Algoma Eastern Railway was represented before the Board by C. Mc-

Crea, M.P.P., Solicitor of the Company, and W. H. Farrell, General Manager of the Company, and the employees were represented by W. H. Harper, International Officer of the Men's Organization, F. C. Benson, President, and J. Ross, Secretary of the Men's Organization.

The chairman of the Board at the beginning of the sitting, after conference with the other members of the Board, urged both parties to confer and see if a mutual settlement could be reached without the Board having to go into the enquiry. Both parties agreed to meet in conference and did so, but reported later in the day that they were unable to reach any agreement. The members of the Board thereupon decided to hear the evidence from both parties.

The representatives of the Company presented evidence giving reasons why the Company desired to reduce the employees' wages. The representatives of the employees presented their case and strongly argued against the proposed reduction. The employees' representative suggested to the Company, that, in as much as they were enjoying standard rates of wages for railway services, they would be agreeable to accept whatever decision was arrived at between the Canadian Railway Association and the Employees' Organizations as a result of the conferences which are taking place in Montreal. The representatives of the Company asked for further time to consult other officials connected with the Company regarding the men's proposal. The Board, with the consent of both

parties, adjourned to give the Company time to consider the proposal. The chairman, on June 28, received from the Company a letter in which the Company accepted the proposal made by the men. The Board met again in Sudbury on July 4 to consider the whole situation, and at this session the men's representatives placed in possession of the Board their written acceptance of the proposal which they had made to the Company. The members of the Board, therefore, attach to this report the letter of the Company and the letter of the men's representatives showing mutual acceptance of the men's proposal, constituting the agreement whereby the present dispute is settled, pending the decision as outlined.

All of which is respectfully submitted.

(Sgd.) REV. FATHER BRENNAN,
Chairman.

(Sgd.) FRED. BANCROFT,
Board Member.

(Sgd.) BASIL B. CAMPBELL,
Board Member.

McCrea & Valin,
Barristers, Solicitors,
Notaries, etc.

Offices, Young Block,
Sudbury, Ontario,
June 28, 1921.

Revd. Fr. Brennan,
Chairman, Conciliation Board,
Espanola.

Reverend and Dear Sir,—

When your Conciliation Board adjourned on the 17th inst., there were certain matters which I promised to take up with the management of the Algoma Eastern Railway, with a view of arranging amicable settlement of this dispute.

Mr. Harper, representing the men, offered to accept, on their behalf, whatever reduction was made general throughout the Dominion in respect to this class of employees, and which is now being considered by representatives of men and companies at a conference in Montreal.

I am pleased to advise you that I have been authorized to notify your Board that the Algoma Eastern Railway is agreeable to a decision by your Board, finding that the decrease in respect to scale of wages of the men concerned in this dispute should be that decided upon between other railways and their men at the said conference in Montreal, or as subsequently accepted by the Board, to be effective when and as applied to other railways in Canada.

Please accept for yourself and other members of the Board my appreciation of your efforts to bring about this amicable adjustment of the matter.

I shall be pleased to have copy of your finding and award, in due course, to conclude this matter.

Yours very truly,

(Sgd.) C. McCREA.

International Association of Machinists.

Sudbury, Ont., July 4th, 1921.

Rev. Fr. Brennan,
Chairman, Conciliation Board,
Algoma Eastern Railway,
Sudbury, Ont.

Reverend and Dear Sir,—

As the representative of Division No. 4 Railway Employees of the American Federation of Labour, before said Conciliation Board, on behalf of the Federated Car and Shop Trades on the Algoma Eastern Railway, I am willing to accept the conditions decided upon by the Committee representing Division No. 4, Railway Employees, of the American Federation of Labour, and the Canadian Railway Association of Canada, and that said conditions become effective on the Algoma Eastern Railway on the same date as on the other Canadian Railways.

This is in conformity with agreement signed by representatives of the men and company on October 19th, 1920, and is the proposal made to the company before this Conciliation Board and accepted by the company in a letter to the Board dated June 28th, 1921.

Yours very truly,

(Sgd.) H. W. HARPER,

(Sgd.) J. ROSS,

(Sgd.) F. C. BENSON.

Report of Board in Dispute between the Ottawa Gas Company and certain of its employees

A REPORT was received from the Board established to deal with the dispute between the Ottawa Gas Company and certain of its employees, being members of Federal Labour Union, No. 16517, American Federation of Labour. The Board was composed as follows: Mr. J. E. Caldwell, City View, Ont., appointed by the Minister in the absence of a recommendation from the other two members, Messrs. George D. Kelley and William Lodge, Ottawa, nominees of the Company and employees respectively. The report was unanimous and contained recommendations as to increased wages. These findings, it is understood, were accepted by both parties concerned, although certain reservations were made by the Company.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Ottawa Gas Company and certain of its employees.

Ottawa, June 23, 1921.

To the Honourable G. D. Robertson,
Minister of Labour, Ottawa.

Re Ottawa Gas Co. and certain of its employees.

Sir,—

The Board appointed to investigate the dispute between the above parties as set out in the application to your Department under date of May 11, 1921, was duly convened on the 13th day of June, and subsequently met for the hearing of evidence or discussion of the matters involved on the 14th, 15th, 16th, 17th, 18th, 20th, 22nd and 23rd days of June. Evidence on behalf of the employees was given by Messrs. F. W. McRae, C. W. Lewis, A. D. Dear and G. Barclay. The case of the Company was presented by Mr. A. A. Dion, its General Manager.

The Board visited the Company's plant and was impressed with its operations, efficiency and with the provisions made for the safety and comfort of the employees. It was gratifying to the Board to learn that the friendly and harmonious relations hitherto existing between the employees and the Company had continued during the past year. After hearing the evidence and taking fully into consideration the general existing conditions, and particularly those governing the service of the employees of the Company, the Board recommends that the following schedule of wages be paid, all of the said rates of pay to apply to the employees now concerned and to date as of July 1, 1921:

FITTING DEPT.	PROPOSED WAGES.
Chief Fitter	63c. per hour
Meter Repairers	60c. "
Troublemakers, Tinsmiths and others getting 60c. hour	54c. "
Helpers, Quigg and Parker, Storekeeper, Clerk and man cleaning offices to remain as they are.	
Driver J. Parrington	40c. "
Driver W. Parrington	40c. "
MAINS DEPT.	
Foremen	63c. "
Fitters	55c. "
Tamping Machine men	55c. "
Syphon man	50c. "
Truck Man	50c. "
Truck Driver	50c. "
Helpers, Roberts and Picknell.	45c. "
Labourers to remain as they are.	
GAS WORKS.	
Stokers	58c. "
Scourers	53c. "
Exhauster Men	54c. "
Conveyor Attendant	54c. "
Boiler Men	60c. "
Machinist	65c. "
Telpher Operator	60c. "
Fitter	55c. "
Hopwood, Utility man	53c. "
Pitcher, Fitter's helper	50c. "
Slack, Utility man	50c. "
Blacksmith	60c. "
Stableman	\$3.70 a day.
Coke Drivers	40c. an hour.
Coke Drivers shall have Saturday afternoons off with pay in July August and September.	
Yardmen	47c. "

With the exception of coke drivers a week's work shall consist of 44 hours; 5 days at 8 hours and 1 day at 4 hours from May 15 to September 15, but this shall not apply to men engaged in continuous operation or such necessary work on Saturday afternoon as may be required from "trouble men."

This recommendation shall not extend to any employees of the Construction Foreman of the Company for the time being, or other foremen engaged in temporary construction work on the premises of the Company, such men not being regular employees of the Company.

Mr. Lodge feels strongly that the rates of wages and agreement should be made in its entirety for another term, but, in

view of the majority of positions having been maintained in this respect and a desire to aid in the continued harmonious relationship, has joined in signing the award.

The Chairman desires to express his appreciation of the courtesy extended by the Superintendent of the Company and the co-operation of the other members of the Board in the interests of industrial good-will.

Yours very truly,

(Sgd.) J. E. CALDWELL,
Chairman.

(Sgd.) GEORGE D. KELLEY,

(Sgd.) WM. LODGE,
Members of the Board.

Report of Board in Dispute between the New Brunswick Power Company, St. John, N.B., and certain of its employees

AREPORT was received from the Board established to deal with the dispute between the New Brunswick Power Company, St. John, N.B., and certain of its employees, being motormen and conductors, electrical power house employees, etc., members of Division No. 663, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: The Honourable Mr. Justice W. B. Chandler, Moncton, N.B., appointed on the joint recommendation of the other two members; Mr. C. W. Burpee, McAdam Junction, N.B., appointed by the Minister in the absence of a recommendation from the employing company, and Mr. W. Frank Hathaway, nominee of the employees. The report of the Board was unanimous and contained certain recommendations with regard to changes in working conditions and also as to a decrease in the wages. The award was accepted by the employees, but rejected by the Company, and a cessation of work occurred on June 29.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of the dispute between the New Brunswick Power Company (employers), and the Amalgamated Association of Street and Electric Railway Employees of America, Division 663 (employees).

To the Honourable Gideon D. Robertson,
Minister of Labour.

The undersigned members of a Board of Conciliation and Investigation appointed to investigate certain disputes between the New Brunswick Power Company and the Amalgamated Association of Street and Electric Railway Employees of America, Division 663, comprising motormen and conductors, electrical power house employees, gas house employees, car barn employees, linemen, trackmen and other, beg leave to report as follows:—

That the Board met at the city of

Saint John on the 15th day of June instant, the members having first been sworn to the due performance of their duties; that before entering upon the actual hearing as to the disputes between the employer and the employees an attempt was made by the Board to bring about a settlement of the dispute, and an informal conference took place between Mr. Percy Thompson, the representative of the New Brunswick Power Company, and Messrs. Magnus Sinclair and Ira D. Farris, the representatives of the employees. Quite a lengthy discussion followed, but the parties were unable to come to an agreement, and the hearing was accordingly proceeded with. Evidence was adduced on the part of the employees, and the statements of the representatives of the employees were heard. Evidence was adduced by the representative of the Company, and statements were submitted by him for the consideration of the Board, both verbal and written. At the close of the hearing another attempt was made to bring about a settlement, and a meeting took place between Mr. Percy Thomson, the Manager of the Company, on the one hand, and Mr. Sinclair and others, on the other hand, representing the employees, but at this second conference the parties were unable to come to any agreement.

At the close of the hearing the members of the Board had an opportunity of examining the operation of a one-man car, which the Company proposes to operate upon its railway, and they travelled some distance on this car in order to watch the operation of the car and the working of the various appliances with which the car is supplied.

The parties to the dispute having been unable to come to any agreement, and no settlement of the dispute having been arrived at during the course of the reference, it now becomes our duty to report on this matter, and to make certain recommendations for the settlement of the dispute between the Company and its employees.

The principal grounds of dispute and difference between the Company and its employees as developed at the hearing are as follows:—

1. As to the duration of any agreement which might be made between the Company and its employees, and as to changes in any such agreement by either party thereto.
2. The wages to be paid by the Company to its employees.
3. The operation of one-man cars on its railway by the Company.

On the 15th of June, 1920, an agreement was made between the New Brunswick Power Company, of the one part, and Division 663, above mentioned, of the other part, which agreement provides that it shall be binding on both parties until June 15th, 1921, and further provides that either party desiring a change in any article or articles shall notify the other party in writing thirty days before the expiration of the agreement affecting such article or articles.

It appears that on or about the 12th day of May, 1921, the officers of Division 663, being employees of the Company, received a communication signed by the General Manager of the Company, which communication stated that on June 15th, 1921, the Company would cancel and terminate every section of the then present working agreement, and would not again enter into any agreement as between the Company and employees, and the employees were further notified by the Company that a reduction in wages was to be put into effect beginning June 15th, 1921. Notice was afterwards given by the Company by posting up bulletins in each department of their properties that a new wage scale would come into force on the 15th day of June, 1921. This new proposed wage scale provided for a reduction of about 11 per cent. in the present wage scale, and so far as motormen and conductors are concerned the proposed scale is as follows:—

For the first six months	39 cents per hour.
For the second six months	41 " "
After the first year	42 " "
After the second year	44 " "
One-man car operation	5 cents per hour extra.
Snow work and training students	4 cents per hour extra.

The Company gave notice that the new proposed wage scale would continue for an indefinite period, and might be altered by the Company on giving the employees thirty days' notice in writing, posted on the bulletin board or delivered personally. The Company further gave notice that, commencing June 15th, it intended to operate all street cars with one man as far as the Company considered practicable and advisable.

The representative of the Company at the hearing stated that the Company had no wish to make any agreement whatsoever with its employees, and did not intend to do so, but that its intention was to deal with the employees individually and without any reference to the Division. There was an attempt made to draw up a new agreement between the Company and its employees, but it was found impossible for them to agree as to the terms of this proposed agreement.

The contentions made by the representatives of the employees at the hearing were that the proposals of the Company were entirely unacceptable to the employees. That the employees desired a definite agreement which could be altered on thirty days' notice from either party. That they objected to any reduction in the present scale of wages, and they further objected very strenuously to the operation by the Company of a one-man car which the Company has fitted up and which it proposes to operate on the railway, contending that the proposed one-man car is unsafe and wholly unsatisfactory.

The Board has carefully considered the statements made on either side, and the evidence adduced, and, in the absence of any settlement between the parties, it makes the following recommendations:—

1. The Board recommends that the agreement made between the Company and Division 663, dated June 15th, 1920, shall continue in force and effect until the 15th day of June, 1922, without change except as to the schedule of wages in the said agreement contained.

2. The Board further recommends in view of the reduced cost of living that the wages of motormen and conductors employed by the Company be reduced from 55 cents per hour, the present rate for men who have been in the employment of the Company for more than two years, to 52 cents per hour, and that the motormen be paid 5 cents an hour extra for operating a one-man car. That all other rates of wages in the said schedule contained be reduced in the same proportion as the wages of the men who have served for more than two years.

3. That, if the Company operates one-man cars on its railway, the following changes be introduced in the equipment of the one-man car which the members of the Board have inspected, and which car, as they understand, the Company proposes to operate on the railway. That an electric power device be provided by which the rear emergency door on the proposed one-man car can be opened quickly by the motorman in case of accident. The Board considers that the rear emergency door as at present provided on the proposed one-man car is not safe. Also that the present hand brake on the front of the car be replaced by an air brake, as the Board considers that one-man cars to be operated in the city of Saint John, where the grades are very heavy, should be provided with an air brake to be used in case of any emergency. The proposed one-man car is at present fitted with a hand service brake, and also with an emergency brake operated by a hand wheel. The Board does not consider that the present emergency brake is sufficient, and therefore recommends that an air brake should be substituted for the present emergency brake. The Board feels it necessary to call attention to certain provisions in the legisla-

tion relating to the New Brunswick Power Company. Section 4 of c. 139 of the Acts of Assembly of the Province of New Brunswick, passed in the year 1920, entitled "An Act relating to the New Brunswick Power Company," is as follows:—

4. The city may appeal to the Board from any act, order or decision of the Company made or done or professing to be made or done in the exercise of any power conferred upon the Company or its Board of Directors by this or any other Act, and to make such order thereupon as the Board shall deem necessary, which order shall be appealable to the Supreme Court, Appeal Division.

Section 6 of the Act above mentioned is as follows:

6. The Board of Directors shall determine the extent and character of the Railway, Electric and Gas service which the public convenience and necessity may require. An appeal may be had to the Board from any order of the Board of Directors respecting the power to over-rule, modify or vary such order of the Board of Directors.

In the opinion of the Board, under the legislation in question, the Common Council of the city of Saint John, representing the city of Saint John, has the right to appeal to the Board of Commissioners of Public Utilities as to any act, order or decision of the Company or as to the extent and character of the rail-

way, electric and gas service which the Company may supply, and it is therefore within the power of the Common Council of the city of Saint John to take steps to ensure adequate railway, electric and gas service by the Company for the public in the city of Saint John. The Board also calls attention to the provisions of Section 13 of an Act of Assembly of the Province of New Brunswick, being an Act of Assembly of the Province of New Brunswick, being 50th Victoria, c. 33, 1887. Section 13 provides that the People's Street Railway Company, referred to in the last mentioned Act, might make, ordain, establish, alter and mend, with the sanction of the Common Council of the city of Saint John, rules and regulations for the government of the railway and the cars and trains running thereon. This section it appears has never been repealed, and it may be that under this section the Common Council of the city of Saint John has control over the rules and regulations of the present company.

All of which is respectfully submitted.

Dated this twenty-first day of June, 1921.

(Sgd.) WILLIAM B. CHANDLER,
Chairman.

(Sgd.) CHARLES WM. BURPEE,

(Sgd.) W. FRANK HATHEWAY.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1921

SEVENTEEN strikes, involving 2,446 employees were reported as having commenced during June. There were in existence at some time or other during the month 44 strikes, involving approximately 8,083 employees. The total time loss on account of industrial disputes was estimated at 161,910 working days, as compared with 163,520 working days in May, 1921, and 185,732 in June, 1920. The time loss occasioned by the 17 strikes which began in June was 43,387 working days, while a loss of 118,523 working days is charged to the

27 strikes that commenced prior to June. Termination was reported in the case of nine strikes which commenced prior to June. Nine strikes commencing during June terminated during the month, leaving the following 26 strikes, involving 5,943 workpeople, on record on June 30: coal miners, South Minto; builders' labourers, Quebec; building trades, Hamilton; building trades, Ottawa; painters, Sault Ste. Marie; plasterers, Winnipeg; plumbers, Moose Jaw, Regina and Saskatoon; stonecutters, Hamilton; stonecutters, Toronto; em-

STRIKES AND LOCKOUTS DURING JUNE, 1921

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
Strikes commencing prior to June, 1921			
LUMBERING:—			
Mill workers, Chipman, B.C.✓.....	Commenced March 14. In protest against a longer working day and a reduction in wages. Men returned on employers' terms; work resumed June 1.		
MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.:—			
Mine, mill and tramline workers, Stewart, B.C.	Commenced May 11. Against a reduction in wages. Settled by negotiations; work resumed June 3.	300	600
Coal miners, South Minto, N.B.....	Alleged lockout April 1. Against a reduction in wages. Unterminated.	122	3,050
BUILDING AND CONSTRUCTION—			
Bricklayers, Calgary, Alta.....	Commenced May 16. In protest against discrimination against union member. Settled by negotiations; work resumed June 7.	25	125
Building trades, Hamilton, Ont.....	Commenced May 2. Against a reduction in wages. Unterminated.	503	12,575
Building trades, Moose Jaw, Sask.....	Commenced May 9. Against a reduction in wages. Information received indicates conditions no longer affected.		
Building trades, Ottawa, Ont.....	Commenced May 2. Against a reduction in wages. Unterminated..	760	19,000
Carpenters, Sault Ste. Marie, Ont.....	Commenced May 9. Against a reduction in wages. Settled by negotiations; work resumed June 8.	8	48
Painters, Sault Ste. Marie, Ont.....	Commenced May 2. Against a reduction in wages. Unterminated.	15	375
Plumbers, Windsor, Ont.....	Commenced May 2. Against a reduction in wages. Settled by negotiations; work resumed June 14.	48	552
Stonecutters, Montreal, Que.....	Commenced May 2. For increased wages. Settled by negotiations; work resumed June 4.	82	246
Stonecutters, Toronto, Ont.....	Commenced May 4. Alleged strike or lockout. Dispute regarding certain working conditions. Unterminated.	85	2,125
METALS, MACHINERY AND CONVEYANCES—			
Machinists, Orillia, Ont.....	Commenced May 9. Employees objected to being taken off their own work and having to divide up other work. Unterminated..	22	550
Employees of steel and coal companies, Sydney, N.S.	Commenced November 22, 1920. For increased wages and improved working conditions. Unterminated.	150	3,750
Patternmakers, Brantford, Ont.....	Commenced February 21. Against a reduction in wages. Unterminated.	9	225
WOODWORKING—			
Upholsterers, Toronto, Ont.....	Commenced January 24. Against increased hours and a reduction in wages. Unterminated.	8	200

STRIKES AND LOCKOUTS DURING JUNE, 1921—*Continued.*

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
PULP AND PAPER—			
Machine operators, Thorold, Ont.....	Commenced February 8. Against a reduction in wages and for union recognition. Unterminated.	100	2,500
Paper mill employees, Fort Frances, Ont.....	Commenced May 2. Against a reduction in wages. Men resumed work June 30, pending arbitration.	229	5,725
Pulp and paper makers, Iroquois Falls, Ont...	Commenced May 11. Against a reduction in wages. Settled by negotiations; work resumed June 8.	638	3,828
Pulp and paperworkers, Sault Ste. Marie, Espanola and Sturgeon Falls, Ont.	Commenced May 11. Against a reduction in wages. Unterminated.	2,000	50,000
PRINTING AND PUBLISHING—			
Compositors, etc., Vancouver, B.C.....	Commenced May 2. For increased wages and 44-hour week. Unterminated.	25	625
Photo engravers, Montreal, Que.....	Commenced May 2. For shorter hours. Unterminated.....	56	1,400
Photo engravers, Ottawa, Ont.....	Commenced May 2. Against a reduction in wages. Unterminated..	12	300
Printers, St. Hyacinthe, Que.....	Commenced May 2. For increased wages. Work resumed June 3. Strikers were replaced by other workers.	10	10
Printers, Vernon, B.C.....	Commenced May 2. For shorter hours. Work resumed June 27. Strikers were replaced by other workers.	12	264
Printers, bookbinders, pressmen, etc., Halifax, N.S.	Commenced May 2. For shorter hours. Unterminated.....	49	1,225
Typesetters, pressmen and bookbinders, Hamilton, Ont.	Commenced May 2. Alleged violation of agreement by employers. Unterminated	300	7,500
FOODS, LIQUORS AND TOBACCO—			
Cigarmakers, Vancouver, B.C.....	Commenced May 31. Men objected to introduction of new machinery, upon which open shop was declared. Unterminated.	48	1,200
LEATHER—			
Shoeworkers, Toronto, Ont.....	Commenced April 26. Against a reduction in wages. Unterminated.	21	525
Strikes commencing during June, 1921			
BUILDING AND CONSTRUCTION—			
Builders' Labourers, Quebec, P.Q.....	Commenced June 30. In sympathy with street paving labourers. Unterminated.	40	40
Plasterers, Winnipeg, Man.....	Commenced June 4. Against a reduction in wages. Unterminated.	20	660
Plumbers, Moncton, N.B.....	Commenced June 1. Against a reduction in wages. Settled by negotiation; work resumed June 13.	20	200
Plumbers, Moose Jaw, Regina and Saskatoon, Sask.	Commenced June 1. Against a reduction in wages. Unterminated..	48	1,200

STRIKES AND LOCKOUTS DURING JUNE, 1921—*Continued.*

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
BUILDING AND CONSTRUCTION—Continued			
Plumbers, Port Arthur and Fort William, Ont.	Commenced June 1. Against a reduction in wages. Settled by negotiations; work resumed June 13.	19	190
Stonecutters, Calgary, Alta.	Commenced June 1. Against a reduction in wages. Settled by negotiations; work resumed June 3.	7	14
Stonecutters, Hamilton, Ont.	Commenced June 4. Against a reduction in wages. Unterminated.	17	425
Structural iron workers, Montreal, Que.	Commenced June 1. Against a reduction in wages and refusal of company to sign an agreement. Settled by replacement; work resumed June 18.	300	4,800
Structural ironworkers, Quebec, Que.	Commenced June 3. Against a reduction in wages and in sympathy with the Montreal strike. Settled by negotiations; work resumed June 16.	15	165
METALS, MACHINERY AND CONVEYANCES—			
Sheet metal workers, Calgary, Alta.	Commenced June 1. Against a reduction in wages. Settled by negotiations; work resumed June 6.	35	140
PRINTING AND PUBLISHING—			
Compositors, Montreal, Que.	Commenced June 14. Objection of men to perform work that came from Toronto. Unterminated.	25	375
Printers, Ottawa, Ont.	Commenced June . For increased wages and 44-hour week. Unterminated.	411	10,275
Printers, Toronto, Ont.	Commenced June 1. For increased wages and 44-hour week. Unterminated.	875	21,875
TRANSPORTATION—			
Street railway employees, St. John, N.B.	Commenced June 29. In protest against reduction in wages and certain working conditions. Unterminated.	212	424
MUNICIPAL EMPLOYMENT—			
Labourers, Quebec, Que.	Commenced June 24. Against a reduction in wages. The strike was being settled by replacement of strikers by other workers when it was called off. Work resumed June 30.	100	600
Policemen and firemen, Quebec, P.Q.	Commenced June 25. For increased wages. Partially settled by replacement of strikers by other workers and strike was called off. Work resumed June 29.	200	900
MISCELLANEOUS—			
Waiters and waitresses, Ottawa, Ont.	Commenced June 1. For improved working conditions and reinstatement of some of the employees. Settled by negotiations; work resumed June 14.	92	1,104

ployees of steel and coal companies, Sydney; machinists, Orillia; pattern-makers, Brantford; upholsterers, Toronto; machine operators, Thorold; pulp and paper makers, Sault Ste. Marie, Espanola, and Sturgeon Falls; compositors, Montreal; compositors, Vancouver; photo engravers, Montreal;

photo engravers, Ottawa; printers, Ottawa; printers, Toronto; printers, bookbinders and pressmen, Halifax; typesetters, pressmen and bookbinders, Hamilton; cigarmakers, Vancouver; shoe-workers, Toronto; and street railway employees, St. John.

Disputes by Industries

THE following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

BUILDING AND CONSTRUCTION.—This group indicated greater strike activity during the month than any other group. Seventeen strikes were in effect, involving 2,022 employees, with an estimated time loss of 42,740 working days. In Hamilton, the strike of the building trades was untruncated. In Ottawa the general strike was settled during the month as far as carpenters, painters, engineers and paperhangers were concerned, but in the other trades the strike was still partly in effect. Three hundred structural iron workers in Montreal were on strike for two weeks in protest against a wage reduction. Other strikes which commenced during the month in this group were: builders' labourers at Quebec; plasterers at Winnipeg; plumbers at Moncton; plombers at Moose Jaw, Regina and Saskatoon; plumbers at Port Arthur and Fort William; stonecutters at Calgary; stonecutters at Hamilton; structural ironworkers at Quebec.

PULP AND PAPER.—At the end of the month negotiations were apparently in progress toward a settlement of the strike of pulp and paper employees which was international in its scope. In Canada, the mills affected at Fort Frances, Iroquois Falls and the Sault Ste. Marie district had resumed partial operations or were preparing to do so. These strikes began during the second week in May and were in protest against decreased wage schedules. This question is now

reported as being negotiated by the international unions and the various companies.

PRINTING AND PUBLISHING.—Mention was made in the June issue of the *LABOUR GAZETTE* (page 770) of the strikes in this group throughout Canada and the United States to enforce the 44-hour week. While this was the general objective of the strikes in all centres, still each strike contained other elements of dispute, chiefly involving wage increases. In Toronto, 875 printers were on strike, according to one union report, while other reports place the number close to 1,500. Here, the former rate for printers was \$35.20 per week of 48 hours. Besides the 44-hour week, the employees' demands were reported to include a minimum of \$44 per week, while the employers as represented by the Toronto Typothetae were willing to offer \$36 for a 48-hour week or \$33 for a 44-hour week. In Ottawa, 411 typos, pressmen and binders struck on June 1 for the 44-hour week plus an increase of from \$35 per week (the former rate) to \$44 per week and \$45 per week for pressmen. In Montreal, on June 14, 25 compositors in one office struck in protest against performing work that was alleged to have come from Toronto. On June 30, the general contract which ruled in Montreal expired, and a strike seemed imminent there. For all Canada during the month the approximation for this group was 10 strikes, involving 1,775 employees with an estimated time loss of 43,849 working days.

TRANSPORTATION.—At St. John, N.B., 212 street railway employees struck, or

were locked out, on June 29, in protest against a proposed reduction in wages and certain working conditions. This dispute dates back to the previous month when the company, it is alleged, gave notice of its intention not to renew the expiring agreement. It proposed to operate a one-man street railway system and to put into effect a new schedule of rates, entailing a varying reduction. A Board of Conciliation, appointed under the Industrial Disputes Investigation Act, recommended a reduction of 2 cents per hour. The award of the Board was not acceptable to the company. A stoppage in work followed and the dead-

lock was unbroken at the end of the month.

MUNICIPAL EMPLOYMENT.—At Quebec, the police and firemen, in the employ of the city, struck on June 25, for a salary increase of 25 per cent. About 200 employees were involved. The strike was only of four days' duration, and when the municipality began to replace the strikers by unemployed men, the strike was called off. One day previous to this strike, 100 municipal street labourers in Quebec struck against a reduction of 7½ cents per hour, but by the end of the month the strike had terminated, due to the rapid replacement of the strikers by other labourers unemployed.

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING MAY, 1921

THE following details with regard to strikes and lockouts in the United Kingdom during May, 1921, based on returns from employers and workpeople, are taken from the June issue of the *British Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.—

The number of trade disputes involving a stoppage of work, reported to the Department as beginning in May, was 65, as compared with 44 in the previous month, and 204 in May, 1920. In these new disputes about 34,000 workpeople were directly involved, and 2,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes).

The national dispute in the coal-mining industry continued during May. In addition, over 16,000 workpeople were involved either directly or indirectly, in 59 other disputes which began before May, and were still in progress at the beginning of that month. The total number of disputes in progress in May was thus 125, involving about 1,152,000 workpeople, and resulting in a loss, during May, of over 23,000,000 days.

The following table classifies the disputes by groups of trades:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in progress in May.	Aggregate duration in working days of all disputes in progress in May.
	Started before May	Started in May	Total		
Building.....	10	23	33	9,000	104,000
Mining and Quarrying.....	12	1	13	1,104,000	22,583,000
Metal, Engineering and Shipbuilding.	10	15	25	10,000	120,000
Transport.....	1	10	11	20,000	227,000
Other Trades.....	27	16	43	9,000	121,000
Total, May, 1921...	60	65	125	1,152,000	23,155,000
Total, April, 1921...	54	44	98	1,176,000	23,392,000
Total, May, 1920 ...	80	204	284	138,000	1,169,000

CAUSES.—Of the 65 new disputes, 38, directly involving nearly 23,000 workpeople arose out of proposed reductions in wages; 13, directly involving nearly 1,000 workpeople, on other wages ques-

tions; 6, directly involving about 9,000 workpeople, in sympathy with the miners involved in the national coal mining dispute; and 8, directly involving nearly 1,000 workpeople, on other questions.

RESULTS.—During May settlements were effected in the case of 35 new disputes, directly involving about 14,000 workpeople, and 17 old disputes, directly involving about 4,000 workpeople. Of

these disputes, 11, directly involving nearly 1,000 workpeople, were settled in favour of the workpeople; 27, directly involving about 13,000 workpeople, in favour of the employers; and 14, directly involving about 4,000 workpeople, were compromised. In the case of 10 disputes, directly involving over 1,000 workpeople, work was resumed pending negotiations.

THE BRITISH COAL STRIKE

THE course of the coal strike in Great Britain has been reported in the last three issues of the LABOUR GAZETTE. In the June issue, the Government proposals were outlined, and it was stated that the month of May had closed with both parties considering these last methods of settlement put forward by the Government.

On June 3, the coal owners, through the Central Committee of the Mining Association, informed the Prime Minister that they had considered the proposals. Their reply was more in the nature of an interpretation of the proposals than a definite acceptance or refusal; but they made it clear that no progress toward a settlement could be made if the miners persisted in demands for a national pool and a national settlement of wages.

On the same day, June 3, the Executive Committee of the Miners' Federation, after hearing from all the districts, rejected the Government's proposals entirely. The Government, in reply, intimated that its offer of £10,000,000 to the coal mining industry could not remain open indefinitely, and that it would be withdrawn within fourteen days unless a settlement had been reached.

After this announcement by the Government, the coal owners invited the

Executive Committee of the Miners' Federation to meet them in joint conference in order that an effort might be made to reach a settlement within the time limit of fourteen days. Joint meetings were held on June 6, 7, 8 and 9, when, after a detailed discussion, it was decided that the owners' wage terms together with the proposals of the Government should be submitted to a ballot vote of every miner. The questions upon which the miners voted were as follows:

(1) Are you in favour of fighting on for the principles of the National Wages Board and National Pool, with loss of Government subsidy of £10,000,000 for wages if no settlement by the 18th June, 1921?

(2) Are you in favour of accepting the Government's and owners' terms as set forth on the back of this ballot paper?

At the back of the ballot paper there appeared the following summary:—

The Government and owners, having definitely rejected the principles of the National Wages Board and National Pool, now offer the terms fully set out below. You are now asked to say whether you will continue the fight for the National Wages Board and the National Pool, or accept the terms offered by the Government and owners. The Government offer of £10,000,000 grant in aid of wages referred to below is to be withdrawn on June 18 unless an agreement is arrived at by that date.

TEMPORARY PERIOD.

The Government offer £10,000,000 to prevent large reductions in wages where reductions are necessary. First reduction not to exceed 2s.

per shift for all workers of 16 years and upwards, and 1s. per shift for workers below 16 years. No further reductions until August 1.

PERMANENT SCHEME—OWNERS' PROPOSALS.

National Board to fix principles for guidance of districts. Board to be comprised of equal number of representatives of both sides, with independent chairman. The parties have already agreed to the principle that profits shall only be a fixed percentage of wages paid.

The Board to fix the amount of the percentage of profits to wages. The Board to fix the amount of new standard.

In this connection the owners have offered as a standard wage the total wages paid in July, 1914, plus district additions to standards, plus the percentage for pieceworkers caused by the reduction of hours from eight to seven, and a minimum percentage of 20 per cent. added thereto. The minimum percentage to continue until June, 1922.

The Board will also fix the items of cost which must be taken into account by the district auditors when ascertaining the district revenue. Wages during permanent scheme to be based upon the capacity of each district to pay.

In the event of a low-paid worker receiving a wage which does not provide him with a subsistence wage, the district board will fix a wage which will secure it for that workman. The decisions of the National Board as to the permanent scheme to be binding upon both parties for a period of 12 months, and thereafter subject to three months' notice on either side.

The balloting occurred on June 15 and the result announced on June 17, indicated a two-thirds majority for continuing the strike. The decision against acceptance carried in every district, the total vote being 183, 827, for acceptance of the terms and 432,511 for their rejection.

Following upon the miners' ballot, the Prime Minister announced that the Gov-

ernment's offer of a £10,000,000 subsidy would be withdrawn after June 18. Thereupon, the Miners' Executive Committee invited other unions, threatened with wage reductions, to attend a joint meeting with a view to enforcing mutual demands. There was much reluctance shown regarding this proposed conference and several big unions refused to attend. Evidently, joint industrial action was not in favour, and the proceedings toward such a step were abandoned.

On June 27, in compliance with the request of the Miners' Executive Committee, the Government convened another meeting of all parties. The negotiations at this meeting resulted in the immediate termination of the strike, the basis of settlement being the renewal of the Government's grant of £10,000,000 and the abandonment of the national wages pool on the part of the miners.

According to press despatches, the main feature of the settlement was the establishing of a new system of wage payments by which the workmen are to share with the employers the proceeds of the industry. Wages are to form the first charge on industry and a standard has been set below which wages will not fall. This standard has been fixed at 20 per cent. above the pre-war rate of earnings. After standard wages have been paid and the other costs of the industry have been met, the owner will take as profits £17 for every £100 paid in standard wages. If there should be any further proceeds to be divided, £83 on every £100 would go to the workmen and £17 to the owners.

APPRENTICESHIP IN CANADA

Notes on Recent Developments and Prevailing Practice

IN view of the growing interest in Canada in the training of young workers, as shown by new movements in labour unions for the regulation of apprenticeship and by recent advances in public technical education or vocational training, a brief survey of the prevailing practice in regard to apprenticeship in Canada will be of interest. In Canada, as in other countries,* the old methods of systematic training of indentured apprentices have been discontinued in many trades under modern industrial conditions. It is stated in a bulletin of the Ontario Department of Labour ("Vocational Opportunities in the Industries of Ontario," reviewed in *LABOUR GAZETTE*, October 1920, p. 1309) that in a group of industries investigated, some form of apprenticeship system was found to exist in 27 per cent of them, and in 10 per cent of the others the duty of instruction was assigned to the foreman, while in the remainder the new employees were first shown by experienced workers what to do and were then left to become proficient by routine. The bulletin quotes the manager of an Ontario factory employing a number of highly skilled trades as stating that "the factories do not teach trades any more." This experience is confirmed by the opinion of Mr. W. Baugh, president of the Metal Trades Council of Montreal, who recently pointed out in the course of an article quoted in the *LABOUR GAZETTE* for October, 1920, (p. 1307) that the apprenticeship question has hitherto been approached only from the standpoint of immediate econ-

omic results to the workers or employers, the former desiring a "square deal" for apprentices only in so far that their own wages and conditions are not lowered thereby, and the latter tending to regard apprentices merely as cheap workers and as a source of new labour supply. Very little trace remains under our factory system of the social importance enjoyed by apprentices for centuries under the guilds.

It is true that in well organized trades, such as printing and publishing, the trades unions still attempt with varying success to discharge the functions of the old trade guilds with respect to apprenticeship, but under most industrial agreements the welfare of the apprentice, instead of being a main consideration on both sides, is subject to compromises between contracting parties whose chief concern lies in their own more immediate interests. In limiting the age of admission to a trade to 16 years, for instance, no provision is made under many agreements for boys between 14 and 16, who are thus allowed after leaving school to drift into "blind alley" occupations, and are given little direction as to their future career during their most formative years. (The printing industry constitutes an exception, many agreements fixing the apprenticeship age at 14 years). The interests of apprentices have thus, in late years, been largely sacrificed or overlooked, owing to the fact that the attention of both parties to trade agreements has been absorbed by questions of self-protection, to the exclusion of more general and remoter considerations of industrial and social welfare, under which would come provision for the adequate care and industrial training of young workers.

Attempts have recently been made from two directions to meet this deficiency, first by governmental action and,

*Among recent articles in the *LABOUR GAZETTE* on apprenticeship in other countries the following may be mentioned: "Apprenticeship in the United States," (March, 1921, p. 381); "Apprenticeship in New South Wales," (June, 1921, p. 799); "Apprenticeship in the Building Trades in Great Britain: Scheme of Adult Apprenticeship for Increasing Present Supply of Labour," (January, 1921, p. 61); "Joint Industrial Councils in the United Kingdom," (containing proposal for Building Trades Apprenticeship Joint Committee) (October, 1920, p. 1311); "Progress in the Regulation of Child Labour and Apprenticeship in South Africa," (March, 1919, p. 315); "Apprenticeship under State Control in Wisconsin" (March, 1919, p. 314).

second, by the industries or the trade unions themselves.

Governmental Action

The state, which had already taken full responsibility for the general education of boys and girls up to the age of fourteen, has in recent years extended its educational work by providing facilities for technical training after the school age has been passed, as well as by the strict limitation of the age of children employed in industry. The progress of vocational training in Canada has been described in recent issues of the *LABOUR GAZETTE*.*

In several provinces also legislation has been passed to provide for the education of boys and girls over school age. In Ontario an Adolescent School Attendance Act now in partial operation requires the attendance at school of adolescents between 14 and 16, with certain exceptions, and that urban municipalities establish or maintain part time courses for pupils up to the age of 18 years. (See *LABOUR GAZETTE*, January, 1921, p. 3). It might be mentioned that the Ontario Department of Labour is also issuing a series of bulletins on "Vocational Opportunities for Young Workers in the Industries of Ontario," designed to furnish young people with a bird's eye view of the industrial field, enable them to choose a suitable vocation and provide suitable direction in regard to training. A number of these bulletins have been reviewed in previous issues of the *LABOUR GAZETTE*.

The function of technical schools under municipal or government auspices is already recognized in some trade agreements as a method of securing efficient apprentices, as for example in an agreement entered into by the plasterers at Toronto last year which requires that an apprentice shall be indentured four

years, and shall regularly attend night classes at Toronto Technical School during two years of his term; or in an agreement in the electrical trade at Hamilton, which requires supplementary electrical courses to be taken at the local technical schools.

Attitude of Organized Labour

Such institutions for technical training, however, do not fulfil all the hopes of organized labour for some system of apprenticeship which would preserve craft traditions, and at the same time retain control of the supply of new workers in the interests of labour. Thus Mr. Baugh, president of the Montreal Metal Trades Council, in the article quoted above, criticises the remedy offered by "vocational training" as not applying to "the many boys who must start to earn money when they leave elementary school, and whose parents cannot afford to pay fees, and other school expenses, and keep economically idle a boy who needs as much food, clothing and pleasure as a man." The same writer in proposing the creation of apprentice councils in each industry remarks that after all "apprentices are of our own class, often our own sons and brothers, and if any persons have an interest in their progress and happiness, we are most likely to have it." The desire felt by members of labour organizations to recover at least a partial control and responsibility for the welfare of young workers is evident in the above proposal for apprentice councils, composed of representatives of employers and workers in a particular industry in each district, supported ultimately by a Dominion-wide council, similarly representative (see *LABOUR GAZETTE*, October, 1920, p. 1306). The local councils, it is suggested would take care of the boy on the job, study the local situation, ascertain the inclination of boys in the latter months of their elementary school course, furnish them with information regarding possible callings, and even form evening classes, and draw up schedules of training and examinations, so as by this means

*January, 1921, p. 51, "Technical Education Act in operation", p. 52, "Progress of Vocational Education in Canada"; February, 1921, p. 202, and April, 1921, p. 594, "Recent Developments in Vocational Education in Canada"; November, 1920, p. 1500, "National Conference on Technical Education"; September, 1919, p. 1114, a summary of the Technical Education Act of 1919.

to ascertain the special aptitudes of individual boys and fit the right boy to the right job.

Existing elements for such an apprenticeship council are perhaps to be found in such organizations as the Joint Apprenticeship Committee created under an agreement in the bookbinding trade at Toronto last year, and which makes recommendations as to training (see LABOUR GAZETTE, September, 1920, p. 1228); in the Joint Examining Boards existing in some trades, such as the plumbing and steamfitting trade at Toronto, (see LABOUR GAZETTE, October, 1920, p. 1386); or in the printing trade at Montreal, Hamilton and elsewhere (see LABOUR GAZETTE, November, 1912, p. 550, etc.), in which the apprentice is examined during his first year by a joint committee composed of a representative of the Employers' Association and another of the local International Typographical Union. In the lithographing trade at Toronto, again, an apprentice committee was formed last year consisting of two members from each organization to review the labour situation each six months and agree on the ratio of apprentices to journeymen for the following six months. Such provisions, however, have reference partly to the necessity on the side of the employers of receiving a *quid pro quo* in the shape of a guarantee of efficiency, in exchange for consenting to limit the number of apprentices. A joint board of this character evidently falls far short of a true apprenticeship council, which would aim at promoting primarily the welfare of the apprentices, and secondarily that of the craft and the general public. Little systematic provision is made for the instruction of the boys. Even in the highly organized printing trade, although standards are provided by means of courses of instruction set by the International Union Technical Schools, and although stringent clauses are included in all agreements by which to regulate the standing of indentured apprentices in each year of their term, the work of actual instruction is left either to the al-

ready overburdened foreman, or more frequently to a journeyman employed on piecework; or the apprentice is practically left to pick up knowledge by his observation of other workers. But indefinite and unsatisfactory as the position of apprentices had become, some progress towards better conditions is evident from the inclusion in recent agreements of such typical clauses as the following, which occurs in the carpenters' agreement of last year at Hamilton and Windsor: "Steps to be taken by both parties before the termination of this agreement to introduce an apprenticeship system and trade tests."

National Apprenticeship Council in Building Trades

The most promising recent development, however, is the National Apprenticeship System of the Building Industry, which was approved by the National Joint Conference Board at a meeting held last January in Montreal, and was also approved by the Association of Canadian Building and Construction Industries at its annual conference at Winnipeg in the same month, (see LABOUR GAZETTE, February, 1921, p. 198). The report of the board committee which drew up the plan, after calling attention to defects of existing conditions, concludes: "Our hope of meeting the situation lies in the revival of a well-established and defined apprenticeship system, with a very definite objective, under the supervision and joint control of our respective organizations." The above scheme was also approved by the Joint Conference of the Building and Construction Industries in Canada, which was held in Ottawa in May, under the auspices of the Federal Department of Labour.

The main features of the National Apprenticeship System, as approved by the conference, are as follows: It is to consist of a National Apprenticeship Council composed of seven members, three of whom shall be employers and three shall be employees in the industry. These six

members, who shall be appointed by the Joint Conference Board of the Industry, shall select the seventh member who shall be chairman of the council. Under authority of the National Council there shall be formed Local Apprenticeship Councils each composed of one employer and one employee for each trade in the industry, with one architect and one industrial engineer. The Local Councils shall carry out the objects of the Apprenticeship System; and the relation of the National Council to the Local Councils shall be advisory and supervisory, except in respect to questions or disputes which shall be referred to the National Council for decision, which decision shall be final and binding. Standard forms of indenture shall be adopted by all employers, and the employer shall bind himself to give the apprentice the fullest opportunity to learn the trade by practice and by attendance at a vocational school. An apprentice shall be bound to attend prescribed vocational classes, and an examination board of not less than three members shall examine apprentices at stated periods. A Local Council may in certain cases cancel indentures and transfer apprentices to another employer, or may, by agreement with the employer, arrange for short periods of transfer to enable the apprentice to extend knowledge of his trade. The local council will assume joint responsibility with the employer for providing facilities for the apprentice to learn all branches of his trade; and it shall determine the number of apprentices necessary, and discharge other functions, all of which are fully described in the Department of Labour's Bulletin No. 3, Industrial Relations Series, "Joint Conference of the Building and Construction Industries in Canada, Ottawa, May 3-6, 1921." This bulletin, copies of which may be obtained from the Department of Labour, also contains, on pages XIII-XV., the rules and regulations governing the National Apprenticeship Council of the Building Industry and the local apprenticeship councils

with a form of indenture of apprenticeship.

Railway Shop Apprentices System

The highest actual development in regard to the training of apprentices in Canada which has up to the present time been attained within the limits of a particular industry may perhaps be found in the engineering trades. This is due to the diversified and exacting nature of the work carried on in such plants as engine and railway repair shops, which required definite measures to be taken for the training of young recruits.

The *Canadian Railroader*, in its issue of August, 1918, described the apprenticeship system that had developed up to that time in the shops of the Grand Trunk Railway. A beginning was made with blacksmiths and carpenters, the chief craftsmen of the earlier period. To these trades were gradually added boilermakers, machinists, pattern makers, tinsmith, coppersmiths, moulders and others, each requiring highly specialized training.

The principal object in any apprenticeship system (says the *Railroader*), should be the training of the young mind as a basis from which any of the above branches of engineering may, if necessary, be followed later. Such a system provides a supply of well-trained mechanics in the first place and, when necessary, a selection is made to fill the positions of foremen and staff officers. These can be relied upon to go ahead and carry out efficiently and successfully their various duties of productive work by reason of their original training and experience in the class-room and in the shop.

It may not be generally known that the Motive Power Department of the Grand Trunk Railway System has been a pioneer in the modern development of apprenticeship systems, which are now part of the educational features of all large railroads in North America. From a small beginning about 16 years ago, in a few of the main shops, the system now in use has spread out to include instruction by a capable instructor at every shop and roundhouse where three or more apprentices are employed. There are a few places where less than that number are employed, but arrangements are such that these can be reached by correspondence lessons and periodical visits by a teacher, so that no

apprentice working for the Grand Trunk Railway in the Motive Power Department is without the opportunity of improving himself along lines best suited to his advancement.

The wide range of work conducted in the Motive Power Department makes it possible for the company to offer regular courses of apprenticeship in the following variety of trades: machinists, boilermakers, patternmakers, tin-smiths, coppersmiths, moulders, blacksmiths, pipefitters and electricians. All of these are available at the three main shops, located at Montreal, Stratford, Ont., and Battle Creek, Mich. The majority are available also at the shops at Ottawa, Ont., and Deering, Me. Machinists' apprentices are employed at all round-houses, and their training is specialized on running repairs to locomotives. This line of work covers a great field, and affords the round-house apprentice a large variety of work and opportunity for study. A part of their time is given to machine shop practice.

Increases in the rate of pay are made regularly each year. The apprentice is required to try an examination each year, which will show the Master Mechanic and the superintendent of Motive Power that he has been diligent in his studies and that he has applied himself to his work. At each of the main shops there is an apprentice instructor, whose duty it is to supervise the education of the boys individually and to show by demonstration how machines should be run.

Each week every apprentice must attend class studies in mechanical drawing, mathematics, sketching, blueprint reading and points concerning machinery, locomotive parts and shop operations. Such portions of these subjects are taught as are needful for the particular education of the apprentice. These classes are under a capable instructor who also sees that every boy has regular shifts, so that he will be given an all-round education, and not simply learn how to work one machine or perform one operation. Later on, after his apprenticeship period is completed, he can specialize in one department if he desires.

An apprentice having satisfactorily completed his four years in the shop as a machinist, blacksmith, pipefitter, patternmaker, electrician or boilermaker, receives a bonus from the company. Roundhouse apprentices, who also serve four years, receive a bonus from the company upon satisfactory completion of their term. While no restriction is placed upon an apprentice to continue in the service of the company after the completion of apprenticeship, nevertheless the management prefers that all apprentices who have served their time remain with them, and appreciate their continued service.

Recent Industrial Agreements

Some notes on apprenticeship clauses contained in the constitutions of International Unions and in recent industrial agreements are given below.

BUILDING TRADES.

Bricklayers. Term of apprenticeship 4 years, under indenture; some agreements limit age of apprentice to 18 years; allow one apprentice for each firm which has been in the district for 2 years, and employs 2 bricklayers, and a second apprentice after a firm's fourth year; a second apprentice is occasionally allowed provided the first has served three years of his term. No definite provision is made for instruction, but the constitution of the International Union states that all apprentices should attend a technical night school for one year during their term of apprenticeship, or take up a home study course approved by the executive board of the Union.

Carpenters. Apprentices are allowed in the proportion of one to 5 or, sometimes, 4 journeymen. One agreement stipulates that not more than one apprentice shall be allowed in proportion to one journeyman carpenter, and that no man over the age of 22 shall work as an apprentice under certain fixed rates of pay. One agreement provides that apprentices cannot be accepted under 18, unless they have previously worked at the trade. Recent agreements, however, contain no general clauses regarding age limit, instruction or other conditions of apprenticeship. Apprentices in some districts must attach themselves to the union local not later than their second year. The constitution of the International Union recommends a strict system of indenture as the best means of thoroughly learning the trade and encouraging boys to join. Boys engaging to learn the trades are to register with the Union.

Electricians. The usual term of apprenticeship is four years, with an annual examination, the shop training being supplemented in some centres by an electrical course at the local technical schools. The first six months' period is sometimes regarded as a probationary period, after which apprentices are expected to join the union. Some agreements make no mention of "apprentices" but allow for the employment of one "helper" for each journeyman employed all the year round; first and second-year helpers in such cases are allowed to work only on shop repairs, except under the supervision of a journeyman; while a third year helper may work under the foreman, except on large contracts.

Painters. Only a few agreements have been recorded in recent years in this trade. The

term of apprenticeship is generally three years, with a provision in some shops that learners must be under 21 years of age on starting; masters are sometimes allowed one apprentice for the shop irrespective of the number of journeymen employed, but the constitution of the International Union allows the local unions to limit the ratio.

Plasterers. In some cases the age limit for learners is expressly abolished, while in others it is set at 16 or 17 years. The sons of masters are not included in the number of apprentices authorized, which is mostly one apprentice for each firm, a second only being allowed when the firm employs over 8 men, and when the eldest apprentice has entered upon his second or third year. The constitution of the International Union, however, states that there must not be more than 2 apprentices to 25 journeymen. Apprentices are generally bound before a notary, the usual term being four years; the age of an apprentice is generally set at under 17 or 18 years. An agreement made in Toronto last year requires attendance at the technical school during the last two years of apprenticeship. The constitution of the International Union makes the locals responsible for seeing that apprentices have full opportunity for learning the trade.

Plumbing and Steamfitting. Conditions of apprenticeship are more stringent in this than in the preceding departments of the building industry. Masters are required under some agreements to submit a list of their indentured apprentices for registration. The term of apprenticeship is generally five years. Apprentices, who are defined as "those who have worked less than three years and are over 16 years of age," are sometimes under control of the employers for the first three years, and for the fourth and fifth years they are under the union local. Apprentices in the first three or four years are usually not allowed to use tools except under supervision of a journeyman. At the end of this period the apprentice is required to pass an examination, after which he receives pay at from half to two-thirds of journeymen's current rates. One apprentice is, in most cases, allowed to each shop, with one additional to each five journeymen, and not more than from 3 to 5 apprentices to any one shop. After his third year the apprentice may serve as an "improver."

BARBERS

One agreement, which was made in 1914, provides that where an employer engages an apprentice who is not qualified to join the local union he shall pay a consideration which the employer and said apprentice may agree on. Provision is made in the by-laws of a local union for apprenticeship as follows: Any man or boy engaging himself to learn the bar-

ber trade must have passed his fifteenth year and must serve a regular apprenticeship of three years.

CLOTHING.

Boots and Shoes. Recent agreements in this trade contain few clauses relating to apprentices, except in connection with the fixing of rates of wages in the earlier stages of apprenticeship.

Tailoring. There are no constitutional provisions, but one or two local agreements limit the number of "helpers" employed to one for every two skilled workmen.

One agreement in the clothing industry provides a two-weeks' probationary period if new workers are regularly at the trade. Apprentices or workers taken from other trades have a trial period of four weeks. An agreement at Toronto in 1920 stipulates that the manufacturer "shall have the privilege of developing workers through the apprenticeship system on a basis to be determined by the representatives of the manufacturers and the union." An agreement in the tailoring trade stipulates that apprentices shall be employed only by special arrangement with the union.

CLAY, GLASS AND STONE.

Glass Bottle Blowers. Term of apprenticeship fixed in one agreement of 1919 at 3 years.

Granite Cutters. Term of apprenticeship for cutters is three years; for tool sharpeners and polishers, two years; one apprentice allowed for six journeymen or less. This agreement provides that no apprentice is to be admitted to the union until his full term is completed; that apprentices are to be given a fair opportunity to make themselves proficient at their trade and that no apprentice is to leave his employer to work for another at the trade during his term, unless under conditions agreeable to his first employer. Not more than three apprentices shall be employed to each full tool sharpener's gang of journeymen, nor more than two to less than a full gang.

FOOD, DRINK AND TOBACCO.

Bakers. Recent apprenticeship agreements contain the following provisions: Apprentices to be over 16 and under 20 years of age at beginning of term (except returned soldiers to whom the union agrees to give every facility to become apprentices at suitable wage to be determined in each case). Proportion of apprentices allowed: 1 to each 3 journeymen in cakeshops, and 1 to 5 in bakeshops. Apprentices to work union hours with time and a half for overtime.

Brewers. One apprentice to each department or three for each brewery; term, 2 years,

with minimum wage; age on starting 16 to 18 years.

Butchers. Boys between 16 and 18 years of age to receive minimum wages; after 18, boys doing men's work to receive men's pay.

Tobacco. The proportion of apprentices allowed in the cigar making trade is, 1 to a shop employing 1 to 5 journeymen, 2 to 10 journeymen, 3 to 20, 4 to 30, 5 to fifty, 5 to be the limit. One apprentice to a journeyman packer is included in the general limit. Some agreements provide that where journeymen are laid off apprentices are to be laid off in the same proportion. In some cases provision is made for returned-soldier learners to be employed in addition to regular apprentices. No apprentice is allowed unless the manufacturer employs journeymen.

METALS, MACHINERY AND CONVEYANCES.

Railways—Mechanical and Car Departments. Wage agreement No. 4 of the Canadian Railway War Board (now known as the Railway Association of Canada) for locomotive and car departments, effective December 1, 1919, gives the following provisions for apprentices: All apprentices must speak, read and write English (or French, in Province of Quebec), and understand the first four rules of arithmetic. Applicants to be between 16 and 21 years of age, to serve 5 years of 290 days; if retained, to be paid not less than minimum rate for journeymen. Apprentices to be indentured and to be given opportunity to secure a complete knowledge of the trade. Ratio of apprentices to be not more than one to every five mechanics. If within six months an apprentice shows no aptitude he shall not be retained. Apprentice not to be assigned to work on night shifts nor allowed to work overtime during first two years.

Shipyards and Marine Trades. The term of apprentices in the marine trades is four years; one apprentice allowed for each five journeymen; half the number of apprentices may in some cases be taken from the ranks of helpers.

Machinists. Age limit on entering, 16 to 21 years; term, four years; apprentice to be taken on probation for three months and then notified if unsatisfactory; apprentices not to leave without reasonable cause.

Sheet Metal Workers. Term of apprenticeship, 4 years under mechanics; apprentice to be under 20; to hold union card, renewable yearly; apprentices to take course in sheet metal drafting during third year; to receive wage increase every 6 months.

Moulders. Term 4 years; apprentices to be advanced in all branches of trade; one apprentice allowed for the shop at large, and one for each 5 journeymen.

PRINTING AND PUBLISHING.

The term of apprenticeship for printers generally is five years, but an exception is made, for instance in a Montreal agreement of 1912, in the case of an apprentice who has passed the supplementary course of instruction furnished by the International Typographical Union Technical Schools, in which case 4 years may suffice; the apprentice must during his first year be examined by a joint committee composed of one member of the Employers' Association and one member of the union, and if he is judged incapable of becoming a competent printer the foreman shall advise him to seek some other vocation. Some agreements provide for a yearly examination by a committee composed of the president of the Union local, and the employer. A recent agreement at Hamilton requires apprentices to attend technical school and take the typographical union supplementary trade course (LABOUR GAZETTE, March, 1921, p. 418). The duty of both employer and employee is to see that the apprentice has every opportunity of becoming efficient. Apprentices must generally have served 4½ years before learning the linotype machine. The proportion of apprentices varies; in some agreements 1 apprentice is allowed to the first 3 or 4 journeymen, and 1 for each subsequent 4 or 5 journeymen; in others, the proportion of apprentices to journeymen is set at fifty per cent. The age limit is generally set at 14 years. Apprentices must be able to read manuscript intelligently and perform the duties of a copyholder, their qualifications in this line being judged by the foreman, chairman of the chapel or a substitute journeyman. Apprentices must be registered by the union at the beginning of their term. Special conditions are laid down for linotype machine apprentices. Some agreements expressly stipulate that apprentices must be transferred from one department to another so as to master all details of the trade. At some newspaper shops apprentices must serve more than 18 months on the "dump" or the same on "ads". An agreement made at Toronto in 1915 gave apprentices the right to appeal to their chapel in the fourth year of their apprenticeship should they feel that any injustice has been done them. The scale of pay for apprentices is often "left to the office" for the first two years of the term, but is strictly defined for the last three years.

PULP AND PAPER.

An agreement of last year in the mills at Dryden, Ontario, calls for the establishment of an apprenticeship system in the mechanical department, "under which youths and young men may learn their trade" beginning at a fixed minimum wage.

PUBLIC UTILITIES.

Among the electrical workers in power plants the rules for apprenticeship mostly fix the term at three or in some cases four years, an employee with less than three years' experience being classed as an apprentice; the proportion allowed is one apprentice to about seven journeymen; groundmen are sometimes given preference when apprentices are taken on, one-third of their time as ground men counting as apprenticeship, the time thus allowed not to exceed one year; employees on switch and service work under 18 serve a probationary period of 6 months at a higher rate of pay. In the

light departments the term is 4 years, with 1 apprentice to 3 journeymen.

ELECTRIC RAILWAYS.

One agreement requires that a "student" pass a preliminary examination, after which he is taken on as a spare man, and is considered to be on probation for four months, at the end of which he must pass a final examination to be made permanent. Under another agreement the training period is left to the discretion of the superintendent; applicants must be able to read and write English and be approved by the superintendent.

LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA

Reports by the Dominion Bureau of Statistics on (a) the glass industry in 1918; (b) the vinegar and pickle industry in 1919

THE Dominion Bureau of Statistics continues its survey of Canadian industries in 1918-19, with preliminary reports on the glass industry in 1918, and the vinegar and pickle industry in 1919. Previous reports in this series have been outlined in recent issues of the **LABOUR GAZETTE**.

The Glass Industry in 1918

The monograph on the glass industry in 1918 forms an advance chapter of an extensive report on "Chemicals and Allied Products in Canada in 1918," prepared under the direction of W. S. J. Cook, chief of the Mining, Metallurgical and Chemical Division of the Bureau. The glass industry shows small development in comparison with the abundance of raw materials and the ready home market for its products. The approximate consumption of glassware in Canada in 1918, was \$11,974,208. Of this amount, however, \$5,430,873 represented imports from foreign countries, the pro-

ducts of the Canadian factories being valued at only \$6,578,602, of which \$35,267 represented articles exported, the balance of the Canadian production being sufficient to meet only 54.9 per cent. of the Canadian market demand. The report concludes, "there seems to be no good reason why the glass industry should not be further developed in this country." Nine establishments were engaged in Canada in 1918 in the manufacture of glass and glassware, of which 7 were in Ontario, 1 in Quebec and 1 in Alberta, the total working capital invested in these plants amounting to \$7,443,525. The average force employed included 2,215 workers in receipt of weekly wages, with average annual incomes of \$908, and 117 salaried workers (including officers, superintendents, managers, clerks and office employees) with annual incomes averaging \$1,799. The total amount of salaries paid during the year to the latter class was \$210,512, while to the wage earners \$2,011,051 was

paid out during the year. The following table shows the distribution of the salaried employees and wage earners in the industry on a certain day in December, when a full complement of workers was engaged, the total number employed on this date being somewhat greater than the annual average mentioned above. The minimum staff was employed in August when only 1,570 wage earners were at work.

DISTRIBUTION OF NORMAL WORKING STAFF

Salaried employees..	1918	
	Male	Female
Officers, superintendents and managers	36
Stenographers, clerks, salesmen and other salaried employees.....	48	33
Wage earners receiving per week:—		
Under \$10.....	92	80
\$10 but less than \$15.....	229	97
\$15 but less than \$20.....	552	16
\$20 but less than \$25.....	537	1
\$25 and over.....	720	1
	2,214	228

The total expenditure for the year, including salaries and wages, cost of fuel and materials, and miscellaneous expenses, was \$5,882,295, while the total output during the year was valued, as stated above, at \$6,578,602.

The Vinegar and Pickle Industry in 1919

Thirty-four individual plants were engaged in Canada in 1919 in the vinegar and pickle industry. Of these plants 16 were in Ontario, 7 in Quebec, 4 in British Columbia, 3 in Manitoba, 2 in Alberta, and 1 each in New Brunswick and Nova Scotia. The total amount of capital invested in these plants was \$3,487,223.

The numbers of employees by classes and by sex are given in the accompanying table, together with the amounts paid to each class in salaries and wages.

Classes of employment	No. of employees		Salaries and Wages
	Male	Female	
Officers, superintendents, managers	51	2	\$113,990
Clerks, stenographers, etc.....	45	23	84,829
Wage-earners, average number...	304	225	460,844
Totals.....	400	250	659,663

Classified by weekly wage payments, within specified wage groups, the numbers of persons by age and sex, as on payroll of December 15, were as follows:

Groups of weekly wage earnings	Over 16 years of age		Total employees
	Male	Female	
Under \$5 per week.....	...	2	2
\$ 5 to under \$10 per week...	9	41	77
\$10 to under \$15 per week...	28	120	178
\$15 to under \$20 per week...	79	36	115

Totals.....	345	222	624*

*The above totals of male and female workers include 18 boys and 39 girls under 16 years of age.

Expenditures (including cost of materials), \$2,122,324; salaries and wages, \$659,663; fuel, \$58,367 and miscellaneous expenses, \$579,557) totalled \$3,419,911, while the selling value at the factory of the products of the industry was \$4,267,568.

REPORTS FOR 1920 OF THE BRITISH COLUMBIA DEPARTMENT OF LABOUR AND THE MINIMUM WAGE BOARD

THE third annual report for 1920 of the British Columbia Department of Labour, which includes also the third annual report of the Minimum Wage Board, has recently been issued.

With respect to wages, the statistics of which in the report cover the twelve-month period ending September 30, 1920, the average wage during the period of all adult male workers in the Province is given as \$31.51 per week, an advance of \$2.40 per week as compared with 1918-19, and of \$3.54 per week as compared with the first seven months of 1918.

The aggregate payroll of those 1,869 firms reporting amounted to \$82,688,708 for the year. The largest payroll in any individual industry was in the lumber industry, covering 474 firms, which amounted to \$25,759,698. The earnings of all the industrial workers included in those firms reporting are given below in classified wage groups:

For week of employment of greatest number	Females		Males		Apprentices
	18 yrs. and over	Under 18 yrs.	18 yrs. and over	Under 18 yrs.	
Under \$6.00.....	4	21	1	29
\$ 6.00 to \$ 6.99.....	1	43	1	22
7.00 to 7.99.....	42	36	6	4	26
8.00 to 8.99.....	9	47	4	5	50
9.00 to 9.99.....	16	51	7	22	27
10.00 to 10.99.....	71	74	73	77	42
11.00 to 11.99.....	20	154	38	29	29

17.00 to 17.99.....	563	50	238	12	21
18.00 to 18.99.....	1,680	45	355	2	8
19.00 to 19.99.....	434	19	46	23
20.00 to 20.99.....	1,165	26	260	4	25
21.00 to 21.99.....	1,023	31	110	3	15
22.00 to 22.99.....	2,183	53	95	6
23.00 to 23.99.....	2,567	25	54	1	7
24.00 to 24.99.....	2,943	23	41	9
25.00 to 25.99.....	3,875	10	54	1	4
26.00 to 26.99.....	1,738	3	16	2	2
27.00 to 27.99.....	6,451	11	8	7
28.00 to 28.99.....	2,203	9	2
29.00 to 29.99.....	2,184	4	6	1	1
30.00 to 30.99.....	13,808	7	163	8	3
35.00 to 39.99.....	12,360	15	6	1
40.00 to 40.99.....	6,386	7
45.00 to 49.99.....	3,167	6
50.00 and over.....	3,172	2

With respect to the number of hours worked weekly by wage-earners during the year, there was a slight tendency in the direction of shorter hours, 50.4 per cent of the wage-earners working 48 hours or under as against 49.7 per cent in the preceding twelve-month period. Slightly more than 2 per cent worked over 60 hours. The longest hours worked were in coast shipping, but the men stated to have been working 84 and 96 hours per week cannot, according to the report, be said to have been in steady employment at these hours. The following table shows the number of workers as on September 30, 1920, grouped according to the length of the working week:

	No. of Workers
Under 44 hours per week.....	1,004
44 hours per week.....	14,374
45-48 hours per week.....	20,756
49-54 hours per week.....	17,801
55-60 hours per week.....	16,232
61-72 hours per week.....	835
Over 72 hours per week.....	644

During 1920, sixty-eight strikes took place, an unusually large number, more than half of which were in the lumber industry; the aggregate time loss, however, amounting to 118,979 working days, was considerably less than in 1919, when the general strike tied up a large portion of the Province's industries for some weeks in the middle of the summer.

With respect to the work of the Provincial Employment Service it is stated that since the provincial Act making it illegal to carry on private employment bureaus where fees are charged came into operation, the work of the Government employment offices in British Columbia has increased greatly, the number of placements in 1920 being about double the number for 1919. At the end of 1920 there were 17 employment offices in the Province, including the

two separate offices for women at Vancouver and Victoria. The problem of the returned soldier continued to be a big one, much of the unemployment in the Province being due, it is claimed, to the fact that British Columbia has to absorb more returned men than any other province in the Dominion.

In answer to a request sent out to employers to furnish information with regard to their bonus, profit-sharing, pension, group insurance, and sick-benefit schemes, sixty firms responded, and it was discovered that many and various profit-sharing and bonus schemes were in operation. Few firms, however, have pension schemes, and those in existence do not appear to follow any hard and fast rule. Under the head of "Group Insurance" several lumber companies have each white employee insured for \$1,000, paying the premium while a man remains in their employ. In other cases the amount insured for is increased periodically. Seven companies in all have definite plans in operation for payment of employees during absence on account of sickness, most of them being on a contributory basis.

Report of Minimum Wage Board

Since the establishment of the Minimum Wage Board in 1918, nine orders in all have been made, covering the Mercantile Industry; Laundry, Dyeing, and Dry-cleaning Industries; Public Housekeeping Occupation; Office Occupation; Personal Service Occupation; Manufacturing Industry; Telephone and Telegraph Occupation; Fishing Industry; and Fruit and Vegetable Industries. (These orders have been reviewed in previous issues of the LABOUR GAZETTE.) The returns given in the annual report of the Minimum Wage Board for 1920 show that a higher rate of wages for women, with a slight reduction in working hours, was the rule as compared with 1919. The report deals with the wages and hours of 9,809 female employees.

In the Mercantile Industries group the returns indicate more than twice the number of adult women receiving the higher wages (\$25 a week and over) in 1920 over those in 1919. There was an increase in the number of adults and a decrease in the percentage of girls under 18 years employed in this group, and while the wages of the women show an appreciable increase, the wages of girls under 18 show a slight decrease. Similar results were shown in most of the other industries. In the Personal Service occupation, the order for which came into effect late in 1919, an average wage of \$16.69 for adult workers was shown, while those under 18 years received an average of \$14.47 per week. The week's work averaged 35.7 hours. This short working period is accounted for by the number of theatre ushers whose duties occupy, as a rule, a few hours less per day than the other employees in this group. The highest wages are earned by employees in beauty parlours, or attendants at gasoline service stations. In the Fruit and Vegetable industry, and the Fishing industry, orders for which became effective on February 28, 1920, the workers are not classified by age but experience, the time set for "experienced" workers in the former industry being 3 months, and in the latter one year. The average weekly wage in the Fruit and Vegetable industry is \$17.85 for experienced workers and \$11.90 for inexperienced. The average hours worked per week are 48.45. The legal minimum wage for experienced workers in the Fishing industry is \$15.50, the average earned in 1920 being \$2.25 higher. The Telegraph and Telephone occupation, an order for which became effective April 5, 1920, also divided the workers into "experienced" and "inexperienced," nine months being the required time for experienced workers. The telephone occupation is the one in which the greatest group of workers receive a similar wage. Out of the 1,227 operators reported, 426 are classified as being in receipt of wages from \$15 to \$16 a week. The

average for the experienced worker figures at \$17.13, as against \$13.90 for the inexperienced. The returns from pay-rolls indicate that for the greatest number of girls the best paid employment, with the shortest hours, is to be found in the Telephone and Telegraph occupation. The largest percentage of the high salaries occurs in the Office occupation, but the highest individual salaries noted are paid to buyers or executive officers in mercantile establishments.

Only a few employers took advantage of the invitation sent out to them to express an opinion on the working of the Minimum Wage regulations. The Board deduces from this that the regulations were acceptable to most of the employers. The majority of those who did reply were strongly in favour of the regulations. Employers in the Office occupations responded more freely, both favour-

ably and adversely, the chief source of complaint being in regard to the standard of pay set for the beginner. Such employers advocated work without pay for the first few months, or at a nominal salary, until such workers became more efficient. Some employers in this and other industries advocated a minimum wage for men also. Some comments from employers in the Personal Service occupation dealt with the apprenticeship phase of the question. They would like the limitation in number of apprentices done away with and permission given to start learners at a purely nominal wage.

The Board concludes its report by stating that a conference in the near future of all the Minimum Wage Boards in Canada would be of great value as tending toward more uniform standards of wages, hours and conditions of labour.

PRICE OF COAL IN BRITISH COLUMBIA

Government Inquiry into Cost, Production and Sale

IN response to general complaints in Vancouver, Victoria, and other coast cities in regard to the high prices charged by retailers for coal, as compared with the prices charged at the pit heads, the British Columbia Government recently appointed Mr. Alexander Henderson as Commissioner under the Public Inquiries Act, to investigate conditions in this industry with special reference to the Vancouver Island field. General R. G. E. Leckie, mining engineer, and Mr. A. P. Foster, chartered accountant, were also selected to investigate the methods and records of the various operators. The Commission, after hearing many witnesses, found the following reasons for the existing high cost of coal as compared with the prices current in 1914:

1. Increased cost of labour.
2. The exhaustion of the more cheaply mined sections of the coal seams and

the consequent gradual increase in distance to the working faces, which entails larger haulage ways and the maintenance of same, and necessitates longer distances for the miners to travel to their work in working hours; in some cases in old mines, almost 20 per cent of the time is taken up in this way.

3. Increased difficulties encountered underground in the way of "faults," "wants," and other irregularities in the formation of the seam.

4. Increased salaries and wages for management and in offices. These fixed expenses, however, vary per ton approximately in inverse ratio to the coal produced.

5. Increase in price placed on the coal to permit of a profit being made on the production by the principal operating companies; previously some of the

principal companies had been operating at a loss.

6. Increase in pay to officers and crews concerned in the transportation of coal.

7. Increased cost of fuel at the bunkers and of supplies.

8. Increased cost of labour in handling, screening, sacking and delivering coal.

9. Increased salaries and other office expenses in connection with the dealers' firms. This includes increased rentals.

10. Increased number of coal dealers. This necessitates fixed expenses out of proportion to the amount of coal handled. There apparently exists among the dealers an agreement to determine the selling price of coal and thus prevent that competition which might eliminate from the business those unable to handle coal cheaply.

11. The great demand for lump coal exclusively, when a mixed produce would serve the purpose equally well.

12. The desire to have coal delivered in sacks, instead of in bulk. This is chiefly owing to faulty construction in buildings; no arrangements being made to receive coal in bulk.

WAGES AND MANAGEMENT NOT BLAMED.

In discussing the wages paid to coal miners, Mr. Henderson stated: "The wages paid are high, but there is nothing that is fixed on a fairer basis. Wages are readjusted at regular quarterly intervals by the High Cost of Living Commission, and rise and fall according to the rise and fall of the price of commodities essential to life. If all wages were fixed in the same way, that is to say, a fair basic wage to start with and then an increase above that wage or a reduction towards it, as prices of commodities rose or fell, it would become evident very quickly that workmen are not unreasonable because their wages were very high, but that those who controlled the prices of commodities were responsible. In

this connection it must not be forgotten that coal mining in British Columbia, even more than elsewhere, is of a somewhat intermittent character, and that employment is frequently not for the whole time, but is interrupted by idle days, often several in a week. This is trying for the workmen and bad for the operators, and probably can be cured only by increased demand for coal. It is mentioned as an incident, perhaps inevitable, and certainly resulting necessarily in higher wages than would be required were the employment constant for full time. I cannot refrain from remarking upon the evidence respecting the conduct of mining operations in Vancouver Island. This evidence shows that the management is excellent, that the superintendents and others in charge are most experienced and intelligent men, and are familiar with the best and latest modes of mining, that the operations are well and efficiently conducted, and it reconciles one slightly to high prices to learn that the provisions for the safety and welfare of the workmen are of the very best, and that improvements are being constantly made. The evidence on this phase of the subject seems to me most satisfactory and convincing, and is supported by General Leckie after a thorough investigation by him. Supplies and materials have been and still are high in cost for mines as for other requirements. It must not be forgotten, however, that there is not much inducement to the operators at the present time to reduce operating costs. They are getting an extremely high price for their coal, and as long as that continues they have little reason to complain of high wages or high prices for supplies."

EVIDENCE OF A COMBINE.

Mr. Henderson finds that the evidence brought before the Commission "clearly establishes that the prices paid by consumers have been excessively high." The price of \$15 per ton for lump coal has never been justified, he declares. "The evidence shows very clearly a combine

among many dealers in Vancouver to fix the price of coal. The Dealers' Association does not appear to have discharged any other function which it might except the function of keeping up the price of coal. The Association could render invaluable aid in reducing the price of coal, if it adopted a regular system of transporting coal from the Island to Vancouver, and also an economical system of delivery."

RECOMMENDATIONS.

The Commissioner concludes a review of the evidence with the following recommendations:

1. Introduce the use of the short ton in all Government compilations, and endeavour to secure its use in all sales.

2. Require coal operators to furnish monthly returns of the operating cost and sales realizations of their several mines.

3. Dealers should be licensed, not for revenue but to compel compliance with conditions contained in the license, safeguarding the public. They should also be required to make returns showing capital engaged, coal handled, operating cost, sales realizations and profits received. These returns should be uniform and be subject to government audit and examination as in the case of the operators.

4. Dealers and all large users should make collection of stores of coal in the summer season, when transportation is cheap, and municipal bodies should encourage such collection.

5. Tests should be made and published showing the analyses and characteristics of coal from all the mines of the province. Endeavours should be made to see that one class of coal is not put on the market in the name of another. Further, there should be established a standard by which to grade coal

by its physical form. General Leckie in his recommendations suggests how this should be done.

6. Dealers should be required to issue to the public regular lists setting forth the different grades of coal, the tests relating to them, the several uses to which the different coals may best be applied and prices.

7. Consideration should be given to the advisability of appointing a fair weights and measures officer for the Province, and he might be given supervision over similar civic officers and jurisdiction as to grades. Provincial police and civic police should be authorized to supplement the authority of the weights and measures officer in every possible way, and a determined effort made by every means available to stamp out the practice of deception in weights and measures.

8. Supervision of construction of new buildings might include regard to convenience for accepting delivery of coal, wood, and other goods in bulk.

9. Combines which keep up the price of coal should be dissolved, and the offenders prosecuted.

10. An enactment to compel operators to furnish coal to any person demanding a quantity, not less than one carload of 40 tons, and tendering payment therefor at the correct price, provided that the operators should not be required to furnish coal to such person in priority to orders previously given *bona fide*.

11. Study should be given to the question of introducing uses of coal that would obviate the waste of by-products and the public nuisances now suffered.

12. Consideration of the use of pulverized coal and the establishment of central plants for its production, and introduction of automatic stokers.

13. An endeavour should be made to reduce freight rates, both rail and water, from coal shipping points.

AN INTERNATIONAL SEAMEN'S CODE

IN a note addressed to the Governments of the States members of the International Labour organization entitled "The International Seamen's Code," published in the form of a 174-page booklet, the International Labour Office describes the attitude of the various Governments toward such a code, and the work already done by the Commis-

sion on an International Seamen's Code and the Joint Maritime Commission.

Sometime before the Second International Labour Conference, which was held in Genoa, Italy, June 15 to July 10, 1920, the International Labour Office sent a questionnaire to the Governments of all maritime countries, requesting their opinions as to the possibilities of

establishing an International Seamen's Code and what its general principles should be. The answers show considerable diversity of opinion. The United States called attention to the fact that "The Seamen's Act of the United States, being very much in the nature of a code, demonstrates the possibility of making an international code for seamen." The Argentine Republic, Belgium and France, think it possible. Finland is of the opinion that "it would hardly seem expedient." Germany expressed the view that "the establishment of a kind of International Code for seamen is not possible at present." Great Britain feels that "it would depend upon the willingness or otherwise of all maritime countries to agree to adopt and enforce a reasonable and proper code." Greece is doubtful. The Netherlands does not consider that "the time has yet come." Norway would not say that it is "impossible." Spain thought the question should be postponed, while Sweden thought such a code should "only embrace vessels employed in foreign shipping."

The report of the Commission on the International Code for Seamen is given in full together with the debates and decisions on this question by the Genoa Conference. As a result, the conference adopted the following recommendation:

"In order that, as a result of the clear and systematic codification of the national law in each country, the seamen of the world, whether engaged on ships of their own or foreign countries, may have a better comprehension of their rights and obligations, and in order that the task of establishing an International Seamen's Code may be advanced and facilitated, the International Labour Conference recommends that each member of the International Labour Organization undertake the embodiment in a seamen's code of all its laws and regulations relating to seamen in their activities as such."

For the purpose of carrying out the recommendations of the Commission and the Genoa Conference the Governing Body of the International Labour Office constituted a joint Maritime Commission consisting of 5 representatives of ship owners, 5 representatives of seamen's organizations and two members of the Governing Body. The full report of the work of this Commission is given including the scope of an International Seamen's Code and the scope of the work of the Commission.

The appendix contains the draft of a French Maritime Code and a historical note on early maritime codes.

DECISIONS OF THE UNITED STATES RAILROAD LABOUR BOARD RESPECTING WORKING CONDITIONS AND DECREASES IN RATES OF WAGES FOR RAILROAD EMPLOYEES

THE decisions of the United States Railroad Labour Board outlined in the LABOUR GAZETTE for June, page 790, are here given in full except that the lists of railroads involved and the schedules specifically applying the changes to each are omitted, all the important railways in the United States being included. An addendum to this decision, dated June 25, made applicable to certain railways and classes of employees not included in that decision the changes therein pro-

vided for. The decision as to the wage increase given July 20, 1920 (Decision No. 2), was printed in the LABOUR GAZETTE for August, 1920, pp. 1068-1075.

As stated in the LABOUR GAZETTE for June, the railway companies operating in Canada notified the organizations of their employees that decreases in wages on the same scale as in the United States were being proposed to take effect from July 1, averaging, it was estimated, about 12 per cent., and called confer-

ences to discuss the application of such changes. Negotiations have since been proceeding in Canada as well as the United States as to the extent to which the decisions of the United States Railroad Labour Board should be put into effect.

United States Railroad Labour Board

Decision No. 147 (Docket 353)

Chicago, Ill.,

June 1, 1921.

This decision determines the undecided portion of the dispute between the carriers and organizations of their employees referred to the Labor Board, April 16, 1920. That dispute was what should constitute reasonable wages and working conditions on the carriers parties thereto. On July 20, 1920, this Board decided the wage portion. It now decides upon a method of arriving at rules regulating working conditions.

From December 28, 1917, to March 1, 1920, the President took over and operated through the Director General of Railroads the carriers parties to this dispute. On March 1st, pursuant to the Transportation Act, 1920, these carriers reverted to their owners.

During Federal control the Director General of Railroads entered into contracts with organizations of employees of these carriers. These contracts, called National Agreements, set out the classes of employees affected, define with particularity the grades in each class, specify work to be done by each grade, hours of service, when payments shall be made, how forces shall be reduced, seniority determined, work assigned, grievances adjusted, apprentices trained, and otherwise fix the rights and obligations of the parties as to working conditions. These agreements by their terms expired with Federal control. In the same period certain orders, supplements thereto and interpretations thereof, relating to wages and working conditions of railroad employees, were issued by the authority of the Director General. These orders, etc., among other things, classified positions, determined the duties and rights of the incumbents and fixed the wages to be paid such incumbents. These orders and supplements provided that they should be incorporated into existing agreements between railroads and their employees.

In February, 1920, the said organizations pressed long standing requests for wage increases on the Director General of Railroads, who declined to act, as Federal control was almost at an end. On February 28th, the Transportation Act became law. Section 301 provides that all disputes between carriers and their employees shall be considered and, if possible, decided in conference between representatives of the parties, and if there undecided,

shall be referred for decision to the Railroad Labor Board created by the Act. Accordingly, the Association of Railway Executives appointed representatives of the carriers released from Federal control to confer with representatives of the organizations on the pending requests for wage increases.

The representatives met in Washington on March 10, 1920. On March 24th, the employees requested that the carriers' representatives secure authority to enter into an agreement preserving after September 1, 1920, the provisions of the general orders, supplements and addenda issued by the United States Railroad Administration as well as the National Agreements and interpretations thereof. On March 30th, the representatives of the carriers declined to request such authority.

No agreement was reached by the conference on any matter in dispute, and on April 16th the entire dispute was referred to the Labor Board.

On May 3, 1920, the organizations were informed by the Chairman of the Association of Railway Executives that the Association had taken the following action on the request for continuance of the National Agreements, orders, etc., of the Railroad Administration:

That the matter of continuing national agreements, interpretations thereof and general orders and all other arrangements negotiated between the United States Railroad Administration and the so-called standard recognized labor organizations shall be handled by negotiation between the management and the employees of each individual railway.

It was further stated that "this recommendation" had been conveyed to all the member roads of the Association.

Accordingly, the organizations arranged for the presentation about May 1, 1920, to each carrier of a request for the continuance of the National Agreements, etc. Such requests were thereafter made on each carrier. Conferences on the requests were denied by the officers of the carriers in general on the ground that the matter had been referred to the Labor Board for decision.

In formulating Decision No. 2, the Labor Board perceived that to inquire into the justness and reasonableness of the National Agreements, etc., as well as to decide what shall constitute just and reasonable wages was impracticable. Time for such inquiry was lacking. Accordingly, at that time the matter of the National Agreements and of the orders, etc., of the United States Railroad Administration was thus disposed of:

There are in the dispute as presented questions involving rules and working conditions, some of which are interwoven with and materially affect earnings and wages. Adequate investigation and consideration of these questions would demand time. Existing conditions required that the Board should make as early decision of the wage question as practicable. For that reason, it has been necessary,—and both parties to the controversy have indicated it to be their judgment

and wish, that the Board should separate the questions involving rules and working conditions from the wage question. Accordingly, the Board has not undertaken herein to consider or change the rules and agreements now existing or in force by the authority of the United States Railroad Administration or otherwise and this decision will be so understood and applied.

The Board assumes as the basis of this decision the continuance in full force and effect of the rules, working conditions and agreements in force under the authority of the United States Railroad Administration. Pending the presentation, consideration and determination of the questions pertaining to the continuation or modification of such rules, conditions and agreements no changes therein shall be made except by agreement between the carrier and employees concerned. As to all the questions with reference to the continuation or modification of such rules, working conditions and agreements, further hearings will be had at the earliest practicable date and decision thereon will be rendered as soon as adequate consideration can be given.

On December 18, 1920, the parties were notified to present, beginning January 10, 1921, evidence and argument on this dispute.

The evidence and arguments submitted support the following conclusions:

The duty imposed by Section 301 on all carriers and their officers, employees and agents to consider and if possible to decide in conference all disputes between carriers and their employees has not been performed by the parties hereto either with regard to the wage or the working conditions portion of this dispute. The record shows that the representatives of the carriers were unwilling to assume the responsibility of agreeing to substantial wage increases. Hence, the conference of March 10th to April 1st, 1920, on the side of the carriers was merely a perfunctory performance of the statute. Nor was the action of the organizations with regard to the individual carriers more than perfunctory. Naked presentation as irreducible demands of elaborate wage scales carrying substantial increases, or of voluminous forms of contract regulating working conditions, with instructions to sign on the dotted line, is not a performance of the obligation to decide disputes in conference if possible. The statute requires an honest effort by the parties to decide in conference. If they cannot decide all matters in dispute in conference, it is their duty to there decide all that is possible and refer only the portion impossible of decision to this Board.

Although Section 301 has not been complied with by the parties, the Board has jurisdiction of this dispute as it is and has been one likely substantially to interrupt commerce.

The carriers' parties hereto maintain that the direction of this Board in Decision No. 2, extending the National Agreements, orders, etc., of the Railroad Administration as a *modus vivendi* should be terminated at once; and that the matter should be remanded to the individual carriers and their employees for negotiation and individual agreement.

The organizations maintain that the National Agreements, orders, etc., with certain modifications desired by the employees should be held by

this Board to constitute just and reasonable rules; and should be applied to all carriers parties to the dispute, except to the extent that any carrier may have entered into other agreements with its employees. They maintain that local conferences requiring necessarily the participation of thousands of railroad employees for several weeks would constitute an economic waste and would produce a multiplicity of controversies as well as irritation and disturbance. They also urge that to require local conferences would be to expose the local organizations of the several carriers to the entire power and weight of all the carriers acting through the Association of Railway Executives on the conferring carrier, that such a disparity of force would produce an inequitable result highly provocative of discontent and likely to result in traffic interruptions. They, accordingly, insist that the conference should be national.

The carriers maintain that rules negotiated by the employees and officers who must live under them are most satisfactory, that the participants in such negotiations know the intent of the rules agreed to and advise their fellow workmen and officers accordingly thereby avoiding a litigious attitude on both sides, that substantial differences exist as between the several carriers with relation to the demands of the service, necessary division of labor and other factors which differences should be reflected in the rules, that these local differences can be given proper consideration only by local conferences. The carriers refuse to confer nationally.

The Labor Board is of the opinion that there is merit in the contentions of each party and has endeavored to take action which will secure some of the advantages of both courses.

This Board is unable to find that all rules embodied in the National Agreements, orders, etc., of the Railroad Administration constitute just and reasonable rules for all carriers parties to the dispute. It must, therefore, refuse the indefinite extension of the National Agreements, orders, etc., on all such carriers as urged by the employees.

This Board also deems it inadvisable to terminate at once its direction of Decision No. 2 and to remand the dispute to the individual carriers and their employees. Such a course would leave many carriers and their employees without any rules regulating working conditions.

If the Labor Board should remand the dispute to the individual carriers and their employees and should keep the direction of Decision No. 2 in effect until agreements should be arrived at, it is possible that agreements might not be arrived at.

The Labor Board believes nevertheless that certain subject matters now regulated by rules of the National Agreements, orders, etc., are local in nature and require consideration of local conditions. It also believes that other subject

matters now so regulated are general in character and that substantial uniformity in rules regulating such subject matters is desirable.

The Board also believes that certain rules are unduly burdensome to the carriers and should in justice be modified. It may well be that other rules should be modified in the interest of employees.

To secure the performance of the obligation to confer on this dispute, imposed by law on officers and employees of carriers, to bring about the recognition in rules of differences between carriers where substantial, to preserve a degree of uniformity in rules regulating subject matters of a general nature, to prevent to some extent the operation in negotiations of a possible disparity of power as between the carriers and their employees, and to enable the representatives of employees of each carrier and the officers of that carrier to participate in the formulation of rules under which they must live, the Labor Board has determined upon the following action:

DECISION.

1. The direction of the Labor Board in Decision No. 2, extending the rules, working conditions and agreements in force under the authority of the United States Railroad Administration, will cease and terminate July 1, 1921.

2. The Labor Board calls upon the officers and system organizations of employees of each carrier, parties hereto, to designate and authorize representatives to confer and to decide so much of this dispute relating to rules and working conditions as it may be possible for them to decide. Such conferences shall begin at the earliest possible date. Such conferences will keep the Labor Board informed of final agreements and disagreements to the end that this Board may know prior to July 1, 1921, what portion of the dispute has been decided. The Labor Board reserves the right to terminate its direction of Decision No. 2 at an earlier date than July 1st, with regard to any class of employees of any carrier if it shall have reason to believe that such class of employees is unduly delaying the progress of the negotiations. The Board also reserves the right to stay the termination of the said direction to a date beyond July 1, 1921, if it shall have reason to believe that any carrier is unduly delaying the progress of the negotiations. Rules agreed to by such conferences should be consistent with the principles set forth in Exhibit "B," hereto attached.

3. The Labor Board will promulgate such rules as it determines just and reasonable as soon after July 1, 1921, as is reasonably possible and will make them effective as of July 1, 1921, and applicable to those classes of employees of carriers parties hereto for whom rules have not been arrived at by agreement.

4. The hearings in this dispute will necessarily proceed in order that the Labor Board may be in position to decide with reasonable promptness rules which it may be necessary to promulgate under Section 3 above.

5. Agreements entered into since March 1, 1920, by any carrier and representatives of its employees shall not be affected by this decision.

PRINCIPLES.

1. An obligation rests upon management, upon each organization of employees, and upon each employee to render honest, efficient and economical service to the carrier serving the public.

2. The spirit of co-operation between management and employees being essential to efficient operation, both parties will so conduct themselves as to promote this spirit.

3. Management having the responsibility for safe, efficient and economical operation, the rules will not be subversive of necessary discipline.

4. The right of railway employees to organize for lawful objects shall not be denied, interfered with or obstructed.

5. The right of such lawful organization to act toward lawful objects through representatives of its own choice, whether employees of a particular carrier or otherwise, shall be agreed to by management.

6. No discrimination shall be practiced by management as between members and non-members of organizations or as between members of different organizations, nor shall members of organizations discriminate against non-members or use other methods than lawful persuasion to secure their membership. Espionage by carriers on the legitimate activities of labor organizations or by labor organizations on the legitimate activities of carriers should not be practiced.

7. The right of employees to be consulted prior to a decision of management adversely affecting their wages or working conditions shall be agreed to by management. This right of participation shall be deemed adequately complied with, if and when the representatives of a majority of the employees of each of the several classes directly affected shall have conferred with the management.

8. No employee should be disciplined without a fair hearing by a designated officer of the carrier. Suspension in proper cases pending a hearing, which shall be prompt, shall not be deemed a violation of this principle. At a reasonable time prior to the hearing he is entitled to be apprised of the precise charge against him. He shall have reasonable opportunity to secure the presence of necessary witnesses and shall have the right to be there represented by a counsel of his choosing. If the

judgment shall be in his favor, he shall be compensated for the wage loss, if any, suffered by him.

9. Proper classification of employees and a reasonable definition of the work to be done by each class for which just and reasonable wages are to be paid is necessary, but shall not unduly impose uneconomical conditions upon the carriers.

10. Regularity of hours or days during which the employee is to serve or hold himself in readiness to serve is desirable.

11. The principle of seniority long applied to the railroad service is sound and should be adhered to. It should be so applied as not to cause undue impairment of the service.

12. The Board approves the principle of the eight-hour day, but believes it should be limited to work requiring practically continuous application during eight hours. For eight hours' pay eight hours' work should be performed by all railroad employees except engine and train service employees, regulated by the Adamson Act, who are paid generally on a mileage basis as well as on an hourly basis.

13. The health and safety of employees should be reasonably protected.

14. The carriers and the several crafts and classes of railroad employees have a substantial interest in the competency of apprentices or persons under training. Opportunity to learn any craft or occupation shall not be unduly restricted.

15. The majority of any craft or class of employees shall have the right to determine what organization shall represent members of such craft or class. Such organization shall have the right to make an agreement which shall apply to all employees in such craft or class. No such agreement shall infringe, however, upon the right of employees not members of the organization representing the majority to present grievances either in person or by representatives of their own choice.

16. Employees called or required for work, and reporting but not used, should be paid reasonable compensation therefor.

Decision No. 147 (Docket 353)

Chicago, Ill.,

June 1, 1921.

The United States Railroad Labor Board, acting under authority of the Transportation Act, 1920, and in furtherance of the purpose of said Act, hereby renders a decision upon a series of controversies between the carriers and the representatives of certain employees of the carriers, involving the question of what shall constitute just and reasonable wages. The various controversies were considered in conference between representatives designated and authorized by the parties, and not having been

decided in such conference were referred to the Labor Board for hearing and decision.

HISTORY OF THE CONTROVERSY.

Immediately after the organization of this Board and on April 16, 1920, it received and took over for hearing a dispute that had been pending before what was known as the Bipartisan Board, between a large number of carriers which had been under government control, including most, if not all, of those now before the Board in these cases, and their employees, which dispute, among other things, involved the question of wages.

After a full hearing and as careful consideration as the time and conditions would allow, the Board in that case (Dockets 1, 2 and 3) rendered its Decision No. 2, awarding certain increases and fixing what it deemed just and reasonable wages at that time for all the classes of employees of all the carriers then before the Board. The Board did not then undertake to, and under the law could not, make that decision a permanent award or standard. That decision or award was accepted in good faith and acted on both by the carriers and their employers parties to that decision; and certain other carriers not formerly parties to that case voluntarily applied and put in force the standard of wages fixed by this Board in its Decision No. 2. That decision was rendered at a period of inflation, rising prices and high costs of living. Since then changes, and in some respects very decided changes, have taken place in business, industrial and financial conditions in the United States, and in a varying measure have affected all industries and the entire public.

We now find ourselves in a period of readjustment to which all interests sooner or later must conform.

Following the raise in wages granted by this Board in Decision No. 2, and to some extent based on that, the Interstate Commerce Commission granted an increase of rates to the carriers which was put in force, but after this there came the inevitable pause in the rising tide of prices and business followed by the like inevitable recession, and in some lines a disastrous fall in prices, and the resulting cutting down of production. This has affected all lines of industrial life all over the United States and produced conditions which have to be met and in whose burdens all have to share.

Confronted by these conditions, the carriers before us, after conferences with the representatives of the different classes of their employees as to a reduction of wages, at which conference there was a failure to reach an agreement, have filed their several complaints and brought their disputes before this Board for a decision as provided by law. The disputes were separately brought; the first being filed by the New York Central Railroad Com-

pany on March 19, 1921, followed by numerous other carriers.

Some of the carriers presented disputes applicable only to a few of the classes of their employees; others applicable to nearly all classes of employees.

The Board, appreciating and knowing the general financial and industrial conditions of the country, considered the appeals of some of the carriers for immediate action, and believing that the applications already filed would soon be followed by numerous others, took cognizance of the fact that most of the evidence offered or to be offered in one case would be material and common to all, and that it would be impracticable to reach an early decision in the time at the disposal of the Board if the cases were heard and considered separately, the Board at that time being engaged in hearing other pressing matters, on April 6, 1921, passed a resolution reciting in substance these facts, and that it was desirable that the Board hear at one time and decide in one decision so far as may be possible the question as to what may constitute just and reasonable wages for all the classes of employees of the carriers parties to Decision No. 2, as to whose wages there might be a dispute, and ordered and directed that Monday, April 18, 1921, be set as a date for hearing, at which time the Board would hear representatives of the parties to disputes where applications had been filed, and of other disputes filed at that time between carriers and employees of carriers parties to Decision No. 2, if ready for presentation, and the Board consolidated all the cases for the purpose of hearing and decision so far as practicable.

On the date set the carriers herein named had filed the applications for hearing of disputes with the classes of their employees herein named and set out. The time was limited for the oral hearings to five days for the carriers and five days for the representatives of the employees, but the Board afterwards gave the employees further time to prepare their cases for hearing, and slightly extended the time. Both parties were also allowed to file certain documents in evidence bearing upon the matters in dispute.

The hearings in these cases were completed on May 16, 1921, and the Board has since had the cases before it under consideration.

Pending the hearing which commenced on April 18th, and since, a considerable number of the carriers before the Board in that hearing have filed with the Board numerous other cases of disputes with other classes of their employees, and other carriers which had not cases pending before the Board on the 18th of April have filed cases of disputes, and such cases are still being received. The Board has been impressed with the belief that a reduction of rates of pay on any road applying to some class or classes and not to others, and thus producing

inequalities of treatment and a reduction of wages from the standards fixed by and in Decision No. 2 on some roads, without a corresponding reduction on others operating in the same section and under substantially the same conditions, would possibly be productive of unrest, dissatisfaction and other unfortunate results. It therefore deemed it desirable to render its decision in as many cases and applying to all or as many classes as might come before it at one and the same time and make it effective as of and on the same date. It also deemed it desirable to fix and announce that date in advance so that all parties could in a measure adjust their affairs with that information before them.

With all these things in view, after having considered the evidence heard in the cases before it, the Board on the 17th of May passed and made public a resolution to the effect that it would announce its decision in these cases on June 1, 1921, to become effective July 1, 1921; and it further decided and announced that it set June 6, 1921, as the date for hearing all other like disputes filed, docketed and ready for hearing at that time, it being the purpose of the Board to make its decision of those disputes then heard effective as of July 1, 1921.

In pursuance of this policy and these orders, it now announces its decision in these consolidated cases already heard.

In the hearing and consideration of these cases there has been available to the Board all the evidence taken and now on file adduced in the hearings of the cases heretofore brought before the Board, information gathered by the Board and its forces under the direction of the statute, including reports of the Interstate Commerce Commission and various other governmental agencies, state and national, in addition to the very voluminous mass of evidence submitted at these hearings by the respective parties, as well as matters of general and universal public knowledge.

As in Decision No. 2, granting increases in wages, the Board found it necessary to assume a known and recognized base and adopted as such base the rates of wages in effect March 1st, the date of the termination of federal control; so in this decision the Board assumes as its base the rates fixed and in effect under and by its Decision No. 2.

Except as modified by changed conditions, the preliminary statement set out in and as a part of its Decision No. 2 might well be here repeated, but that is not deemed necessary. Practically the same methods of procedure there outlined were followed in these cases. The Board has been governed by the same principles and the directions of the law as there outlined, and has endeavored to give due consideration to every element of the problem before it.

The decision of the Board is the result of the action of the Board, composed of nine members acting as a body, under the usual parliamentary methods of procedure and its own rules. Each and every separate question was considered and voted upon — each and every rate for each class was voted upon and adopted by a majority vote of the Board, and in every instance one or more of the public group, as the law requires, voted in the affirmative on any classification or rate adopted.

In a problem so complex and involving the inter-relationship of the wages of so many different classes of employees it is obvious that there could not be unanimous agreement among all the members of the Board on all decreases fixed by this decision; but the several decreases hereinafter set forth represent, in each instance, the best judgment of the majority of the Board. This statement is made in order that it may not be inferred that the decision, in all its details, states the precise decrease which any one of the members hereof might have stated if he had the sole power and responsibility for fixing such decrease.

The Board proceeding under the methods outlined, while not attempting to set out all the findings in detail, for the information of the public and those directly interested, may here briefly outline some of its findings which have been considered in reaching the results herein announced.

It finds that since the rendition of its Decision No. 2 there has been a decrease in the cost of living. What that decrease has been it is impossible to state with mathematical accuracy or even what the general average for the United States has been up to and on any given date. The machinery for procuring and stating with accuracy the data to fix this is by no means perfect. The decreases vary greatly according to the locality, and affect different people in different degrees. In some localities the general decrease has been greater than in others. In the cities the general decreases in some lines have been offset to some extent by the high rents. In some of the items or products that enter into the costs of living the fall in prices has been great; in others, much less.

The Board also finds that the scale of wages for similar kinds of work in other industries has in general been decreased. The same conditions are also found as to this element. It is practically impossible to find any exact average line of decrease for the entire country. The decreases vary in different industries, and in different localities, and in some instances with different industries, individuals or corporations. In some places and classes the decrease has been heavy; in others, not so great. There has been a decrease, and the tendency is at present downward.

But the most unfortunate condition is that in many localities large numbers are out of

employment on account of the prevailing depression, and hence without wages.

On these elements and the others prescribed by statute to be considered, the Board has looked to the general conditions existing and brought to its attention, as well as the evidence offered as to particular localities and carriers.

In a decision of this character it is not practical to fix rates applying with exact ratio to each individual employee and separate locality, for the reason that necessity compels the Board to accept certain standardizations of pay for railroad employees. But these standards are now somewhat different in different regions, and so the decreases will have relatively the same general effect.

The Board believes that based on these elements shown, i. e., the decreased costs of living and the general decrease in the scale of wages in other industries, that the decreases herein fixed are justified and required.

But the Board is required by the Transportation Act to consider not one, but all of the seven elements especially mentioned in the act, and other relevant circumstances, and this it has endeavored to do in reaching the results herein announced.

It has endeavored to consider as it should all the elements that enter into this complex problem. There are certain facts and conditions known to all and which can neither be disputed nor ignored. Whatever may be said as to the origin or contributing causes, there has been and is a marked, and to some extent distressing and disastrous, depression in business and industry affecting the entire country and some lines of production most seriously. As a result heavy financial losses have been suffered and many hundreds of thousands thrown out of employment and deprived of all wages, and this loss of purchasing power by them has in turn accelerated the general depression by reducing the demand for the products they would otherwise have purchased. While it has been argued that the fall in prices has not reached to any large extent the consumer, it has without question most disastrously reached and affected the producers, especially some lines of manufacture and the agricultural classes.

It should be recognized by all that the problem before us is chiefly an economic one, and we are all confronted by adverse and troublesome conditions which everyone must help to solve. It should not be looked upon as a struggle between capital and labor, or the managers and the employees.

DECISION.

The Labor Board decides:

1. That the rates of wages heretofore established by the authority of the United States

Railroad Labor Board, shall be decreased as hereinafter specified, and that such decreases shall be effective as of July 1, 1921.

2. That the scope of this decision is limited to the carriers named under Article I herein, to such carriers as may be included hereafter by addenda, and to the specific classes of employees named or referred to under each particular carrier.

3. That the reduction in wages hereby authorized shall be made in accordance with the following articles which prescribe the regulations, designate the employees affected, and establish the schedules of decreases.

Article I.—Carriers and Employees affected.

Each of the following carriers shall make deductions from the rate of wages heretofore established by the authority of the United States Railroad Labor Board, for the specific classes of its employees named or referred to in this article, in amounts hereinafter specified for such classes in the schedules of decreases; apply the rates of wages established in Section 3 (b) of Article II, and Sections 1, 2, 3 and 4 of Article X; and make effective the rates of wages fixed by differentials provided in Section 4 of Article IV.

Article II.—Clerical and Station Forces.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedule of decreases per hour:

(Note.—For clerks without previous experience hereafter entering the service of a carrier, rates of wages specified in Sec. 3 (b), this article, are hereby established.)

Sec. 1. Storekeepers, assistant storekeepers, chief clerks, foremen, sub-foremen, and other clerical supervisory forces 6 cents.

Sec. 2. (a) Clerks with an experience of two (2) or more years in railroad clerical work, or clerical work of a similar nature in other industries, or where their cumulative experience in such clerical work is not less than two (2) years 6 cents.

(b) Clerks with an experience of one (1) year and less than two (2) years in railroad clerical work, or clerical work of a similar nature in other industries, or where their cumulative experience in such clerical work is not less than one (1) year 13 cents.

Sec. 3. (a) Clerks whose experience as above defined is less than one (1) year 6½ cents.

(b) Clerks without previous experience hereafter entering the service will be paid a monthly salary at the rate of sixty-seven dollars and fifty cents (\$67.50) per month for the first six (6) months, and seventy-seven dollars and fifty cents (\$77.50) per month for the second six (6) months.

Sec. 4. Train and engine crew callers, assistant station masters, train announcers, gatemen, and baggage and parcel room employees (other than clerks) 10 cents.

Sec. 5. Janitors, elevator and telephone switchboard operators, office, station and warehouse watchmen, and employees engaged in assorting way bills and tickets, operating appliances or machines for perforating, addressing envelopes, numbering claims and other papers, gathering and distributing mail,

adjusting dictaphone cylinders, and other similar work 10 cents.

Sec. 6. Office boys, messengers, chore boys and other employees under eighteen years of age, filling similar positions, and station attendants . . . 5 cents.

Sec. 7. Station, platform, warehouse, transfer, dock, pier, store-room, stock-room, and team-track freight handlers or truckers, and others similarly employed 6 cents.

Sec. 8. The following differentials shall be maintained between truckers and the classes named below:

(a) Sealers, scalers, and fruit and perishable inspectors, one (1) cent per hour above truckers' rates as established under Section 7.

(b) Stowers or stevedores, callers or loaders, locators and coopers, two (2) cents per hour above truckers' rates as established under Section 7.

The above shall not operate to decrease any existing higher differentials.

Sec. 9. All common laborers in and around stations, storehouses and warehouses, not otherwise provided for 8½ cents.

Article III.—Maintenance of Way and Structural and Unskilled forces specified.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedules of decreases per hour:

Sec. 1. Bridge, building, painter, construction, mason and concrete, water supply, and plumber foremen (except water supply and plumber foremen coming under the provisions of Section 1 of Article IV, this decision) 10 cents.

Sec. 2. Assistant bridge, building, painter, construction, mason and concrete, water supply, and plumber foremen, and for coal wharf, coal chute, and fence gang foremen, pile driver, ditching and hoisting engineers and bridge inspectors (except assistant water supply and plumber foremen coming under the provisions of Section 1 of Article IV, this decision) 10 cents.

Sec. 3. Section, track and maintenance foremen, and assistant section, track and maintenance foremen 10 cents.

Sec. 4. Mechanics in the maintenance of way and bridge and building departments (except those that come under the provisions of the national agreement with the Federated Shop Trades) 10 cents.

Sec. 5. Mechanics' helpers in the maintenance of way and bridge and building departments (except those that come under the provisions of the national agreement with the Federated Shop Trades) . . . 7½ cents.

Sec. 6. Track laborers, and all common laborers in the maintenance of way department and in and around shops and roundhouses, not otherwise provided for herein 8½ cents.

Sec. 7. Drawbridge tenders and assistants, pile-driver, ditching and hoisting firemen, pumper engineers and pumpers, crossing watchmen or flagmen, and lamp lighters and tenders 8½ cents.

Sec. 8. Laborers employed in and around shops and roundhouses, such as engine watchmen and wipers, fire builders, ash-pit, flue borers, coal passers (except those coming under the provisions of Section 3 of Article VIII, this decision), coal chute men, etc. 10 cents.

Article IV.—Shop employees.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedules of decreases per hour:

(Note—For car cleaners rates of wages fixed by a differential shown in Section 4, this article, are hereby established.)

Sec. 1. Supervisory forces 8 cents.

Sec. 2. Machinists, boilermakers, blacksmiths, sheet metal workers, electrical workers, carmen, moulders, cupola tenders and coremakers, including those with less than four years' experience, all crafts, 8 cents.

Sec. 3. Regular and helper apprentices and helpers, all classes 8 cents.

Sec. 4. Car cleaners shall be paid a rate of two (2) cents per hour above the rate established in Section 6 of Article III, this decision, for regular track laborers at points where car cleaners are employed.

Article V. — Telegraphers, Telephoners and Agents.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedules of decreases per hour:

Sec. 1. Telegraphers, telephone operators (except switchboard operators), agents (except agents at small non-telegraph stations as referred to in Supplement No. 13 to General Order No. 27, Article IV, Section c), agent telegraphers, agent telephoners, towermen, levermen, tower and train directors, block operators, and staffmen 6 cents.

Sec. 2. Agents at small non-telegraph stations as referred to in Supplement No. 13 to General Order No. 27, Article IV, Section (c) 5 cents.

Article VI.—Engine service employees.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedules of decreases per mile, per hour, or per day, as the case may be:

Sec. 1.—Passenger Service.

Class.	Per mile. Cents.	Per Day. Dollars.
Engineers and motormen48	\$0.48
Firemen (coal or oil)48	.48
Helpers (electric)48	.48

Sec. 2.—Freight Service.

Class.	Per mile. Cents.	Per Day. Dollars.
Engineers (steam, electric, or other power)64	\$0.64
Firemen (coal or oil)64	.64
Helpers (electric)64	.64

Sec. 3.—Yard Service.

Class.	Per Hour. Cents.
Engineers	8
Firemen (coal or oil)	8
Helpers (electric)	8

Sec. 4.—Hostler Service.

Class.	Per Hour. Dollars.
Outside hostlers	\$0.64
Inside hostlers64
Helpers64

Article VII.—Train service employees.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedules of decreases per mile, per day, or per month, as the case may be:

Sec. 1.—Passenger Service.

Class.	Per Mile. Cents.	Per Day. Dollars.	Per Month. Dollars.
Conductors4	\$0.60	\$18.00
Assistant conductors or ticket collectors4	.60	18.00
Baggagemen handling both express and dynamo4	.60	18.00
Baggagemen operating dynamo4	.60	18.00
Baggagemen handling express4	.60	18.00
Baggagemen4	.60	18.00
Flagmen and brakemen4	.60	18.00

Sec. 2.—Suburban Service (exclusive).

Class.	Per Mile. Cents.	Per Day. Dollars.	Per Month. Dollars.
Conductors4	\$0.60	\$18.00
Ticket collectors4	.60	18.00
Guards performing duties of brakemen or flagmen4	.60	18.00

Sec. 3.—Freight Service.

Class.	Per Mile. Cents.	Per Day. Dollars.
Conductors (through)64	\$0.64
Flagmen and brakemen (through)64	.64
Conductors (local or way freight)64	.64
Flagmen and brakemen (local or way freight)64	.64

Sec. 4.—Yard Service.

Class.	Per Day. Dollars.
Foremen	\$0.64
Helpers64
Switchtenders64

Article VIII.—Stationary engine (steam) and boiler room employees.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedules of decreases per hour:

Sec. 1. Stationary engineers (steam)	8 cents.
Sec. 2. Stationary firemen and engine room oilers	8 cents.
Sec. 3. Boiler room water tenders and coal passers	6 cents.

Article IX.—Signal Department employees.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedules of decreases per hour:

Sec. 1. Signal foremen, assistant signal foremen, and signal inspectors	8 cents.
Sec. 2. Leading maintainers, gang foremen, and leading signal men	8 cents.
Sec. 3. Signalmen, assistant signalmen, signal maintainers, and assistant signal maintainers	6 cents.
Sec. 4. Helpers	6 cents.

Article X.—Floating equipment employees.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, the following schedules of decreased rates of pay are established:

Sec. 1.—Ferries.

Class.	Per Month.
Captains	\$200.00
Engineers	190.00
Firemen and oilers (licensed)	140.00
Firemen and oilers (unlicensed)	140.00
Deckhands	125.00
Porters	100.00

Sec. 2.—Tugs and Steam Lighters.

Class.	Per Month.
Captains	\$200.00
Mates and first deckhands (licensed)	130.00
First deckhands (unlicensed)	130.00
Second deckhands	125.00
Floatmen and float watchmen	125.00
Engineers	190.00
Firemen and oilers (licensed)	140.00
Firemen and oilers (unlicensed)	140.00
Bridgemen	125.00

Sec. 3.—Lighters and Barges.

Class.	Per Month.
Captains, steam hoist—single drum	\$135.00
Mates and first deckhands (licensed)	145.00
Captains, steam hoist—double drum	140.00
Engineers, steam hoist—double drum	150.00
Captains, derricks—under 30-ton hoist	140.00
Engineers, derricks—under 30-ton hoist	150.00
Captains, derricks—30-ton hoist and over	150.00
Engineer, derricks—30-ton hoist and over	160.00
Mates, derricks	100.00
Captains, hand winch lighters and covered barges	130.00

Sec. 4.—Lighters and Barges.

Class.	Per Month.
Captains, hand hoist barges—covered lighters	\$120.00
Captains, steam hoist—single drum	125.00
Captains, steam hoist—double drum	130.00
Engineers, steam hoist—single drum	135.00
Engineers, steam hoist—double drum	140.00

Article XI.—Other supervisory forces.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedules of decreases per hour:

Sec. 1. Train dispatchers	8 cents.
Sec. 2. Yard masters and assistant yard masters	8 cents.

Article XII.—Miscellaneous employees.

For the miscellaneous classes of supervisors and employees not specifically listed under any article, named in connection with a carrier affected by this decision, use the following rule for making decreases:

Sec. 1. For miscellaneous classes of supervisors and employees in the hereinbefore named departments properly before the Labor Board and named in connection with a carrier affected by this decision, deduct an amount equal to the decreases made for the respective classes to which the miscellaneous classes herein referred to are analogous.

Sec. 2. The intent of this article is to extend this decision to certain miscellaneous classes of supervisors and employees submitted by the carriers, not specifically listed under any section in the classified schedules of decreases, and authorize decreases for such employees in the same amounts as provided in the schedules of decreases for analogous service.

Article XIII.—General application.

The general regulations governing the application of this decision are as follows:

Sec. 1. The provisions of this decision will not

apply in cases where amounts less than thirty dollars (\$30.00) per month are paid to individuals for special service which takes only a part of their time from outside employment or business.

Sec. 2. Decreases specified in this decision are to be deducted on the following basis:

(a) For employees paid by the hour, deduct the hourly decrease from the hourly rate.

(b) For employees paid by the day, deduct eight times the hourly decrease from the daily rate.

(c) For employees paid by the month, deduct two hundred and four (204) times the hourly decrease from the monthly rate.

Sec. 3. The decreases in wages and the rates hereby established shall be incorporated in and become a part of existing agreements or schedules, or future negotiated agreements or schedules, and shall remain in effect until or unless changed in the manner provided by the Transportation Act, 1920.

Sec. 4. It is not intended in this decision to include or make decreases in wages for any officials of the carriers affected except that class designated in the Transportation Act, 1920, as "Subordinate Officials," and who are included in the Act as within the jurisdiction of this Board. The Act provides that the term "Subordinate Officials" includes officials of carriers of such class or rank as the Interstate Commerce Commission shall designate by regulation duly formulated and issued. Hence, whenever in this decision words are used, such as "foremen," "supervisors," etc., which may apply to officials, such words are intended to apply to only such classes of subordinate officials as are now or may hereafter be defined and classified by the Interstate Commerce Commission as "subordinate officials" within the meaning of the Transportation Act, 1920.

Article XIV.—Interpretation of this decision.

Should a dispute arise between the management and the employees of any of the carriers as to the meaning or intent of this decision, which cannot be decided in conference between the parties directly interested, such dispute shall be referred to the United States Railroad Labor Board in the manner provided by the Transportation Act, 1920.

Sec. 1. All such disputes shall be presented in a concrete and joint signed statement setting forth:

- The article of this decision involved.
- The facts in the case.
- The position of the employees.
- The position of the management thereon.

Where supporting documentary evidence is used it shall be attached to the application for decision in the form of exhibits.

Sec. 2. Such presentations shall be transmitted to the Secretary of the United States Railroad Labor Board, who shall place same before the Labor Board for final disposition.

ENTRY — Modifying Decision No. 119 with Respect to Rules Governing Compensation for Overtime and Continuing Temporarily Certain Other Rules Established by or under the Authority of the United States Railroad Administration.

In Decision No. 119 the Labor Board determined that portion of a dispute referred to it on April 16, 1920, relating to rules and working conditions. The history of the dispute is set forth in that decision. In the decision the Board terminated (effective July 1, 1921) its direction in Decision No. 2 extending the rules,

working conditions and agreements in force under the authority of the United States Railroad Administration, and called upon the officers and system organizations of employees of each carrier, parties thereto, to designate and authorize representatives to confer and to decide so much of the dispute relating to rules and working conditions as it might be possible for them to decide—such conferences to keep the Board informed of final agreements and disagreements, to the end that the Board might know, prior to July 1, 1921, what portion of the dispute had been decided.

The decision also provided that the Labor Board would promulgate such rules as it determined should be just and reasonable as soon after July 1, 1921, as would be reasonably possible and would make them effective as of July 1, 1921, and applicable to those classes of employees of carriers, parties to the dispute, for whom rules had not been arrived at by agreement.

Reports of the results of conferences held in accordance with the direction contained in Decision No. 119 have been and are now being received in considerable number. In some instances the carriers and the employees have reached an agreement upon all rules. In a considerable number of instances there remain certain rules upon which no agreement has been reached, while in others, conferences have not as yet been begun. Under these circumstances, in order that no misunderstanding may exist or unnecessary controversy arise, it appears necessary, purely as a *modus vivendi*, that the Labor Board establish a uniform policy to be pursued with regard to the undecided rules until such time as it is possible to make a decision.

In the available reports from the conferences held in accordance with the direction contained in Decision No. 119, it is found that the principal rules still the subject of dispute are those governing the payment of overtime. The Labor

Board directs as follows, effective July 1, 1921, with the understanding that if the rules promulgated by the Labor Board to be effective July 1st are more favorable to the employees, adjustment in compensation due to the employees will be made by the carrier:

1. All overtime in excess of the established hours of service shall be paid for at the pro rata rate; provided that this will not affect classes of employees of any carrier which have reached an agreement as to overtime rates, nor classes of employees of any carrier who by agreement or practice were receiving a rate higher than pro rata prior to the promulgation of any general order of the United States Railroad Administration relating to wages and working conditions. Inasmuch as this Board has not as yet given consideration to any dispute on overtime rates, this order should not be construed to indicate the final action and decision of the Labor Board on disputes as to overtime rates which have been or may be referred to the Board.

2. In lieu of any other rules not agreed to in the conferences held under Decision No. 119, the rules established by or under the authority of the United States Railroad Administration are continued in effect until such time as such rules are considered and decided by the Labor Board.

3. This direction shall not be understood to modify Decision No. 119 in any respect other than is specifically provided for herein.

4. Rules agreed upon by carriers and employees to be effective as of July 1, 1921.

By order of

UNITED STATES RAILROAD

LABOR BOARD,
R. M. BARTON,
Chairman.

Attest:

C. P. CARRITHERS,
Secretary.

DISTRICT CONVENTIONS OF UNITED MINE WORKERS OF AMERICA

(a) Special convention of District 18, at Calgary, Alta.; (b) annual convention of District 26, at New Glasgow, N.S.

Special Convention of District 18,
U. M. W. of A.

A SPECIAL convention of District 18, United Mine Workers of America, convened by the International Executive Board, was held in Calgary, June 14-16, to consider the restoration of autonomy to District No. 18*; to adopt a constitu-

tion in strict conformity with the laws of the International Union; and to elect district officers and an International Board member (see LABOUR GAZETTE, June, 1921, page 754.) Mr. John P. White, special representative of the International, presided over the convention.

A report presented by a committee of the International Union stated that the

*The circumstances leading to the disruption of the autonomy of District 18 have been referred to in previous issues.

affairs of District 18 had been administered by the International for a considerable time. "This was made necessary because of the action of the former district officers and large number of the members in affiliating with what is known as the 'One Big Union,' a procedure which proved disastrous to the interests of the mineworkers of this important coal producing district." The re-establishment of autonomy was conditioned upon a clear understanding of the laws of the Union and adherence to contract provisions. After stating that the Union had no wish to enter into recriminations over what was past the report declared that the achievements of the U.M.W. of A. afforded the best evidence of its soundness as a means of uplifting the miners and claimed that "it has been instrumental in revolutionizing the conditions under which the mine worker performs his labour; it has been the one great institution that has driven out the grosser evils from the miner's life, and has brought a larger degree of sunshine and happiness into his home." The Convention unanimously agreed to comply with the conditions laid down and pledged their support and co-operation to the International.

The Convention adopted the draft constitution submitted by the Constitution Committee with the following amendments included therein:

"To demand that 6 hours shall constitute a day's work, and that all coal be weighed before being screened on the basis of 2,000 pounds to the ton.

"The members of this District shall be men employed in and around the mines, living in the territory comprising District 18. Any men working in or around the mines or coke ovens may become members of the local union where they are employed, when accepted, upon the following conditions, namely, by paying an initiation fee of \$10 for practical miners and surface workers, and \$15 for non-practical miners."

The Calgary local of the International Union of Steam and Operating Engineers requested the United Mine Workers to relinquish control of all engineers in District 18 working in and around the mines, and suggested a joint conference to be held between representatives of their union and of the U. M. W. of A. (Exclusive jurisdiction over all crafts engaged in and around coal mines was vested in the U. M. W. of A. by the American Federation of Labour, after a vigorous struggle.) The request was declared to be beyond the scope of the convention to discuss.

Convention of District 26, U. M. W. of A.

The annual convention of District 26, United Mine Workers of America, postponed from February 15, was held on June 14-22, at New Glasgow, N.S., President Robert Baxter in the chair. About 120 delegates attended.

In view of the serious situation resulting from the closing of several mines and the general depression during the past months the convention decided to impose a levy of one per cent on the earnings of the members for two months for the relief of the unemployed.

A protest was made against the practice followed by operating companies of working only the mines where the cost of producing coal is least, letting the other mines remain idle, and these companies will be asked to have the contracts and work proportionately divided. The Federal and Provincial governments were also asked to have the mines which are closed reopened.

An amendment to the Franchise Act was called for to the effect that a man who is idle through depression in his trade and is forced to apply to the municipality for relief should not be deprived of his right to vote.

The convention protested against the practice of the coal companies in taking on men not in their employment prior

to the depression, and allowing older employees to remain idle.

Objection was made to the difficulty experienced by some local officials in securing a meeting with mine superintendents. In regard to certain old company employees who, it was claimed, had been denied employment because they were somewhat past their work after having worked for many years for their employers, it was resolved to demand that these men be taken back to work until such time as an old age pension scheme has been put into effect by the company.

In regard to the recent "Montreal agreement" it was claimed by the shippers and trimmers that the Dominion Coal Company had violated the agreement by dispensing at some mines with two of the three shifts, and by changing the rates paid for trimming. The district officers were instructed to demand adjustment, or call for an arbitration board. It was also declared that the same agreement was violated by some operators in keeping the bankmen on the surface after the mine stops hoisting coal to do extra work, and also by keeping the chain runners and drivers after they have finished hauling their coal. The Dominion Coal Company was also asked to restore a bonus of 60 cents a day to the rates paid to firemen as granted prior to the Montreal agreement. The convention protested against any reductions in wages before the expiration of the present agreement.

The housing conditions in many districts where the coal companies furnished houses were declared to be very bad, with insufficient and unsanitary accommodation, though many carpenters had been laid off by the companies; and a committee was appointed to bring the matter before the proper authorities.

In regard to the 8-hour day, which was put into effect in the mines of Nova Scotia by an agreement in March, 1918. Irregularities were reported to have come into practice owing to insufficient

allowance being made for travel from the coal face, and the policy committee was instructed to draft a plan to overcome such difficulties. The words "eight hours from bank to bank" ought it was thought to be inserted in future contracts and men working on construction ought to be included in the 8-hour day plan.

In view of the injunction placed by the United States government on the U. M. W. of A. headquarters to prevent their funds being used to support striking miners, the convention invited the International executive to open a bank account in Canada, in order to prevent a similar injunction being issued in connection with the sending of relief in the event of a strike in Canada. Other resolutions passed by the convention were as follows:

Protesting against the payment of income tax by the mine-workers of Nova Scotia;

Recommending the amendment of the Compensation Act to pay at least 75 per cent of earnings during disability;

Favouring the 2000-pounds, or short ton as the standard ton in future contracts;

Opposing compulsory arbitration clauses in any future agreement;

Forbidding members to sub-contract or sub-lease any oil mines in Nova Scotia, this practice having proved to be detrimental to local unions, by enabling operators to reduce the market price of coal.

That future wage agreements provide that men working in deeps and other difficult places be paid not less than \$8 a day.

That special provision be made for men shovelling coal more than 15 feet from the road.

That the companies run riding rakes further into the mines, where necessary, so as to obviate unnecessary walking by the miners.

That any member who fails to attend

at least 50 per cent of the regular meetings of the local to which he belongs, without satisfactory explanation, be either fined, suspended or expelled.

That a sub-district convention may be called at the request of one or more local unions on two weeks' notice being given to the other unions.

That horses be put into sections of mine where possible, for the hauling of coal.

That the distance for pushing coal in

pitching seams be 200 feet, and 5 cents per ton be paid for every 50 feet.

The executive committee was instructed to put into force a system of economy and retrenchment during the coming year.

A referendum vote of all locals will be taken on the question of starting a district labour newspaper.

Future annual conventions will meet during the first week following June 15 in each year.

ANNUAL CONVENTION OF THE AMERICAN FEDERATION OF LABOUR

Synopsis of Proceedings of the Forty-first Meeting, at Denver, Colorado

THE forty-first annual convention of the American Federation of Labour was held on June 13-25 at Denver, Colorado. The delegates attending numbered 509, representing 93 national and international unions; 4 departments; 32 state branches; 113 central bodies; 46 local trade and federal labour unions; and 5 fraternal delegates, including Mr. W. F. Bush, of the United Garment Workers of America, representing the Canadian Trades and Labour Congress, and Messrs. J. H. Thomas and James Walker, representing the British Trades and Labour Congress, who delivered addresses on behalf of their organizations. President Samuel Gompers presided over the convention.

The report of the Executive Council showed that the average paid-up membership for the year 1921 was 3,906,528, a slight decline from the previous year, when the record of 4,078,740 was reached. This decline was stated to be partly due to the prevalence of unemployment, and to the suspension of eight international organizations with a membership of 115,425, for failure to comply with decisions rendered by the conventions of the Federation. During the year 2,225 charters were issued, while 2,177 charters lapsed and were surrendered. The receipts for the general fund, including

balance on hand, amounted to \$1,036,150, and the expenses to \$857,887, leaving a balance of \$178, 262.

The report shows that 1,635 strikes occurred during the year, in which 191,934 workers were involved. The cost of the strikes reported on was \$8,248,700, which together with \$213,475 in donations made by unions for financial assistance to other unions, made a total of \$8,462,175 expended to sustain members on strike during the year. These figures, however, are not quite complete, some international organizations not having furnished full returns, and some movements to secure improved conditions of labour or to maintain standards not being fully covered.

Special Labour Conference

The Executive Council in their report for the year give details of the special conference of Federation officials and representatives of national and international trade unions, held at Washington on February 23-24. This conference was convened in view of the serious situation which, it was claimed, was then confronting the labour movement through concerted efforts on the part of opposing interests for the destruction of trade unionism. A declaration was adopted

setting forth the general principles governing the labour movement. In this, reference was made to the "open shop" campaign carried on by reactionary employers as a campaign distinctly and solely against union workmen. Among the positive recommendations contained in the declaration were the following:

Legislation to protect the organized workers against the doctrine of property right in the labour of a human being.

Injunctions not to be used in industrial disputes, unless applicable on general grounds.

Prohibition of immigration for two years.

Extension of initiative and referendum in Federal and state affairs.

Abolition of usurped powers of the courts to declare unconstitutional any law passed by Congress.

Election of judges.

Restoration of exemption from or repeal of all anti-combination and so-called conspiracy laws.

Restoration of an adequate employment service.

Administration of credit as a public trust in the interest of all the people.

Repeal of state industrial court laws, and freedom from court decisions holding trade unions and individual members thereof liable in damages for the unlawful act of others.

Law to declare that labour organizations are not co-partnerships.

Investigation of private detective agencies.

The Executive Council claimed in their report that the February conference was a "deciding factor" in the conflict with reaction, and that "since that time the campaign to destroy the trade union movement has materially weakened." The convention endorsed the declarations contained in the report of the

Wages and Cost of Living

The Convention condemned the practice of fixing wages solely on the basis of the costs of living as resulting in the

standardizing of social classes. While not prepared to suggest a proper basis of wage measurement the Council affirmed the necessity for scientific research in order that a scientific principle may be discovered. "Ultimately," it was declared, "there must be found some method of relating standards of living to social usefulness." An investigation into this subject will be made. The Convention declared the fixing by statute of the wages of adult male workers in private employment to be unsound and dangerous.

The Convention recommended the continuance of the work of the United States Federal Trade Commission in publishing information respecting ownership, production, distribution, sales and profits in the basic industries; also limiting of re-consignments and brokerage operations; encouragement of co-operation; publicity in all legislation dealing with the regulation of corporations and monopolies. It was also recommended that the United States Department of Labour "should compile and issue monthly statements of the cost of manufacture of those staple articles which form the basis of calculation in fixing the cost of living."

Co-operation and Credit Control

It was decided to continue the A. F. of L. Bureau of Co-operative Societies, under the direction of the Executive Council. The Convention declared its belief in co-operation as an effective means of curbing profiteering.

The Convention approved the law of Massachusetts governing co-operative banks and unions. A thorough inquiry was ordered to be undertaken by the executive Council into the use of savings and funds collected by banks and insurance companies, and the methods and use of the credit system.

The Convention declared itself in favour of the retention of the excess profits tax, and in opposition to the introduction of a turn-over, consumption or sales tax.

Banking Laws

The Convention called for legislation which would limit the "spread" between the rate at which member banks of the Federal Reserve system secure money and the rate which they charge for its use; and which would prohibit the loaning of money by these banks for speculative, or non-productive purposes. The creation of a rural credit system was also called for.

Meat Packing Monopoly

A resolution was passed declaring that the "Big Five Packers" had succeeded in evading the anti-trust laws for 16 years, and calling for legislation which would require in this industry a uniform system of accounting; the acquisition by the railroads of all roads and cars used in transporting meat; compulsory registration of packers, agencies and dealers; and governmental non-financial aid to co-operative, municipal and public slaughter houses.

Government Securities Recommended

In view of the huge losses incurred by the workers through fraudulent and worthless stocks and securities, the Convention strongly urged the continuance of the issuance of treasuring saving certificates as a secure means for promoting thrift, and recommended to their members the placing of their savings in government securities.

Decisions Prejudicial to Labour

The United States Supreme Court, by a majority opinion, having declared unconstitutional the provision of the Sherman Anti-Trust Act which exempted labour organizations, and other recent legal decisions having denied the privilege of a union to increase its membership and therefore to increase its power of collective bargaining by soliciting and persuading workmen to terminate their employment, and having otherwise questioned the validity of trade unions, a conference of union officials was held

on February 21 to consider the situation resulting from these decisions. An act concerning labour organizations was then drafted, this act asserting the rights of unions to organize or persuade others to join organizations for the purpose of regulating hours, wages etc.; declaring unions and their members not liable for the unlawful act of their officers; disallowing restraining orders or injunctions against persons ceasing employment, or persuading others to do so; prohibiting indictments for participating in joint action. The Convention ordered that copies of the proposed measure be sent to all state federations. Strong resolutions were passed condemning the issue of injunctions, which were declared to menace the very existence of workers as freemen.

The Convention protested against the powers exercised by the courts to pass on the constitutionality of laws enacted by Congress, and proposed a constitutional amendment providing that any bill or resolution passed by a majority of each house and signed by the President, or in the event of his veto by two-thirds of each house over the objections of the President, shall be held valid whenever called in question.

The Kansas Court of Industrial Relations was claimed to be an "admitted failure," as no attempt was made to punish any strikers, though 20 strikes occurred during the first year; and was declared to "make for tyranny, injustice and unfreedom," and to be "inimical to the interests of not only labour but of the farmers and the people generally." A resolution was passed re-affirming condemnation of the Kansas Court, and commending the organized workers of Kansas, especially the mine workers, in courageously opposing injunctions and threats of imprisonment for opposing it.

"Open Shop" Movement

The Convention expressed its appreciation of the pronouncements regarding the so-called open-shop movement which were recently made by the National

Catholic Welfare Council, the Federal Council of the Churches of Christ in America, and the Central Conference of American Rabbis. Various resolutions had been passed by these bodies condemning the "open shop" movement as aiming at the complete domination of industry by the employers.

Union Label

In order to meet the efforts of Chambers of Commerce and Manufacturers' Associations to disrupt unionism the Federation delegates pledged themselves to purchase as far as possible only products bearing union labels and to patronize only stores bearing the union shop card. The committee in charge of this subject recommended the formation of union label leagues, and the recognition of only those labels, cards or buttons which are endorsed by the A. F. of L.

Unemployment Insurance

A resolution favouring unemployment insurance was rejected on the ground, as stated by President Gompers, that "if we should establish the so-called unemployment insurance every action of our life, insofar as it refers to labour and employment, would be subject to the regulation and the discipline and the decision of government." A resolution was passed declaring a portion of the present industrial depression and consequent unemployment to be artificial and deliberately brought about for the purpose of lowering living and working standards, and calling on all public authorities to carry on all such public works as are under consideration.

Unemployment

A shorter working day was recommended as a means of relieving unemployment, and affiliated unions were invited to put this policy into effect. In this connection the Convention endorsed the efforts of the printing trades unions to establish a 44-hour week.

Workmen's Compensation

The Convention reaffirmed its conviction, based on years of practical experience that exclusive fund insurance and the elimination of private profit in workmen's accident compensation are advantageous to wage workers. The principles adopted at the Philadelphia Convention in 1914 were reaffirmed, fixing 66 $\frac{2}{3}$ per cent of wages as the minimum amount of compensation; compensation during widowhood of widows of workers killed in industry; additional rates on basis of number of children under 18 years; administration of compensation laws under state commissions; occupational diseases to have an equal claim with injuries due to accidents; elimination of employers' liability insurance companies; elimination of self-insurance by employers, and general use of state funds administered by a commission.

In the discussion on this subject the Ohio law was referred to as the model form of a workmen's compensation law.

Employment Bureau

It was resolved to make every efforts to have a sufficient appropriation granted in Congress to maintain the Federal Employment Bureau, which had been reduced to a skeleton through insufficient funds.

Immigration

The Convention instructed the Executive Council to continue its efforts to secure the enactment of a law that will forbid the importation of labour from any country until conditions have become more standardized and the relations of life more nearly normal.

Strong resolutions were passed favouring the permanent exclusion from the United States of all classes of Asiatics other than those exempted under the Chinese Exclusion Act; protesting against efforts by "enemies of labour"

to open the door to Chinese coolies, and endorsing the policy of the Japanese Exclusion League of California.

Colored Workers

A conference was ordered to be held at Washington between representatives of the Executive Council of the A. F. of L., of the Brotherhood of Railway Clerks etc., and of the Coloured Railroad, Freight and Baggage Handlers and Station Employees for the purpose of working out a plan for handling the grievances of the coloured employees. It was also ordered that a conference of representatives of organizations affected be held within 90 days for the purpose of reaching an amicable settlement of the general problem of coloured labour.

Education

The Convention pledged support to the American Federation of Teachers in resisting intimidation in the interests of reaction, and approved of higher standards in public schools, which should be maintained as a "civic model." For adult education schools under trade union auspices were approved, also co-operation with educational efforts such as the Bryn Mawr Summer School for women in industry.

The Convention approved the appointment of a permanent committee on education. A careful review of textbooks used in public schools was also decided on.

In view of the Industrial Rehabilitation Act, signed by President Wilson in June, 1920, and the Federation's advocacy for many years of vocational training of persons disabled in industry, the Federation decided to urge on Boards of Vocational Education and Boards of Education the necessity of maintaining effective standards which will insure an equal opportunity for those incapacitated; and to recommend the full co-operation of local labour bodies and legislatures in taking full advantage of the new act.

Approval of Labour Department

The Convention protested against the proposal contained in a bill introduced in the United States Senate by Senator Kenyon, of Iowa, which was declared to aim at the destruction of the Department of Labour by removing from it several of its important bureaus and subsidiary departments, and placing them under a proposed Department of Public Welfare. Strong approval was expressed of the work of the Department of Labour, which had more than justified its creation "in spite of influences inimical to its design, scanty appropriations, or total denial of funds, preventing full service." A strong tribute of appreciation was paid to the late Secretary of Labour, the Hon. Wm. B. Wilson, the first trade unionist to sit in the Cabinet of the President of the United States.

Non-partizan Political Campaign

The Convention ordered immediate steps to be taken for the permanent organization of the Non-Partizan Political Campaign, and that labour should continue to press for legislation in the interest of labour, organized and unorganized, and of the people generally. An agency will be established for circulating among standing committees in the various unions information as to the doings of Congress in regard to labour.

Labour and the Farmers

The Convention resolved to continue the past policy of developing co-operation between the trade union movement and the organized farmers on questions of mutual interest. In spite of differences of opinion among the various farmers' organizations material progress was made during the past year.

Duty on Oil Demanded

A resolution was passed favouring an import tariff on crude oil and its by-products to protect the independent petroleum and coal producing interests

operating within the United States, so as to afford fair return to home invested capital and insure a living wage to work-ers employed in these industries.

Railways

The Convention declared that in conformity with the fundamental principles of the United States Constitution, namely, that government is instituted for the common good and that service to the public should be the measure of compensation, legislation should be enacted which would bring about the public ownership and democratic operation of the railways of the United States; that the workers should enjoy all the rights, privileges and immunities as are now granted to those who contribute capital. The Executive Council was directed to assist the recognized railway labour organizations in their efforts in this direction, and also to draw up a legislative programme. The Convention further instructed the Executive Council to endeavour to secure a statement of the salaries being paid to railroad officials and attorneys. The equalization of wages for the employees in similar departments on all roads was also recommended.

Seamen's Union

A resolution was carried complimenting the Seamen's Union upon their stand in opposing the efforts made by their employers to establish an "open shop" in the merchant marine, and to reduce further the general level of wages. A resolution favouring the establishment of a Marine Transport Department of the A. F. of L., organized on an industrial basis similar to the Building Trades Department, was referred to the Executive Council to ascertain the wishes of the members of the several organizations involved. The Convention protested against judgments declaring that long-shoremen were maritime workers and therefore outside state jurisdiction in regard to accident compensation, and endorsed recent bills declaring long-shoremen covered by compensation laws.

One Big Union

It was reported that "as a factor in the industrial life of both Canada and the United States the One Big Union has practically ceased to exist." Following a conference held at Washington in March, between the Executive Council and Mr. Tom Moore, president of the Canadian Trades and Labour Congress, a questionnaire was issued to all international unions having membership in Canada as to the secession movement. The replies showed that "those internationals originally affected have in nearly all cases recovered." Another question brought forward by President Moore was the need for affiliation to the Canadian Trades and Labour Congress by those international unions which have not yet affiliated. The Convention urged that such internationals seek immediate affiliation with the Canadian Trades and Labour Congress.

Control of Natural Resources

The Convention declared its opposition to the alienation of any natural resources still in public ownership, and demanded legislation providing for strict federal control of the production and distribution of natural resources now privately held.

Equal Rights for Women

A motion to amend the constitution of the Federation by denying the right of any union to limit the right of membership on the ground of sex was rejected, and a resolution was carried requesting those international and national organizations which do not admit women workers to membership to give early consideration to the question of their admission.

Maternity

Support was voted for the "Sheppard-Towner" Maternity Bill introduced in Congress to promote the welfare of mother and child in the period of childbirth, this bill being opposed in Con-

gress by the forces opposed to organized labour.

International Labour Relations

The Executive Council reported that the Federation had been unable to participate in the International Labour organization, owing to the fact that the United States has not acquired membership in the League of Nations. The Federation declined to participate further in the deliberations of the International Federation of Trade Unions, with which it had been affiliated from 1910 to 1915 (see LABOUR GAZETTE, January, 1921, page 69), owing to "the intolerable rules and regulations set up for the government and conduct of that organization." One of the rules referred to is one making it possible to adopt any proposed measure by a majority vote, involving, it is claimed, "a denial of that complete national autonomy for which the A. F. of L. has always stood, and which was safeguarded in the old International Federation of Trade Unions which existed prior to 1914." During the year the Federation was represented by fraternal delegates at the British Trade Union Congress, and took part in the "extremely important" third annual convention of the Pan-American Federation of Labour at Mexico City in January.

America and the Soviets

The Federation reaffirmed its opposition to the Soviet Government of Russia, as expressed in the resolution passed at the Montreal Convention in July 1920, on the ground of its unrepresentative character. The Executive Council's report alleged that the Soviet propaganda had become "concentrated in large part, within the labour unions with a view of overthrowing the *bona fide* labour movement of America as a condition precedent for the overthrow of the Republic of the United States." This effort was carried on by the Third, or Communist International and "its adjunct, the new Red Labour Union Interna-

tional," by aiding the I. W. W., and "by forming communist nuclei within the locals of the organizations affiliated with the A. F. of L."

Civil Service

Resolutions were passed calling for a reclassification of the United States Civil Service, the employees to be represented upon the administrative body in charge of this work; and for more liberal retiring and compensation allowances. The Convention called on Congress to pass the Johnson-Nolan Bill providing a minimum wage of \$3 a day for all federal employees. It was stated that though 50,000 government employees now received less than \$3 the bill had failed of final passage. The Convention also asked that aliens in the employ of the Government should be required to qualify for citizenship.

Non-manual and Unskilled Workers

Organized skilled workers were asked to render all possible aid to organized unskilled workers in their efforts for better organization and improved working conditions. Resolutions were passed authorizing substantially increased assistance to the American Federation of Teachers; urging delegates to assist in organizing office workers in their districts, including bank-clerks, reporters, time-keepers, stenographers, bookkeepers, etc., undertaking to support Civil Service organizations in securing legislation granting civil servants the right to appeal from the judgment of officials in cases involving de-motion or dismissal.

Lumbering Industry

It was decided to launch a campaign at the earliest moment for the complete organization of the lumber industry in the northwest, to meet "unbridled wage slashing" by the lumber interests.

Personnel Research Foundation

The Personnel Research Foundation was organized in March, 1921, under the

auspices of the National Research Council and the A. F. of L. became a member, appointing five delegates. Its object is to inquire into the various causes of economic waste which add to costs and diminish production.

Military Training

The Convention expressed opposition to compulsory military training, on the ground that its advocates sought thereby to create a militarist spirit which would defeat the aspirations of the workers.

Disarmament

A resolution was passed on the subject of disarmament declaring the Convention opposed to militarism or a large standing army; and that "the working people, the masses of the world population, can end wars if they but have the independence to think and give their convictions reality by daring to do so"; calling upon the United States government to take the initiative or to co-operate with any other nations for the purpose of a general agreement for disarmament; and instructing the Executive Council to call upon the workers and people to aid this object in every way within their power.

Referendum before Declaring War

A proposal was made to amend the United States Constitution by withdrawing from Congress the power of declaring war; by placing this power directly in the people to be exercised through a referendum vote; and by requiring that those who vote for war give their active service before those who vote against it. This proposal was defeated by a large vote.

Prohibition

The Convention declared itself in favour of the modification of the Volstead Enforcement Law so as to permit the manufacture and sale of wholesome beer.

The Irish Question

The Convention reaffirmed its sympathy with the Irish people by urging recognition of the Irish republic and the punishment of British officials responsible for atrocities. A resolution calling for a boycott of English goods for as long as the British Government maintains "its barbarous and destructive policy in Ireland," was rejected.

Anti-Labour Newspapers

In connection with a false report of proceedings at a labour convention in Chicago which had appeared in one of the "Hearst" newspapers, the Convention censured such methods of attacking organized labour.

Relief for Suffering Peoples

The Convention approved the relief work done in the past year in China, Ireland, the Near East, Russia, and France. These efforts, it was stated, had been instrumental in saving the lives of thousands of starving people in the near and far east. Each local union was urged to support at least one orphan at a cost of \$60 a year.

Labour's Memorial Day

The Convention again confirmed the recognition of the fourth Sunday in May as Labour's Memorial Day, as established at the meeting in 1907, to be observed by appropriate ceremonies in memory of workers on behalf of freedom; and also urged the proper celebration of Labour Day, the first Monday in September.

Information Bureau

Under instructions by the 1920 Convention the Executive Council organized during the year a bureau of information on the labour movement and a corps of speakers was maintained for keeping the public informed as to the facts of the industrial situation. The further systematizing of the work of information was approved by the special council

meeting of February 23-24. Proposals for the establishment of a labour daily newspaper, or chain of newspapers, will be investigated, and reports made to next convention.

Central Labour Councils were advised to hold periodical public meetings for the purpose of discussing labour problems and informing the public as to the true purposes of the labour movement.

Election of Officers

The names of Samuel Gompers and John L. Lewis, president of the U. M. W. of A., being proposed for president for the ensuing year, the former was elected by a vote of 25,022 to 12,324, delegates representing 38,293 votes abstaining from voting. Other officers elected were:

First Vice-President: James Duncan (Granite Cutters' Union).

Second Vice-President: Jos. M. Valentine (Moulders' Union).

Third Vice-President: Frank Duffy (Carpenters' Union).

Fourth Vice-President: Wm. Green (Miners' Union).

Fifth Vice-President: Wm. D. Mahon (Street Railwaymen's Union).

Sixth Vice-President: Tom Rickert.

Seventh Vice-President: Jacob Fischer.

Eighth Vice-President: Matthew Woll (Photo Engravers).

Treasurer: Daniel J. Tobin.

Secretary: Frank Morrison.

The next annual convention will be held at Cincinnati, Ohio.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE FOUR-WEEK PERIOD APRIL 25 TO MAY 21, 1921

REPORTS from employment offices to the Dominion Headquarters of the Employment Service of Canada for the four-week period ended May 21, 1921, show a decrease in the number of placements when compared with the reports for the preceding period. The offices reported that they had made 32,712 references to regular positions and that 22,574 placements were effected. When compared with 23,602 placements made during the preceding period this represents a decrease of 1,028 placements.

During the period under review, placements in regular employment were re-

ported by weeks as follows: week ended April 30, 5,537; week ended May 7, 6,105; week ended May 14, 5,750; week ended May 21, 5,182. In addition a total of 7,309 placements were made in casual employment, (employment of a duration of one week or less is termed casual). These were reported by weeks as follows: week ended April 30, 1,569; week ended May 7, 2,008; week ended May 14, 1,977; week ended May 21, 1,755. Placements in casual work reported during the preceding period totalled 5,867, representing an increase during the period of 1,442 casual placements.

The accompanying chart presents graphically applications, vacancies, and placements, week by week since the beginning of October, 1919. The chart indicates that there was a slight decline in applications registered and in vacancies notified to the Service at the beginning of the period, followed by a recovery during the first week in May. Both these curves register a decrease during the last week under review. The curve for placements reflects on the whole a downward tendency, although a slight increase is noted at the beginning of the period.

The accompanying table gives in detail the work of the offices for the four-week period April 25 to May 21. It will be noted that at the beginning of the period there were 24,293 applicants unplaced, in comparison with 24,958 applicants unplaced on May 21, after allowance had been made for cancellations and place-

ments. The number of vacancies remaining unfilled on April 25 was 6,122, while the vacancies unfilled on May 21 totalled 4,422. On comparing the above with the figures for the corresponding period of last year it may be of interest to note that the number of applicants unplaced on May 22, 1920, was 5,892, while the number of vacancies remaining unfilled on this date totalled 13,370.

During the period at present under review the number of applications reported by the offices totalled 42,313, of which 32,712 were from men and 9,601 from women. The number of vacancies notified by employers to the Service during this period totalled 33,875, of which 23,763 were for men and 10,112 for women. When comparing these figures with the corresponding figures for the preceding period there is a decrease of 491 applications and a decrease of 1,916 vacancies.

EMPLOYMENT CONDITIONS IN CANADA FROM MAY 15 TO JUNE 11, 1921, AS REPORTED BY EMPLOYERS

WEEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada during the four weeks from May 15 to June 11 inclusive showed a moderate increase in payrolls for the first week, followed in the second week by a noticeable reduction due chiefly to temporary shut-down of railway shops. In the third week this loss was recovered and minor gains were added, but in the fourth week industry again showed a slight decline. At the end of the period, as composed with the beginning, there was a net gain of less than 4,000 employed persons.

The change reported for each week as compared with the preceding was as follows:—

Week ending May 21, an increase of 3,792 persons, or .62 per cent.

Week ending May 28, a decrease of 7,193 persons, or 1.19 per cent.

Week ending June 4, an increase of 9,008 persons, or 1.49 per cent.

Week ending June 11, a decrease of 1,852 persons, or .3 per cent.

In the first week the outstanding gains occurred in railway construction, while others of a fairly substantial nature were registered in pulp and paper, lumber and its products and building construction. Minor upward movements occurred in leather, lobster and sardine canning and packing, water transportation and coal mining. The most important decrease in employment was afforded by the logging industry—the usual seasonal decline. The only other noticeable contractions were in railway transportation, iron and steel, supplemented on a minor scale by declines in textiles. The expansions in railway construction and maintenance took place mainly in the Prairie provinces, while that in pulp and paper products occurred chiefly in

Ontario and Quebec; the latter district also registered an increase in lumber and lumber products. The favourable movements in building construction and leather were featured principally in Ontario and Quebec, while the gains in fish canning were confined to the Maritime provinces. The increase in water transportation indicated further activity at St. Lawrence and upper lake ports. The expansion in coal mining was between Alberta and the Maritime provinces. The downward movement in logging chiefly occurred in Ontario and Quebec while the contraction in railway transportation was mainly in the Prairie provinces but also to a lesser extent in the Maritime district. Contractions in the iron and steel group occurred in Ontario and Quebec, there being a slight gain in this industry in the Prairie provinces. The unfavourable balance in textile products was slight and was shown in Ontario and Quebec. Compared with the corresponding week of last year the majority of industries showed contractions in payrolls.

In the second week of the period occurred a contraction in iron and steel products, due mainly to temporary shut-down of railway shops chiefly in the province of Quebec. In addition, losses in crude, rolled, forged and wire products were exhibited by Ontario. No other losses of importance occurred, but minor decreases were shown in the musical instrument and electrical apparatus group in Ontario and Quebec, and in textiles in the same district, mainly in garments and personal furnishings, hosiery and knit goods and thread, yarn and cloth. Other contractions were in telephone communication in the Prairie provinces: retail trade in Ontario and the West, water transportation at upper St. Lawrence and west coast ports. Gains of importance were shown in railway construction and maintenance in the

Prairie provinces, lumber and lumber products in Ontario and Quebec; and in railway transportation in the Prairie provinces and Ontario. There were also minor expansions in building construction, to a somewhat larger extent in Ontario than elsewhere; in logging in Ontario; coal mining and fish canning in Maritime provinces; and dairying generally. The Maritime district, the Prairie provinces and British Columbia all showed favourable balances when compared with the previous week.

In the third week was featured a recovery in the iron and steel industry

caused by the reopening of railway shops, supplemented by expansions in crude, rolled and forged products in the Quebec-Ontario districts. Second in importance was a substantial advance in railway construction shared by the same district and the Prairie provinces. Other gains of some note occurred in lumber and lumber products, railway transportation, water transportation, and coal mining. The first of these showed mainly in Ontario and Quebec; that in railway transportation was distributed through all provinces, though most largely in Ontario and British Columbia; water transportation, expansions

were exhibited mainly in Quebec although British Columbia also showed gains; in coal mining Nova Scotia registered the bulk of the increase while Alberta recorded only very small additions to payrolls and British Columbia experienced minor losses. Building construction continued to improve very slightly in Ontario, with Quebec showing only nominal advances, and other provinces registering slight decreases. The pulp and paper industry also made gains on a small scale, practically confined to New Brunswick pulp mills. The largest single contraction of any industrial group was that in textiles, registered almost exclusively in Ontario. The only other shrinkage of any importance occurred in logging, mainly in Quebec.

In the last week of the period only four noticeable features were presented. The first was a further shrinkage in the iron and steel group, largely in vehicle, agricultural implement and crude products plants in Ontario. The other provinces also reported declines in this industry though on a minor scale. The

second was a further reduction in the logging industry of Ontario and Quebec. The third was a fairly heavy falling off in water transportation at upper St. Lawrence ports and on the Pacific coast. The fourth was a further gain in railway construction and maintenance, principally in the western provinces. Other gains of less importance were registered in building construction, principally in Ontario and the Prairie provinces; lumber, largely in British Columbia; and coal mining in British Columbia. Minor declines were reported in the pulp and paper industry in Ontario and Quebec.

The weekly index number of employment for the four weeks averaged 87.5 as compared with an average of 106.4 for the same period last year. The accompanying chart shows the weekly percentage change in the number of persons on payrolls since the base week, (January 17, 1920) as reported by those employers making returns, the number of which employers average over 5,200 each week.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF MAY, 1921, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of May, 1921, and is based on returns received from 1,672 labour organizations with a combined membership of 201,496 persons. For all occupations reporting, 15.46 per cent of the members were out of work, as compared with 16.27 per cent at the end of April, 2.88 per cent at the close of May, 1920, and 3.83 per cent in May, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unem-

ployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that the percentage of unemployment figures have reference only to those unions reporting.

Though the percentage of unemployment in May remained practically stationary when compared with the preceding month, what nominal decline it manifested may be attributed to slightly greater activity for workers in the transportation, mining and building groups. On the other hand, unemployment in the manufacturing and mechanical industries showed a small increase.

Table I on this page summarizes the returns by provinces. Nova Scotia and Prince Edward Island, New Brunswick, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia registered somewhat smaller percentages of idleness than in April, while there was a considerable increase in the number out of work in Quebec, largely on account of a temporary shutdown at the end of the month in railroad shops, but also attributable to decreased activity for garment workers. As compared with May of preceding years the percentages of idleness in all provinces were considerably larger.

The percentages of unemployment reported in the different occupations and industries are indicated in Table II on page 935.

Unemployment in the manufacturing

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES.

and mechanical industries, as reflected by 407 organizations with a total membership of 51,529 persons, was somewhat larger than in the preceding month and also than in May, 1920 and 1921, 23.28 per cent of the members being out of work, as compared with 21.27 per cent at the end of April and with 3.40 and 4.05 per cent in May 1920 and 1919, respectively. There was slightly less activity for workers in metals, machinery and conveyances; food, tobacco and liquors; clothing and laundering; leather, boots, shoes and rubber; glass bottle blowing; jewelry working, and oil refining than in April, while in almost all these groups the percentages of idleness greatly exceeded those registered for the corresponding month of previous years. In the first named group, moulders, boiler makers and pattern makers recorded considerably more slackness, while improvement was shown for blacksmiths and machinists as compared with the preceding month. Garment workers registered slightly more unemployment than in both April, 1921, and December, 1920, in which months occurred the previous high levels of unemployment among their members. As has been stated in other issues of the LABOUR GAZETTE, practically all these employees are reported from Montreal, very few returns being received from similar unions in Toronto, another large centre in the clothing industry. Textiles, carpets and cordage, pulp, paper and fibre, printing, publishing and paper goods, and woodworking and furniture registered slightly smaller percentages of idleness than in April, but in every case, with the single exception of woodworking and furniture, the number of unemployed was larger than in May, 1920, and 1919. In that industry, however, conditions appeared to be better than in May of last year.

In addition to the total unemployment many of the unions in the above named industries reported a large percentage of their members as working on short time.

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES.

Month	Manufacturing and Mechanical Industries.	Metals, Machinery and Conveyances.	Food, Tobacco and Liquors.	Textile, Carpets and Cordage.	Clothing.	Pulp, Paper and Fibre.	Printing, Publishing and Paper Goods.	Woodworking and Furniture.	Leather, Boots, Shoes, and Rubber.	Glass Bottle Blowing.	Jewelry Working.	Oil Refining.	Transportation.	Steam Railways.	Street and Electric Railways.	Navigation.	Teaming and Driving.	Mining, Quarrying and Refining of Ores.	Building and Construction.	Public Employment.	Fishing.	Lumbering and Logging.	Miscellaneous.	All Occupations.

*Commercial and Railway.

[illegible]

Reports were tabulated from 688 unions of transportation workers with an aggregate membership of 79,409 persons, showing that 9.43 per cent of the members were out of work as compared with 11.0 per cent in April and with 2.62 and 2.21 per cent in May, 1920, and 1919, respectively. The percentage of idleness among steam railway employees (whose returns constituted about 82 per cent of the entire group membership reporting) also showed a slight decline, 10.86 per cent being out of work as compared with 12.53 per cent in the preceding month, 1.51 per cent in May, 1920, and 1.62 per cent in May, 1919. Railway carmen, trainmen and maintenance of way employees registered slightly smaller percentages of idleness than in April, while those reported by conductors, engineers and local unions of telegraphers showed increases as compared with the preceding month and also with May, 1920 and 1919. Street and electric railway employees, and teamsters and chauffeurs were also more fully employed than in April, but the percentages of unemployment slightly exceeded those recorded for the corresponding months of 1920 and 1919. On the other hand, navigation workers were somewhat slacker than in April, but the percentage out of work was smaller than in May of the preceding years. In addition, reports were tabulated from 13 associations of longshoremen covering 7,299 members, of whom 1,807, or 24.7 per cent, were out of work as compared with 27.5 per cent at the end of April, with 7.26 per cent at the end of May, 1920, and 10.81 per cent at the close of May, 1919. These returns, on account of the casual nature of longshore work, are not included in the accompanying tabulations. As in the case of the manufacturing group, very many of the unions included under transportation reported the majority of their members as working short time.

In the mining, quarrying and refining of ores group, returns were received from 41 unions with a total membership of 11,144 persons, of whom 1,465

were unemployed, a percentage of 13.15 as compared with 21.89 per cent out of work in April, 1.16 per cent in May of last year and 2.84 per cent in May, 1919. The number out of work was somewhat smaller than in April, largely on account of slightly increased activity reported by miners both in Nova Scotia and Alberta. In Quebec, however, asbestos miners indicated large proportions of their members as unemployed. Miners everywhere registered substantially less activity than in May, 1920 and 1919, as did also quarry workers and smeltermen. A large number of unions reported that the mines were working only a few days each week.

The percentage of unemployment among workers in the building and construction group dropped from 20.03 in April to 15.82 in May, largely on account of slightly increased activity for bricklayers, masons and plasterers, carpenters and joiners, granite and stone cutters, painters, decorators and paper hangers, and hod carriers and building labourers. Electrical workers, plumbers and steam fitters, tile layers, lathers and roofers, bridge and structural iron workers and steam shovel and dredgemen, however, were not as fully employed as at the end of the preceding month. The percentage out of work in this group at the end of May greatly exceeded that reporting for May of preceding years, 4.32 per cent being idle at the close of May and 8.68 per cent at the end of May, 1919. Bricklayers, masons and plasterers, carpenters and joiners, electrical workers, plumbers and steamfitters, bridge and structural iron workers and steam shovel and dredgemen were not as fully employed as in May of either year. On the other hand, granite and stone cutters and painters, decorators and paper hangers reported smaller percentages of unemployment than in both 1920 and 1919, while the numbers out of work among tile layers, lathers and roofers, and hod carriers and building labourers were larger than in May of last year, but smaller than in

the corresponding month in 1919. A large number of the unions mentioned above, in addition to total unemployment and short time, reported that a considerable number of the members were working outside their normal occupations.

In the public employment group, as indicated by 108 associations with an aggregate membership of 10,080 persons, the percentage out of work was 5.08 as compared with 3.79 per cent at the end of April and with .04 per cent at the close of May last year. In the corresponding month in 1919 no unemployment was reported. This slight increase in percentage may be attributed to lessened activity for civic employees.

Logging and lumber workers as reported by three unions with a total membership of 9,093 persons, showed 3,840 members as unemployed, a percentage of 42.23 as compared with 46.52 in the preceding month. Figures for May of previous years are not available. These workers in British Columbia again reported slightly more activity than in the month before. Fishermen, as indicated by 4 organizations, also showed a nominal decline in the number out of work, 24.85 per cent of the members being out of work as compared with 26.26 per cent in April, 1921. In May, 1920, however, no unemployment was reported,

while in the corresponding month of 1919 there was only 4.10 per cent of idleness.

Unemployment in the group of miscellaneous trades, as reported by 132 unions with an aggregate membership of 9,561 persons, was slightly more pronounced than in April and also than in May, 1920, but improvement over May, 1919, was manifested. The percentage out of work for the month under review stood 5.42, as compared with percentages of 4.02, 1.57 and 7.26 in April, 1921, May, 1920, and May, 1919, respectively. Retail clerks, as indicated by 5 unions, reported no unemployment as compared with slight percentages out of work in May of preceding years. Unclassified workers registered increased activity as compared with April, and with May, 1919, though the percentage out of work was larger than in May of last year. On the other hand, hotel and restaurant employees, barbers, theatre employees and stationary engineers and firemen were less actively employed than in the previous month and also in practically every case than in May of 1920 and 1919. Many of the above unions, in addition to the total unemployment, reported a substantial number of their members as on short time.

The tabular statement on pages 936-937 presents the returns in some detail.

EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES, MAY, 1921

REPORTS from fifteen cities showing the number of civic employees temporarily engaged and the wages paid these persons during the month of May showed increases of 6.6 per cent in the number of employees and of 17.2 per cent in the amount of wages paid, as compared with the preceding month. In May, 1921, 12,745 persons were temporarily employed, and the wages amounted to \$1,152,841 as compared with 11,950 employees and an aggregate payroll of \$983,935 in the preceding month.

In comparison with the returns for the same period in 1920, there was an increase of nearly 14 per cent in the number of employees and of over 5 per cent in the wages paid, there having been 11,183 employees with a total payroll of \$1,091,908 in May of last year.

St. John, Montreal, London, Brandon, Regina and Moose Jaw recorded increases in the number of persons employed as compared with both April, 1921, and May, 1920. At Ottawa, Hamilton, Vancouver and Victoria, there

were declines in the former and increases in the latter comparison. On the other hand, Toronto, Winnipeg, Calgary and Edmonton reported the reverse, showing increases over the preceding month, but losses in comparison with May of last year. Saskatoon registered reductions in both instances.

As to wages, St. John, Montreal, London, Brandon, Regina and Moose Jaw reported gains both as compared with

April, 1921, and with May, 1920. Ottawa, Toronto, Winnipeg, Saskatoon, Calgary and Edmonton recorded increases over the preceding month with declines as compared with May, 1920. This situation was reversed at Hamilton and Victoria, where declines in the former and gains in the latter comparison were reported. Vancouver registered reductions in the amount of wages paid in both cases.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS MAY 1921 AS COMPARED WITH APRIL 1921 AND WITH MAY 1920.

EMPLOYMENT IN THE BUILDING TRADES DURING MAY, 1921, AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 56 cities, showed a slight increase during May as compared with the preceding month, the value rising from \$12,502,330 in April to \$13,233,543 in May, an increase of \$731,213 or 5.8 per cent. Increases in this comparison were registered in Quebec,

Ontario, Manitoba, Saskatchewan and British Columbia, that of \$865,995, or more than 15 per cent., in Ontario being the largest. Of the declines reported elsewhere, that of \$940,815 or over 74 per cent. in Alberta was the most marked.

As compared with the returns for the corresponding month in 1920, there was

an increase of \$1,151,943 or slightly over 9.5 per cent., the value for May of last year having been \$12,081,600. Prince Edward Island, Quebec, Ontario, Manitoba and British Columbia showed increases in this comparison, that in Manitoba of \$577,604, or practically 100 per cent., being especially large. On the other hand, Nova Scotia, New Brunswick, Saskatchewan and Alberta registered losses in this comparison. The decline in Alberta, as in the comparison with April, 1921, was the most decided, standing at \$562,630 or over 63 per cent.

Of the larger cities, Montreal, Toronto and Winnipeg recorded gains as compared with both April, 1921, and May, 1920. In Vancouver there was a decrease as compared with the preceding month, but the value for May of this year exceeded that registered in the same month in 1920.

Of the smaller centres, Quebec, Galt, Kingston, London, Sarnia, Windsor, St. Boniface, Medicine Hat, Prince Rupert and South Vancouver, reported increases in both comparisons.

The returns from 35 cities formerly used in this report (which are distinguished by asterisks and which are also tabulated separately for statistical purposes) showed that the total value of the building permits issued by these cities was \$10,991,570, as compared with \$10,758,398 in April. There was, therefore, an increase of \$233,172 or over 2 per cent. as compared with the returns for the preceding month. In comparison with the corresponding month of last year, moreover, there was an increase of \$154,474, or a little more than one per cent., the value for May, 1920, having been \$10,837,096.

FAIR WAGE CONTRACTS, JUNE, 1921

DURING June the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to four fair wage contracts awarded by the Department of Public Works, all of which contained the usual fair wage clause providing for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed. No contracts containing the fair wage clause were let during the month by the Department of Railways and Canals.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Alterations, etc., to steam heating apparatus in Westminster Hospital, London, Ontario. Name of contractor, W. G. Edge, Limited, Ottawa, Ontario. Date of contract, June 13, 1921. Amount of contract, \$12,863.

Overhauling and repairing of dredge "Fruhling," P.W.D. No. 303. Name of contractor, Wallace Shipyards and Dry

Dock Co., Ltd., North Vancouver, B.C. Date of contract, June 9, 1921. Amount of contract, \$6,827.50.

Public floating wharf, Carroll's Landing, (Arrow Lake), B.C. Name of contractor, Thos. F. Lean, Burton, B.C. Date of contract, June 9, 1921. Amount of contract, \$7,800.

Renewal of wharf, Kincolith, (Skeena District), B.C. Name of contractor, Wm. T. Muse, Prince Rupert, B.C. Date of contract, June 15, 1921. Amount of contract, unit prices.

POST OFFICE DEPARTMENT.

The following is a statement of payments made in June for supplies ordered by the Post Office Department subject to the regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions.

Nature of orders.	Amount of order.
Making metal dating stamps and type and other hand stamps and brass crown seals.....	\$ 883.45
Making and repairing rubber stamps, daters, etc....	210.92
Supplying mail bag fittings.....	517.14
Making up and supplying letter carriers' uniforms, etc.....	41,885.27
Repairing letter boxes, etc.....	35.00
Making and supplying letter box keys.....	70.00
Supplying parcel scales.....	8,205.00
Making and supplying stamping ink, pads, etc.....	361.00

RECENT CHANGES IN WAGES IN CANADA

THE bulletin on Wages and Hours of Labour in Canada, 1901-1920, published as a supplement to the LABOUR GAZETTE in March, 1921, showed that wages rose steadily during those years. The general downward trend of wages since the figures for 1920 quoted in the bulletin may be seen by an examination of the accompanying data.

In the year 1920 hourly rates of wages as indicated by the index numbers of twenty-one trades in thirteen cities had advanced 90 per cent over 1913, and on an average increased to 200 per cent over the rates of 1901. At the close of 1920 wage rates began to decline in a few instances, notably in the lumbering industry, where cuts of as much as 20

per cent occurred between September and January. Since then wages in general have tended to decrease.

In the metal trades, wage reductions for blacksmiths, boilermakers and machinists have ranged for the most part from 7 to 20 per cent, and in the cases of sheet metal workers, patternmakers and moulders, there were average reductions of from 7 to 11 per cent. Manufacturers of farm implements and machinery have reported wage reductions of 10 per cent.

In shipbuilding decreases between 5 and 10 per cent predominated, in some cases being as great as 17 per cent.

In the textile and clothing industries wages have been reduced as follows: cotton mills from 5 to 12½ per cent and knitting mills 10 to 20 per cent.

In the woodworking industry, wages of furniture workers have undergone reductions of 10 to 15 per cent, and in general other woodworkers' have been reduced from 5 to 20 per cent.

In most firms of the pulp and paper industry, negotiations are still pending, (in many cases for reductions of 30 per cent), reductions of 15 and 20 per cent having been effected in a few other instances.

In the rubber industry, cuts of 6 and 7 per cent have predominated, in a few instances the decrease being as much as 20 per cent.

In the chemical industry some cuts varying from 5 to 20 per cent have been made.

A few changes have been reported in the boot and shoe industry, the average reduction in these cases being 10 per cent.

Wages in metal mining have shown decreases ranging from 14 to 25 per cent. The greatest reductions reported have been in British Columbia, where successive reductions of 50 and 75 cents per day have been put into effect. In other provinces wages were reduced 25 and 75 cents per day. In coal mining in Alberta, wages were reduced by certain employers 16 per cent and in one large mine, 12½ per cent. Coal miners' wages on Vancouver Island were reduced twice, the total cuts being 66 and 70 cents per day.

In the building trades, where reductions have been effected they have been at the rate of from 5 to 10 cents per hour, higher wages being cut more, making an average reduction of from 8 to 10 per cent.

In the lumbering industry no changes have been reported recently, noticeable reductions having been effected early in the year as mentioned above. Reductions of 10 per cent in civic wages have been under consideration during the past months in some cities and in a few cases are already effective. Civic wages in general have been adjusted to conform with prevailing rates in the locality. In the manufacture of food and drinks a few instances of reductions of 10 per cent have been reported recently. The most notable reduction was that of 12½ per cent which was effective in the meat packing industry in March.

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

AGREEMENTS effected between employers and employees and schedules of wages and working conditions received in the Department are published in summary form in the LABOUR GAZETTE each month. In most cases such agreements are signed by both parties, but verbal agreements are included in the record, this term being interpreted to

include schedules of rates of wages, hours of labour and other conditions of employment agreed upon between certain of the employees and employers concerned, and in effect though not signed. In the case of each agreement the rates of wages in the principal classes of labour are given, together with an outline of the more important working

conditions and other information of general interest. The following is a summary of the more important agreements and schedules recently received by the Department, arranged by industrial groups.

Food, Drink, Tobacco

TORONTO, ONT.—CERTAIN EMPLOYERS, AND BAKERY AND CONFECTIONERY WORKERS' UNION No. 181. Agreement in effect from May 1, 1921, to May 1, 1922.

A day's work to be not more than eight hours, six days a week. Sponge setting on Friday to be paid not less than \$1.00, same to be done by jobbers.

Minimum Wages: Per week—foremen, \$48; second hand, \$44; third hand, \$40.

Jobbers sent by local not to be rejected when capable of doing work assigned to them.

Overtime, time and one-half for journeymen.

WINNIPEG, MAN.—CITY DAIRY COMPANY LIMITED, AND INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS No. 119. Agreement in effect from November 1, 1920, to October 31, 1921.

Company to hire union members, or those who will join within 15 days.

Employees through a committee of representatives to discuss grievances with officials of company, or, failing satisfaction, with Board of Directors.

In cases of loss or damage through accident or breakdown, employees to be given a fair hearing.

Employees in service of company to be entitled at expiration of one year's service to seven days' holidays with full pay annually, and in addition, one day off in each fourteen, with full pay. After 26 weeks' employment, employees to be entitled to one-half the summer vacation.

Wage scale: Per week—Spare routemen, \$34; retail drivers, \$18 and 4 per

cent on sales; minimum, \$29 per week. Auto truck drivers, teamsters and wholesale drivers, \$30.

MOOSE JAW, SASK. — ROBIN HOOD MILLS, LIMITED, AND UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA. Agreement in effect from September 1, 1920, with wage scale in effect from February 14, 1921.

Hours: Per day, eight, except in case of men on daylight labour.

Overtime, time and one-half. Work on Sundays and holidays when plant is in operation, double rate. Repair work on Sundays and holidays when plant is not in operation, time and one-half.

Grievances to be reported first to foreman; then if not settled to superintendent; next to management; finally to grievance committee who will take up matter jointly with management.

Operative labour to be on 8-hour day basis; maintenance labour, 10 hours.

If workers must be laid off, as much notice as possible to be given.

In case of accident or sickness, employee to receive his position after recovering.

Wages: Per hour—*Eight Hour labour*. Warehouse and loading foremen, operating engineers, 72½ cents; stock-keeper, head packers and assistant foreman, car checkers, 67½ cents; packman, operating millers, machine tenders, flour packers, firemen, boiler washer, 62½ cents; smutters and oilers, feed pekers, 60 cents; sweepers, 52½ cents; truckers and loaders, boiler washer's helper, 57 cents; ashman, common labour, 50 cents.

Women labellers, machine tenders, lidders and other female labour, 50 cents maximum, 30 cents minimum, depending on nature of work and skill of worker.

Daylight labour—Package Department: Charge hand, 67½ cents; box makers, 57½-62½ cents; box maker's helper, 50 cents; tube makers and lid makers, 62½ cents. Elevator: Charge hand, 67½ cents; elevator oper-

ator, 62½ cents; oiler, grain sampler, 60 cents; wheat shoveller, 57 cents; common labour, 50 cents. Copper shop: Head setter, 62½ cents; cooper's helper, 55 cents; common labour, 50 cents. Local warehouse, sackroom, yard: Charge hand, 57 cents; storekeeper, 67½ cents; truck drivers, 60 cents; teamsters, 57 cents; yard men, 60 cents; coal shovelers, 55 cents; sackman's helper, stenciller, 57 cents. Miscellaneous: Machinist engineer, 72½ cents; millwright, 70 cents; pipe fitter, 67½ cents; blacksmith (temporary), 62½ cents.

FERNIE, B.C. — FERNIE-FORT STEELE BREWING COMPANY, LIMITED (IN LIQUIDATION), AND UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, No. 308. Agreement in effect from June 1, 1921 to May 31, 1922.

Only union men to be employed, but in busy season extra men may be employed if not causing lay-off of union men.

No man to be discharged or discriminated against for upholding union principles, or serving on a union committee.

Hours of labour, eight hours per day, six days per week. Sundays and holidays, double time.

Minimum wage: Per day—Brewers, cellarmen, kettlemen, coopers, \$6.25. Washhouse men and others in brewery, \$6.00. Men in bottle shop, \$5.65. Per month—Teamsters, \$150; first engineers, \$190; second engineers, \$180; eight hours per day; overtime, Sundays and holidays, time and one-half. Slack barrel coopers, per day, \$5.65.

Employees on recovery from sickness to be reinstated. If staff is reduced in dull season, men to be laid off in rotation in an impartial manner, for no longer than one week at a time.

Differences to be referred to a Board of Arbitration of two members from each party and, if necessary, a fifth selected by them. Decision to be binding on both parties.

During working hours, employees to receive free beer if the privilege is allowed by law.

Printing and Publishing

CALGARY, ALTA.—EMPLOYING FIRMS, AND BOOKBINDERS' UNION, No. 211. Agreement in effect from May 1, 1921, to October 31, 1921.

Wages: Per week—Journeyman bookbinders, finishers and rulers, \$44; cutters, \$36; journeywomen, \$21. Hours per week, forty-four. Overtime, time and one-half for first three hours; thereafter and Sundays and holidays, double time.

No member to do work under a piece or contract system.

No work from non-union shop or shops in which strike is on to be done in another shop by a union member, and if done by non-union man, union to withdraw its members from said shop.

When Union can not supply necessary help, employer may secure his own help until Union is able to supply him. Any employee proving efficient not to be refused admission to the Union.

Apprentices: In bindery, one to one, two or three men; two to five; three to nine, and one to each additional five; where three men and one apprentice are employed, an additional boy to be allowed to work in shop as apprentice enters third year. Apprentices to serve four years and join union at end of first year. Scale: Per week—First six months, \$9; second six months, \$11.25; second year, \$15; third year, \$22.50; fourth year, \$30.00; thereafter, minimum rate, \$44. Girl apprentices: to serve not less than three years. Scale: Per week—First six months, \$10.50; second six months, \$13; third six months, \$15; fourth six months, \$18; third year, \$20; thereafter, minimum scale, \$21. Folding machine operators: First year, \$21; second year, \$23; 50 cents a shift extra for night work.

ST. JOHN, N.B.—EMPLOYING FIRMS, AND TYPOGRAPHICAL UNION, No. 85.

Agreement in effect from May 1, 1921, to May 1, 1922.

Newspaper and Book and Job Regulations:

Only Union members to be employed when Union can furnish same.

Overtime and holidays, time and one-half. Sundays double time.

Hours per week, book and job offices, 44 hours; newspaper offices, eight hours per day; seven and one-half per night. No overtime unless more than eight hours worked.

Proof-readers holding union cards to receive minimum scale.

No piece work to be allowed. Work to be secured only through the foreman.

Disputes to be referred to employer and a committee of two from office affected; if not settled, to be referred to an arbitration committee of three, one from each party and a third selected by them; decision to be final and binding.

Day Work—minimum wages: Per week—Book and job foremen, linotype operators and machinists, \$29.35. Floor hands and monotype keyboard operators, \$27.50. Newspapers—All foremen, linotype operators and machinists, \$32.00; floor hands, \$30.

Apprentices: third year, two-fifths of journeyman's pay; fourth year, one-half; fifth year, two-thirds.

Night work—Foreman, operators and machinists, \$35; floormen, \$33. Apprentices paid as for day work.

On newspapers, one apprentice to six journeymen; job offices, one apprentice to four journeymen, not more than three in one office.

Apprentices to serve five years before being admitted to journeyman membership of Union. In first and second year, general work in composing room; in third year at least four hours a day on composition and distribution; in fourth year at least six hours a day on composition and distribution; in fifth year, at least seven hours; last six months of term, apprentice to learn typesetting devices. Beginning with third year, appren-

tices to take course in printing; to make quarterly reports showing degree of proficiency attained; to undergo examination before local committee regularly. Work must show whether entitled to increase in wage scale.

WINDSOR, ONT. — EMPLOYERS, AND WINDSOR TYPOGRAPHICAL UNION, No. 553. Agreement in effect from January 1, 1921, to December 31, 1921.

Job.—Only Union members to operate machines. Probationary members to be allowed to learn machine composition during last six months of apprenticeship, but not to displace a regular operator.

A journeyman machinist to be employed on each shift with three or more typesetting or typecasting machines run on regular shifts.

Apprentices to be not less than sixteen years of age when beginning and possess a common school education, to try examination at end of six months; if qualified, to continue apprenticeship of five years. Foremen and members to teach apprentices the printing business. Apprentices to journeymen, one to five or less; two to not less than ten; three to not less than 15; four to not less than 20; five to not less than 25, and not more than five to an office.

Hours per week, to April 30, 1921: Days, 48 hours; nights, 45 hours. May 1, 1921 to December 31, 1921: Days, 44 hours; nights, 42 hours.

Overtime, time and one-half; Sundays and holidays, double time.

Wages: Per week—Day, \$42, night, \$44. Apprentice, one-third minimum rate for floorman in third year; one-half in fourth year; two-thirds in fifth year.

Newspaper.—Hours per week in composing rooms: Day, 48; night, 45—days, 8 hours; nights, 7½ hours. Overtime, time and one-half for first three hours; thereafter and Sundays and holidays, double time, except in case of morning newspapers when a night's work shall consist of 5½ hours, paid as a full night.

Wages: Per week—Foremen, machin-

ists, operators, bankman, heading men, ad men, make-up men, hand compositors (all being journeymen): January 1 to April 30, 1921, days, \$46; nights, \$48. May 1 to August 31, 1921, days \$47; nights, \$49. September 1 to December 31, 1921, days, \$48; nights, \$50.

Apprentices, third year, one-third floormen's rate; fourth year, one-half; fifth year, two-thirds.

NELSON, B.C.—CERTAIN EMPLOYERS, AND TYPOGRAPHICAL UNION, No. 340. Agreement in effect from May 1, 1921, to May 1, 1922.

All persons employed in composing rooms, except apprentices, to be good standing union members.

Hours per day, 7½.

Wages: Floormen, machinists, operators, per day, \$7.50; per night, \$8; machinist operators, per day, \$7.75; per night, \$8.25; foremen, per day, \$7.75; per night, \$8.50.

Overtime, first five hours, time and one-half; thereafter, double time. Work on morning papers on holidays, 6 hours to be a night's work. Only Union and apprentice members to practise on machines. Period of learners to be twenty-six weeks. Scale; Per day—First six weeks, \$2.50; second six weeks, \$3.15; third six weeks, \$3.80; last eight weeks, \$5.15.

Apprentices: Number not to exceed one to six journeymen or less, with one additional for each major portion of six. Beginning with an apprentice's third year a second apprentice to be employed, provided that apprentice in third year has been continuously employed in composing room. No more than two apprentices at one time. Applicant must read manuscript intelligently and have rudiments of a common school education and be qualified to perform duties of a copy holder.

Apprentices' Wages: Per week—First six months, \$5; second six months, \$6; third six months, \$7; fourth, \$8; fifth, \$11; sixth, \$14; seventh, \$16; eighth, \$19; ninth, \$22; tenth, \$25. If

given straight apprenticeship on machine the last six months, rates of learners as given above to govern; if half time on machine and half on floor, two-third rate shall apply.

Foremen and chairmen to have responsibility of training apprentices. Apprentice becoming proficient in one branch to be transferred, finally being turned out a finished all-round journeyman.

Book and Job Offices:

Hours per week, 44. Hours per day, eight, with one short day per week.

Wages: Per hour—Foremen, 96⅞ cents; compositors, 93¾ cents. A journeyman employed singly to be considered a foreman.

Overtime, Sundays and holidays, time and one-half.

Newspaper rate to govern in book and job offices and publications other than daily newspapers.

In shops employing one to six journeymen, one apprentice; one additional to additional five men or major portion thereof.

Building and Construction

KINGSTON, ONT.—MASON CONTRACTORS, AND BRICKLAYERS, MASONS AND PLASTERERS, No. 10. Agreement in effect from April 1, 1921, to March 31, 1922.

Wages: Per hour—85 cents. Hours per day, eight. No work to be done before 8 a.m. or after 5 p.m., except in cases of necessity.

Overtime and holidays, time and one-half. No work on Labour Day. Sundays, double time.

Only union men to be employed; union members to work only for contractors recognizing terms of this agreement.

No member to be allowed to contract or sub-contract any work.

Provisions made to preserve good workmanship in the trade.

No strikes to take place before matter is brought before a joint arbitration committee for settlement. No union mem-

bers to take part in a sympathetic strike except under direct authority of the International Executive.

A contractor or firm in business one year to have one apprentice to serve four years; after apprentice has completed third year, another apprentice to be permitted. Apprentices to be under 18 years of age, and indentured.

Violation of this agreement to be reported, and dealt with by joint arbitration committee.

HAMILTON, ONT.—MASON BUILDERS' ASSOCIATION, AND BRICKLAYERS' AND MASONS' UNION, No. 1. Agreement in effect from May 1, 1921, to April 30, 1922.

Agreement similar to that previously in effect with the exceptions that wage rate per hour is now \$1.00, and clause providing wage rate for apprentice is omitted.

CALGARY, ALTA.—GENERAL CONTRACTORS' ASSOCIATION, AND BRICKLAYERS, MASONS, AND PLASTERERS, No. 2. Agreement in effect from June 1, 1921, to March 31, 1922.

Hours of labour, eight per day; four on Saturdays.

Wages: Per hour—\$1.15. Foremen, not less than 10 cents per hour over journeymen's wages. Work outside of city, at least 10 cents per hour minimum; also railway fare and time travelling.

Night shifts, 7 hours' work with 8 hours' pay. Overtime, only for saving of life or property, time and one-half. Saturdays until 5 p.m., time and one-half; thereafter and Sundays and holidays, double time. Overtime for boiler repair work, double time.

In case of dispute, same to be investigated by a committee of three members of each party; settlement to be binding. No strike to be entered into before matter under dispute has been brought before joint arbitration committee.

Succeeding agreement to be negotiated during January, 1922.

SAULT STE. MARIE, ONT.—SOO BUILDERS' EXCHANGE AND CARPENTERS AND JOINERS, No. 446. Agreement in effect from June 6, 1921, to February 28, 1922, and from year to year subject to change or termination on 30 days' notice.

Hours of labour; eight per day. Overtime, time and one-half; holidays, double time. No work Sundays or Labour Day, except to save life and property.

Wages, 75 cents per hour. Any man incapacitated by old age, accident or other cause may work for rate as arranged subject to approval of union.

Foremen to be union men, except where contractor acts as foreman. Carpenters to be union men where possible.

Matters requiring adjustment to be referred to arbitration.

Apprentices to be indentured.

CALGARY, ALTA.—CONTRACTORS, AND CARPENTERS' DISTRICT COUNCIL. Agreement in effect from June 1, 1921, to March 31, 1922.

Wages: Per hour—90 cents.

Hours per day: eight, and four on Saturdays. Overtime until midnight, time and one-half; thereafter and Saturday afternoons, Sundays, and holidays, double time. Day shift, eight hours; night shift, seven hours, with eight hours' pay. No work on Labour Day, except to save life and property.

No Union member to work for anyone outside Contractors' Association for less than 90 cents, or for anyone who has not signed this agreement.

OTTAWA, ONT.—ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES, AND HOD CARRIERS, BUILDERS AND COMMON LABORERS, No. 428. Agreement in effect from June 22, 1921, to April 30, 1922, with four months' notice of change.

Hours of labour, nine per day, five on Saturdays. Overtime until 10 p.m., time and one-half, thereafter and Saturday afternoon and holidays, double time, except shift work which shall be paid

regular rate. No work on Labour Day except to save life and property.

Minimum wages per hour, 50 cents.

Industrial Council to be established of five members from each party with an independent chairman chosen by them to adjust disputes. Decision to be binding on both parties.

GUELPH, ONT.—MASTER PAINTERS, AND PAINTERS' UNION, No. 1262. Agreement in effect from April 1, 1921, to March 31, 1922.

Hours of labour: nine per day, five on Saturdays. Overtime until 10 p.m., and until 5 p.m. Saturdays, time and one-half; thereafter and Sundays and holidays, double time.

Minimum wage per hour, 60 cents.

Only union men to be employed.

WINNIPEG, MAN.—MASTER PAINTERS' ASSOCIATION AND MASTER PAINTER CONTRACTORS, AND PAINTERS, DECORATORS, PAPERHANGERS, GLAZIERS AND GLASS-WORKERS, No. 739.

Hours of Labour: eight per day, forty-four per week. Overtime, time and one-half; after midnight, Saturday afternoons, Sundays and holidays, double time. Overtime not to exceed six hours per week. Master painters to give preference to members of No. 739, all other things being equal.

One apprentice to every shop employing two or more men. No apprentice to be allowed to work alone. No member of No. 739 to work for anyone except recognized masters paying business tax and carrying workmen's compensation insurance and parties to this agreement, provided such masters can employ him. Foremen to be good standing Union members.

Grievances to be submitted to a joint committee, and if either party fails to attend meeting the other to win by default. No strike or lockout during conference.

Business agent to assist in providing the necessary number of qualified men.

Minimum wages for journeymen, 81 cents per hour. Swing stage work, 5 cents per hour above regular rate.

Union to endeavour to prevent dumping of men to one shop and to distribute them as the need arises, especially those loyal to Union.

BROWNSBURG, QUE.—PROPRIETOR OF GRANITE QUARRIES IN CHATHAM TOWNSHIP, AND PAVING CUTTERS' UNION, No. 39. Agreement in effect from January 1, 1921, to January 1, 1922, with three months' notice of change.

Blocks $3\frac{1}{2}$ - $4\frac{1}{2}$ inches wide, $4\frac{3}{4}$ - $5\frac{1}{4}$ inches deep, 8-12 inches long; cut on track, \$40 per M; cut in motion, \$47 per M. Blocks $3\frac{1}{2}$ - $4\frac{1}{2}$ inches wide, $4\frac{1}{2}$ inches deep, 7-9 inches long: cut on track, \$34 per M; cut in motion, \$40 per M. Blocks 4 x 4 inches cut on track, \$21 per M; cut in motion, \$26 per M. Flange blocks $3\frac{1}{2}$ - $4\frac{1}{3}$ inches wide, 5 inches deep, 7-10 inches long: cut on track, \$57 per M; cut in motion, \$64 per M. Blocks 8-12 inches long, $4\frac{1}{2}$ - $5\frac{1}{2}$ inches deep, $3\frac{1}{2}$ - $5\frac{1}{2}$ inches wide, cut in motion, \$47 per M.

Day work, 87 $\frac{1}{2}$ cents per hour; 8 hours per day, four hours on Saturdays. None but union men or those eligible to become so to be employed. Proprietor when increasing number of men to notify union secretary. Union to take all necessary steps to try and secure all the men wanted. Proprietor not to employ more paving cutters than can be kept in steady work.

Proprietor to have a supply of good drinking water at convenient places on each track.

Any other company or individual starting work with this branch not to receive a bill of prices less than current bill between the parties of this agreement.

TORONTO, ONT.—CONTRACTING PLASTERERS AND MEMBERS OF THE INTERNATIONAL CONTRACTING PLASTERERS' ASSOCIATION, AND THE PLASTERERS LABOURERS' UNION. Agreement in effect from January 1, 1921, to December 31, 1921.

Disputes arising to be referred to a joint arbitration committee of five from each party. Any one refusing to comply with rules of settlement to be suspended from membership in Association or Union.

Wages: Per hour—75 cents. Overtime, time and one-half; Sundays, holidays and after 6 p.m. Saturdays, double time.

No member to leave employment of a member of Association in order to accept work from any outside individual or firm.

LONDON, ONT. — CONTRACTORS, AND OPERATIVE PLASTERERS' AND CEMENT FINISHERS' UNION, No. 159. Agreement in effect from April, 1921, to March, 1922, with 90 days' notice of expiration.

Wages per hour—\$1.00. Foremen or men in charge to receive not less than \$1.00 per day additional.

Hours per day, eight; four on Saturdays. Overtime and holidays, double time; no work on Labour Day.

Union to try to furnish master plasterer with number of men required to complete a job.

FREDERICTON, N.B.—MASTER PLUMBERS, AND PLUMBERS' AND STEAMFITTERS' UNION, No. 770. Verbal agreement to be in effect from May 1, 1921, to May 1, 1922.

Wages: Per hour, 70 cents. Hours per day, eight. Overtime and holidays, time and one-half. Double time, Sundays.

CALGARY, ALTA.—SANITARY AND HEATING ENGINEERS, AND PLUMBERS AND STEAMFITTERS, No. 496. Agreement in

effect from March 1, 1921, to May 31, 1922.

Hours of labour: March 1 to November 30, eight per day, four on Saturdays; December 1 to February 28, seven per day, three and one-half on Saturdays. Out of town labour, ten hours per day.

Wages: Per hour—Journeyman, \$1.00; improvers during last year, after having passed examination, 75 cents; helpers, first year, 60 cents; second, third and fourth years, 65 cents.

Overtime, first five hours, time and one-half; thereafter and Sundays and holidays, double time. Night shift, time and one quarter for ten hours, overtime to last for two nights.

Apprentice to serve five years and to use tools only if under supervision of a licensed plumber, until he has served three years and passed an examination. One apprentice to each shop, and one for each five journeymen. More than five to a shop. Journeyman to be employed two months before employer may retain apprentice.

Not more than one steamfitter's helper, or apprentice, to each journeyman steamfitter, except for heavy lifting. Apprentice to serve five years, the last year as improver, and to pass an examination.

No journeyman to work except for a licensed plumber or steamfitter employer, except when working for the City or the School Board.

Members of one branch of trade prohibited from working at the other.

Grievances to be referred to employer and if not then settled to a committee of two or three of each party.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JUNE, 1921

THE movement of prices continued downward, but as in May was not so pronounced as during the latter part of 1920 and the early part of 1919. In retail prices of food, however, the decrease was steep, due chiefly to a drop of 20 cents per pound in butter, though meats, eggs, cheese and nearly all the items were slightly lower.

In retail prices of foods the average cost of a weekly family budget in sixty cities at the first of June was \$11.16 as compared with \$12.25 for May, \$16.92 for June, 1920, \$13.72 for June, 1919, \$12.77 for June, 1918, and \$7.35 for June, 1914. One-half of the decrease of \$1.09 in foods was in butter, the cost of which on three pounds fell 59 cents. Eggs were down 3 cents per dozen and cheese between 3 and 7 cents per pound. There were slight decreases in nearly all the other items, beef being down $\frac{1}{2}$ cent per pound and the other fresh meats 1 cent per pound, salt pork and bacon 3 cents per pound. Coal and coal oil were down slightly but rent averaged slightly higher. All items in food were considerably lower than a year ago, especially butter and potatoes. Fuel and rent, however, were higher.

In wholesale prices, the index number stood at 242.6 for June as compared with 247.3 for May, 249.3 for June, 1920, 284.1 for June, 1919, 280.6 for June, 1918, and 135.3 for June, 1914. The chief decreases for the month were in livestock and meats, fish, miscellaneous foods, with small increases in textiles, leather and building materials. In fruits and vegetables, lemons showed a considerable advance. As compared with a year ago, all the groups were substantially lower, especially grains, textiles, hides and leathers, lumber, and raw furs. Fresh fish, fresh fruits, fuel, lighting, lumber, miscellaneous building materials and house furnishings were higher than in June, 1919.

The table of retail prices and rentals shows the prices at the beginning of June of over one hundred staple food-stuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada having a population of 10,000 or over. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these have been published each month since the beginning of 1910, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts exclusively occupied by workingmen. The first class is of houses in good condition, favourably

located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, those being the items for which statistics have been obtained each month and published in the *LABOUR GAZETTE* since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease

from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding months back to 1913.

Retail Prices

In meats there was downward movement, beef averaging $\frac{1}{2}$ cent lower, other fresh meats dropping 1 cent, and salt pork and bacon 3 cents per pound. Mutton was down 3 cents in New Brunswick, the Province of Quebec and in Ontario, decreases in other provinces being slight. Pork chops showed a greater decrease than other fresh meats, being down 4 cents per pound. Whitefish were down 2 cents per pound. Lard was 3 cents lower in nearly all the provinces. Eggs averaged 3 cents per dozen lower, being down in all the provinces, except in Nova Scotia where increases occurred. Milk averaged almost 1 cent per quart lower, but the decreases in the Province of Quebec averaged 2 cents. Dairy butter averaged $32\frac{1}{2}$ cents at the beginning of June, as compared with 51.4 cents at

the beginning of May and 54.9 cents at the beginning of April, the decreases being general throughout the Dominion. Similar changes occurred in creamery butter. Cheese was about 3 cents lower throughout the country. Bread decreased in Moncton, Bathurst, Hull and Woodstock. Flour, rolled oats, cornmeal and barley showed little change. Rice and tapioca were slightly lower. Potatoes were again lower, the decreases being considerable in all the provinces, except in Manitoba and Alberta. Prunes, raisins and currants were slightly lower. Jam and canned fruits were lower. Honey, marmalade and corn syrup showed little change. Tea and coffee tended to be slightly lower. In laundry starch and soap there were slight decreases. Anthracite coal was down at St. John, N.B., Fredericton, Newcastle, Quebec, Three Rivers, Brockville, Belleville, Niagara Falls, Windsor and Cobalt. Bituminous coal was also slightly down in most of the cities. Rent was lower in Amherst, but advanced in Medicine Hat and Lethbridge.

Wholesale Prices

GRAINS AND FODDER.—Wheat, Manitoba No. 1 Northern, at Winnipeg fell from \$1.92 per bushel at the end of May to \$1.85 about the middle of June and rose again to \$1.89 by the end of the month. Barley at Winnipeg fell from 81 to 72c. and rose again to 78c. Oats at Winnipeg remained practically unchanged throughout the month at from 47c.-49c. Corn at Toronto advanced from 73c. to 77c. but later fell to 75c. Flaxseed advanced from \$1.77 to \$1.86 but declined again to \$1.83. Rye declined from \$1.40 to \$1.25 at Toronto. Hay was lower at Montreal at \$21.00-\$22.00 per ton. Bran and shorts fell \$3.00 to \$4.00 per ton at Toronto.

ANIMALS AND MEATS.—At Winnipeg cattle declined from \$8.25 per hundred pounds to \$8.00. Cattle at Toronto fell from \$9.50 to \$8.00 per hundred pounds. Dressed beef, hindquarters, at Toronto fell from \$9.00-\$11.00 to \$7.00-\$10.00 per 100 lbs. Veal declined from 19c. at the end of May to 16c. at the end of June. Hogs at Toronto, which had fallen from \$10.25 in May, advanced from \$8.25 to \$12.75 per hundred pounds. Dressed hogs were also up from 13c. to 18c. per pound. Hams advanced from 33c. to 35c. Lard rose from 12½c. to 14½c. Sheep declined from \$8.00 to \$6.00 per hundred pounds and dressed mutton from 18c. to 16c. per pound. Dressed lamb was quoted at from 28c.-30c.

DAIRY PRODUCTS.—Finest creamery butter at Montreal advanced slightly from 30½c. to 31¾c. per pound, by the end of the month. Dairy butter at Toronto rose 1c. per pound to 27c. Eggs recovered from 34c. per dozen to 40c. at Montreal.

FISH.—Some varieties of fish were lower than the May quotations. Dry codfish was down from 8c. per pound to 6c. Haddock fell from 5c. to 4c. Salted mackerel was down from 8c. per pound to 6c. Fresh whitefish at Toronto declined from 25c. to 20c. per pound.

FRUITS AND VEGETABLES.—Strawberries came on the market at 20c.-25c. per box, rose to 25c.-30c. and declined to 11c.-15c. by the end of June. Bananas advanced to 9½c. per pound at Toronto. Lemons rose from \$4.50 per box at Toronto to \$6.00. Oranges were up \$1.00 per box at Toronto. Potatoes at Montreal declined 20c. per bag to 55c.-60c. Beans were lower at \$2.30 per bushel.

(*) Preliminary figures. (†) Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.
 (‡) Revised. (a) The number of commodities varies from month to month.

MISCELLANEOUS FOODS.—Flour remained practically unchanged from the levels of last month. Bread was slightly lower at Toronto. Rolled oats rose 5c. per bag to \$3.20. Sugar declined from \$10.89 to \$10.39 per hundred pounds at Toronto. Molasses was 5c. per gallon lower at Montreal.

TEXTILES.—Very little change occurred in woollens and cottons except raw cotton at New York, which fell from \$12.85 to \$11.85 per hundred pounds. Raw silk, Japan, was up. Jute fell from 9.16c. per pound to 8.66c. Hessians declined 60c. per yard to \$9.95. Oilcloths were lower at \$4.56 per piece 54 inches wide for table and 50c. per yard for floor.

HIDES, LEATHER, BOOTS AND SHOES—Hides showed no change from May figures. In leathers, waxed uppers rose from 35c. to 40c. per pound. Some lines of boots were down 10c.-25c. per pair.

METALS AND IMPLEMENTS.—Pig iron was down \$2.00 per ton to \$34.80.

Wrought iron scrap was slightly lower. Iron and steel bars remained unchanged. Lead was higher, silver bar, spelter and tin lower.

FUEL AND LIGHTING.—Gasoline declined 1c. per gallon and coal oil fell 2½c. per gallon.

BUILDING MATERIALS.—Spruce deals at St. John fell \$2. per M. to \$28. Oak rose from \$105 to \$115 per M. Plaster of Paris declined from \$6.00 to \$5.35 per barrel. Nails and iron wire were lower. Linseed oil advanced from 84c. to 92c. per gallon. Turpentine was down from \$1.15 to \$1.07 and benzine was also lower at 35c. per gallon.

HOUSE FURNISHINGS.—No changes were reported.

DRUGS AND CHEMICALS.—Alcohol, alum and glycerine were lower, while soda ash was slightly higher.

MISCELLANEOUS.—In raw furs mink skins rose from \$12.00 each to \$14.00. Muskrat skins declined 5c. each to 90c. The pulp market continued weak.

RECENT CHANGES IN PRICES IN CANADA AND OTHER COUNTRIES

WHOLESALE prices in Canada reached their peak in May, 1920, when they showed an advance of about 160 per cent from the average of prices in 1913. By June, 1921, they had fallen on the whole 30 per cent to 40 per cent from this point.

The average cost of living in 60 cities of Canada reached its highest point in June and July, 1920, when it was 101 per cent above the 1913 average. By June, 1921, it had fallen nearly 20 per cent from this high point.

The decline from the high point in the movement of wholesale prices became accelerated towards the end of 1920, but tended to slow up by April, 1921. By that date many basic materials appeared to have reached a firmer base than for some time and to be affected by market conditions in much the same manner as before the war, fluctuating slightly at times instead of participating in a general upward or downward movement as during the war and the two years following the armistice. The

important farm products, however, dropped precipitately with little indication of stabilising influences such as appeared in the markets for materials continuously produced throughout the year. Manufactured goods fell more gradually as demand lessened, and raw materials fell in price with somewhat later reduction in wages of labour. On the whole, prices of farm products and raw materials are practically down to 1913 levels, the decreased returns to such producers creating a very serious situation through the curtailing of purchasing power and the tying up of credits, with some stagnation in the movement of goods to market, though less than is popularly supposed. On the other hand producers of "consumers' goods" have been caught with stocks of high-priced raw materials and goods finished or in process of manufacture from such high-priced materials, and a sudden fall in "effective demand," due to the loss of purchasing power among farmers and wage-earners as well as commercial classes, all being hit by the re-adjustment in prices and values. Owing to the comparatively sound and liquid financial situation the widespread bankruptcy experienced in 1914, 1907, and during previous crises, had not appeared, and manufacturers as well as wholesalers and retailers appear to have been able to take their losses through gradual liquidation of stocks in most cases. Similarly precipitate cuts in wages have been avoided, the 20 per cent and 30 per cent cuts anticipated early in the year appearing to be the exception, while gradual reductions seemed to be the rule. Considerable unemployment, due both to complete shutdowns and to part-time operations, appeared as the most serious factor, the serious reduc-

tion in "effective demand" purchasing power making it all the more difficult to move the surplus stocks of finished goods. The readjustment necessary, involving the transfer of labour and capital from the production of goods in which there appeared a surplus, especially luxuries, to the production of goods from which quick and sure returns were to be expected, appears to be coming about more quickly and with less friction than during the great trade depressions of the nineteenth century and the first decade of the twentieth, better financial measures and better understanding of economic conditions being of great importance in such readjustments. The adjustment of wage rates according to the decline in prices, both cost of living and prices of the products of labour and developed resources, becomes an important factor in keeping the industrial machine in motion. A similarly important factor is the treatment of the unemployment problem, the institution of relief work on what are essentially useful and ultimately profitable projects being of material importance in bringing about a revival.

The following comments on conditions in the United States, from the June number of the bulletin issued by the Federal Reserve Board of the United States, are of interest as conditions in Canada are similar to those in the United States and are affected directly or indirectly to a great extent by the same influences.

Prices themselves have tended to settle to a somewhat lower basis and the various index numbers have tended to move rather more closely in harmony, thus indicating that the re-adjustment period is nearer completion.

It is now estimated that an actual decline in cost of living from the peak point, amounting to approximately 20 per cent, has taken place.

There seems to be increasing realization of the fact that a relatively stable wholesale price level will not be obtained until liquidation has occurred in all lines in which production, consumption, or prices are out of harmony one with another. Liquidation of a pronounced sort has occurred during the course of the past year in raw materials such as grain and live stock, cotton, wool, hides, copper and other non-ferrous metals, with the result that raw materials in these lines are now being sold at approximately pre-war prices. In the case of cotton, hides, and non-ferrous metals conditions in April and early May were such as to indicate that a fair degree of stability has been obtained, and prices showed slight increases over March levels. Wool prices, however, continued to decline because of the abnormally heavy importations which are being made in anticipation of the new tariff measure.

Wholesale Prices in Canada

As the index number of 272 commodities published since 1910 contained a large number of commodities which reacted slowly to market conditions, a special index number has been cal-

culated, using fifty of the most important and most representative commodities, and this index number has been converted to the base of 1913 = 100. The list contains 20 foods, 15 raw materials, and 15 manufactured goods. This index number rose from 102 in January 1913, 98.2 in August and 102 in December 1913, to 104.4 in December 1914, to 119.7 by December 1915, to 154.4 by December 1916, to 188.1 by December 1917, to 204.1 by December 1918, to 220.3 by December 1919, and to 260.5 by May 1920, when the high point was reached. By December 1920 it had fallen to 199.9, by March to 174.3 or 33 per cent below the high point of May 1920, and by June to 154.1 or 41 per cent below the maximum.

* The index numbers for these commodities were originally calculated on the base of average prices 1890-1899 = 100, and conversion to the base of average prices in 1913 = 100 has been effected by dividing the original index number for each month by the average of the index numbers for 1913. The results obtained are therefore only approximate.

Cost of Living in Canada

In addition to the statistics as to retail prices of food and fuel, and as to rates for rent, the Department during the past year secured figures as to retail prices of staple lines of clothing, including footwear, from retail dealers throughout Canada, for the years 1913-

1920. The figures relate to prices prevailing at the end of the year in each case, but in 1920 and 1921 prices during spring were also secured. From these quotations the percentages of changes in the cost of clothing have been calculated. Information was also secured as to the prices of household supplies, furniture, furnishings, etc., and an

COST OF LIVING IN CANADA 1910-1921

estimate has been made as to the percentage changes in the cost of miscellaneous items, the effect of the information gathered showing that such changes are approximately equal to the average changes in other items. The percentage changes in food, fuel and rent have been calculated from the weekly budgets published in the *LABOUR GAZETTE* from month to month, and the accompanying table summarizes the changes from year to year by groups, the figures for each group and for all items weighted according to the family budget method.

CHANGES IN THE COST OF LIVING IN CANADA FROM 1913
TO 1921.

(Percentages of increase in cost by groups over 1913).

Date	Food	Fuel	Rent	Clothing	Sundries	All

Dec. 1920.....	102	118	39	135	90	92
March 1921.....	80	109	39	95	87	77
June 1921.....	52	97	43	73	81	63

* Decrease.

A comparison based on this table between the prices for July 1920 and June 1921 shows a decrease during this period of nearly 20 per cent. Food dropped about 34 per cent, clothing about 33 per cent and "sundries" about 5 per cent, while on the other hand fuel advanced in price about 3 per cent and rent about 7 per cent. The decrease in "sundries" was chiefly due to house furnishings, which fell in about the same proportion as clothing.

Changes in Prices in Other Countries

The *International Labour Review* for March 1921 contains an article on wholesale prices in various countries. The index numbers of wholesale prices for a number of countries from 1913 to 1921 are listed, and for better comparison are converted to the base of 1913. Owing to the method used for this conversion, the resultant figures are in some cases only approximations. The various index numbers are also briefly analyzed, with a view to observing the movements in different classes of commodities.

The same *Review* for February, 1921, contains an article on retail price

CHANGES IN THE AVERAGE COST IN 60 CITIES IN CANADA OF A WEEKLY FAMILY BUDGET BY GROUPS OF EXPENDITURES 1913 - 1921

BASED UPON THE PRE-WAR FAMILY EXPENDITURE
OF A SKILLED WORKINGMAN \$21.00 PER WEEK IN 1913

fluctuations in various countries. As with wholesale price index numbers, those of retail prices have been reduced to a common base, viz., the prices for July 1914, or in a few cases some other month in the same year. In some countries the index numbers show the cost of food, sometimes other articles are included, and in other cases these numbers represent the cost of a standard family budget, in which not only food, but clothing, light, heating, rent, etc. are included.

Some of the more important comments in the articles may be noted under the names of the respective countries.

DENMARK.

Wholesale prices (according to *Finanstidende*) reached their highest level in November, 1920, when they were four times as high as before the war. By February, 1921, they had fallen 28 per cent from this high point. Generally speaking, foodstuffs had not increased in price to the same extent as industrial materials. Their fall, on the other hand, was not so rapid. Tin and hides were cheaper in February, 1921, than they were in 1914. Paper, however, was still five times as dear as before the war.

The retail figures of the Danish Government are only published at six-monthly intervals. They show the changes in the cost of an average workman's family budget for five persons and are used to regulate the wages of state employees and numerous other workers. A comparison between July, 1920, and January, 1921, shows a very slight increase in the latter month.

FRANCE.

The general index number of wholesale prices (from *Statistique Générale*)

reached its highest point in April 1920, and after a marked fall rose again for a time in July-September. Since the latter date prices fell regularly and fairly rapidly till February, 1921, when they had reached the same level as in September, 1919, and showed a decrease of 30 per cent as compared with the maximum. The most rapid fall appears to have taken place in the prices of industrial materials, which had risen higher than those of food stuffs. The fall is particularly marked in the case of textiles.

The index numbers of retail prices at Paris, based on the prices of 13 articles, reached their highest point in November, and by February had fallen about 10 per cent from this point.

GERMANY.

The chief difficulty in establishing an index number of prices for Germany is that a large number of articles in common use are still subject to Government control, and that, side by side with the official prices, there exist much higher prices at which the same articles are sold in illicit trade. There being no record of "illicit" prices, index numbers have to be calculated on the official fixed prices, thus presenting an unduly favourable picture, while as soon as any article is decontrolled, the recorded prices at once rise to near the level prevailing on the illicit market, and the index number shows an increase which does not represent the real situation, the high prices that were previously paid not having been recorded.

The official index numbers of wholesale prices show the highest point in March, 1920, those of the *Frankfurter Zeitung* in May, 1920. A certain decrease followed, but prices rose again

in the last months of the year; finally there was a considerable fall in the first months of 1921. The most decided tendency to fall in price was shown by textiles.

The *Reichsarbeitsblatt* publishes each month a series of index numbers of cost of living for all German towns, based on a budget, including food, fuel, lighting and rent, for a family of five. The same difficulty arises here as in the case of the wholesale index numbers, but the figures for five cities, Berlin, Hamburg, Munich, Dresden and Breslau, down to February, 1921, showed the peak in December, 1920-January, 1921, with a drop in February.

ITALY.

Wholesale prices in Italy (Bachi's index number) rose to about seven times their pre-war level. In January, 1921, the general index number was still above that for January, 1920, and showed a decrease of only 8 per cent compared with the highest point (November, 1920). It appears that prices began to fall towards the end of 1920 for foodstuffs and chemical products, and at the beginning of 1921 as far as textile materials and minerals and metals were concerned. It also appears that in February, 1921, the prices of building materials and of certain vegetable products were still rising.

The cost of living index numbers did not show any signs of falling up to the early part of 1921.

NETHERLANDS.

The official index numbers of wholesale prices are published in two groups, one for 49 commodities of all kinds, and one for 31 foodstuffs. Both reached their

highest point in July, 1920, the rise in foodstuffs being less marked than in the general commodities, the latter rising to three times the pre-war level. In these same commodities the fall in price was very gradual until October, then more marked in November and December. By February, 1921, they had fallen only 30 per cent from the highest point, and were still 10 per cent above the pre-war level.

The index numbers of retail prices at Amsterdam, based on the cost of 27 articles, reached their maximum in October, and decreased, slowly at first, then with greater rapidity.

SWEDEN.

The general index numbers of wholesale prices (from *Svensk Handelstidning*) reached their highest point in June, 1920, and then fell, slowly at first, but more rapidly after November, until in February, 1921, they had fallen 35 per cent from the maximum, and were nearly the same as the average for 1917. The different groups, however, included in the index number fluctuated in very various ways. Coal had risen until at its highest point it cost twelve times as much as before the war, but by February 1921, coal prices were less than one-third of what they had been in the previous July. Textiles, and hides and leather, also showed a great fall in price, though they had not risen to such an extraordinary extent as coal.

The official cost of living index number, representing the expenditure of a typical town-worker's household for food, fuel, light, rent, clothing and taxes, is only calculated every three months. The figures for January, 1921, showed a slight decrease from October, 1920, which was the highest point.

UNITED KINGDOM

The *Economist* and *Statist* index numbers of wholesale prices show the highest point to have been reached in March or April, 1920. The old index numbers of the Board of Trade place it several months later, but the new index numbers of the same body, which have been re-calculated on a new system, show the maximum in April. At the highest point wholesale prices had risen to more than three times the pre-war level. The fall was rather slow until September-October, 1920, after which it became more rapid, until in February, 1921, the decreases from the highest point were approximately as follows:

Economist.	38 per cent
Statist.	31 per cent
Board of Trade (new).	31 per cent

A brief analysis is made of the figures for the classes of commodities comprised in the last-named series. The prices of foodstuffs rose in the first months of 1920, and varied little until October, when they reached their highest point. They then began to fall, with increasing rapidity each month, but in February, 1921, the prices of meat and fish were still about 10 per cent above those for the same month in 1920. In industrial articles the decrease was much more marked, and cotton showed an almost catastrophic fall, the price in February, 1921, being less than a third of the maximum, reached in April of the previous year. "Other textiles" followed a somewhat similar course, but with less marked variations. Iron and steel fell regularly from June, 1920, and "other metals and minerals" from September. In February, 1921, these commodities had

decreased in price about 28 per cent and 22 per cent respectively from their highest points. The fall in the miscellaneous class entitled "other articles" was about 27 per cent to February 1921, but this class is composed of commodities which varied in price so greatly that the average has little real significance.

The index numbers of retail prices published by the British Government showed by February, 1921, a considerable decline from the highest point, reached in November 1920.

UNITED STATES.

Of the various sets of index numbers of wholesale prices published in the United States, most show their highest point in May 1920.

The series issued by the Bureau of Labour Statistics shows about the same figure for February, 1921, as for April, 1917, so that in less than one year the fall from the highest point was as great as a rise to that point which had occupied three years. The movement of prices in the different groups of articles was extremely irregular. Chemical products and house furnishings, which had reached particularly high maximum prices at a very late date, showed the most rapid fall in price. The greatest increase had taken place in furnishings and clothing; the smallest in metals. The commodities which in February, 1921, were the furthest removed from their pre-war prices were furnishings and building materials. Farm products were nearest to pre-war prices. Foodstuffs had a middle place in all these variations.

The Bureau's index numbers of retail food prices, based on the cost of 22

a Average for year. b Quarter beginning in specified month. c. 230 commodities, 1890-1909: 272, 1910-1914: 271, 1915-1921.

articles of food, reached the highest point in June and July, 1920. Down to February, 1921, the decline from this point was about 28 per cent.

The following table issued by the

United States Bureau of Labour Statistics, shows the increase in the cost of living in the United States from 1913 to May, 1921. These figures are averages based on the prices secured in 32 cities.

CHANGES IN COST OF LIVING IN THE UNITED STATES

Item of expenditure	Per cent of total expenditure	Per cent of increase from 1913 (average) to—									
		Dec., 1914	Dec., 1915	Dec., 1916	Dec., 1917	Dec., 1918	June, 1919	Dec., 1919	June, 1920	Dec., 1920	May, 1921

**No change.

OTHER COUNTRIES

In Australia wholesale prices began to fall in August, 1920.

In Belgium the level of retail prices according to the official index numbers of 56 commodities, was about 9 per cent lower in February, 1921, than at the highest point in October, 1920; the weighted index numbers of 22 food items showed a decrease of less than 7 per cent for the same period.

In India and Japan wholesale prices began to fall in the first half of 1920.

In Norway the highest point in wholesale prices was reached in September, 1920, and up to February, 1921, the drop was about 25 per cent. The figures for retail food prices in Norway for January, 1921, showed a decline from those

for December, 1920, and retail fuel prices showed a decided drop during the same period.

In South Africa a fall in wholesale prices began in October, 1920. The index numbers of retail prices of 18 foods for 9 towns in South Africa reached their highest level in July, 1920, declined somewhat, and rose again to nearly the same point in October, the second drop then commencing.

In Switzerland monthly figures published by the Union of Swiss Co-operative Societies in the 23 large towns, and based on the average consumption of a working-class family, in food, lighting and heating materials, showed a decrease in February, 1921, of about 9 per cent from the prices of October, 1920. The fall in food items was in about the same proportion.

RECENT LEGAL DECISIONS AFFECTING LABOUR

THE two legal decisions summarized below have reference to cases of Workmen's Compensation in the province of Saskatchewan and Quebec.

A warehouse in connection with a retail business falls within scope of Saskatchewan Workmen's Compensation Act

A workman employed by a retail furniture dealer of Regina was injured when at work in a building, a part of which was rented by his employer for storage purposes. He brought an action for damages against his employer under the Workmen's Compensation Act of Saskatchewan. The accident was due to an elevator being out of repair, a circumstance of which the employee was ignorant. The trial judge found that the building where the accident occurred was not a warehouse in the meaning of the Act and did not apply in this case. He therefore dismissed the action with costs. The plaintiff appealed to the Court of Appeal. In the judgment of the Court the definition of a factory contained in the Act to which the Act applied was quoted. This included, among other places, warehouses where goods or materials are stored. The case of the respondent rested upon English decisions in which it was held that "warehouse" did not apply to a building used as a place for storing articles

pending their sale in a retail shop. It was pointed out by the Court, however, that the British Workmen's Compensation Act, 1897, enacts that "factory" shall have the same meaning as in The Factory and Workshop Acts 1871 to 1891, and in order to arrive at the meaning of "warehouse" the English Courts would quite properly consider the scope and object of the various Acts referred to. In Saskatchewan they were not confronted with any such question, and they were not required to interpret this Act in the light of other legislation. The Court could not see any reason for drawing any distinction under the Saskatchewan Act between a warehouse used in connection with a retail business and one used in connection with a wholesale business.

The appeal was allowed with costs and the case was referred back to the trial judge for assessment of compensation. (*Saskatchewan — Weisbrot vs. Reinhorn.*)

Under Quebec law an unguarded machine does not in itself make employer responsible for accidents

An employee in a tool factory suffered the loss of two fingers when working on a machine. He brought an action against the company employing him for \$5,482

damages on the grounds of negligence, claiming that the machine which injured him was unguarded contrary to the rules of prudence and that the employee who

put the machine in motion was intoxicated. The defendant company denied these allegations and further alleged that the accident was due to the plaintiff's own lack of care and skill, that it was an act of negligence on his part to place his hand where he did, and that he had voluntarily exposed himself to a danger he knew and understood and was alone responsible for the consequences.

The Superior Court at Montreal dismissed the action of the plaintiff on the grounds that he had failed to establish that the accident was due to any fault

or negligence on the part of the defendant company or its employees, the proof that in other similar factories the same apparatus is surrounded with a guard does not in itself constitute a fault such as to render the defendant responsible, and that even if the person employed to set the apparatus in movement was under the influence of liquor at the time of the accident there was no proof that his condition was the cause of the accident or that his condition was known to any one in authority. (*Quebec—Adams vs. The Modern Tool Manufacturing Company.*)

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.
DEPUTY MINISTER—F. A. ACLAND.

Volume 21

AUGUST, 1921

Number 8

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

This issue of the **LABOUR GAZETTE** contains articles on the general conciliation work of the Department of Labour, on the action taken by various countries with respect to the conventions and recommendations of the International Labour Conferences, and on the eighth meeting of the Governing Body of the International Labour Office, recently held at Stockholm. Among other articles in this issue that might be mentioned is one describing typical methods of wage payment, and one dealing with apprenticeship in the United States.

At the beginning of July unemployment among trade unions was 13.15 per cent of the total membership as compared with 15.46 per cent at the beginning of June, and 2.14 per cent at the beginning of July, 1920. Many of the unions reported also a large percentage of their members as working on short time. According to returns received from some 5,000 firms employment conditions during July showed moderate improvement, although a certain amount of fluctuation resulted from shut-downs and subsequent re-opening of railway shops. Employment for the month was strikingly less favourable than during the same period in 1920.

The cost of the weekly family budget of staple foods continued to decline, averaging \$10.98 at the beginning of

July as compared with \$11.16 for June; \$16.84 for July, 1920; and \$7.42 for July, 1914. The index number of wholesale prices for July fell to 238.6 as compared with 242.6 for June; 346.8 for July, 1920; and 134.6 for July, 1914.

The time loss due to industrial disputes during July was less than during either June, 1921, or July, 1920. There were in existence during the month 32 strikes involving 7,662 workpeople and resulting in an estimated time loss of 103,554 working days. At the end of the month there were on record 24 strikes involving about 3,743 workpeople.

Proceedings under the Industrial Disputes Investigation Act

During the month of July the Department received a report from the Board of Conciliation and Investigation appointed to deal with a dispute between the Association of Canadian Building and Construction Industries, Hamilton Branch, and men of various trades in the building industry in Hamilton and district, members of the Hamilton Building Trades Council.

Eight applications were received for the establishment of Boards and a chairman was appointed in connection with a Board which had been established during the preceding month.

Further crea- tion of Joint Industrial Councils

At a joint conference of the Building and Construction Industries convened on the invitation of the Dominion Government in accordance with a request received from the National Joint Conference Board of the Building and Construction Industries held in Ottawa, May 3-6, 1921, the Minister of Labour was requested to co-operate in the establishing of Local Joint Councils of the Building Industry throughout the country. Acting on this request, the Department of Labour despatched one of its officials to Western Canada to render whatever assistance was possible in this connection. The results obtained to date have been very gratifying, and at present Joint Committees of the Building and Construction Association, and the Trades Unions connected with the industry are drafting constitutions for Local Joint Industrial Councils in the following cities:— Vancouver, B.C., Calgary and Edmonton, Alta., Saskatoon and Moose Jaw, Sask. Preliminary meetings have also been held in Regina, Sask., and Winnipeg, Man.

It might also be interesting to note that a Joint Committee of employers and employees of the Printing Trades is drafting a Constitution for a similar organization for that industry in Edmonton, Alta., and in all probability another Council of the Printing Trades will be inaugurated in the near future in Regina, Sask.

Workmen's Compensation Acts and border industries

The Dominion-Provincial Commission on Uniformity of Labour Laws, which met at Ottawa in April, 1920, recommended among other things a uniform system for the administration of Workmen's Compensation for accidents, with a uniform scale of compensation and the extension of the scope of the Compensation Acts. This lack of uniformity is especially disadvantageous in the case of industries situated near the boundary of two provinces, whose laws differ in

these respects. For example, if a workman residing in the province of Quebec is injured while at work in Ontario, he or his dependant, in case of death, is only entitled to receive from the Ontario Workmen's Compensation Board the sum to which he would have been entitled if the accident had occurred in Quebec, where the scale of remuneration is lower than in the neighbouring province, although the employer pays to the Ontario Board the full quota covering all his employees. The Trades and Labour Council of Hull, Quebec, recently passed a resolution urging the Dominion Trades and Labour Congress to try to secure uniform workmen's compensation laws throughout the Dominion. The matter has also been taken up with the provincial authorities of Quebec by the firm of J. R. Booth, Limited, lumbermen and paper manufacturers of Ottawa, many of whose employees are thus discriminated against on account of their residing in Hull, in the Province of Quebec. It is understood that a new workmen's compensation law in Quebec is in contemplation, and it is stated that in the meantime the Quebec Government is taking steps with a view to securing the co-operation of the Ontario authorities in bringing about a more satisfactory arrangement.

Wage reduction endorsed by Works Council

The question of a reduction in wages was recently brought before the Works Council of the International Harvester Company at Hamilton, Ont. Five members of the Council selected from the employee representatives were appointed to investigate the books and records of the Company and every means was placed at their disposal to obtain all the facts and figures they desired. After the investigation they reported as follows: "We, the employee representatives, find that owing to the lack of orders on account of high cost of machines and large stock on hand, the company's proposed reduction of 20 per cent on day and piece rates, and 10 per cent on

salaries, seems necessary, and wish to go on record as regretfully accepting same in hope that the plant may be kept running. After carefully reviewing the reductions made so far, and the further reductions necessary to meet the objective asked for, and having tried in every way without success, to find some other way of accomplishing the result, we endorse the present method of reducing the day and piece work rates in force November, 1920, until a total reduction of 20 per cent is reached."

International Committee on Industrial Hygiene In accordance with a suggestion adopted at the First International Labour Conference at Washington, the Governing Body of the International Labour Office has taken steps to form an Advisory Committee of experts on questions of industrial hygiene. The governments of Belgium, France, Germany, Great Britain, Italy, Japan, Netherlands, Spain, Sweden and Switzerland have each been requested by it to nominate as a member of this Advisory Committee one of its health inspectors or factory inspectors. The members of the Committee in the various countries will keep in touch with the International Labour Office and its Industrial Hygiene section by correspondence; the Committee will meet when convened by the Governing Body, preferably on the occasion of the International Labour Conference. The Committee will regularly address reports on its work to the Governing Body.

British Trade Union Guild Council formed In the issues of the LABOUR GAZETTE for April and September, 1920, (pp. 424 and 1109) some account was given of the formation of a building trades guild at Manchester and elsewhere in England. At a meeting in Manchester on June 11 last, Mr. S. G. Hobson, who is said to be the originator of the scheme, stated that the building guild had already completed over £250,000 worth of work, and had in hand contracts to the value of

two million pounds. He claimed that the guilds had saved large sums to the community, and stated that no adverse criticism of the work which had been done had come from either the Government or the local authorities. At the same meeting, which was attended by 300 delegates of trade unions and representatives of 20 trades councils in the north-western counties of England, it was decided to form a Trade Union Guild Council with the object of promoting guilds, and of obtaining industrial control by means of guilds. Mr. Hobson pointed out that the guilds must remain a part of the labour movement, and resist the temptation to become a commercial organization. They would make no profits, and by the terms of their constitution they were not allowed to distribute any dividends. The Ministry of Health having recently insisted that the Building Guilds proceed by ordinary commercial contract, that is, by making lump sum tenders, it was declared that the Guild regards this rule as directly opposed to the principles of their organization.

Cost to the British Government of the coal dispute

It was officially stated in the British House of Commons on July 5, that the charges falling on the Exchequer as a result of the measures taken by the Government in connection with the coal stoppage so far as they could be estimated at present were approximately: Defence force, army reserve, etc., £7,000,000; Navy, £1,225,000; Air force, £330,000; Civil emergency organization, £300,000; Subsidy to the coal industry, £10,000,000. The increased amount payable under the state guarantee to the railways as a result of the dispute, was estimated as at least £10,000,000.

British railwaymen abandon claim to share in management

In the June issue of the LABOUR GAZETTE, on page 756, reference was made to the agreement between the British railway companies and the railwaymen's unions providing for the creation of joint

industrial councils. It was stated that the leaders of the men had withdrawn their demand for representation on the boards of directors of the railways in favour of joint councils of officers and elected employees. In a debate in the House of Commons on the second reading of the Railways Bill on May 26, the Minister of Transport said that as the railway undertakings were not ordinary industrial concerns but owed their monopoly to the government and had their prices fixed not by competition but by legislation, the government had approved the request of representatives of Labour that workmen should be included in the directorates. "Labour, however," he stated, "has deliberately surrendered the offer of the government included in this Bill for the inclusion of working men directors on the boards. The government think that they have made a mistake—that both the workmen and the companies have made a mistake—but they have settled this matter between themselves."

At a conference of the Labour party Mr. C. T. Cramp, Industrial Secretary of the National Union of Railwaymen, explained the position of the railway unions with regard to this question. He said that when the railway unions had made this demand for representation on the directorate they believed there would be national ownership of the railways and not a continuation of private ownership. The value of representation on boards of directors under private ownership they believed would be reduced almost to nil. They recognized that if they had one, two or three men elected by their fellows to take part on a board of directors where the great majority consisted of representatives of private railway companies, the railwaymen's representatives were not merely impotent in a helpless minority, but they were liable to be misjudged by those who elected them because they became parties to decisions which by no means represented their opinions or desires.

Agreement in New York clothing industry

An agreement, which was described by Mr. Sidney Hillman, the union president, as "the most constructive agreement ever entered into by the New York clothing market", was concluded on June 2 by the Amalgamated Clothing Workers of America and the clothing manufacturers' association, bringing to an end a strike of 24 weeks' duration in the men's clothing industry of New York. The chief points in the agreement are as follows:

(1) The principle of the union shop to prevail; (2) hours of work to be 44 per week; (3) standards of production in each shop group to be determined by representatives of the union and the employers; (4) wages to be determined by a joint committee of the union and the association; (5) the relations between the union, the association and the contractors to be worked out by a joint commission; (6) a general reduction of 15 per cent in wages except for cutters, to be agreed to; (7) administration of the new agreement to be vested in a board of arbitration composed of three members, namely, one union and one association representative, and an impartial chairman chosen jointly by the other two members.

Italian Government dockyards to be rented to workers

An agreement has recently been concluded between the Italian Government and the Amalgamated Union of Co-operative Societies of Workmen and the Metal Workers' Union whereby the State pledges itself to rent to these associations two government dockyards and three arms factories which the associations will adapt for the manufacture of agricultural machinery, railway material, etc. The joint programme of the associations, it is understood, is to stimulate the co-operative movement among the metal workers, and to improve the material and moral condition of all metal workers belonging to the Metal Workers'

Union. Production will be improved to the highest possible degree by study and development to render each society within the amalgamated co-operative association capable of producing the material required by the others. The highest wage rates paid by private concerns will be paid by the co-operative association to its members, and bonuses will be given for production. An annual division of the profits among the whole working staff is stated to be under consideration.

Jottings

Among the meetings and conventions of organized labour affecting trade unionists in Canada, which will take place during the month of September, are the following:

Canadian Federation of Labour, at Montreal, Que., September 12.

Dominion Railway Mail Clerks' Federation, at Ottawa, Ont.

Federated Association of Letter Carriers, at Montreal, Que., September 1-3.

United Mine Workers of America, at Indianapolis, Ind., September 20.

International Brotherhood of Electrical workers, at St. Louis, Mo., September 19.

Amalgamated Association of Street and Electric Railway Employees, at Atlanta, Ga., September 12.

United Textile Workers of America, at Knoxville, Tenn., September 12.

United Slate, Tile and Composition Roofers, Damp and Waterproof Workers' Association, at Chicago, Ill., September 12.

International Association of Fire Fighters, at Columbus, Ohio, September 12.

Metal Polishers' International Union, at Cincinnati, Ohio, September 19.

International Steel Plate Transferrers' Association, September 4.

Brotherhood of Painters, Decorators and Paperhangers of America, at Dallas, Texas, September 5.

United Association of Journeymen Plumbers and Steamfitters, at Providence, R.I., September 19.

The Department of Labour has commenced the publication of "Employment," a bi-weekly bulletin of the Employment Service of Canada, the first issue having appeared on August 1.

The Third Annual Meeting of the Employment Service Council of Canada will be held at Ottawa, August 31-September 2. The Ninth Annual Meeting of the International Association of Public Employment Services, formerly the American Association of Public Employment Offices, will be held at Buffalo, September 7-9.

During the month of September, the advisory committee under the Factories Act of Alberta will hold conferences on the minimum wage with representatives of employers and employees at Lethbridge, Medicine Hat, Calgary and Edmonton. Three employers and three employees will represent each division. Further information can be supplied by the secretary, Mrs. M. Lewis, Qu'Appelle Building, Edmonton.

The city of Calgary has adopted a system of group insurance for its employees which became effective on June 1. About 700 employees are covered in the sick benefit fund and the same number in the life policy. The city pays 40 per cent and the employees 60 per cent of the policy, 50 cents being deducted per month from the employees' salaries or wages. The provisions of the policy assure \$1,000 to an employee at death and provide for all sickness and quarantine with payment for 10 weeks or 60 days, 80 per cent of the present salary or wages being given. A maximum amount of \$100 is payable for each of the following: hospital fees, operations, and medical fees.

A meeting of the Commission on the Mothers' Allowances Act of Ontario was held at Toronto in July. One hundred and fifty cases were re-considered, and 50 new cases were taken up. It is stated that five or six new cases are investigated and added to the payroll every day, and there are at present over 2,000 mothers receiving allowances under the Act, and upwards of \$84,000 a month is being paid out. In some cases the allowance has been discontinued where the mothers proved to be immoral, cruel or improvident, as the allowance is considered a salary from the government to enable the mother to make good citizens of her children.

Regulations of the Workmen's Compensation Board of Manitoba approved by order-in-council and brought into force on July 20, require every employee with more than ten workmen to keep at his place of employment a First Aid kit, the quantity of materials in the kit to be graded according to the number of employees. Every employer must provide and maintain a First Aid room, if he has 100 or more workmen, or if he has 50 or more workmen five miles from a hospital. A minimum first aid kit must accompany the crew of every railroad train and vessel.

The province of Quebec has sent several young men to Sweden to study forest practice. An article by Mr. Edward Beck, in the *Pulp and Paper Magazine* states that education plays an important part in Swedish forestry. The Swedish government spares no expense in educating and training picked men for forest work in both its higher and its less important branches. A college of forestry has been in existence since 1828, providing a three year course in practical and theoretical forestry. The State also maintains eleven schools of lesser grade throughout the country, chiefly for the training of forest rangers, the course lasting one year.

The United States Congress has recently passed a bill limiting im-

migration of persons of each nationality to three per cent per year until June, 1922, of the number of foreign born persons of such nationality resident in the United States as determined by the census of 1910.

A labour bank is being organized at Philadelphia, Pa., with an authorized capital of 5,000,000 shares at a par value of \$20 each. It is stated that this bank is designed to form a trust to receive on deposit the savings of wage earners throughout the country, and "to keep labour's savings and the earnings of the savers in the hands of labour where it cannot be used against the workers who produced it." The creation of labour bank at Chicago by the Brotherhood of Locomotive Engineers, and elsewhere by other labour bodies has been noted in previous issues of the LABOUR GAZETTE.

A Mining Danger Research Board has recently been appointed in Great Britain to direct generally the work of the Mines Department into the causes of mining dangers, and to undertake the re-organization of the existing arrangements for carrying out such work at the Mines Department Experimental Station.

A new department has been organized at the India Office in London for dealing with labour and industry. It has two branches, a general division which will consider all labour and industrial questions in regard to India, and another division which will deal with such questions in regard to labour and industry which arise from the admission of India as a separate member of the League of Nations, including Indian immigration rights in the Dominions.

Germany has established a system for the compulsory training of women in general house work and in the work of children's nurses, dressmakers, waitresses, typists and secretaries. All women must pass through beginners' classes, and women up to 35 years of age who are in receipt of an unemployment allowance must attend one of the courses or forfeit the allowance.

INDUSTRIAL CONDITIONS DURING JULY, 1921

I.—General Review

During the month a continued moderate increase was noted in the volume of employment in Canada. At the end of the month, however, the situation was only on a par with that at the beginning of the year, indicating a fair amount of recovery from the low level in April, but still decidedly below that of the corresponding period in 1920. Ontario and Quebec reflected the uncertain movements in the iron and steel group due to shutdowns and reopenings in railway shops. These provinces showed upward movements in railway construction and maintenance, railway transportation and pulp and paper, but saw-mills and wood-working industries showed a tendency toward lessened activity. In the Maritime provinces there were no unusual movements, the tendency being favourable in the majority of industries. The western provinces experienced increased activity in railway construction and maintenance and in railway transportation. In British Columbia there was little change in the situation apart from an increase of activity in lumber mills. Compared with the base week in January, 1920, the majority of industries showed a much less favourable situation, those chiefly affected being building construction, rubber products and iron and steel products.

The industries which showed the greatest improvement over the previous month were railway transportation and railway construction. Manufacturing as a whole showed moderate gains. Meat-packing and dairying establishments in Manitoba and Ontario showed a larger volume of business. In the iron and steel industries there was some slackness in agricultural implements and heating appliances and in sheet-metal and tool-making plants. The leather industry in

Ontario and Quebec improved somewhat, more especially in boot and shoe manufacturing. The pulp and paper industry also expanded slightly; more especially in Quebec. There was little change in the rubber products industry. The textile industry also showed little change, although there was slightly less employment in garment and personal furnishings factories. Small expansions in hosiery, knit goods and headwear firms partially offset the latter. In logging the downward movement of the previous month was checked considerably, due largely to increased activity in British Columbia saw-mills. Mining in general made small advances; coal mining in Alberta experienced the largest increases. Ontario and the Prairie provinces featured a noticeable increase in railway transportation. Water transportation fluctuated between districts, with a tendency toward lessened activity at Upper St. Lawrence ports. Building construction on the whole showed very little increase in volume; the most noticeable advances were made in the Prairie provinces. Railway construction and maintenance was much more favourably situated than in the previous month. The increases in this line were absorbed mainly by Ontario, Quebec and the Prairie provinces.

The loss of time on account of industrial disputes during July was less than during either June, 1921, or July, 1920.

Strikes

There were in existence at some time or other during the month 32 strikes, involving about 7,662 work-people and resulting in an estimated time loss of 103,554 working days, as compared with 44 strikes, 8,083 work-people and 161,910 working days in June, 1921; and 59 strikes, 10,016 work-people and 137,841 working days in

July, 1920. On July 1, there were on record 27 strikes affecting 6,039 workpeople. Five strikes were reported as having commenced during July, as compared with 17 during June, 1921. Six of the strikes commencing prior to July and two of the strikes commencing during July were reported terminated, leaving 24 strikes, involving about 3,743 workpeople on record at the end of the month.

In prices the movement continued downward. The chief decreases in wholesale prices appeared in

Prices cattle and beef, fresh fish, sugar and molasses, and in metals. Marked recoveries occurred, however, in hay, hogs and hog products, cheese, butter and eggs, and in raw furs. In grains, wheat and oats were down while corn, barley, and flaxseed advanced slightly. In miscellaneous foods beans, oranges, canned vegetables, and bread stuffs were lower, but the rest of the group remained steady. In textiles, cottons were slightly higher

while silks showed a small decline. The departmental index number of wholesale prices stood at 238.6 for July as compared with 242.6 for June; 346.8 for July, 1920; 294.0 for July, 1919; and 134.6 for July, 1914.

In retail prices nearly all the items in the budget were slightly lower, the chief decreases being in beef, rib roast, lard, cheese, and sugar. Eggs advanced about 4.5c. per dozen with smaller increases in evaporated apples and prunes. A small decline occurred in fuel and lighting but rentals advanced somewhat on the average. The average cost of a weekly family budget covering 29 foods in sixty cities was \$10.98 at the beginning of July as compared with \$11.16 for June; \$16.84 for July, 1920; \$13.77 for July, 1919; and \$7.42 for July, 1914. The total family budget of foods, fuel and lighting, and rent in July amounted to \$21.55 as compared with \$21.74 in June; \$26.92 in July, 1920; \$22.02 in July, 1919; \$20.66 in July, 1918; and \$14.17 in July, 1914.

II.—Industries and Trades.

Logging

Logging in Quebec districts on the whole showed a continuance of the seasonal decline. Firms at Louisville, Hull and LaTuque showed considerable slackening, while other at River Desert and St. Jovite changed very little. At Three Rivers there was a local expansion in this industry. The situation was much the same in Ontario; at Fort Frances, Haileybury, Midland and Ottawa many employees were let out, but at Blind River, Brayside, Nesterville, and Pembroke there was practically no change. In British Columbia camps there was some improvement, more especially at Alert Bay. An exception was the camp at Headquarters. Timber of all species scaled in the Province in the month of June totalled 1,739,460 feet as compared

with 1,700,497 feet in May, Douglas fir predominating.

Mining

Coal mining on the whole made gains over previous months, Alberta fields being more favourably affected than others. Only minor increases in activity were displayed by British Columbia fields. The Maritime provinces made considerably larger additions to staffs than the Western provinces, but because of the general slackness in the demand for coal considerable short time is predicted for the mines at Glace Bay and Sydney. Metalliferous mining made small advances, chiefly in Ontario gold properties and British Columbia silver-lead-zinc fields. Quarrying was favourably affect-

ed in Ontario and New Brunswick to about the same extent in each case.

Manufacturing Industries

Sugar refining at Dartmouth and St. John experienced slightly greater activity during the month, partly due to the seasonal demand from fruit canneries. Chocolate making at Halifax and St. Stephen showed a less favourable situation. Meat packing firms in Hull and Montreal reported increases in staff. Biscuit and candy firms in Montreal varied, some showing better conditions, but others reporting fewer workers engaged. Sugar refining in Montreal was considerably more active and the same was true of flour and cereal mills. Dairying establishments in Ontario reported considerably better business, notably in Toronto, Ottawa and Peterborough districts. Meat packing plants in Toronto on the whole showed gains, with some minor exceptions. Candy, chocolate and biscuit manufacturing at Brantford and in some London and Toronto plants was slacker, but other firms in Toronto and London reported improved conditions. Sugar refining at Wallaceburg was considerably brisker; the plant at Kitchener remained closed. Flour and cereal mills at Keewatin, Peterborough and Port Colborne registered little change. Starch mills at Cardinal and Fort William added to their working forces. The usual seasonal increase in fruit and vegetable canning continued, activity being especially marked in the Leamington district. Meat packing plants in Calgary and Edmonton showed little change, but in Winnipeg and Elmwood staffs were increased. Dairying establishments in the Prairie provinces generally showed practically no change. Flour and grain establishments in Winnipeg varied but the general tendency was toward improvement. At Moose Jaw flour milling was favourably affected. Sugar refining at Vancouver reflected the seasonal demand from the canneries.

Iron and steel mills in the Maritime district showed slight improvement. At

IRON AND STEEL PRODUCTS.

New Glasgow there were substantial additions to staffs, and the same was true on a smaller scale at Sydney. Ship yards at Halifax also added to their working forces. The car plant at New Glasgow remained closed. Steel ship yards at Montreal and Three Rivers showed slackening, while at Sorel there was a slightly better situation than in the previous month. Rolling mills and foundries in Montreal and Longue Pointe on the whole showed moderate improvement. Plumbing supply firms in Montreal were somewhat more active, while shoe machinery firms and locomotive works laid off hands. Car manufacturing in Montreal experienced considerably more activity. Bridge works at Lachine improved somewhat, but sewing machine works at St. John's discharged some employees. The cartridge plant at Brownsburg and the arsenal at Quebec showed little change. Agricultural implement firms at Brantford, Hamilton, Peterborough, Smith's Falls and Toronto all showed a smaller volume of business than in the previous month. Automobile manufacturing at Chatham, Walkerville, Oshawa and Toronto was on a lower level also. Bridge works at Hamilton were more active but at Walkerville there was a moderate decline. Ship building at Kingston, Midland, and Toronto was less favourably situated than in June. Car manufacturing in Ottawa and metal roofing in Oshawa showed declines, while wire fence manufacturing at Hamilton and Leaside showed only minor changes. Bridge works in Winnipeg reported a very slight improvement. Iron works at Winnipeg exhibited but little change, while at Selkirk there was a marked increase in activity at the rolling mills. Ship building and repairing yards at Vancouver and Victoria all showed small decreases in the volume of business. Fluctuations in all provinces, but especially in Ontario and Quebec were caused

by the shutdown and subsequent re-opening of railway shops.

Shoe manufacturing firms in Montreal showed both increased and decreased

business, the balance being slightly favourable. LEATHER AND RUBBER PRODUCTS Trunk and bag leathers however showed a decline. At St. Hyacinthe

additions were made to staffs in shoe factories. In Quebec there were variations, but on the whole the situation was more favourable than in Montreal. Rubber firms at Granby reduced pay-rolls considerably. In Montreal there was a generally favourable situation in this industry with the exception of fountain pen manufacture. At St. Jerome large reductions in staffs of rubber factories occurred. Tire and rubber companies in Toronto, with a few exceptions, showed considerably lessened activity, and much the same situation was reported from Guelph. The factory at Port Dalhousie remained closed. At Merritton, Bowmanville and Kitchener there was not much change, although some slackness was observable. Boot and shoe firms in Toronto and London did not change much, but in Galt there was some expansion. Tanneries at London and Kitchener made slight additions to staffs.

At Plaster Rock, N.B., sawmills maintained and slightly increased the level of the previous month.

LUMBER In the province of Quebec there was little change in mills at Breakeyville, Port Etchemin, Montreal, Sayabec, Coaticook and Beauharnois. There

was some slackening in mills at Quebec, St. Pacomé, Sorel, Hull and Cowanville. Much the same situation prevailed in Ontario, those points reporting adverse conditions being Rockland and Fort Frances while there was no change at Arnprior, Byng Inlet, and Keewatin. Apart from sawmill activities, reports from furniture and wood working factories showed considerably less work

offered in this line at Stratford and Brantford. Newmarket furniture plants were running at about normal, while carriage factories at Orillia showed some improvement. In Manitoba, sawmills at The Pas were still working actively. At Golden, Chemainus and Vancouver additional mill hands were taken on but at Fraser Mills and Wardner, B.C., employees were let out.

In the Maritime district, pulp and paper mills at Chatham, St. John, and

Bathurst were rather busier, but at Liverpool PULP AND PAPER PRODUCTS and Murray there were minor declines in this industry. At LaTuque

and Quebec there was no change, but increased activity was observed at Hull. At Three Rivers, Shawinigan Falls, Windsor Mills, Donnacona, Cap Magdelaine, Chicoutimi, East Angus and Bagotville a number of employees were released. The situation was more favourable in Ontario, increased activity prevailing at Cornwall, Ottawa, Sault Ste. Marie, Espanola, Thorold and Smooth Rock Falls, Sturgeon Falls and Hawkesbury.

Cotton mills at Marysville and Milltown, N.B., and at Yarmouth, N.S., were running slightly below the level of the previous month. Garment and personal furnishing plants

in Montreal, Quebec, Sherbrooke, St. Hyacinthe and St. John's on the whole showed little change, although many firms reported reductions in staff. Cotton mills in Montreal and Three Rivers were operating on a slightly less favourable basis, while at Valleyfield, Montmorency Falls and Magog there was practically no change. Carpet factories in Toronto and Guelph showed slightly increased staffs. Garment and personal furnishing plants in Toronto and Hamilton were in much the same condition as in Montreal. Knitting mills at Toronto, Hamilton, Woodstock, Almonte, Dunville and Peterborough on the whole

showed some improvement. Cotton mills in Hamilton, Welland and Cornwall were more favourably situated than in June and the same was true of cordage manufacturing in Welland. In Edmonton, garment manufacturing showed a fair increase.

Broom and brush making at St. John declined during the month, the same being true of brass, MISCELLANE- bronze and copper prod-
OUS MANU- ducts. Light, heat and
FACTURING. power production in

Montreal maintained about the same level. Breweries in this city expanded their operations slightly, while tobacco manufacturing experienced a fairly substantial increase. Light, heat and power production at Quebec changed very little. Jewellery manufacturing in Montreal and Sherbrooke registered a decline. Aluminum manufacturing at Shawinigan Falls and can manufacturing at Maisonneuve were brisker. The nickel plant at Deschenes continued to operate at much below normal. Power production at Hamilton increased slightly. Electrical appliance factories at Hamilton, Stratford and Toronto on the whole showed considerable losses in working force. Soap making at Toronto increased in extent of operations but musical instrument manufacturing experienced a decline. Nickel plants at Copper Cliff and Port Colborne varied but little; aluminum manufacturing in Toronto increased slightly. Copper and brass products in Toronto were favourably affected, while in silverware there was not much change. Light, heat and power production in Winnipeg experienced no change. In Vancouver this industry slightly increased.

Construction

Canadian Pacific, Grand Trunk and Canadian National Railways reported an increase in the volume of employment afforded on railway construction, including maintenance of way, during the

month of July. There was a net gain of about 3,400 persons reported by these companies at the end of this month as compared with the payrolls at the end of June. The largest increase was reported by the Canadian National Railways, amounting to approximately 2,000 persons. Some 1,200 workers were added to the staff of the Grand Trunk. The value of building permits in 56 cities during June amounted to \$12,930,499 as compared with \$13,233,543 in May, representing a decrease of a little more than two per cent. The building construction industry on the whole showed only moderate increases, principally in the Prairie provinces. There was a contraction in this industry in the Maritime provinces, but British Columbia employed a larger number of workers. An analysis of reports from large contracting firms in the more important centres shows rather better conditions in St. John, but less activity at Halifax. Montreal firms varied, but the balance was slightly favourable. This industry was comparatively active at Sherbrooke. In Toronto there was on the whole a tendency to increase staffs, but in Hamilton conditions were not so good. There was not much change at Windsor and Ottawa, while at London there was some slackness. At Kitchener, Kingston and Fort William this industry was at a low level. Winnipeg firms added somewhat to staffs, and the same was true in a general way of the Prairie district. At Vancouver and British Columbia points there were upward movements on a smaller scale.

Transportation

The gross earnings of the Canadian Pacific Railway in June were \$14,461,642 as compared with \$16,480,574 in the same month last year. The gross earnings of the Canadian National Railways in July were \$8,857,354 as compared with \$9,003,674 in July, 1920. During July the number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways in operation,

including general offices, trainmen and engine crews, station employees, sleeping, parlour and dining car employees, showed a gain of about 2,000 persons over the payrolls reported to the end of June. This increase was nearly all accounted for by additional Canadian National employees, there being just under 1,600 workers added to the payrolls of this company. A gain of about 450 was reported by the Canadian Pacific. Electric railway transportation in June varied but little. The volume of water

transportation was irregular, but on the whole there was less activity at Upper St. Lawrence and Great Lake ports, partially offset by moderate increases at Pacific and Atlantic Coast points.

Trade

Retail trade as reflected in the payrolls of large departmental stores recorded a small downward movement, principally in Ontario. Wholesale business changed very little, but in some districts made small advances.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

PROCEEDINGS FOR THE MONTH OF JULY, 1921, WITH TEXT OF BOARD'S REPORT

DURING the month of July the Department received a report from the Board established to deal with a dispute between the Association of Canadian Building and Construction Industries, Hamilton Branch, and men of various trades in the building industry in Hamilton and district, members of the Hamilton Building Trades Council.

Eight applications were received for the establishment of Boards and a chairman was appointed in connection with a Board which had been established during the preceding month.

Applications Received

During the month of July applications for the establishment of Boards were received as follows:—

(1) From the Association of Canadian Building and Construction industries, Hamilton Branch, concerning a dispute with men of various trades in the building industry in Hamilton and district, members of the Hamilton Building Trades Council. The personnel of the Board and the text of the Board's report appear in the present article.

(2) From the Canadian Fish and Cold Storage Company, Prince Rupert, B.C., concerning a dispute with certain of their employees, being members of the Fish Packers' Union. The application for a Board was subsequently concurred in by the employees, which brought the dispute within the scope of the statute. A Board was established composed as follows: Major J. H. McMullan, Prince Rupert, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Colonel S. P. McMordie and Mr. George Casey, Prince Rupert, nominees of the employer and employees respectively.

(3) From the employees of the Corporation of the City of Hull, being firemen, members of Local 174, International Association of Fire Fighters. Enclosed with the application was a resolution passed by the Hull City Council concurring in the application, which brought the dispute within the scope of the statute. A Board was established composed as follows: Mr. Stanfield Larose, Hull, chairman, appointed on the joint recommendation of the other two members, Messrs. Moise J. Laverdure

and Eugene Reinhardt, Hull, nominees of the corporation and the employees respectively.

(4) From the employees of Mr. F. W. Nicholas, of Port McNicoll, Ontario, employed in the freight sheds at Port McNicoll, members of Lodge No. 1506, International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

(5) From the employees of the Canadian Pacific Railway Company, being members of the Brotherhood of Railway Clerks, Freight Handlers, Express and Station Employees.

(6) From the employees of the Canadian National Transfer Company, being teamsters and chauffeurs, members of Local 124, Canadian Brotherhood of Railroad Employees.

(7) From the employees of the Canadian National Railways, being clerks, freight handlers, roundhouse, shop and station employees, parlor, sleeping and dining car employees, etc., members of

the Canadian Brotherhood of Railroad Employees.

(8) From the employees of the Montreal Tramways Company, being members of Division 790, Amalgamated Association of Street and Electric Railway Employees of America.

The five last named applications were under consideration by the Minister at the close of the month.

Other Proceedings under the Act

During July, Mr. U. E. Gillen, Toronto, was appointed chairman of the Board established to deal with the dispute between the Toronto Suburban Railway Company and certain of its employees, being linemen, operators, wiremen, etc., members of the Canadian Electrical Trades Union, Toronto Branch. The appointment was made by the Minister in the absence of a recommendation from the other two members, Messrs. George D. Kelley, Ottawa, and H. E. Manning, Toronto.

Report of Board in Dispute between the Association of Canadian Building and Construction Industries, Hamilton, and workers in various building trades

A report was received from the Board established to deal with the dispute between the Association of Canadian Building and Construction Industries and men of various trades in the building industry in Hamilton and district, members of the Hamilton Building Trades Council. In this instance an application was received from both parties concerned which brought the dispute within the scope of the statute. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, appointed on the joint recommendation of the other two members, Messrs. Joseph M. Pigott and H. J. Halford, Hamilton, nominees of the employers and employees respectively. The report was signed by the chairman and Mr. Pigott

and recommended certain reductions in wages. Mr. Halford did not concur in these findings and presented a minority report.

Report of Board.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The Association of Canadian Building and Construction Industries (employer), and men of all trades in the building industry in Hamilton and district, members of Hamilton Building Trades Council and Bricklayers' International Union (employees), the dispute being referred to a Board of Conciliation and Investigation by mutual consent under Clause 63.

The Honourable Senator G. D. Robertson, Minister of Labour, Ottawa, Ont.—

Sir:—

The Board of Conciliation appointed in this dispute, composed of Colin G. Snider, chairman, J. M. Pigott and H. J. Halford, met at the Court House, in Hamilton, on Tuesday, the 12th day of July, 1921, pursuant to appointment. Each member of the Board filed his oath of office, duly sworn.

The employers notified the Board that W. H. Yates, J. E. Riddell and J. W. Frid were to attend the meeting as their representatives; the employees named Joseph Lepley, A. Dickenson and H. A. Longfellow as their representatives.

At the opening of the meeting, it was objected, on behalf of the employees, to the inclusion of the bricklayers and the masons as parties to these proceedings, and, acting upon the instructions received by the Chairman, this objection was sustained. The employers were at first disposed to refuse to proceed with the arbitration with the other trades if the bricklayers and masons were not included, but, after consultation among themselves, they finally decided to withdraw their objection and to proceed without the bricklayers and masons.

Later in the proceedings, when the wages of the lathers was taken up, the representatives of the employees being lathers objected to having their rate of pay determined by this Board, on the ground that they were all employed and had no dispute with their employers as to wages. After consideration, the representatives of the employers agreed that the lathers' case should be withdrawn also.

The Board then proceeded to take such evidence as was presented by the employers and those of the employees who are Carpenters, Painters, Sheet Metal Workers, Plasterers, Steam and Operating Engineers, Electrical Workers, Hod Carriers and Builders' Labourers. It was agreed by and between the

representatives of the employers and the representatives of the employees that the finding of this Board, as to wages, shall be accepted by both parties to the dispute.

The Board continued in session on the 12th, 13th, 14th, 15th, 18th, and 19th days of July, but was unable to secure an agreement between the parties on the question submitted to the Board, which was confined to the rate of wages for the different trades, parties to the proceedings.

After hearing all the evidence and argument that the parties had to submit and after consultation and discussion between the members of the Board themselves, in an endeavour to arrive at a unanimous conclusion, it was found that this desirable result could not be obtained. Colin G. Snider, Chairman, and J. M. Pigott, nominee of the employers, agree in submitting the Majority Report, in which H. J. Halford is unable to concur.

The evidence shows that there is a large quantity of building in contemplation in this city that is being deferred owing to the high cost of construction. In the opinion of the majority of the Board, it is very necessary, under existing conditions, that the opportunity of employment should now be increased as much as possible; therefore, the majority of the Board, with this object in view, recommends for the remainder of this building season, as the minimum union rate of wages in the trades and craft before the Board, the following union scale:—

Carpenters	75c per hour
Sheet Metal Workers.....	80c per hour
Plasterers	90c per hour
Steam and Operating Engineers.	75c per hour
Electrical Workers	75c per hour
Painters	62c per hour
Hod Carriers and Builders' Labourers	50c per hour

These trades have been receiving as follows:—

Carpenters	85c per hour
Sheet Metal Workers.....	90c per hour

Plasterers	\$1.00 per hour
Steam and Operating Engineers.	85c per hour
Electrical Workers	85c per hour
Painters	67½c per hour
Hod Carriers and Builders' Labourers	55c per hour

and the recommendation which we make is a reduction of 10c per hour in the wages of all those who have been receiving 85c and up per hour.

The scale of wages which we recommend is to take effect from the day of the date of this Report and continue in force for the balance of the year 1921, or such longer term as may be provided in any agreement or agreements entered into between any employer and his employees.

All of which we have the honour to respectfully submit.

Dated at Hamilton this 19th day of July, 1921.

(Sgd) COLIN G. SNIDER,
Chairman of Board.

(Sgd) JOSEPH M. PIGOTT,
Appointee of the Employers.

Minority Report.

In the matter of the dispute between the Building Trades Council and the

Construction Contractors of the City of Hamilton, Ont.

Senator G. D. Robertson,
Minister of Labour,
Ottawa, Ont.

Sir,—

As one of the members of the Board of Conciliation appointed to deal with the above dispute, I beg to submit as a minority report the following:

That in my opinion the evidence submitted did not warrant the reduction in wages such as was recommended by the majority report. The evidence submitted by the employees very plainly set forth that their yearly earnings were not more than enough to enable them to live within the budget as set by the Department of Labour; also that the overhead expenses of some of the firms of employers were ridiculously high, and that, if the cost of construction is to be reduced and conditions stabilized, it is high time that the employers should reduce their overhead expenses and share in the reduction to the same extent as the employees.

(Sgd) H. J. HALFORD,
Appointee of the Employees.

Hamilton, Ont., July 21, 1921.

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1921

FIVE strikes, involving 1,623 employees were reported as having commenced during July. There were in existence at some time or other during the month 32 strikes, involving approximately 7,662 employees. The total time loss on account of industrial disputes was estimated at 103,554 working days, as compared with 161,910 working days in June, 1921, and 137,841 in July, 1920. The time loss occasioned by the five strikes which began in July was 17,897 working days, while a loss of 85,657 working days is charged to the 27 strikes that commenced prior to

July. Six strikes which commenced prior to July were reported to have terminated. Two strikes commencing during July terminated during the month, leaving the following 24 strikes, involving 3,743 workpeople on record on July 31: coal miners, South Minto; carpenters, Welland; painters, Sault Ste. Marie; stonecutters, Toronto; employees of steel and coal companies, Sydney; gauge men, Sydney; machinists, Orillia; sheet metal workers, Saskatoon; compositors, Montreal; compositors, etc., Vancouver; photo engravers, Montreal; photo en-

cigarmakers, Vancouver; shoeworkers, Galt; shoeworkers, Toronto; street railway employees, St. John; scowmen and lumber handlers, St. John, and long-shoremen, St. John.

Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—Two strikes, affecting 1,006 work people and causing a time loss of 2,512 working days, occurred at New Waterford, N. S., during July. The pit drivers objected to an hour being taken from their time because of having stopped work earlier than they should have and also, because of their refusal to take their horses to the stables. The first strike occurred on July 7, and was in existence for three days. A few days later another strike occurred for practically the same reason. Negotiations were carried on and the men resumed work after being idle two days.

BUILDING AND CONSTRUCTION.—Seven strikes in this group were carried over from the previous month's record, involving 900 workpeople and resulting in a time loss of 13,992 working days. The strikes of the building trades at Hamilton and Ottawa were terminated during the month. In the case of the Hamilton strike, settlement was brought about by the award of a Board of Conciliation appointed under the Industrial Disputes Investigation Act. The Board recommended a cut in wages of from five to ten cents an hour. The award was accepted by the men and work was resumed on July 18. Plasterers at Winnipeg, who struck against a reduction of 7½ cents per hour in their wages, returned to work after accepting a cut of 5 cents per hour. The plumbers at Moose Jaw, Regina and Saskatoon also returned to work at reduced wages. At the close of the month the following strikes in the

building and construction group remained unterminated: carpenters at Welland, painters at Sault Ste. Marie, and stonecutters at Toronto.

METALS, MACHINERY AND CONVEYANCES.—Four strikes affecting 193 workpeople and resulting in a time loss of 4,825 working days were carried over from the previous month, and remained unterminated at the end of the month.

PULP AND PAPER.—During July operations were resumed in the pulp and paper mills at Cap Magdeleine and Sault Ste. Marie, Espanola and Sturgeon Falls. As a result of negotiations between the International union and representatives of the various companies, work was resumed in most cases on terms which prevailed prior to the strike, pending the final settlement of a Joint Arbitration Board.

PRINTING AND PUBLISHING.—This group indicated greater activity during the month than any other group. Ten strikes were in effect involving 2,355 employees, with an estimated time loss of 58,875 working days. Two new strikes—printers at Winnipeg and Montreal—occurred during the month affecting approximately 607 workpeople. Printers at Montreal were demanding increased wages and the 44-hour week, while the same trades in Winnipeg claimed to be locked out when they demanded a renewal of their agreement. Both strikes remained unterminated at the end of July.

LEATHER.—Two strikes, affecting 30 employees and resulting in a time loss of 710 working days, were in existence during the month. Shoeworkers at Galt stopped work during the first week in July in protest against a reduction in

wages. The strike of shoeworkers in Toronto was carried from the previous month's record.

TRANSPORTATION.—The strike of street railway employees at St. John which

went into effect during June remained untermiated. Seowmen and lumber handlers and longshoremen at the same place also remained on strike at the close of July.

STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING JUNE, 1921

THE following details with regard to strikes and lockouts in the United Kingdom during June, 1921, based on returns from employers and workpeople, are taken from the July issue of the *British Labour Gazette*.

NUMBER, MAGNITUDE AND DURATION.—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in June, was 29, as compared with 65 in the previous month, and 183 in June, 1920. By far the most important of these new disputes was that involving about 375,000 workpeople in the cotton industry. In the 28 other disputes which began in June, about 38,000 workpeople were involved either directly or indirectly (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes).

The dispute in the coal mining industry, which began on April 1, 1921, continued throughout the month, and, in addition, about 22,000 workpeople were involved, either directly or indirectly, in 61 other disputes which began before June and were still in progress at the beginning of that month. The total number of new and old disputes in progress in June was thus 91, involving about 1,535,000 workpeople, and resulting in a loss during June of nearly 30,000,000 working days.

CAUSES.—Of the 29 new disputes, 16 directly involving nearly 407,000 workpeople, arose out of proposed reductions in wages; 6, directly involving about 500 workpeople, on other wages questions; 3, directly involving about 4,500 workpeople, on questions of trade union prin-

ciple; and 4, directly involving about 1,000 workpeople, on other questions.

RESULTS. — Apart from the cotton trade dispute, which resulted in a compromise, settlements were effected during June in the case of 11 new disputes, directly involving about 30,000 workpeople, and 26 old disputes, directly involving about 24,000 workpeople. Of these disputes, 8, directly involving over 4,000 workpeople, were settled in favour of the workpeople; 13, directly involving nearly 18,000 workpeople, in favour of the employers; and 16, directly involving about 32,000 workpeople, were compromised. In the case of 4 disputes directly involving about 500 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in progress in June	Aggregate duration in working days of all disputes in progress in June
	Started before June	Started in June	Total		
Building.....	13	3	16	6,000	37,000
Mining and Quarrying.....	10	..	10	1,102,000	22,559,000
Metal, Engineering and Shipbuilding.....	12	13	25	35,000	130,000
Textile.....	4	3	7	377,000	772,000
Transport.....	4	..	4	10,000	30,000
Other Trades.....	19	10	29	5,000	75,000
Total, June, 1921...	62	29	91	1,535,000	29,603,000
Total, May, 1921...	60	65	125	1,152,000	23,155,000
Total, June, 1920...	95	183	278	128,000	1,222,000

ACTION TOWARDS ALLEVIATION OF THE UNEMPLOYMENT SITUATION

WITH a view to securing combined action and co-operation in an effort to minimize the present unemployment situation, which threatens to become more acute as the winter season approaches, the Minister of Labour recently addressed a memorandum to the various provincial governments outlining the present situation and the grave outlook for the future, and the necessity for planning in advance by each province if the unemployed situation next winter is to be properly taken care of.

The memorandum of the Minister of Labour to the provincial governments was as follows:

The anticipated revival of trade and industry has not been realized to the extent hoped for. Communications are being received from some Provincial authorities, from organizations of various sorts, as well as from individuals, expressing the view that the unemployment problem may become serious next winter and urging that attention be given to it in advance. One Province intimates its intention of calling a conference in which Provincial officials, representatives of employers and employed, returned soldiers, municipal officials, and others should participate.

The Federal Department of Labour has kept itself closely informed, carefully noting the fluctuations in the supply of and the demand for labour. Successful efforts have been made through the Federal Provincial Employment service in distributing unemployed labour, especially in aiding unemployed urban residents to find work in rural districts, which has temporarily relieved the situation in some centres. When seasonal employment ends there will probably be a substantial addition to the present number of unemployed workmen, of whom there are now many more than is usual at this season.

Conditions vary in different provinces, even in different communities within the same province. Unemployment and measures necessary to cope with it has, until last winter, always been regarded as a matter of purely local concern, the municipalities affected each taking such action as seemed necessary. Because of its general character and the rapidity with which it swept down upon the country in 1920, Provincial Governments aided as need required and the Federal Government adopted

a general aid policy which materially and promptly assisted municipalities in rendering necessary relief.

Generally speaking, employers and employed have, especially during the past three years, shown a spirit of co-operation instead of combativeness. During periods of deflation and world-wide business depression, such as now exists, it is obviously more difficult to maintain that spirit of confidence and appreciation of each others' rights and difficulties than is the case during periods of industrial prosperity. Unemployment, or the fear of unemployment and need on the part of both the workman and his dependents, tends to make him dissatisfied. The continued deflation in selling prices—rendering imperative a decrease in production costs—causes employers to urge wage reductions, which the workman is naturally inclined to resist. The buying public is on strike awaiting lower prices, thereby substantially contributing to unemployment. These emergency conditions but emphasize the necessity for giving attention in advance to ways and means to best meet a repetition of last winter's difficulties.

A general conference, representative of all interests from each province, would be both expensive and cumbersome. It would necessarily be more expensive to some provinces than others, according to distance from meeting place.

For the foregoing reasons it is respectfully suggested that the better plan would be to make a survey and investigation, by conference or otherwise, Provincially, after which the Federal Government would be glad to discuss the whole matter in conference with the Provincial Governments, with a view to determining the best possible means of fairly meeting any emergency which may occur.

The views of the Government of your Province on the subject would be appreciated.

The replies received from the provincial governments indicate that in practically all the provinces investigations in one form or another are being instituted by provincial officials in co-operation with the employing interests and labour and returned soldiers' organizations.

On July 20, the Ontario government met in conference the representatives of employers and workers in many groups of industries, after which it was an-

nounced that the government would appoint a committee on unemployment of seven members on the nomination of the following groups: returned soldiers, farmers, the building industry, the mercantile interests, the manufacturers, the retailers, and labour. The committee, which will be an investigating and advisory body, will endeavour to map out a programme to meet the situation, but it will not have administrative powers. It is stated that Labour representatives at the conference had declared that Labour was prepared to help to bring about a trade revival by accepting lower wages as the cost of living came down, provided that the present standard of living was not reduced.

A conference called by Premier Stewart of Alberta met at Edmonton on July 20. There were present some thirty representatives of municipal, industrial and returned soldier organizations, including Mr. F. E. Harrison, fair wage officer of the Federal Department of Labour. Premier Stewart put before the conference a definite plan for a system of winter relief employment to be arranged between the provincial and federal governments and the municipalities; all such employment to be furnished, controlled, and paid for by the government, and to be confined strictly to rough labour so as not to interfere with the trades. The scheme provided that a lower rate of wages should be paid, not with a view to cutting wages generally, but for the relief of unemployment only. The Labour representatives present made no definite statement with respect to the proposal, but stated that Labour had always been willing to concede to special relief measures provided that any re-

duction in wages did not result in any private gain.

The following recommendations and form of questionnaire, which were drafted by a committee of the conference, were adopted by the conference:

1. That this committee recommend to this conference on unemployment that the Government Employment Service be requested to secure as much of the labour required for harvest in Alberta from the unemployed in the Province of Alberta and and that any further labour required be secured as far as possible from other Western Provinces instead of from Eastern Canada.

2. That we recommend that the Government be requested to furnish the necessary funds that will permit Government Employment Bureaus to advance transportation and furnish blankets when required, to workmen, so that they will be able to take up jobs; arrangements for repayments to be made through employer.

3. Recommend that the Provincial Government be requested to have Canadian citizens employed as far as practicable, on the contract work on irrigation work in Southern Alberta, and that the Federal Government be requested to rigidly enforce the Alien Labour Act as it applies to this country.

4. Recommend that on relief work operated by either Provincial or Federal Governments that the standard rate of wages for that particular class of work in that locality be paid.

5. That this conference recommend to the Government that an appropriation be made for the organization of the Province in the securing of all data affecting the present labour situation, the number of men out of employment, the number of expected destitute cases within each district, and that an Advisory Committee of ten be appointed to receive and act upon the reports of the several representatives and that a full report from this Advisory Committee be placed before the incoming Government with their recommendations within one month from date.

6. That this committee recommend to the Conference that the broader question of unemployment should be postponed until after the data dealing with the immediate situation have been collected, after which a further meeting of this conference be called, not later than September 1st, to consider permanent provisions for dealing with unemployment and that the conference then in-

clude representation from other classes interested in the project.

Advisory committee appointed as per Res. 5. W. Smitten, Labour; R. Gallacher, G. W. V. A.; H. A. Greenfield, U. F. A.; Mrs. Waagen, Red Cross; The Mayors of Calgary, Edmonton, Lethbridge, Medicine Hat, Red Deer, and Wetaskiwin.

Suggested Questionnaire; subject to change to suit organization:

- 1.—A. Organization.
B. District.
C. Address.
- 2.—How many of your members are unemployed at the present time?
- 3.—How many of your members will be unemployed during the winter months, approximately?
- 4.—A. Do you anticipate any distress in your community during the coming winter?
B. How many cases?
C. Of what nature?
- 5.—Have you any organization and local means of relieving cases of distress?
- 6.—A. Is there any public or necessary work which can be undertaken in your district?
B. What authority should carry out that programme?
- 7.—Have you any public institutions in your district which have made any effort to prosecute relief work?

The Quebec Department of Labour, as a preliminary measure, has issued a special questionnaire to the superintendents of employment offices and to individuals in the province who are in a position to give particulars as to working conditions, the actual situation at the present time, and the prospects for next winter. When this information has been received the Department hopes to be in a position to make concrete suggestions.

In British Columbia the government has invited some fifty leading employers of labour, financial men, mayors and reeves to meet the government in conference on August 10 to develop plans to meet the situation.

CONFERENCE AT TORONTO OF THE BUILDING INDUSTRY.

On July 15, at Toronto, a conference on unemployment in the building industry took place under the chairmanship of the Honourable G. D. Robertson, Minister of Labour, between members of the Canadian Manufacturers' Association, the Toronto Building Trades Council, the Builders' Exchange, and representatives of the brick manufacturers. At this conference the following resolution respecting a reduction in wages, moved by Mr. J. B. Carswell, for the employers, and seconded by Mr. T. A. Woods, representing labour, and concurred in by the nineteen labour representatives present was carried unanimously:

Moved that inasmuch as figures have been presented to this meeting to show that material costs are rapidly declining, that costs of living are also rapidly declining, and that a reduction in wage rates as suggested below can be put into effect without in any way lowering the present standard of living:

Therefore be it resolved that the 19 representatives from the Building Trades Unions take back to their respective unions the suggestion that voluntary reduction of ten cents per hour be put into effect on July 25th.

Further that another meeting be held between these 19 representatives and the Builders Exchange on Thursday morning, the 25th inst., at 10.30 o'clock in the Builders' Exchange rooms to conclude the agreement.

That the building material manufacturers be present at the same meeting to bring in all and every suggestion possible to further reduce material costs.

At the meeting held on July 25, the labour representatives announced that trades unionists affiliated with the nineteen branches of the building trades had voted against the proposed reduction of ten per cent in wages on the ground that the cost of living had not come down in the same proportion in Toronto as in the country as a whole, and further that rents were still going up.

EMERGENCY RELIEF FOR UNEMPLOYED IN CANADA

THE May issue of the LABOUR GAZETTE contained an outline of the policy of the Federal Government with respect to the distribution of emergency relief for the unemployed in Canada. It will be remembered that on December 14 last the government announced its intention to provide one-third of the amount of relief payments that might be made by any municipality, the other two-thirds being paid either by the municipality affected or by the municipality and the province jointly. For this purpose the government voted \$500,000 during the last fiscal year, while during the present fiscal year other sums of money amounting to \$300,000 have already been authorized.

The following statement shows the total payments made by the federal government for amounts expended by municipalities from the date of the announcement of the policy to March 31, 1921, the end of the last fiscal year; also those payments that have already been made in the present fiscal year.

CONCILIATION WORK OF THE DEPARTMENT OF LABOUR

THE conciliation work of the Department of Labour, accomplished through the instrumentality of Boards of Conciliation and Investigation established under the authority of the Industrial Disputes Investigation Act, 1907, is fairly generally known, due to the fact that the proceedings and recommendations of these boards are recorded regularly in the LABOUR GAZETTE, and also receive considerable notice in the public press. The efforts of the Department in

the interest of industrial peace are, however, by no means limited to the proceedings of Boards under the Industrial Disputes Investigation Act.

Statistics compiled for the annual report of the Department of Labour for the fiscal year ending March 31, 1921, contain references to 77 of the more important cases in connection with which conciliation work, apart from the Industrial Disputes Investigation Act, was performed during the year. These dis-

putes involved a great many different labour questions and covered a very wide range of industries, including coal mining in both eastern and western Canada; ship building; the iron and steel industry; steam and street railway service and miscellaneous transport; building and construction operations; the manufacture of pulp and paper, cotton and woollen textiles, clothing, leather goods, etc.; bread and milk supply; meat packing, etc. In all cases the intervention of the Department was undertaken on the request of one or both of the parties involved in the dispute, or else at the instance of the local public authorities. In a number of instances the Minister of Labour was personally requested to intervene before a strike was declared; in other cases the services of officers of the Department stationed at Ottawa, Montreal, Toronto, Winnipeg, Calgary and Vancouver were utilized in this work.

Special efforts were also made by the Department of Labour during the past fiscal year to assist in the maintenance of industrial peace in the coal fields of Alberta and British Columbia. Apart from the 77 important disputes above mentioned, in connection with which the good offices of the Department were sought, an official of the Department of Labour, stationed at Calgary, known as the Director of Coal Operations, dealt during the year with forty individual disputes in the coal fields of Alberta and western

British Columbia, and assisted also in the negotiation of new agreements between the Western Coal Operators' Association, which is a representative of the coal mining interests of Alberta and western British Columbia, and District 18 of the United Mine Workers of America, on behalf of the employees.

In the fall of 1918, a royal commission was appointed to investigate and deal with wage matters connected with the coal mining industry on Vancouver Island. The commission was composed of three members, the resident fair wages officer in Vancouver, of the Department of Labour, being the chairman. The arrangement made in connection with this matter was that wages adjustments should be made every three months, based on an inquiry into any changes occurring in the cost of living, the inquiry to be conducted by the royal commission. Successive awards have since been made every three months by the commission, and the arrangement is still in effect.

Work accomplished under I. D. I. Act

The following table from the forthcoming annual report of the Department for the fiscal year ending March 31, 1921, gives the number of applications received for boards of conciliation and the number of boards granted during each of the fiscal years since the passage of the Industrial Disputes Investigation Act on March 22, 1907:

NUMBER OF DISPUTES DEALT WITH UNDER THE I. D. I. ACT DURING THE FISCAL YEARS, 1907-1921.

	1907-1908	1908-1909	1909-1910	1910-1911	1911-1912	1912-1913	1913-1914	1914-1915	1915-1916	1916-1917	1917-1918	1918-1919	1919-1920	1920-1921	Total
Number of applications....	34	21	27	24	18	21	16	16	11	36	52	95	72	63	509
Number of boards granted..	31	19	25	19	15	17	15	17	11	23	38	60	46	38	371
Number of disputes where strike not averted (or ended).....	1	1	4	4	4	4	0	1	1	1	1	2	3	5	32

It will be observed from the above table that boards were not established in the case of 138 applications, adjust-

ments having been effected in some of these instances through the agency of the Department without the aid of a

board, while in other cases the disputes did not clearly come within the province of the Act. Of the 371 cases in which boards were granted, only 32, or 9 per cent, resulted in strikes or in the continuation of strikes that had previously been started. Of the 339 cases where settlements either by expressed or tacit understanding were arrived at, it is reasonably certain that a large proportion of these would have resulted in strikes involving large numbers of workers or in other serious disturbances if conciliation proceedings under the Act had not taken place.

Conciliation Work apart from the I. D. I. Act

As has already been stated, there are many instances in connection with industrial disputes where, though a strike appeared imminent, a settlement has been effected through the mediation of the Department without having recourse to a Conciliation Board under the Industrial Disputes Investigation Act.

The recent case of the Cornwall Street Railway dispute might be cited as a typical example of settlement through direct negotiation brought about by the Department without recourse to Board procedure with the unavoidable delay and expense incidental thereto. On December 11, the Cornwall Street Railway Employees' Union made application to the Department of Labour for a board of conciliation to consider a dispute respecting increased wages and improved working conditions. It was stated in the application that conferences of the employees' representatives and the officials of the Cornwall Street Railway Company had failed in effecting an adjustment. On December 16 the company wrote the Department asking a delay of proceedings for a few days as there was some prospect of a settlement. On December 29, no agreement having been arrived at in the meantime, a fair wage officer of the Department proceeded to Cornwall and discussed the situation with both parties. On January 31, through

the action of an official of the Department, a meeting took place in the head office of the company at Montreal, between a representative of the Union and an executive official of the company, notwithstanding that up to that time the company had refused to recognize the Union. At this meeting an agreement was reached granting full recognition to the International organization and providing for an increase of wages from February 1. The application for a conciliation board was withdrawn, and a few days later the manager of the Cornwall Street Railway Company wrote the Department as follows: "We wish to thank you for your interest in the matter between ourselves and the men, and we are in hopes that the agreement arrived at will settle this question for some time to come."

In very many similar cases the Minister and officers of the Department have brought about peaceful settlements in matters which have become little known to the general public. There are cases where peculiar difficulties develop in the making of a working agreement or appear during the life of an agreement, and there are other cases where unusual and unforeseen industrial situations are brought about, the outcome largely of changing conditions and even changing thought in these matters. Such difficulties are brought to the attention of the Department in various ways, and the Department is usually able by correspondence or by personal intervention through an officer to heal the threatened breach and prevent an interruption of work.

Direction of Coal Operations

An important field of conciliation work which for the past four years has engaged the serious attention of the department and from which it has only recently been relieved, has been the direction to a considerable extent of the coal operations of southeastern British Columbia and southwestern Alberta, with the object of securing so far as

possible the maximum production of coal from this region during the war. It will be remembered that the year 1917 opened with much unrest in the coal mining industry in this region and that work had ceased in practically all large coal producing properties. The coal operators were as a rule members of the body known as the Western Coal Operators' Association with headquarters at Calgary, Alberta, and the employees were mostly members of the international trade union known as District 18 of the United Mine Workers of America. The shortage of coal on the North American continent being acute, with widespread and disastrous consequences, there was urgent necessity for the resumption of work at all points, and there being little prospect of a working agreement being reached by the operators and miners, the Minister of Labour, acting under the War Measures Act, secured the appointment in July, 1917, of Mr. W. H. Armstrong, of Vancouver, B. C., as Director of Coal Operations with power to make all necessary investigations and inquiries respecting wages, holidays, hours of labour, and other labour conditions, and respecting other matters connected with the resumption of the production of coal and coke and the continuance thereof during the war and generally to control the operations of the collieries and coke ovens throughout District 18. The owners and the management of the mines and coke producing plants were required to comply with the orders of the Director, who was empowered to fix the selling price of coal and coke and to take possession of any coal mine or coke-producing plant within the district.

One of the most important aspects of the work of the Director was the settlement of industrial disputes. As has been stated there had been much unrest in the district. The mine employees at many points in these fields had been striking intermittently since November, 1916, and when on March 31, 1917, the agreement made a year earlier came to an end and no new working agreement was made, work ceased generally

throughout the District. This condition continued until the appointment of Mr. Armstrong as Director and then received immediately the Director's attention. Consideration was at once resumed concerning a tentative agreement which had been drafted some months previously as between the miners and operators, and early in July, 1917, under an order issued by the Director, operations were resumed. During the course of the few weeks following, as a result of negotiations between the Director, the policy committee of the miners and the operators in the District, adjustment was effected as to some 70 contentious points, some of them of high importance, which had been allowed to stand in abeyance at the time the men returned to work. It will be realized that the District covers a wide area and includes nearly a hundred separate mines and about nine thousand workers, and the Director during the time he held office, nearly four years, issued 164 orders having to do with working conditions in the numerous collieries. Only in rare cases did cessation of work occur and such occurrences were local and of short duration. The good offices of the Director and his staff were also called into requisition in regions beyond the boundaries of the District.

The Director of Coal Operations also issued orders at various times giving effect to the findings of the Cost of Living Commission which had been appointed under the tentative agreement before-mentioned to adjust wages at intervals of four months in accordance with changes in the cost of living. Mr. F. E. Harrison, fair wages officer of the Department at Calgary, was chairman of the Commission. Mr. Harrison also acted as chief assistant to the Director of Coal Operations from the time the office was created until it lapsed in June last with the closing of the parliamentary session.

For the settlement of industrial disputes arising in the near future, the provisions of the present agreement be-

tween the Western Canada Coal Operators' Association and District 18 of the United Mine Workers of America are being put into effect. This agreement, which does not expire until March 31, 1922, provides for the appointment of a grievance committee of six members,

three representing the operators and three the miners. In the event of such committee failing to agree, provision is made for the appointment of an impartial chairman, who shall be selected either by unanimous consent of the committee or by the Minister of Labour.

ACTIONS OF VARIOUS COUNTRIES UPON DECISIONS OF INTERNATIONAL LABOUR CONFERENCES

Greece and Roumania ratify the Washington Conventions

IN the LABOUR GAZETTE for March on pages 362-369 an account was given of the action of various countries upon conventions and recommendations of the First International Labour Conference, held at Washington, D.C. A further account of the measures taken by the different countries with regard to this conference and also with regard to the Second International Labour Conference in Genoa appeared in the *Daily Intelligence* of the International Labour Office for July 4. At the First Conference six draft Conventions were adopted. These had reference respectively to: (1) Limitation of hours of work to 8 per day and 48 per week; (2) provision against unemployment; (3) the employment of women before and after childbirth; (4) the employment of women during the night; (5) the minimum age for children employed in factories; and (6) the night work of children in industry. The text of these conventions and also of the recommendations appeared in the issue of the LABOUR GAZETTE for December, 1919, on pages 1440 to 1453.

The two states of Greece and Roumania have ratified all the six conventions and have registered their ratifications with the Secretary General of the League of Nations, the former having done so last October and the latter in June. The effect of these two ratifications is

that the conventions, excluding that concerning unemployment which requires that ratification of three members must be registered, come into force in Greece and Roumania on the date when the Secretary General notifies the members of the organization that two members have ratified. A letter of notification to this effect has been sent. The conventions will come into force for other member states from the date of their respective ratifications.

The province of British Columbia, as mentioned in the June issue of the LABOUR GAZETTE on page 784, has also carried out the provisions of these Conventions, by legislation which will come into effect with the coming into operation of similar laws in other provinces.*

ACTION OF BRITISH GOVERNMENT.

The policy of the British Government with regard to these conventions was set forth on July 1 in a debate in the House of Commons on a motion of the Minister of Labour, the Right Honour-

*The action taken by the Canadian government upon the draft conventions and recommendations has been set forth in previous articles in the LABOUR GAZETTE. In the issue of November, 1920, on pages 1491 to 1493, the text of an order-in-council is given which contains the opinion of the Minister of Justice as to the jurisdiction of the federal and provincial governments with regard to the matters therein. This subject was further dealt with in a report of the Minister of Justice to Parliament an account of which was given in the issue of the LABOUR GAZETTE for June, 1921, on pages 776 to 781.

able Dr. Macnamara, "That this House approve the policy of His Majesty's Government respecting the several Conventions and Recommendations of the International Labour Conference at Washington, in November 1919." - As regards the Recommendations, the Minister stated that apart from the second Recommendation dealing with reciprocity of treatment of foreign workers, which was still under examination in view of the forthcoming meeting of the International Emigration Commission, all the others had been accepted except two minor articles of the first Recommendation.

With regard to the Conventions, the government was prepared to ratify four out of the six. The two that the government was not prepared to ratify were those concerning the employment of women before and after childbirth and the limiting of the hours of work to eight per day and 48 per week. As to the former, the Minister contended that the existing system dealt with the question on entirely different lines and the government considered it would not be justified in destroying the machinery which had been working for some time in order to start again on different lines. As to the Hours Convention the difficulty was with regard to the railways, the railway men being governed by agreements with a guaranteed day and a guaranteed week of 48 hours, with regular Sunday duty outside the guaranteed 48-hour week. He pointed out that a normal working week of 48 hours was established in Great Britain, and that practically all the various agreements provided for definite conditions with regard to overtime. He stated the policy of the government as follows: "We propose to send a letter to Geneva explaining the difficulties which here confront us, and intimating that we shall be very glad to take part in a reconsideration of the Hours Convention, probably drawn on more elastic lines, at a future Congress of the International Labour Organization." After some dis-

cussion, the motion of the Minister of Labour was carried by 164 votes to 53.

The Women, Young Persons and Children (Employment) Act, 1920, of Great Britain, contains provisions relating to the draft conventions on minimum age, night work of women, and night work of young persons.

On July 5, in conformity with the announced policy of the British Government orders-in-council were passed ratifying the Draft Conventions on unemployment, concerning the employment of women at night, concerning the night work of young persons employed in industry, and fixing the minimum age of admission of children to industrial employment.

ACTION BY VARIOUS COUNTRIES.

With regard to the other countries, Belgium has passed an Act establishing the 8-hour day and the 48-hour week, which dealt with the matters in the draft Conventions on: (1) hours; (2) minimum age; (3) night work of women and (4) night work of young persons. Czecho-Slovakia has passed a law ratifying the draft Conventions on hours, minimum age and night work of women. Denmark passed a law concerning apprenticeship governing night work of young persons. Japan has enacted a law concerning Public Labour Exchanges along the line of the draft Convention dealing with unemployment. Finland has passed a law ratifying the draft Convention concerning unemployment.

Bills for the ratification of the six draft Conventions have been introduced in Argentina, Belgium, Italy and Spain. A Bill for the ratification of all the draft Conventions except that concerning unemployment which was dealt with by another law, was adopted by the Chamber of Deputies of Finland. Bills concerning the hours of labour have been introduced in Chile, Denmark, Great Britain, India, Italy and Sweden. Bills concerning unemployment and the establishment of public labour exchanges have been introduced in Chile, Czecho-Slovakia, Denmark, Norway, Poland,

Roumania and Uruguay. Bills concerning the employment of women before and after childbirth have been introduced in Chile, Denmark, Portugal, and Roumania. Bills concerning the night work of women have been introduced in Denmark, Poland, Portugal, and Switzerland. Bills concerning the minimum age of employment of children have been introduced in Chile, Denmark, Portugal, and Switzerland. Bills concerning the night work of young persons have been introduced in Chile, Czecho-Slovakia, Denmark, Poland, Portugal and Switzerland.

The recommendations of the First International Labour Conference had reference to unemployment, reciprocity of treatment of foreign workers, the prevention of anthrax, the protection of women and children against lead poisoning, the establishment of government health services, and the prohibition of the use of white phosphorus in the manufacture of matches. With regard to these Roumania passed an Act carrying them all into effect, Denmark passed an Act concerning unemployment insurance, Great Britain enacted a law for the protection of women and children against lead poisoning, Japan enacted a law prohibiting the use of white phosphorus in the manufacture of matches, and the Netherlands passed a law concerning anthrax.

Decrees to give effect to various recommendations have also been issued, or are in course of preparation as follows: Austria, concerning the employment of women and children in dangerous and unhealthy trades; Belgium, regulating state contributions to unemployment funds; Italy, prohibiting the use of white phosphorus in the manufacture of matches, and the Netherlands regulating the use of soluble lead compounds for protection against lead poisoning. Greece has also incorporated in the Labour Code regulations concerning the use of white phosphorus, and in India a resolution was passed by the Legis-

lative Assembly for the creation of a government health service.

The following Bills have also been introduced, or are in preparation to give effect to the provisions of the Recommendations: Austria, to amend the law relative to labour inspection (government health services); Belgium, for the creation of a system of compulsory health insurance; Chili, concerning the employment of women and children (lead poisoning), and concerning industrial health and safety; Denmark, to amend the Act concerning employment exchanges; France, to amend the law on labour exchanges; Denmark, concerning employment exchanges; India, to amend the Factory Act with reference to lead poisoning and anthrax; Luxembourg, creating a system of compulsory unemployment insurance; Switzerland, concerning the protection of women and children from lead poisoning.

In addition to the action taken by Japan, Italy and Greece as mentioned above, with regard to the prohibition of the use of white phosphorus in the manufacture of matches, measures have been adopted since the Washington conference towards enforcing a similar prohibition in Australia, Austria, Czecho-Slovakia, India and Poland.

ACTION ON DECISIONS OF GENOA CONFERENCE.

With regard to legislation consequent upon the decisions of the Second International Labour Conference at Genoa, an account of which appeared in the LABOUR GAZETTE for October, 1920, on pages 1316 to 1330, Australia has passed the Commonwealth Navigation Act 1919-20, providing for unemployment indemnity in case of loss or foundering of ship, and Great Britain has passed the Women, Young Persons and Children (Employment) Act, 1920, which deals with the minimum age for the employment of children. The provisions of the Act with regard to the minimum age of admission of children to employment at sea came into force on July 1, and on July 5 the draft convention dealing with

the subject was formally ratified by order-in-council. Bills relating to the subjects of the draft Conventions have also been drawn up by the States of Belgium, Denmark, France, Poland and Sweden, while the States of Denmark,

Poland and South Africa have drawn up bills to give effect to the provisions of the Recommendations. National seamen's codes are stated to be in course of preparation in Argentine, France, Poland, South Africa and Sweden.

THE GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE

Eighth Session of the Governing Body, held in Stockholm, July 5-7, 1921

THE Eighth Meeting of the Governing Body of the International Labour Office was held in Stockholm, Sweden, on Tuesday, Wednesday and Thursday, the 5th, 6th and 7th of July. The Honourable G. D. Robertson, Minister of Labour and nominee of the Government of Canada on the Governing Body, being unable on account of pressure of public duties to attend the meeting, Mr. F. A. Acland, the Deputy Minister of Labour, was appointed by Order-in-Council as substitute for the Minister and attended the gathering accordingly.

It should be explained that at the Seventh Meeting of the Governing Body, held at Geneva in April, 1921, an invitation had been received from the Government of Sweden to hold the Eighth Meeting at the Swedish capital. The Swedish Government had at the same time explained that an appropriation had been made to meet the expenditure which would be involved in bringing from Geneva to Stockholm such portion of the office staff of the International Labour Office as might be deemed necessary for the purpose of the work of the Meeting. Subsequently the Government of Denmark, taking advantage of the acceptance of the Governing Body of the invitation of the Government of Sweden and of the proximity of the capitals of the two countries, suggested that the members of the Governing Body might be first assembled at Copenhagen, the Danish capital and through which, in any event, many of the delegates would conveniently, if not necessarily,

pass on their way to Stockholm. This arrangement was effected, the members of the Governing Body assembling on Saturday, July 2, at Copenhagen, and spending two days in the Danish capital, during which time they were enabled to meet numerous Danish governmental officials interested in the questions dealt with by the International Labour Office, and were also the recipients of courteous hospitality from the Danish Government.

The meetings of the Governing Body at Stockholm were held in the Rigsdag, or House of Parliament of Sweden, offices in which had been kindly placed by the Swedish Government at the disposition of the Governing Body. It should be added that the members of the Governing Body were in Sweden also the recipients of many courtesies from the Swedish Government, as also from the King of Sweden, who gave a tea in honour of the delegates, at which members of the Body were enabled to meet numerous leading officials of the country.

The consideration of the report of the Director constituted the principal feature of the business of the Meeting, prominent in the Director's report in turn being the consideration given by the Director to the report on the organization of the Secretariat (of the League of Nations) and of the International Labour Office, made by the Commission of experts appointed in accordance with a resolution adopted by the League of Nations at its meeting on

December 17 last. Various suggestions and recommendations contained in the report were freely discussed by the members of the Governing Body, but it was deemed proper to defer any formal action arising out of the report until the report had been laid before the League of Nations itself, which will presumably take place at the approaching meeting of the Assembly.

An item of the agenda covered proposals concerning the relations of the International Labour Office with the League of Nations. This caused an active discussion, interest centering largely on the means whereby the International Labour Office should receive formal representation before the League of Nations authorities with a view to the discussion of important questions arising between the two bodies and particularly with respect to representations which it might become at any time desirable to make with respect to the budget of the International Labour Office, which is, under the terms of the Treaty, submitted to the Treasurer of the League of Nations. In view of the fact that the assembly of the League of Nations will shortly be in session, it was decided to wait the outcome of the discussion which this matter is likely to receive at the meeting in question.

It will be remembered that the Governing Body consists of twenty-four members who are appointed by the International Labour Conference. Twelve persons represent the Governments, six persons represent employers and six persons represent workmen. In the words of Article 393 of the Treaty, "Of the twelve persons representing the Governments, eight shall be nominated by the Members which are of the chief industrial importance, and four shall be nominated by the Members selected for the purpose by the Government Delegates to the Conference, excluding the Delegates of the eight Members mentioned above. Any question as to which are the Members of the chief industrial importance shall be decided by the Council

of the League of Nations." Some consideration has been given to the question of the method of determining the eight states which are of chief industrial importance and as to precisely how this term should be interpreted. At a previous meeting of the Governing Body, a Committee was appointed for the purpose of investigating this question, the Chairman of the Governing Body, Mr. A. Fontaine, becoming chairman also of this Committee. Mr. Fontaine explained that the Committee has been investigating the subject and has received the assistance of notable statistical experts. Considerable information was yet to be received, but it was expected the Committee would close its work shortly and would be able to present its report at the next meeting of the Governing Body.

Some discussion occurred with respect to the International Emigration Commission appointed a year ago by the Governing Body. It will be recalled that the member of this Body representing the Government of Canada is Mr. J. Obed Smith, Commissioner of Emigration in Great Britain. The Governing Body had paid the British Government the courtesy of requesting it to name a chairman and the British Government had named Lord Cave, formerly Home Secretary. The individual commissioners, with the aid of the International Labour Office, have been collecting information necessary for the purposes of the Commission, but the Commission had not, up to the time of the present Meeting of the Governing Body, met as a whole. It had become known and was now formally reported to the Governing Body that Lord Cave had found it impossible to continue the work pertaining to the chairmanship of the Commission, and, he having accordingly retired, the British Government had named as chairman Viscount Ullswater, recently retired Speaker of the British House of Commons and who, it will be remembered, visited Canada during the past winter. The Emigration Commission was to meet towards the close of July at Geneva and it was

expected that its report would be issued shortly thereafter.

Some consideration was given to the question of the agenda for the 1922 Conference. No final action on this point was taken, but the trend of discussion indicated a probability of questions pertaining to emigration, on which the report of the Emigration Commission might have an important bearing, forming the principal feature of the Conference for 1922.

In determining the date of the next Meeting of the Governing Body, the ninth, it was necessary to have in mind the point that the Third International Labour Conference begins on October 25, and since some members of the Governing Body may also be delegates to the Conference, it was desirable that the Governing Body should meet immediately before that date. It was decided therefore that the Governing Body shall hold its next Meeting at Geneva, on Wednesday, October 19.

SOME RECENT WAGE NEGOTIATIONS AND DISPUTES IN GREAT BRITAIN

COTTON INDUSTRY.

THE British *Labour Gazette* issues of June and July, 1921, give details of a stoppage of work in the Cotton Textile industry from June 4 to June 27, arising out of a breakdown in negotiations with regard to wage reductions. Details of the dispute and of the terms of settlement are given below.

The great majority of the operators in the cotton industry are paid on a piece-work basis, according to the lists recognized for the various branches of the trade. At the beginning of the war, wages were generally 5 per cent above list prices. During and after the war, up to May, 1920, advances had been given amounting to 140 per cent on the list prices, so that rates current at that time were 245 per cent of list prices. The hours of work had been reduced from 55½ to 48 per week.

In May 1920 agreements were reached for an advance of 70 per cent on standard list prices, the new rates thus being 315 per cent of the list prices. Classes of workpeople who were not paid on the basis of a standard piece price list received an advance in the same proportion to their previous rates. In the case of tapers, dry tapers, warp dressers and loom overlookers the advance was only

55 per cent on the list prices instead of 70 per cent. The new rates were to remain unchanged for twelve months from the date of their coming into operation.

Early in May 1921, the various employers' associations gave notice to the unions of a proposed reduction of 95 per cent on the standard lists of wages (equivalent to 95/315, or 30 per cent, on the prevailing rates). As a result of a joint conference on May 27, a negotiating committee was set up, and it was agreed that in the event of no settlement being reached notices should expire on June 4. Negotiations broke down on June 3, the final position being the employers' proposal for a reduction of 80 per cent, and the Unions' of 50 per cent, each on list prices. The employers declined to postdate notices for fourteen days, and also declined the proposal to submit the difference to independent arbitration while work should be continued at the old rate.

Deputations from each side met the Minister of Labour at his invitation, and negotiations were resumed on June 10. On June 24, an agreement was signed for a reduction of 60 per cent on list prices to take place forthwith and 10 per cent at the end of six months. In the case of those operatives who had

only 55 per cent advance in May 1920, proportionate reductions, amounting to only 55 per cent in the aggregate, are made. The agreement is to be in force for six months, and any alteration at the end of that period requires three months' notice.

The mills re-opened on June 27. During the early part of July they were still working short time, but an improvement in trade was hoped for.

WOOLLEN INDUSTRY.

Wages in the woollen and worsted industry have been on a sliding scale, adjusted to basic rates according to the movement of the cost-of-living figures. The general increase in basic rates between July, 1914, and December, 1920, was approximately 15 per cent. The general "cost-of-living" increase for time workers up to the end of 1920 was 175 per cent on the enhanced basic rates, so that for this class of workers the weekly rates at January, 1920, were, in all, 316 per cent of the pre-war rates. The sliding scale for piece workers does not move in full proportion to the change in cost of living: for male piece-workers the advance to December, 1920, was generally 144.56 per cent on the enhanced basic rates, and for female piece-workers 152.17 per cent. All these increases were in addition to a general advance of over 15 per cent on hourly and piece rates, granted in March, 1919, concurrently with a reduction in weekly hours from 55½ to 48, in order to maintain weekly wages at the same level as before.

From January to June, 1921, the reductions under the cost-of-living sliding scale amounted to 40 per cent on basic rates (14½ per cent of wages current at the first of January) in the case of time workers, the reductions for piece-workers, like their previous advances, being in somewhat smaller proportion.

At a meeting of the National Wool and Allied Textile Industrial Council on May 12, the employers submitted proposals for a reduction of 5 per cent from

basic rates. It was also proposed that the fall in the cost of living should be anticipated, the index figure for the increase since July, 1914, being taken as 90 instead of 135. The executive of the General Union of Textile Workers opposed these reductions. At subsequent meetings the employers' terms were modified, the index figure finally proposed for an anticipation being 105, with a reduction, as before asked, of 5 per cent on the basic rates. For time workers this meant a reduction, in all, of about 17 per cent on current rates, for piece workers somewhat less. An adult male time-worker receiving 78s 1½d per week would be reduced to 65s 3d per week; an adult female time-worker at a wage of 45s 11½d per week would have, after the change, 38s 2d per week. The reduction was to come into force on July 9, and the new agreement to continue until June, 1922. No further reduction in the sliding scale was to be made until the cost of living fell to 95.

The ballot of the unions on these proposals gave a majority in favour of acceptance, and the Industrial Council agreed to the terms on June 27. About 200,000 workers were affected.

It may be of interest to note that a table published in the *Daily Intelligence* of the International Labour Office on June 22, purported to show that, on account of short time, weekly earnings in the woollen industry in May, 1921, were in many cases less than the pre-war earnings.

ENGINEERING AND SHIPBUILDING.

In the shipbuilding industry and in the engineering trades generally (machinists, riveters, ironmoulders, pattern-makers, etc.), up to the beginning of 1921, general advances over pre-war rates had been granted amounting to 39s. 6d. a week for men on time rates, together with a bonus of 12½ per cent on total earnings. For men on piece work the general increases amounted to 26s. 6d. a week, together with an advance of

25 per cent on basic piece prices and a bonus of $7\frac{1}{2}$ per cent on total earnings.

As a result of an agreement reached at a conference between the Shipbuilding Employers' Federation and the Federation of Engineering and Shipbuilding Trades on April 19, a reduction of 6s. per week to time-workers in the Shipbuilding industry, and 15 per cent on the current list of net piece-work prices, was effected in two equal cuts, dating from the week ending May 7 and the week ending June 4 respectively. The deduction is made before the bonus on total earnings, mentioned above, is added, so that the net decrease to time workers is 6s. plus $12\frac{1}{2}$ per cent of 6s., or, in all, 6s. 2d. per week.

For the engineering trades outside of the shipbuilding industry the question of wages was not so easily settled. On April 21 a conference took place between representatives of the Amalgamated Engineering Union and the Engineering and National Employers' Federation to discuss the employers' proposals for a reduction of 6s. per week on time rates and 15 per cent on piece rates (as in the shipbuilding trades), with the added condition of the abolition of the bonus

of $12\frac{1}{2}$ per cent to time-workers and $7\frac{1}{2}$ per cent to piece-workers. The employers refused to agree to the Union proposal for arbitration, and the Union approached the Minister of Labour with a request to set up a court of inquiry under the Industrial Courts Act. The minister persuaded the parties to confer further. The dispute dragged along, modified terms being offered by the employers and rejected, but finally, on June 30, a delegate conference of the four Trade Unions concerned endorsed new terms offered by the employers. Under these proposals the reduction of 6s. per week to time-workers and 15 per cent to piece-workers would take place in two instalments, on July 15 and August 15. The employers temporarily withdrew their demand for the abolition of the bonus, but there was to be a further conference in September to discuss whether the state of trade at that time would warrant the continuance of these wages.

Notices from employers of the termination of the existing contracts, which were due to expire on June 30, were suspended for 14 days while a ballot of union members was taken on the above proposals. The ballot resulted in acceptance of the terms.

REPORT ON WORK OF BUILDING GUILDS IN GREAT BRITAIN

A RECENT weekly bulletin of the British Ministry of Labour refers as follows to a report on the working of the building guilds in Great Britain, published by Mr. Ernest Selley, of the Garden Cities and Town Planning Association, "who has been making investigations to ascertain whether the guilds were making good their claims that industrial control by guild workers has been established, and that houses are being built better and more quickly and cheaply by the guilds than by private contractors."

Mr. Selley [says the Labour Minister's bulletin] is not connected with the

guild movement, and it is claimed by the association that he is a skilled investigator of considerable experience. It is stated that he inspected guild housing contracts which are being carried out in various districts, and obtained information from foremen, architects, surveyors, borough councillors and members of housing committees, as well as from guildsmen and others not in official positions. Mr. Selley holds the view that complete democratic control by guild workers is made possible by the structure of the local committees and the central managing body, and he states that experience has shown that an efficient

directorates can be chosen from, and selected by, the rank and file.

As for the actual work carried out, Mr. Selley states that he found expert opinion unanimous in approving the output on guild schemes, some clerks of the works estimating it at 25 per cent above the average; and the quality of the work done is pronounced to be excellent. Men found to be slacking are liable to dismissal, but have the right of appeal to the works committee or the union. It is stated, however, that there have been very few cases of dismissal. Mr. Selley states that the present situation may be summed up as follows:—

“(1) The guilds have proved that

they are organized on businesslike lines, and are able to carry out building operations in a workmanlike manner. (2) The quality of the work produced is distinctly above the average. (3) The weight of evidence goes to show that the output per man on guild contracts is as good as that obtained by the best private contractors, and certainly higher than most. (4) It is not yet possible to make any definite statement as to comparative building costs, but, from the evidence obtained, there is ground for believing that the cost of building in guild contracts is likely to be lower than the average cost in the districts where the guilds are operating.”

BRITISH LABOUR WOMEN'S CONFERENCE

THERE has recently come to hand a complete report of a labour women's conference which was held at Manchester, England, on April 27 and 28, under the auspices of the Labour Party. There were present 523 delegates representing 261 organizations including 164 women's sections, 20 divisional branches of the Labour Party, 52 local branches of the Labour Party and Trades Councils, 19 trade unions, and 6 national societies. Miss Margaret Bonfield presided.

Among the subjects discussed at the conference were the following: A resolution was passed extending sympathy to the women of the coalfields, and opposing the policy of the government in dealing with the coal miners' strike. The conference declared that the great need of the world was peace and the re-establishment of trade and industry, and urged the establishment of credits for countries which had fallen into an economic ruin, such credits to be given to co-operative or non-profit making organizations, and the re-opening of the negotiations with Germany in regard to the payment of reparations on the principle that they be made in a manner that will

not be injurious to the industrial life and trade of the countries concerned on either side. An educational campaign was urged concerning economic and industrial conditions of wage workers of all nations in order to support and strengthen the International Federation of Trade Unions. To encourage understanding between the workers of the different nations an exchange of apprentices was advocated under the auspices of their respective trade unions in the various countries. The action of the British government was condemned in deciding not to ratify the maternity convention of the International Labour Conference at Washington. A resolution was unanimously passed expressing complete agreement with the policy of the Labour Party in demanding provision either of work or full maintenance for all unemployed workers, and in particular provision for the education and maintenance of all juvenile workers during periods of unemployment, both in the interests of these boys and girls and to prevent their competition with adults in the labour market. In other resolutions that were carried unanimously the

conference advocated the extension of the franchise to all women of twenty-one years and over, the inclusion of women representing labour on the County Advisory Committees for the nomination of magistrates, the removal of all household or property qualifications for women jurors; equality of pay and opportunity for men and women in the Civil Service; the setting up without delay of Trade Boards in all industries when the workers demand such protection; the introduction of legislation to secure pensions for women with dependent children on the lines proposed by the Labour Party in their Mothers' Pen-

sion Bill, 1920; the immediate issue by the government of an emergency order to prevent ejectments, and to fix rents of houses erected under the Housing Act at figures which approximate the amounts paid at that time. The forbidding of the employment of any child under fourteen in any gainful occupation and the revival of the educational centres attached to juvenile employment exchanges at the close of the war, making attendance at them compulsory upon all children registering at the exchanges, and accompanying it with a maintenance grant.

APPRENTICESHIP IN THE UNITED STATES

Report of Apprenticeship Committee of the National Association of Corporation Training

THE report of the Committee on Trade Apprenticeship of the National Association of Corporation Training,* which report is incorporated in the published proceedings of the ninth annual convention of that Association, held recently at Niagara Falls, N. Y., contains much interesting information with respect to apprenticeship in the United States. Much of this information is given in summarized form below.

PUBLIC CONTINUATION SCHOOLS.

The growth of public continuation schools, which resulted from the recent "Smith-Hughes" law, a measure providing Federal aid for vocational education, was found to have created a new interest in apprentice training generally. Twenty-eight states have already established such schools, which have as their object "the better training of the younger workers in industry." These public schools are not designed as a substitute

for the training departments of industrial corporations, though to some extent they cover the same ground. The continuation schools, on the contrary, have resulted in the further development of corporation apprenticeship courses. In apprenticeship legislation the state of Wisconsin is in advance of the other states of the union.

APPRENTICESHIP IN WISCONSIN.

The same Committee in its report for the previous year† stated that Wisconsin was then "the only state having a completely organized modern apprentice system covered by recent laws administered by a state board, under a state supervisor of apprentices." The Wisconsin law provides that apprenticeship agreements made pursuant to the act, shall be approved by, and shall be made upon forms approved by the State Industrial Commission; that in apprenticeship contracts of three years or over, the probationary period shall be three months, during which period the agreements may

*National Association of Corporation Training (Incorporated), Irving Place at 15th Street, New York; managing director, F. C. Henderschott. The membership list includes many of the largest industrial corporations in the United States.

†See proceedings of Eighth Annual Convention.

be made void upon written notice to the Commission; that diplomas shall be granted upon graduation when completed to the satisfaction of the Commission; that apprenticeship contracts shall be filed with the Commission within thirty days following commencement of apprenticeship term; that all trade agreements on apprenticeship be approved by the Commission; and in trades where there are no uniform approved standards the employer may execute a special agreement with the apprentice, subject to the approval of the Commission; no minor can be legally apprenticed who is not placed under a written agreement pursuant to the act. It is also provided that during the first two years of his term the apprentice shall receive instruction for not less than five hours per week, and his total number of hours of instruction and work per week shall not exceed 55.

In carrying out the scheme the State works through existing trade groups, particularly through trade organizations. The length of the term varies according to the practice prevailing in the several trades. A representative trade committee is formed to discuss apprenticeship conditions. Apprentices are supervised in the workshops by the State supervisor or his deputies, who co-operate with the employer's supervisors and receive complaints in the interest of either party. The supervisor further sees that employers are educated in the need for apprenticeship, and that boys and their parents are instructed as to the boys' need to learn a trade; he also endeavours to create a genuine interest in apprenticeship among labour organizations and to obtain their co-operation with the work of the State, and in general "make himself responsible for the promotion of training for the next generation of mechanics."

Technical instruction is provided by state vocational schools. The subjects taught generally include English, elements of citizenship, trade arithmetic, trade science, trade drawing, etc., and

in some cases shop practice; the general policy of the apprenticeship administration, however, is to insist on academic work in the school hours and to see that the boy is taught shop practice in his place of employment. Trade unions are declared to be in favour of apprenticeship "because it means maintaining the dignity of their trades, and the development of more intelligent men from among whom they may recruit new members for their organization"; but experience shows, it is claimed, that journeymen are somewhat reluctant to impart trade knowledge to learners, and placards are posted in the shops urging them to give more thought to this matter. An apprentice club is being organized in Milwaukee for discussing grievances and making plans for the general welfare of the young workers.

PUBLIC TRAINING IN OTHER STATES.

Outside Wisconsin the state systems of apprenticeship are stated by the Committee to be less complete. Thus, Minnesota, Pennsylvania, New York, New Jersey, California, Utah and Massachusetts, have no state system, though provision is made for voluntary part-time continuation schools and classes. In New York State a law which became partly operative toward the end of 1920, and will be in full force by September 1, 1925, provides that all children between 14 and 18 years of age who are not in regular full time schools must attend part-time schools, which must be established in every community of 5,000 inhabitants. In the same State, 22 unit trade schools exist in which the elements of many trades are taught, one half of the school day being devoted to shop work and one half to courses in related drawing, mathematics, applied science, English, history, civics, etc. In New Jersey there are reported to be "no indentured apprentices, and certainly nothing that could be called a system of apprenticeship," but compulsory continuation schools have existed since September 1920. Connecticut has a system of ap-

prentice training in trade schools, and non-compulsory continuation schools.

CORPORATION TRAINING COURSES.

Part-time and continuation schools provided by the various states, cannot however, in the opinion of the Committee on Trade Apprenticeship, take the place of the existing training departments of industrial corporations, for the reason that certain knowledge can only be imparted to apprentices on the job and by those familiar with actual practice. Besides offering the necessary experience of the operations involved in the several trades, together with correlated class work, various other subjects, such as English, civics, industrial history, economics and hygiene, are increasingly recognized as being an essential part of any complete apprenticeship training. In drawing up a model syllabus the committee of the Association of Corporation Training lay some stress on the study of elementary economics and "civics," which they claim "will do much to relieve the present industrial unrest and radicalism." But for the most part the courses are so designed as to enable the apprentice to perform his work more efficiently and intelligently.

When the movement for corporation training was started existing apprenticeship systems made little provision for actual teaching, boys being left to pick up knowledge through observation of others. The result of this haphazard method for obtaining industrial recruits was to permit boys without aptitude for the trade to enter a shop, and for the more efficient boys to drag out the period of apprenticeship to an unnecessary length. The corporation schools attempt to remedy these faults by special care in the selection of boys for the various courses, and by careful arrangement of suitable courses of instruction.

Among the reasons given for the provision of corporation training are the following: the acknowledged shortage of mechanics thoroughly skilled; no concern can use men trained by another company to as good advantage as those

trained by itself; labour turnover is lessened, and economy thus promoted; increase in loyalty; wholesome effect upon the whole staff of technical expert training in the plant; increased output due to higher skill of employees; broader training gives better judgment and higher intelligence; industries are obliged to provide training since "the old apprenticeship system has been abandoned."

The report of the Apprenticeship Committee states that after a study of the apprenticeship training courses of corporation training departments, it was found that a large proportion of the graduates in such courses remain with the corporations where they were trained and that many of them eventually advanced into executive positions.

Notes on some existing corporation apprenticeship courses are given below:

The American Rolling Mill Company is typical of the sheet steel producing industry. It has five trades represented in its apprenticeship courses, namely, machinists, moulders, pattern makers, electricians and blacksmiths. Classroom work is given in each trade represented, the course comprising mechanical drawing, shop sketching, design, mathematics (pure and applied), electricity, trade and shop lectures, hygiene and safety. All applicants for apprentice work are required to have the equivalent of eight years' common school training before admission to the courses. The age limits vary from 18 to 35 years, or older in specific cases. A trial period of about three months is required of all applicants. Apprentices work the same regular turns as journeymen. In the machinists' trade the apprentice is given his preliminary training in a training shop under the direct charge of an expert instructor. After the trial period and first period of training the apprentice is shifted alternately between the training and maintenance shops until completion of course. Practical as well as theoretically trained instructors are utilized for classroom work. Attendance

records of shop and class room are kept, but no grading of class room merit is made. The foremen in the respective divisions employing apprentices are kept advised of the apprentices' progress in class-room work, and act on the committees which supervise the courses. The graduate apprentices fill in the regular vacancies which occur from time to time in the shops. On graduation they receive a diploma signed by a high officer of the company. Further special courses may be followed on payment of a small fee.

The Yale and Towne Manufacturing Company has apprentice courses in electrical construction work and power and plant drafting. Instruction in electrical construction is in charge of the department foreman and consists in regular routine plant work. The apprentice is then assigned to regular work under instruction in the belt room, at steam fitting, at mill wrighting, and in the machine shop; he also serves for three months in the power plant. In addition to these technical courses the company provides one-hour "shop talks" on the classification, construction and use of machine tools and cutting tools. One-hour talks are also given on trade or health topics under the auspices of the local Apprentice Association. All apprentice work in this company is comprised in a four-year course, class work being outlined on progressive lines. Last year about 60 per cent of the apprentice graduates remained in the service of the company.

The Solvay Process Company provides courses for about 50 apprentices in machinist work, plumbing and steamfitting, blacksmithing, carpentry, boiler and sheet metal work. The boys are first placed in the repair shops under regular mechanics, but without a special instructor. About one year is spent in the machine shop, the remaining time being divided among the other departments. Classroom work includes shop mathematics, freehand drawing, layout work for sheet iron and other departments, strength of materials, elementary mecha-

nics, reports, shop equipment, and nature of company's products. Practical men from the shop assist the instructor in technical shop matters. The boys spend an entire week on this class-room work alternating with a week in the shops, but on Saturdays all boys work in the shop. They are paid for the time spent in class as well as for that in the shop, company discipline being maintained in both branches. The purpose of the course is to train boys for general repair work in all branches, but not to teach these trades completely. The length of this course is two years, and on graduation the student is given a certificate and is placed on the roll of regular repairmen.

The Western Electric Company train tool-making apprentices from 15 to 18 years of age. Of these 80 per cent were reported to remain with the company, and 20 per cent of those who remain fill supervisory positions.

R. Hoe and Company have maintained an apprentice training system since 1858. They have now 160 apprentices, about 60 new boys being taken on each year, some of whom serve four years and others five years. About twenty are graduated each year, two-thirds of those who start being lost during the course. About 25 per cent of present employees and 90 per cent of the foremen were former apprentices. This company maintains a technical school which apprentices are required to attend three nights a week, the subjects taught including mechanical drawing, arithmetic, algebra, trigonometry, geometry, business English and mechanics. There are eight grades in the school, each of which requires four months to complete.

The General Electric Company has an apprentice system, most of the graduates remaining with the company. There is an alumni association of graduates, which holds regular social and educational meetings.

The American Locomotive Company have had apprentice training for eleven

years, and 53 per cent of those trained remained with the company. An apprentice club is maintained to provide social life for the boys.

The Thomas Maddock's Sons Company reported that 90 per cent of their apprentices remained with the company after the completion of training. The courses cover five years. All apprentices are segregated in one department, where they are supervised and instructed by a foreman.

The Westinghouse Electric and Manufacturing Company, Lester, Pa., have conducted apprentice courses for about thirty years, most of the graduates remaining with the company.

The National Cash Register Company reported that in 12 years experience 48 per cent of their apprentices remained with the company, about 10 per cent attaining foremanships.

The Bullard Machine Tool Company reported a loss of about 22 to 25 per cent of the apprentices trained by the company.

The Atcheson, Topeka and Santa Fé Railway established apprentice schools over 13 years ago. Since that time 1539 skilled mechanics have been graduated for the shops and round houses, fully two-thirds of this number and 90 per cent of last year's graduates being still with the company. Some 220 have been promoted to positions as foremen and master mechanics.

The Westinghouse Air Brake Company have conducted apprentice courses since 1902. Since then 81 apprentices have graduated out of 155 indentured, 50 of the indentures being cancelled for various reasons. Twenty-eight graduates remain with the company, six holding executive positions. The course is always full, 24 being the largest class allowed. Practically, all graduates are assigned to tool-room work for which recruits are otherwise hard to obtain.

The American Bridge Works start each alternate year a new class of ten in the drawing course of four years,

almost all finishing the course, and half the number remaining with the company.

The Winchester Repeating Arms Company graduates 50 apprentices yearly, 65 per cent remaining in the service of the company, and 12 per cent occupying executive positions.

The Warner and Swasey Company report a large number of their apprentice graduates attaining responsible positions either in their own plants or with other companies. These men were all trained as machinists.

APPRENTICESHIP ON U. S. RAILWAYS.

Among other changes effected in the management of railways during the period of Government control, some companies were compelled to discontinue their school work. Shop training was continued, but with the necessity for a reduction in working forces many graduate apprentices were laid off and the results of training were thus nullified. Since the return of the roads to their owners there has been an attempt to return to normal conditions, but since the companies are required to recognize seniority in making reduction of forces, and since apprentices are not given seniority before graduation, it results that the first men to be laid off during trade depression are the recent apprentice graduates. Another rule limits the number of apprentices to one for each five mechanics. When forces are reduced apprentices also must be laid off, and training which should be a continuous process is greatly impeded. Moreover the rates paid to apprentices have been raised between 300 and 400 per cent over those of 1916, so that every minute of an apprentice's time has to be utilized for productive work. It is anticipated, however, that with the resumption of normal business conditions the demand for skilled mechanics and men with leadership qualities will increase; the need for apprentice courses will become more evident as the only practical method for filling the depleted ranks of the working forces in the railway shops.

INDUSTRIAL TEACHERS' SCHOLARSHIPS IN NEW YORK STATE

IN an article printed elsewhere in this issue (page 1013) reference is made to an Act passed in New York State in 1920, making further provision for the education of children over the regular school age, and to the trade schools now in operation in the same state. In 1920 that Legislature also passed an Industrial Teachers' Scholarship Act providing \$50,000 annually for the training of industrial, trade and technical teachers. This measure was designed to improve the teaching personnel in the day and evening vocational schools and in the part-time schools. Twenty-five men are annually accepted for scholarships, those with dependents receiving \$2,000 and those without dependents \$1,500. The scholars pursue a one-year intensive course at the State Normal School at Buffalo. The "Vocational" division of the State Department of Education determines from year to year the kinds of trades from which men shall be selected for scholarships. Applicants are required to have five years' technical experience in some occupation in one of these selected trades, to be between the ages of

21 and 36 years, to be residents of the state and United States citizens, and to have a good general education. The committee which examines applications is composed of three representatives from each of the following organizations: The State Federation of Labor, the Associated Industries, and the State Department of Education. Scholarships were awarded in the initial year to men in the following occupations: automobile repairing, machine shops, electrical work, sheet metal work, printing, pattern making, baking, textile work, industrial chemistry, architectural drafting, electrical designing, structural designing. Each scholar devotes full time to the work of the course. The subjects taught are as follows: 1st term: Trade analysis; English; Trade Mathematics; Trade Science; Mechanical Drawing or Shopwork; Theory, principles and problems of Vocational Education: 2nd Term: Trade Analysis; Public Speaking; Teaching industrial or technical subjects; practice teaching; Hygiene and accident prevention; Industrial history and economics.

ANNUAL REPORT OF DISTRICT OF COLUMBIA MINIMUM WAGE BOARD

THE third annual report of the Minimum Wage Board of the District of Columbia, covering the year 1920, was summarized in the June issue of the United States *Monthly Labor Review*. The report states that approximately 17,000 women come under the minimum-wage law potentially, and that 10,900 were covered by wage orders at the end of the year. A complete pay-roll inspection was made, and various reports were obtained from employers to ascertain the degree of compliance with the law.

In 50 cases of first violation, affecting 122 individuals, \$2,962 in back pay was collected through the office of the board. Prosecution was recommended in three cases in which the employer refused to adjust back pay. Learners' certificates were issued in 2,304 cases, and special licenses in 23.

The wage survey of employments not covered at the beginning of the year secured pay-roll records for 2,327 women. Of these 247 were employed

as car cleaners by transportation companies, only two receiving less than \$18 a week, 83 per cent being rated at \$21.60. This group was therefore regarded as already earning a living wage and was dismissed from further consideration. Of the 2,080 women remaining, 549, or 26.4 per cent, received less than \$9 per week; and 365, or 17.6 per cent, \$9 and under \$10. The number receiving \$10 and under \$11 was 261, or 12.6 per cent; \$11 and under \$12, 137, or 6.6 per cent; 420, or 20.1 per cent, received \$16 and over. The industries covered were laundry and dry cleaning, operation and care of office and other buildings, and manufacturing, more than half (1,190) being employed in the first-named occupation. As a whole, practically 80 per cent of these women received less than the \$16 minimum which had been tentatively adopted as the minimum cost of living. More than one-half of the women employed in the care of office and other buildings received less than \$9 per week, due it is explained to the small number of hours worked per day, though the hourly wage was low, being less than 25c per hour. The manufacturing industry is better paid, 47.5 per cent receiving \$16 and over, and but 25.3 per cent receiving less than \$12. The comparatively high rate paid here is said to be "largely due to the volun-

tary adoption by a considerable number of employers of the \$16.50 wage rate established in the mercantile industry." Competition and a desire for competent employees were felt to be largely responsible for this.

The effects of the law are summarized as having produced an immediate material increase in wages, followed by a more gradual increase; the minimum has not tended to become the maximum, over 40 per cent of the women coming under wage orders now receiving more than the minimum; there has been no tendency on the part of the employers to substitute learners for experienced workers on account of lower rates, no tendency to discharge learners when entitled to the minimum; no tendency to substitute minors for adult workers, the percentage of minors employed showing a decrease; no appreciable displacement of women by men, nor any considerable decrease in the number of women employed; there has been a tendency to raise wages in other industries not now covered by orders; and "in general, substandard workers have not been adversely affected by the minimum wage law." On the whole, "the board feels justified in concluding that the minimum wage law is accomplishing the purposes for which it was enacted."

THE COAL MINING INDUSTRY IN GERMANY

LABOUR and production in the Ruhr Coal field of Germany from 1918 to 1920 has been made the subject of inquiry by the International Labour Office, Geneva, and the results of the inquiry have recently been published. These mines situated in the Rhenish-Westphalian basin are the most important in Germany, having produced in 1913 over 62 per cent of the total production of coal in the country. In that year the quantity of coal produced in this district was 114,832,844 tons, but

in 1919 it fell to 71,160,280 tons. It is stated that such a divergence between the amount produced before and after the war threatened to have the most serious effects on the world's economic and political life, as in 1913 Germany exported 35,000,000 tons of coal, but in 1919 she had no surplus for export, and the question whether she was in a position to deliver the quantities required by the Versailles Treaty was causing acute anxiety.

A summary of the facts collected in

this inquiry shows that since the beginning of 1920 efforts had been made by the Prussian and German Governments and by employers' and workers' organizations to increase the output of these collieries with the result that in 1920 the production had risen to 88,306,182 tons, reducing from 44 to 26 million tons the difference between the present and pre-war output.

The work of the government was chiefly the creation of a centralized system of employment exchanges for miners and generally organizing adequate and attractive housing accommodation. The miners agreed to an increase in the number of hours' work per week from 42 to 49, and the numbers of workers rose from 408,585 in 1913 to 532,798 in December, 1920. These new workers were drawn from all parts of Germany and from the most diverse branches of industry, a considerable proportion having come from industries where lack of employment prevailed. Many sailors formerly in the German navy were attracted to the work by propagandist articles in the newspapers. A large proportion of these workers were therefore unskilled as miners; though both the miners' and the mine-owners' organizations have

spared no efforts, apparently, in training the new hands. Other efforts of the employers were more particularly directed to sinking and working new shafts, and to investigating methods for the more economic use of fuel generally. It is expected that these efforts will produce a decided improvement in the output of coal in the Ruhr district. The immediate results are said to have been mainly due to the agreements concerning extra shifts which were adopted in spite of opposition from the revolutionary sections, and which can only be maintained so long as the trade unions have the upper hand of the Communists. There does not seem to be any immediate danger of the Communists winning as the immense majority of miners are bent on helping the Ruhr to recover its former commercial prosperity. The condition of the Ruhr mining industry, nevertheless, is still critical owing to the danger of the conditions of life for the miner becoming worse through rising prices following the transition from the system of rationing to the free sale of provisions. The latest reports, however, show that the cost of living in the Ruhr district has fallen slightly since the beginning of the present year.

SOME TYPICAL METHODS OF WAGE PAYMENT

THE present article describes briefly some various typical methods for the payment of wages for work done that have become either established or the subject of experiment by the industrial world. The methods outlined include a brief summary of the "Payment-by-Results" system, adopted in 1917 by the Priestman Brothers, Limited, of Hull, England, and the Co-partnership scheme instituted in 1909 by Lever Brothers, Limited, of Port Sunlight, England.

TIME-RATE METHOD

The oldest and most common method of wage payment is the time-rate, usually called the day rate. The unit of time may vary from an hour to a week or a year; but in most cases labour is paid for at an hour rate, with extra compensation for overtime.

Although in theory a time wage is simply a payment for an employee's service within a stated period, in practice it will be found that the remuneration

is given for a fairly definite amount of work of customary quality and accuracy.

PIECE-RATE SYSTEM.

Straight piece-rate is the first of the methods of payment by production to supplant the time-rate method. The workman is paid for the amount of work performed and not the time expended. In actual practice, however, just as the time-rate implies some indefinite "piece" basis, so the piece-rate implies some indefinite "time" basis; for example, an employer, in fixing a piece-rate, is largely guided by his estimate of the operative's probable earnings per hour, day, or week.

HALSEY PREMIUM PLAN.

The Halsey premium, commonly called the Premium Bonus, is a combination of the time rate and the piece rate systems. With this method, if a man improve on the standard time

(which is commonly based upon the average day-work record, and not upon any scientific time study), he is given not the whole of the time saved as under the piece-rate system, but a definite portion of it, commonly one-third or one-half. Again, if he lose time, that is, if his time exceed the standard set for the job, he does not (as under the piece-rate method) sacrifice the hours in excess of the standard time; but he still receives a time wage for all the time worked by him; for the Halsey premium carries with it a guaranteed time wage. To take a practical illustration: supposing the time set for the job is ten hours, and the work be completed in eight hours, the operative would be given, in addition to his eight hours at time-rate, a portion (probably 33-1/3 per cent or 50 per cent) of the two hours saved. The following table prepared by *Bloomfield's Labour Digest* illustrates more completely the workings of the Halsey plan:—

WAGES: 50 CENTS PER HOUR.

PREMIUM: ONE-HALF TIME SAVED.

No. of units made	HOURS			COMPENSATION				LABOUR COST		
	Standard	Actual	Hours saved	Time wage	Premium	Total wage	Earnings per hour	No. of units made	Labour cost	Unit cost
4	4	4	0	\$2.00	.00	\$2.00	\$.50	4	\$2.00	\$.50
4	4	3	1	1.50	.25	1.75	.58	4	1.75	.43¼
4	4	2	2	1.00	.50	1.50	.75	4	1.50	.37½
4	4	1	3	.50	.75	1.25	1.25	4	1.25	.31¼

THE ROWAN PREMIUM PLAN.

The Rowan system follows the Halsey premium in paying a portion of the time saved, but, instead of giving to the worker a fixed percentage of the saving, it

adds to his actual time a percentage identical with that by which the standard time is reduced. Thus, if the employee performs a task in eight hours, the standard time having been fixed at

ten hours, he would get a premium of two-tenths or 20 per cent of 8 hours—1.6 hours. (It should be noted that the premium percentage is applied to the time actually worked, not to the time saved). So, in the case quoted, the premium rate, 20 per cent, is added to the hours worked, i. e. to 8 hours. (It would not be correct to take 20 per cent of the time saved, i. e. of the 2 hours, and call that the premium). If it be remembered that—

when one-quarter of time is saved, time and quarter is paid,

when one-half of time is saved, time and half is paid,

when three-quarters of time is saved, time and three-quarters is paid,—

there will be avoided the liability to confuse the Rowan* method of calculation with that of the Halsey premium.

If the standard time be exceeded, the worker gets time-wage for the whole of his time; in other words, the time-wage is guaranteed.

The advantage of this method of paying a premium is held to consist in the marked incentive it gives to the employee in the early stages of saving of time. With a standard time of ten hours, successive reductions of one, two, three and four hours leave him with a premium higher than that obtained for similar reductions under the 50 per cent Halsey premium. (The worker's gain would, of course, compare more favourably still with that under the 33 per cent Halsey premium). At five hours, i. e., at a reduction of 50 per

cent in the standard time, the 50 per cent Halsey and the Rowan offer an identical premium to the employee who, at this point, increases his earnings by 50 per cent.

The following is a typical example of the benefit to an employee if he reduces the standard time under the Rowan premium:—

STANDARD TIME=10 hours.
TIME RATE=50 CENTS PER HOUR.

Time taken	10 hours	8 hours	5 hours	3 hours
Time wage.....	\$5	\$4	\$2.50	\$1.50
Premium.....		\$0.80	\$1.25	\$1.05
Wage plus premium	\$5	\$4.80	\$3.75	\$2.55
Wage per hour increased by.....		20%	50%	70%

THE DIFFERENTIAL PIECE-RATE (TAYLOR) PLAN.

The differential piece-rate is a method of remuneration which was introduced in the United States by the late Dr. Taylor, the founder of Scientific Management, with the aim of encouraging a maximum production. Its origin, however, can be traced to Lancashire, England, where, many years ago, it was associated with the cotton industry. The principle of the system lies, of course, in the adjustment of reward to performance. For a high output a high piece - rate is given ; but this high rate is sacrificed by the worker if any part of his work fails to attain a predetermined standard in respect of quality or accuracy. The method of payment is based on careful time studies as a preliminary to fixing

*The Rowan premium, according to D. F. Schloss, "exceeds time-wage by the same proportions as that which the saving in time effected bears to the standard time."

any rate of compensation. The task or number of units which a worker can produce in a given time is determined and taken as a standard. Two piece-rates are then set for the work, a high rate

if the worker does his task in the standard time or less, and a lower rate if he takes longer than the standard time.

The working of the system in its simplest form is illustrated below:

LOW RATE: 40 CENTS PER PIECE.

HIGH RATE: 50 CENTS PER PIECE

No. of units made	HOURS			COMPENSATION		LABOUR COST		
	Standard	Actual	Time saved or lost	Wage earned	Rate per hour	No. of units made	Labour cost	Unit cost
4	4	6	-2	\$1.60	\$.26 $\frac{2}{3}$	4	\$1.60	\$.60
4	4	5	-1	1.60	.32	4	1.60	.52 $\frac{1}{2}$
4	4	4	0	2.00	.50	4	2.00	.50
4	4	3	+1	2.00	.66 $\frac{2}{3}$	4	2.00	.37 $\frac{1}{2}$

THE TASK-WITH-BONUS (GANTT) PLAN.

Another system of remuneration associated with the Taylor plan is the Task-with-bonus, which originated with Mr. H. L. Gantt, who was associated with Dr. Taylor for some years. The Task-with-bonus was designed to be a preliminary system when conditions were not ready for the differential rate; it has, however, since established itself as a permanent method.

The Task-with-bonus guarantees the normal time-rate and, in addition, for the achievement of any specific task under all its conditions, pays a bonus which is usually a substantial percentage of the day-wage. The percentage varies greatly with the nature of the work and the demands made upon the physical and mental resources of the worker. For average conditions an addition of about 40 per cent to the time-rate is given, but where severe bodily exertion is entailed, another 10 per cent or 20 per cent is paid. Where delicate and expensive machinery is used the bonus is sometimes as high as 100 per cent. The system works as follows: Suppose the standard

time is 10 hours and the bonus for success is 40 per cent; and that the employee succeeds in performing the task without deviating from his schedule in 8 hours. One way of rewarding him for doing this would be, still to pay him the standard time but to pay the bonus as 40 per cent of the time actually taken:—

For the Task:	For the improvement on task:
10 hours at 50c. ... = \$ 5	10 hours at 50c. ... = \$5.00
Bonus, 40 per cent. = 2	Bonus, 40% of 8 hours at 50c. ... = 1.60
<u>\$ 7</u>	<u>\$6.60</u>

For the standard performance the employee would thus receive 70 cents per hour; for the improvement on standard, $\$6.60 \div 8 = 82\frac{1}{2}$ cents per hour; an increase in earnings of nearly 18 per cent.

It should be noted that if the worker fails to do the task within the standard time fixed he receives the basic day rate, which is guaranteed to him. This plan of wage payment, therefore, works exactly like a day rate up to the time the worker turns out the standard output, and from that time on like a piece rate.

QUALITY BONUS PLAN.

The Quality Bonus Plan is more usually an adjunct of the Task-with-bonus-plan. It is used to some extent in textile manufacturing trades, particularly in knitting mills.

The Quality bonus is paid in addition to the Production bonus for quantity. Inspector's reports form the basis on which the Quality bonus is paid. A small percentage for possible defects is allowed of say 6 per cent. Any workers with lower percentages of defects get a bonus based on a percentage of their earnings for the pay period. The percentages for the Quality bonus may vary in different departments of the same factory according to the nature of the work. The following table is illustrative of a Quality bonus schedule in a textile factory :—

Percentage of defects	BONUS TO BE PAID		
	Dept. A.	Dept. B	Dept. C.
6% or over.....	None	None	None
5% to 6%	2%	3%	1%
4% to 5%	4%	6%	2%
3% to 4%	7%	9%	4%
2% to 3%	10%	12%	6%
1% to 2%	12%	15%	9%
Less than 1%.....	15%	18%	12%

THE EMERSON EFFICIENCY PLAN.

The Emerson Efficiency bonus, which originated in the United States where it is said to be in successful operation, is perhaps more particularly associated with railway repair-shops and with fac-

tories where it is extremely difficult to standardize materials, processes and conditions. This plan has for its basis a guaranteed time-wage and sets up a standard of efficiency which is possible of attainment by a worker with good average ability. For the attainment of this standard, which is called "100 per cent efficiency", a bonus is awarded. The amount of the bonus is commonly 20 per cent of the time-wage. Thus, if the performance of a task in 10 hours were the standard of efficiency, the employee would receive 12 hours' pay, if he succeeded in attaining the standard. Now a feature of this system is that the worker is encouraged by a graduated bonus-scale to persevere in his effort, even though he realizes that he is not going to reach the 100 per cent point. This encouragement begins so soon as the worker improves upon a 66-2/3 per cent efficiency; that is to say, when, for example, he begins to improve upon the time of 15 hours for a 10-hour job. The stimulus at first is very small. Supposing the task to be performed in 14½ and 14 hours — efficiencies of 69 per cent and 71.4 per cent — the bonuses paid are approximately 0.1 per cent and 0.4 per cent. If the time taken be 13 hours — 76.9 per cent efficiency — the bonus is advanced to 2 per cent. After this point, at 12½, 12 and 11½ hours — efficiencies of 80 per cent, 83 per cent, and 87 per cent — the bonuses are 3.3 per cent, 4.9 per cent, and 7.6 per cent respectively. At 11.1 hours — 90 per cent efficiency — the bonus is 10 per cent. From this point, for each additional 1 per cent efficiency 1 per cent of bonus is paid, so that at 100 per cent efficiency the bonus is 20 per cent, at 110 per cent efficiency 30 per cent, at

120 per cent efficiency 40 per cent, and so on.

The unit of efficiency is determined for a period of time, such as a day, week or month — usually for a full pay-roll period and not for individual operations or jobs. The efficiency unit is obtained

by dividing the total actual times into the sum of the standard times.

The following table illustrates the working of the Efficiency bonus, where the guaranteed time-wage is 50 cents per hour :—

HOURS			COMPENSATION				LABOUR COST			
Standard	Actual	Per centage effi- ciency	Time wage	Bonus		Total wage	Earnings per hour	No. of units made	Labour cost	Unit cost
				Per cent time wage	Amount					
4	6	66½ %	\$3.00	0%	\$0.00	\$3.00	\$.50	4	\$3.00	\$.75
4	5	80 %	2.50	3.3%	0.08	2.58	.52	4	2.58	.65
4	4	100 %	2.00	20%	0.40	2.40	.60	4	2.40	.60
4	3	133 %	1.50	53%	0.80	2.30	.77	4	2.30	.58
4	2	200 %	1.00	120%	1.20	2.20	1.10	4	2.20	.55
4	1	400 %	.50	320%	1.60	2.10	2.10	4	2.10	.52

PAYMENT-BY-RESULTS SYSTEM OF PRIESTMAN BROTHERS.*

The scheme of co-operative production, or "payment by result", adopted in April, 1917, in the machinery factory of Priestman Brothers, Limited, of Hull, England, was reviewed at some length in the LABOUR GAZETTE issues of May, 1919, and August, 1920. The leading features of the plan are here briefly recapitulated:

A "standard of output" is established, being a fixed quantity of finished product (in this case machinery reckoned by weight) which a certain number of men are capable of turning out at ordinary day rates. Then, if this standard can, by means of better co-ordination and collective effort, be increased, without any addition being made to the number of workers or hours of employment,

the day rates of wages are supplemented by a percentage equal to that by which the output exceeds the standard. Careful details of every article completed are recorded, the record requiring confirmation by the Works Committee, and if it is approved the result of the four weeks' work is then posted in the shops, every employee receiving with each payment of his four subsequent weeks' wages a percentage on his individual earnings, the percentage figure being determined by the extent to which the output of the whole plant for the month is found to exceed the "standard output".

Minor additions to, or reductions in, the staff or plant do not affect the standard of output, but if substantial additions to the working forces are made, or if there is any appreciable reduction either in the number of workers or in the hours worked, then the standard weight is correspondingly increased or reduced, the new standard weight being mutually agreed upon.

*Interesting articles on this system appeared in *Factory*, the *Magazine of Management*, issues of February 15, and March 15, 1920.

When orders begin to fall off reductions in payments to workers are of course inevitable as they would be under piece work, overtime and all other plans. However, under co-operative production the necessary reduction in wages and hours is distributed over the whole staff, and no worker under this system is suspended from employment until the point is reached at which the total average payments to workers fall below the average level of the day wages in the district.

CO-PARTNERSHIP SCHEME OF LEVER BROTHERS, LIMITED.

The co-partnership scheme of Lever Brothers, Limited, Port Sunlight, England, commenced to operate in 1909. The following information with respect to the scheme is obtained from a prospectus issued by the Company in 1919.

"After payment of all Preference and Preferred Ordinary dividends and 5 per cent on the Ordinary shares in respect of any year, further amounts available for distribution are subject to the terms of a Co-partnership Trust Deed made in 1909 and Supplemental Deeds thereto under which employees of the Company and its Associated Companies participate on Co-partnership Certificates held. The terms of the Deeds do not affect the rights of the Preference and Preferred Ordinary shareholders."

The net remainder of profit available for distribution is "divided between the holders of ordinary shares of the Company and the trustees of the Co-partnership Trust in proportion to (a) the total amount paid-up or credited as paid-up for the time being on the issued ordinary shares of the Company and (b) the total

nominal amount of the 'partnership certificates then issued and outstanding, and entitled, for the time being, to participate in the distribution of dividends under the scheme."

It is noteworthy that, in addition to conditions of age and service, a participant in this scheme must undertake "not to waste time, labour, materials, or money in the discharge of his duties to the Company but to loyally and faithfully further the interests of the Company to the best of his skill and ability."

The amount of Partnership Certificates granted is based on the annual salary, and all classes of employees from directors to labourers participate in the scheme. There is a provision by which certificates are cancelled in case of neglect of duty, flagrant inefficiency, disloyalty to the Company, etc.

"In the normal way of retirement the Partnership Certificates are exchanged for Preferential Certificates which shall be "either ten times the average dividends paid in respect of the former director or employee's Partnership Certificates during the three preceding years, or the same nominal amount as that of the Partnership Certificate so exchanged, whichever shall be the lesser."

In 1918 over £200,000 was devoted to the payment of Co-partnership dividends. The number of participants in 1918 is not given, but some indication of the figure may be obtained from the number of co-partners participating in 1912, which was 1906.

It should be stated that there are, of course, other co-partnership schemes in operation on both sides of the Atlantic, which vary in respect to the distribution of profits.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE FOUR-WEEK PERIOD MAY 23 TO JUNE 18, 1921

REPORTS from Employment Offices to the Dominion headquarters of the Employment Service of Canada for the four-week period ended June 18, 1921,

show a decrease in the number of placements, when compared with the returns for the preceding period. The offices reported that 26,941 references were

made to regular positions, and that 19,367 placements were effected. Placements in regular employment reported during the preceding period totalled 22,574, representing a decrease during this period of 3,207 placements. During the period under review the placements were reported by weeks as follows; week ended May, 28, 4,268; week ended June 4, 4,633; week ended June 11, 4,881; week ended June 18, 5,585: In addition to the above the offices reported a total of 5,102 placements in casual work (employment of duration of one week or less is termed casual) as compared with 5,867 reported during the preceding period.

The accompanying chart presents graphically the applications, vacancies and placements week by week since the beginning of October, 1919. The chart indicates that there was a steadily increasing number of vacancies and placements reported throughout the period. Applications, however, show a slight falling off during the last week of the period.

The statistical table accompanying this report presents in some detail the work of the office for the four-week period

ended June 18. The report indicates that at the beginning of the period there were 25,202 applicants unplaced, as compared with 21,607 on June 18 after allowance had been made for cancellations and placements. The number of vacancies remaining unfilled on May 23 totalled 4,448, as compared with 5,331 vacancies unfilled on June 18. On comparing the above with the corresponding figures for last year it may be of interest to note that on June 15, 1920, the number of applicants unplaced totalled 4,931 and the number of unfilled vacancies was 10,681.

During the period under review the number of applicants reported at the offices totalled 36,282, of which 28,055 were men and 8,227 were women. The number of vacancies notified by employers to the Service during the period totalled 29,335, of which 20,381 were for men and 8,954 were vacancies for women. When comparing these figures with those for the preceding period it will be noted that there was a decrease in registration of 6,031 applicants and of 4,540 vacancies notified.

EMPLOYMENT CONDITIONS IN CANADA FROM JUNE 11 TO JULY 16, 1921, AS REPORTED BY EMPLOYERS

WEEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada during the five weeks from June 11 to July 16, showed on the whole an upward trend in the volume of employment, although at July 1, the recovery was only sufficient to bring the volume of employment up to the point registered at the beginning of the year. The weekly index number of employment for the five weeks averaged 87.9 as compared with an average of 108.2 for the same period last year. The accompanying chart shows the weekly percentage change in the number of persons on payrolls since the base week (January 17, 1920), as received each week.

In the first week of the period the movement of primary importance was an expansion in railway construction. Ontario and Alberta accounted for the bulk of this increase, Quebec and Manitoba showed gains on a considerably smaller scale, while there was practically no change in this industry in the Maritime district and Saskatchewan. Substantial expansions also were recorded in water transportation and in lumber. In the former the expansion occurred mainly at Upper St. Lawrence ports, although both Pacific coast and Great Lakes points also showed gains; a decrease was registered at Maritime ports. The expansion in lumber occurred in all provinces, the largest increases being in Nova Scotia, Quebec and Ontario. Moderate expansions were exhibited by a number of industries. Coal mining made gains in Nova Scotia, distributed fairly uniformly over all fields. Alberta reported only minor increases. Building construction continued the slow improvement of the previous week, principally in Ontario and the Prairie Provinces. The canning industry in Ontario continued its seasonal expansions. The leather industry showed gains in Ontario supplemented by minor increases in Quebec and British Columbia. Railway transportation exhibited small gains in nearly all provinces, those in Quebec being slightly the largest. The most important decrease in employment was experienced by the iron and steel industry, largely in automobiles, steel shipyards and agricultural implements. Small hardware also sustained losses, but crude, rolled, forged and wired products experienced gains. These contractions chiefly affected the province of Ontario. Declines on a smaller scale occurred in

logging in Quebec, musical instruments, chemical products, and electric apparatus in Ontario, and electric railway transportation in Manitoba.

In the second week of the period there was a contraction in the iron and steel group involving more than 11,000 workers, due mainly to temporary shut-downs in Ontario and Quebec railway shops. Other branches of this industry which suffered a decline were crude, rolled and forged products, agricultural implements, machinery other than vehicles and steel shipbuilding and repairing. On the other hand there were minor increases in heating appliances plants. The only other decline of importance in industry occurred in logging in the Ontario-Quebec district, due to further closing down of camps. Minor contractions occurred in lumber, principally in Ontario mills and carriage factories, and in retail trade, largely in Ontario and Quebec. The industries which showed the most marked improvement over the previous week were railway construction, pulp and paper products, canning and sugar refining. The first of these showed its gains chiefly in the Prairie provinces; the second recorded increases mainly in the Ontario-Quebec district, largely in fibre board; the third involved seasonal expansion in fruit and vegetable canning in Ontario and British Columbia and sugar refineries in Quebec. The textile industry showed moderate gains chiefly in garments and personal furnishings, hosiery and knit goods in Ontario factories. Moderate increases were recorded in water transportation, divided between Nova Scotia and British Columbia. In coal mining, Nova Scotia fields registered minor losses, which, however, were more than offset

by gains in Alberta, the balance as between the two districts being favourable. Hotel service continued to show seasonal increase, and telephone operation recorded a minor expansion. Building construction showed very little change except in the province of Quebec; even in that province only nominal increases occurred.

During the week ended July 2, there was a favourable balance of employment caused almost wholly by increases in the iron and steel group, due to re-opening of railway shops mainly in the province of Quebec. The only other noticeable expansion occurred in railway construction, principally in Manitoba. Supplementary increases on a small scale were shown in railway transportation, practically confined to Quebec. The outstanding contractions in employment occurred in the woodworking and sawmill industries, pulp and paper, logging, and building construction. British Columbia accounted for the bulk of the losses in sawmills; to a considerable extent this was due to temporary shutdown. Pulp and paper products declined in the Ontario-Quebec district. The logging industry continued to show seasonal decrease, chiefly in Ontario and British Columbia. The losses in building construction were shown principally by Ontario and Manitoba. The only other contractions of note took place in water transportation, on the Pacific coast and to a lesser extent at Maritime ports. Losses on a small scale were exhibited by

textiles, in the Ontario-Quebec district, principally in garments and personal furnishings; by wholesale trade, largely in Quebec; by non-metalliferous mining, chiefly salt and asbestos in the Ontario-Quebec district.

During the fortnight ended July 16 all the provinces without exception showed moderate improvement. There was a marked upward movement in iron and steel products, confined almost wholly to the province of Quebec, and due mainly to re-opening of railway shops. An expansion of about two per cent took place in pulp and paper products in Quebec and Ontario. Alberta coal fields reported an expansion in employment, and fields in Nova Scotia and British Columbia together aggregated an equal amount of increase. Railway transportation made substantial gains, chiefly in Ontario and Quebec; the Prairie Provinces also experienced increased employment in this industry. Water transportation, more especially at Upper St. Lawrence ports, afforded considerably less employment. Building construction on the whole showed very little activity, although the Prairie Provinces registered small advances. Railway construction and maintenance reported the largest percentage increase of any industry, occurring chiefly in Ontario and Quebec, and in a lesser degree in the Prairie Provinces. Rubber and textile firms reported minor shrinkages about equal in value. Electric apparatus firms in Ontario reported considerably lighter payrolls.

UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF JUNE, 1921, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of June, 1921, and is based on returns received from 1,511 labour organizations with a combined membership of 181,552 persons. For all occupations reporting, 13.15 per cent of the members were out of work, as compared with 15.46 per cent at the end of May, 2.14 per cent on June 30, 1920, 2.58 per cent on June 30, 1919, .41 per cent on June 30, 1918, 1.20 per cent on June 30, 1917, and 2.13 per cent on June 30, 1916. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness, or as a direct result of strikes or lockouts, are

not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployed is based, it should be understood that the percentage of unemployment figures have reference only to those unions reporting.

The accompanying chart shows the curve of unemployment by quarters for 1916-17-18, and by months for 1919, 1920 and to June of this year. It will be seen that the curve has shown a slightly downward tendency for the last three months, the percentage of idleness dropping from 16.48 in March to 13.15 at the end of the month under review.

That the percentage of unemployment in June showed a small decline as com-

pared with the preceding month, may be attributed to slightly increased activity in the manufacturing and mechanical industries, in transportation, and building and construction. The mining group, however, showed more unemployment. The increased slackness as compared with June of previous years was of a general character, all groups being affected by the prevailing dullness.

Table I on this page summarizes the returns by provinces. Slight reductions in the numbers out of work were reported by unions in Quebec, Ontario, Manitoba, Saskatchewan and Alberta in comparison with the returns for May. On the other hand, Nova Scotia, Prince Edward Island, New Brunswick and British Columbia registered somewhat less activity. As compared with June of

previous years, there were large increases in unemployment in all provinces.

The percentages of unemployment reported in the different occupations and industries are indicated in table II on page 1034.

Unemployment in the manufacturing and mechanical industries, as indicated by 357 unions with a combined membership of 42,698 persons, was somewhat less prevalent than in May, 19.83 per cent of the members being out of work as compared with 23.88 per cent in the preceding month. As compared with June of the previous years, however, the number of unemployed showed a substantial increase, only 2.17 per cent of the members having been out of work in June, 1920, 3.16 per cent in June, 1919, .42 per cent in June, 1918, 1.79 per cent in June 1917 and 1.1 per cent in June, 1916. The slight decline in slackness since the preceding month may be attributed to somewhat greater activity in metals, machinery and conveyances, printing, publishing and paper goods, woodworking and furniture, leather, boots, shoes and rubber, jewelry working and oil refining. On the other hand workers in food, tobacco and liquors (notably sugar refinery employees), textiles, carpets and cordage, clothing and glass bottle blowing, were less fully employed than in May. Pulp, paper and fibre makers reported no unemployment, but a large proportion of their members were on strike. Substantial increases in idleness as compared with June of preceding years were registered by workers in all these groups, with the exception of woodworking and furniture, in which the percentages of unemployment reported for June, 1919, 1918, and 1916 exceeded that recorded for the month under review, and of leather, boots shoes and rubber, in which the number unemployed was somewhat smaller than in June of last year and of 1917.

Considerable short time, in addition to the total unemployment, was reported

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES.

by a large number of unions included in the manufacturing and mechanical groups.

Reports were tabulated from 652 organizations of transportation workers, with an aggregate membership of 75,759 persons, of whom 4,783 members or 6.31 per cent were unemployed, as compared with 9.43 per cent of idleness in May, 1921. On the other hand the percentage for June of this year largely exceeded the percentages reported in the corresponding months of previous years, when 1.81 per cent for June of 1918 was the most pronounced. Steam railway employees (whose returns constituted about 82 per cent of the entire transportation group reporting) were slightly more fully engaged than in the preceding month, showing an unemployment percentage of 7.48, as compared with 10.86 in May. This decline in slackness was of a general nature, being indicated by a large proportion of the unions classified under the group. There was, however, a pronounced increase in unemployment as compared with June of preceding years in this group. Street and electric railway employees, navigation workers and teamsters and chauffeurs reported more activity than in May. The first and last named unions, however, reported larger percentages of unemployment than in June of previous years with the exception of those in 1919, while navigation workers were less fully employed than in the corresponding month of any year in the record. In addition, reports were tabulated from 12 associations of longshoremen covering 6,996 members, of whom 1,369 or 19.6 per cent were out of work, as compared with 24.7 per cent at the end of May, with 9.47 per cent at the close of June, 1920, 2.8 per cent in June, 1919, 5.96 per cent in June, 1918, 2.31 per cent in June, 1917, and 3.43 per cent in June, 1916. These returns, on account of the casual nature of longshore work, are not included in the accompanying tabulations. A large number of the above unions reported a substantial amount of short time.

In the mining, quarrying and refining of ores group, as reflected by 39 unions with a combined membership of 11,354 persons, the percentage of unemployment was 16.83, as compared with 13.15 per cent in May, 1921, and with less than one per cent in June of previous years. Most of this unemployment occurred among the mine workers in Nova Scotia, but there was also considerable inactivity in the coal mines of Alberta and the asbestos mines in Quebec. Quarry workers and mill and smeltermen, as registered by two unions and one union respectively, reported slight declines in idleness since the preceding month, with large increases over June of previous years. Many unions of miners reported the majority of their members working on short time.

The percentage of unemployment among workers in the building and construction group stood at 13.14, as compared with 15.82 per cent in May, 1921, 4.28 per cent in June, 1920, 4.71 per cent in June, 1919, 1.57 per cent in June, 1918, 3.21 per cent in June, 1917, 8.6 per cent in June, 1916. Bricklayers, masons and plasterers, carpenters and joiners, electrical workers, granite and stone cutters, tile layers, lathers and roofers, bridge and structural iron workers, steam shovel and dredgemen and hod carriers and building labourers registered slight increases in activity as compared with the preceding month, but in most cases members of these unions were less fully employed than in June of preceding years. Painters, decorators and paperhangers and plumbers and steam fitters, showed larger percentages of unemployment as compared with May, 1921, and also as compared with June of previous years.

In the public employment group, as reported by 105 organizations with a combined membership of 9,397 persons, no unemployment was reported as compared with a percentage of 5.08 in the preceding month, .02 per cent in June, 1918, and .04 per cent in June, 1917. In the other months used in this article

for comparative purposes no unemployment was reported.

Logging and lumber workers as indicated by two unions with a combined membership of 6,562 persons, reported 3,500 or 53.34 per cent of their members out of work, as compared with 42.23 per cent in the previous month. Figures for comparison with June of other years are not available. This large proportion of unemployed was the result of dullness in the mills and logging camps of British Columbia. Fishermen, whose returns covered 1,782 members, reported a nominal decrease in activity as compared with May, with pronounced declines in comparison with June of preceding years.

Unemployment in the group of miscellaneous trades as reflected by 116 associations with a total membership of 7,994 persons, showed practically no change when compared with May, but there was an increase in idleness over June of other years, 5.32 per cent of the members being unemployed for the month under review in comparison with 5.42 per cent in May, 1921; 2.48 per cent in June,

1920; 3.99 per cent in June, 1919; .49 per cent in June, 1918; .99 per cent in June, 1917; and 3.1 per cent in June, 1916. Retail clerks, as reported by four unions covering 530 members, were slightly less active than in any month used in this article for comparison, though the percentage of unemployment was only 1.51. Hotel and restaurant employees, barbers and stationary engineers and firemen were somewhat more fully employed than in the preceding month, but in almost every case the percentage of unemployment exceeded that recorded in June of other years. Theatre employees and unclassified workers registered a small increase in unemployment over May. The former unions also showed less activity than in June of previous years. The same is true also for unclassified workers with the exception of June, 1919, when the percentage of idleness slightly exceeded that registered in the month under review. considerable short time was reported by a large number of the unions coming under this heading. The tabular statement on pages 1036-37 present the returns in some detail.

EMPLOYMENT OF CIVIC EMPLOYEES IN FIFTEEN CITIES, DURING JUNE 1921

REPORTS from fifteen cities showing the number of civic employees temporarily engaged and the wages paid these persons during the month of June showed increases of slightly over 1 per cent in the number of employees and of 4.7 per cent in the amount of wages paid as compared with the preceding month. In June, 1921, 12,889 persons were tem-

porarily employed and the wages amounted to \$1,206,590.40 as compared with 12,745 employees and an aggregate payroll of \$1,152,841.06 in May.

In comparison with the returns for the corresponding period in 1920 there were increases of about 11 per cent in the number of employees and of nearly 23 per cent in the wages paid, there

having been 11,609 employees with a total payroll of \$1,179,704.27 in June of last year.

St. John, Ottawa, London, Brandon, Moose Jaw, and Edmonton registered increases in the number of persons temporarily employed as compared with both May, 1921, and June, 1920. At Montreal, Hamilton, Vancouver, and Victoria there were declines in comparison with the preceding month, with gains as compared with the corresponding month of last year. The reverse is true for Toronto, Winnipeg and Calgary, where the number of employees for the month

under review exceeded that registered during the preceding month but showed decreases when compared with June, 1920. Regina and Saskatoon reported reduction in both cases.

As to amount of wages paid, St. John, Montreal, Ottawa, Hamilton, London, Brandon, Regina, Moose Jaw and Victoria registered increases both as compared with May, 1921, and June, 1920. In Winnipeg and Calgary there were slight increases in the former with declines in the later comparison. Toronto, Saskatoon, Edmonton and Vancouver recorded decreases in both cases.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS DURING JUNE 1921 AS COMPARED WITH MAY 1921 AND WITH JUNE 1920.

EMPLOYMENT IN THE BUILDING TRADES DURING JUNE, 1921, AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the Building Trades as indicated by the value of building permits issued in fifty-six cities showed a slight decline during June as compared with the preceding month, the total value falling from \$13,-

233,543 in May to \$12,930,499 in June, a decrease of \$303,044 or 2.3 per cent. Prince Edward Island, New Brunswick, Quebec, Manitoba, Saskatchewan and Alberta registered increases in this comparison, that of \$269,322 or slightly

over 58 per cent in Saskatchewan being the largest. Of the decreases registered in the remaining provinces that of \$532,-686 or 8.2 per cent in Ontario was the most marked.

As compared with the returns for the corresponding month in 1920 there was a decrease of \$454,129 or 3.4 per cent, the value for June of last year having been \$13,384,628. Ontario, Saskatchewan and British Columbia showed increases in this comparison, that in Ontario of \$587,014 or nearly 11 per cent being especially large, while of the declines registered in the other sections of the country that of \$627,666 or 17.3 per cent in Quebec was the most pronounced.

Of the larger cities, Montreal and Vancouver reported increases both as compared with May, 1921, and June, 1920, but on the other hand at Winnipeg there were decreases in both comparisons. At Toronto the value of building permits issued showed a decrease as compared with May, but an increase over June of last year; while in Edmonton there was an increase over the preceding month but a decrease as compared with the corresponding month of 1920.

Of the smaller centres Moncton, Three Rivers, London, Windsor, Brandon, Regina, Point Grey, and Victoria registered increases as compared with the previous month and also in comparison with the corresponding month in 1920.

The returns from thirty-five cities formerly used in this report (which are distinguished by asterisks and which are also tabulated separately for statistical purposes) show that the total value of building permits issued by these cities was \$11,839,671 as compared with \$10,-989,570 in May. There was, therefore, an increase of \$850,101, or nearly 8 per cent, as compared with the returns for the preceding month. In comparison with the corresponding month of last year there was a decrease of \$439,828 or over 3 per cent, the value for June, 1920, having been \$12,279,499.

ESTIMATED COST OF BUILDING WORK AS INDICATED

FAIR WAGE CONTRACTS, JULY, 1921

DURING July the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to ten fair wage contracts, of which six were awarded by the Department of Public Works, three by the Department of Marine and Fisheries, and one by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS

Reconstruction of office building of the Headquarters of Military District No. 11, Work Point, (Esquimalt) B.C. Name of contractor, Knott and Jones, Victoria, B.C. Date of contract, June 28, 1921. Amount of contract, \$19,550.

Dredging outer entrance channel, Goderich, Ontario. Name of contractor, William Bermingham, Goderich, Ontario. Date of contract, July 13, 1921. Amount of contract, unit prices: class "A" \$7, class "B" 45 cents (per cubic yard scow measure).

To clean up wholly and entirely of all obstacles, etc., (excepting solid rock) the bed of St. Mary's river to grade elevation, Sault Ste. Marie, Ontario. Name of contractor, The Soo Dredging and Construction Company, Limited, Sault Ste. Marie, Ontario. Date of con-

tract, July 15, 1921. Amount of contract, \$125 per day of working hours deducting \$5 per hour for any one time lost.

Construction of spur line of railway from Esquimalt and Nanaimo to new dry dock at Esquimalt, B.C. Name of contractor, Peter Lyaal and Sons Construction Company, Limited, Montreal, Quebec. Date of contract, July 27, 1921. Amount of contract, unit prices.

Pile bent and decking wharf, Ioco. Townsite, Burrard Inlet, New Westminster District, B.C. Name of contractor, R. Bumstead, Vancouver, B.C. Date of contract, July 16, 1921. Amount of contract, unit prices.

Construction of wharf, Ladysmith, Nanaimo District, B. C. Name of contractor, William Greenlees, Vancouver B.C. Date of contract, July 12, 1921. Amount of contract, unit prices.

DEPARTMENT OF MARINE AND FISHERIES

Two double dwellings, Prince Rupert, B.C. Name of contractor, E. H. Shockley, Prince Rupert, B. C. Date of contract, July 6, 1920. Amount of contract, \$28,644.

One wooden dwelling, Point Lepreau, N. B. Name of contractor, W. F. Fitzgerald, St. John West, N. B. Date of contract, April 22, 1920. Amount of contract, \$5,975.

Reinforced concrete tower, boathouse and slipway, Liscomb, N. S. Name of contractor, G. Y. Grant and Sons, Guysboro, N. S. Date of contract, August 4, 1921. Amount of contract, \$4,400.

DEPARTMENT OF RAILWAYS AND CANALS

Construction of the substructure for a single track railway bridge over the

Petitcodiac River, near Salisbury, County of Westmorland, N.B. Name of contractor, Gorman and Peckham, Halifax, N. S. Date of contract, July 12, 1921. Amount of contract, schedule of prices.

POST OFFICE DEPARTMENT

The following is a statement of payments made in July for supplies ordered by the Post Office Department subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages and the performance of work under sanitary conditions.

Nature of orders	Amount of orders
Making metal dating stamps and type and other hand stamps and brass crown seals.....	\$ 1,404.62
Making and repairing rubber stamps, daters, etc.....	230.12
Supplying mail bag fittings.....	3,813.73
Making up and supplying letter carriers' uniforms, etc.....	31,433.11
Repairing letter boxes, etc.....	35.80
Making and supplying stamping ink, pads, etc.....	70.99
Repairing scales.....	113.75

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

AGREEMENTS effected between employers and employees and schedules of wages and working conditions received in the Department are published in summary form in the LABOUR GAZETTE each month. In most cases such agreements are signed by both parties, but verbal agreements are included in the record, this term being interpreted to include schedules of rates of wages, hours of labour and other conditions of employment agreed upon between certain of the employees and employers concerned, and in effect though not signed. In the case of each agreement the rates of wages in the principal classes of labour are given, together with an outline of the more important working conditions and other information of general interest. The following is a summary of the more important agreements and schedules recently received by the Department, arranged by industrial groups.

Mining

NEW DENVER, B. C.—CERTAIN MINING COMPANIES OPERATING WITHIN THE SLOCAN MINING DISTRICT, AND MINE MILL AND SMELTER WORKERS' UNION, No. 98. Agreement in effect from May

16, 1920, extended with revised wage scale from May 6, 1921.

For summary of agreement see the LABOUR GAZETTE for July, 1920, page 904. After a special joint conference followed by a referendum vote of the Union, the wage scale was reduced 75 cents per day, effective May 6, 1921.

Fishing

PRINCE RUPERT AND SOUTH VANCOUVER, B.C.—CERTAIN PACKING COMPANIES IN PRINCE RUPERT AND SOUTH VANCOUVER, AND THE DEEP SEA FISHERMEN'S UNION OF THE PACIFIC. Agreement in effect from May 15, 1921, to December 31, 1921, and thereafter, unless cancelled by thirty days' notice.

Only union members to be employed if obtainable. Companies not to be compelled to engage men who for good reasons are objectionable.

Prices for marketable fish caught by lines and delivered during 1921:

Per pound — halibut, $2\frac{3}{4}$ cents; black cod (sable fish) $1\frac{3}{4}$ cents; other acceptable varieties, 1 cent. A bonus may be paid with no bearing on this agreement.

Fishermen not to cause delay to the vessels; to take on board ice and bait but not fuel and stores; if careful, not to be charged for gear lost. For fish lost after having been iced and stored in vessels, fishermen to receive half rate. Fishermen to be represented at the scales by one of their members. Not less than 400 pound drafts to be weighed; 14 per cent to be deducted for fish taken with heads; when heads are cut, 21½ per cent to be deducted.

When long lines are used, mate not to share with fishermen. When vessels are in port 24 hours fishermen to receive checks. If companies need fish for shipment, fishermen to discharge same irrespective of the hour. Fishermen to rig all gear without charge.

When deckhands are not obtainable, fishermen to do necessary deckhands' work and receive deckhands' wages.

Printing and Publishing

MONTREAL, QUE. — CERTAIN EMPLOYERS, AND STEREOTYPERS AND ELECTROTYPERS' UNION No. 33. Verbal agreement in effect from August 1, 1920, to August 1, 1921.

Electrotypers: Minimum wages: Per week—Moulders, \$40; holidays, double time. Hours, 48 per week. Work outside regular hours to be considered overtime and paid time and one half; after three hours' work, double time.

Difficulties or misunderstandings to be submitted to Board of Arbitration, composed of one from each party and a third member who shall be disinterested.

Stereotypers: Minimum wages: Per week—\$36; holidays, double time. Hours per week, 48. Work outside of regular shop hours, time and one-half; after midnight, double time; job shops, after three hours, double time.

Only good standing union members to be employed.

ST. HYACINTHE, QUE.—TWO EMPLOYING PRINTERS AND TYPOGRAPHICAL UNION

No. 788. In the June LABOUR GAZETTE, page 824, it was incorrectly stated that wages in a printing office at St. Hyacinthe, Que., were reduced 20 per cent, hours per week being increased from 48 to 55. Information subsequently received shows that in one printing establishment an agreement was signed to be in force until January 15, 1922, providing for wages of \$25 for a week of 44 hours. A verbal arrangement was also made with the proprietors of a newspaper for the same wages with a week of 48 hours.

VICTORIA, B. C. — EMPLOYING JOB PRINTERS, AND PRINTING TRADES UNIONS. Agreement in effect from May 13, 1921, to December 31, 1921.

Hours, 44 per week.

Wages: Per hour—machine operators, compositors, cylinder pressmen and bookbinders, 90 cents.

Platen pressmen and other employees to have same percentage of increase.

Rates to be in effect from time the employees go back to work.

SYDNEY, N.S.—EMPLOYING FIRMS AND SYDNEY TYPOGRAPHICAL UNION No. 460. Agreement in effect from May 1, 1921, to October 31, 1921.

Wages, book and job offices: Per week, handmen, operators, day shift, \$30; night shift, \$33.

All employees, including foremen, to be union members; this rule not to apply to present employees who are not members of the union.

Union reserves right to its members to refuse work from or for unfair employers.

Hours: eight per day for five days; Saturday, four. Overtime, time and one-half; Sundays and holidays, double time.

Apprentices: in an office employing three journeymen or less, one apprentice; an additional one for every three additional journeymen; three apprentices to be the limit. One member of the

union to be employed in composing room before office is entitled to an apprentice. Apprentice to be examined at end of six months; if found competent, term to continue until apprentice has served five years. Minimum wages: third year, one-quarter of journeymen's wages; fourth year, two-fifths; fifth year, two-thirds.

SWIFT CURRENT, SASK.—SUN PRINTING AND PUBLISHING Co. LTD., AND TYPOGRAPHICAL UNION No. 726. Agreement extended from November 1, 1920, to October 31, 1921.

Text of agreement summarized in the LABOUR GAZETTE for October, 1920.

New scale: Day work, 8 hours per day, daily except Sunday. After May 1, 1920, hours per day for five days, 8; hours on Saturday, 4.

Wages: Per week—Journeymen, day work, \$40; night work, $7\frac{1}{2}$ hours per night, \$43; foremen, day, \$43; night, \$46. Machine operators to receive pay of journeymen plus 50 cents extra per shift.

Employees with one year's office standing to receive one week's holiday with pay.

MOOSE JAW, SASK.—EMPLOYING FIRMS AND TYPOGRAPHICAL UNION No. 627. Agreement in effect from November 1, 1919, with amended wage scale from November 1, 1920, to October 31, 1921.

Text of original agreement summarized in the LABOUR GAZETTE for December, 1919, page 1484.

New scale: Minimum wage: per week, from November 1, 1920, to October 31, 1921, newspaper workers, day work, 48 hours per week, \$47; night work, 45 hours per week, \$50. Book and job printers, November 1, 1920, to April 30, 1921, day work, 48 hours per week, \$47; night work, 45 hours per week, \$50. From May 1, 1921, to October 31, 1921, day work, 44 hours per week, \$47; night work, 45 hours per week, \$50. Provided that in the event of Regina and Saska-

toon Unions securing the 44-hour week, or reduced hours on the newspapers same shall go into effect in Moose Jaw for newspaper workers with no change in wage scale.

Food, Drink, Tobacco

BRANTFORD, ONT. — MASTER BAKERS AND BAKERY AND CONFECTIONERY WORKERS' UNION No. 187. Verbal agreement in effect from May 1, 1921, to May 1, 1922.

Hours per day, nine; six days per week. Two hours extra on Friday if 54 hours have not already been worked. Working hours, 7 a.m. to 6 p.m. excepting Fridays and days when bread is baked for holidays.

Minimum wages: Per week—journeymen, \$28.50; oven men, \$31.50; dough men, \$31.50; foremen, \$35.

One union helper and one apprentice to five bakers. Less than five, one helper or one apprentice. One additional apprentice to every three bakers over five. No union men to bake bread on Saturday.

Overtime, time and one-half.

Minimum wages, cake bakers: Per week—foremen, \$35; journeymen, \$29.50.

All bakers, apprentices and helpers to become union members.

CALGARY, ALTA.—MASTER BAKERS AND BAKERY AND CONFECTIONERY WORKERS' UNION No. 197. Agreement in effect from May 1, 1921, to May 1, 1922.

Minimum wages: Per week—foremen, \$37; doughmen and ovenmen, \$34; bakers and confectioners, \$31. Overtime, time and one-half. No overtime in a week containing a holiday unless $5\frac{1}{4}$ hours' overtime have been worked. Jobbers to be paid same rate as journeymen. No man to be paid in any week less than his full weekly wage. (This is not meant to refer to time loss by sickness). Saturday work for bread bakers

and Sunday work for cake bakers to be double time. Hours per day, eight.

One helper or apprentice to five or less men; one additional helper or apprentice for every additional five journeymen employed. Helpers not to do work of a baker. Apprentices to be between 16 and 20 when beginning apprenticeship.

No bakery wagon driver to do work of a journeymen baker or confectioner.

Only union members to be employed, or non-union men who will join after a week.

Disputes to be settled by workmen of the shop with union officials, or, failing this, by an arbitration committee of two from each party, none of whom to be actual parties to the dispute or members or employees of the firm involved. Committee to appoint an independent chairman, not a member of the trade; decision to be binding.

CALGARY, ALTA.—SILVER SPRAY BREWING COMPANY, AND BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA. Agreement in effect from June 1, 1921, to June 1, 1922.

Any good standing competent member may be employed as engineer, fireman, general purpose man, or cooper, if he passes required examination. All employees to become Union members two weeks from date of employment.

No member to be discharged on discriminated against for upholding union principles.

Hours: March first to November first, nine hours per day for five days; five hours the sixth day. November first to March first, eight hours for five days, four hours the sixth day.

Engineers, two weeks' holiday with pay each year after twelve months' service.

No overtime for oiling and greasing trucks. If Union is unable to furnish competent truck drivers, they may be

hired by employer but must join the Union.

During working hours, employees to be allowed free temperance beer.

Sickness to be no excuse for discharge. Man on recovery to receive former position. Men engaged during busy season not to be counted as permanent men, nor to be taken into union if working less than three months. Company may hire extra help from April 1 to September 30, returned soldiers to have preference, provided no union men are out of work.

Employees to have right to purchase Company's goods at wholesale price.

If reduction of staff is necessary to reduce number of steadily employed men in one department, men not to be laid off for longer than one week at a time, lay-off to be in rotation in a fair and impartial manner, men kept on to be those competent to do work.

Overtime, time and one-half. Sundays and holidays, double time.

Foremen, night watchmen and shipper wishing to be exempt from joining union, not to perform regular work of a working man.

Employers must first approach secretary when wishing to hire new men. If no competent union men are available, any man may be hired, preference being given to returned soldiers.

Differences to be referred to a Board of Arbitration of two members of each party, failing to agree, these to select a fifth, and decision of majority to be binding.

Company may employ a boy for every ten men, boys not to perform work of a man.

Preference for advancement to be given to seniority, provided men advanced are competent.

Wages: Per month — first engineer, \$162.50; 2nd engineer, \$148.75; night-man, \$128.30; firemen, \$125. Per hour—

coopers (slack), bottlers, town teamsters, truck drivers and assistants, brew house helper, wash house man, 61½ cents; cellars and brew house, 63½ cents; machine men, packers, yard teamsters, 58½ cents; boys, 28½ cents.

Building and Construction

TORONTO, ONT. — SHEET METAL SECTION OF THE BUILDERS' EXCHANGE AND SHEET METAL WORKERS' UNION No. 30. Agreement in effect from January 1, 1921, to December 31, 1922.

Only union men to be employed if available. If supply is lacking, non-union men may be employed, and retained until union men are available.

Union men to work only for firms who have signed the agreement, except when through lack of trade these firms are not employing all the members of the union, then the business agent may offer union members' services to other firms provided the said members may work under conditions of contract.

Union to create a board of arbitrators of one or more to settle disputes; employers to create a board of equal number, board of both parties to elect or appoint one or more additional persons; if dispute is not settled by these, either party may by paying costs appeal to the official arbitrator whose decision shall be final.

Minimum wages: Per hour — 90 cents. Hours: 8 per day; 44 per week. Overtime (after 44 hours), until midnight, time and one-half; thereafter and Sundays and holidays, double time.

On outside jobs, fare and travelling expenses to be paid.

Any journeyman spoiling work or material to forfeit his time and net cost of material spoiled.

One apprentice or improver for every two journeymen. Employer to teach him or have him taught the trade within four years, if he is capable of becoming a mechanic.

Class of work helpers shall be employed on to be left to decision of Board of Arbitrators.

Improvers to be paid at a rate agreed upon.

Apprentices to be admitted to the union at expiration of apprenticeship period.

Union men to notify business agent when discharged or out of work, so he can tell them where to obtain work.

Apprentices: Boy commencing, to be under twenty years of age. Apprentices to get an apprenticeship card from union each year.

Apprentice committee of equal numbers of employers and employees to deal with matters concerning apprentices. Term to be four years. Apprentice not to work at one branch of the trade for more than a year. Wages per week to be increased every six months starting at \$13 for 1st 6 months, and reaching \$28 for 8th 6 months.

EDMONTON, ALTA. — MASTER SHEET METAL ASSOCIATION AND SHEET METAL UNION No. 371. Agreement in effect from July 12, 1921, to March 31, 1922.

Minimum wage: Per hour—journeymen, 95 cents; improvers, 75 cents.

Apprentices before being admitted to union to be examined as to qualification by shop steward, foreman and employer; if not satisfied, apprentices may have case brought before a committee of three members of union not affiliated with said shop, and three masters, or the joint council of industry, if such exists; majority vote of board to be final. One improver to each shop with less than two journeymen; improver after three years to become a journeyman. One apprentice to each shop, and one to every three journeymen.

Hours per week, 44. Shorter hours may prevail from April to November, depending on state of trade.

Overtime, time and one-half, until midnight; thereafter and Sundays and holidays, double time.

No union member to contract or sub-contract with any employer.

Union and employers to report any violation of the spirit of harmony and to protect interests of the craft.

REGINA, SASK. — ASSOCIATION OF CONSTRUCTION INDUSTRIES OF REGINA, AND BRICKLAYERS' AND MASONS' UNION No. 1. Agreement in effect from May 16, 1921, to March 31, 1922, and from year to year thereafter except on three months' notice of change.

Joint arbitration committee to be formed of three from each party, to arrange conditions of the trade and to settle differences.

Union members not to work where non-union men are employed at this trade, nor for employers who do not carry out terms of this agreement.

Hours of labour, 8 per day, Saturdays, 4 hours. Beyond five miles from city, working Saturday afternoon to be optional. Overtime only in cases of emergency. To 7 p.m., time and one-half; thereafter, and holidays, double time. No work on Labour Day.

Wages: Per hour—journeymen, \$1.15; foreman, 10 cents additional per hour.

Where three or more men are employed, one to be a foreman. A contractor after being in business two years may employ an apprentice; no employer to have more than one apprentice at one time.

Union members to go on sympathetic strike only if ordered by International headquarters.

EDMONTON, ALTA. — GENERAL CONTRACTORS' ASSOCIATION OF EDMONTON, AND BRICKLAYERS AND MASONS No. 1 OF ALBERTA. Agreement in effect from June, 1921, to May, 1922.

Hours of labour, 8 per day, 4 hours on Saturdays.

Minimum wages: Per hour — \$1.15. Foreman, not less than 10 cents additional.

Overtime, time and one-half to 9 p.m., and until noon Saturdays: thereafter and Sundays and holidays, double time.

Only union men to be employed if such can be supplied within forty-eight hours. Non-union men working temporarily to be replaced as soon as possible by union men.

OTTAWA, ONT.—ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES, AND OTTAWA DISTRICT COUNCIL OF CARPENTERS AND JOINERS. Agreement in effect from June 21, 1921, to April 30, 1922.

Hours of labour, 8 per day; Saturdays, 4 hours. Overtime till five p.m., time and one-half. Thereafter, and Saturday afternoons and holidays, double time.

Minimum wages: Per hour—75 cents.

Industrial Council to be established, having five members from each party and an independent chairman: same to adjust disputes, decision to be binding.

No work on Labour Day except to save life or property.

Both parties agree to adopt and enforce the National apprentice system as adopted at the Joint Conference of the Building and Construction Industries at Ottawa, May, 1921, to be revised by both parties to this agreement.

Union men to be given preference of employment, all things being equal.

OTTAWA, ONT.—ELECTRICAL CONTRACTORS' ASSOCIATION, AND ELECTRICAL WORKERS No. 724. INSIDE WIREMEN. Agreement in effect from May 1, 1921, to April 30, 1922, and from year to year except on four months' notice of change.

Hours of labour, 8 per day; Saturdays, 4 hours.

Overtime, Saturday afternoons and until midnight, time and one-half; thereafter and holidays, double time.

Conciliation board agreed to of two members from each party; disputes to be laid before board before a strike is resorted to.

Wages: Per hour — journeymen, 80 cents; improvers, 55 cents; helpers to be paid as skilled labour.

No apprentice to be allowed to work on a job unless under direct supervision of a licensed man. Journeymen and improvers while in employment of an electrical contractor not to do private work of any kind. Members employed as maintenance men not to engage help through an electrical contractor who has not signed the agreement. No members to leave work to take part in sympathetic strike.

HAMILTON, ONT. — EMPLOYERS AND OPERATIVE PLASTERERS AND CEMENT FINISHERS No. 298. Agreement in effect from May 1, 1921, to April 30, 1922.

Hours per day, 8; Saturdays, 4 hours.

Wages: Per hour—\$1.00.

Overtime until 10 p.m., time and one-half; thereafter and holidays, double time.

Foremen to be good standing union members, and to receive not less than 50 cents per day additional.

Any firm in business one year to be allowed one apprentice, to be indentured for four years; and if employing an average of eight men, to be allowed a second apprentice. Union to enforce carrying out of indenture, and to register apprentice.

No plasterer to be allowed to work on a job except by permission of the original contractor.

Arbitration Board to consist of three members from each party, with an umpire selected by the Board if necessary. Board to settle cases of violation of agreement.

REGINA, SASK.—ASSOCIATION OF CONSTRUCTION INDUSTRIES AND OPERATIVE PLASTERERS' ASSOCIATION No. 393. — Agreement in effect from May 23, 1921, to March 31, 1922.

Wages: Per hour—\$1.15. Hours: eight per day, four on Saturdays; ten in the country. Overtime until 9 p.m., time

and one-half; thereafter, and Saturday afternoons and holidays, double time. No work on Labour Day. Work on Sunday only through necessity and in accordance with the law of the land; same to be paid double time.

Foreman to be a union man; to receive a minimum of ten cents per hour over current rate; to be employed where there are three or more plasterers.

Any outside contractor doing work in Regina jurisdiction to employ on his contract fifty per cent local members.

Disputes to be referred to a committee of six, three from each party, who will attempt to settle dispute before action is taken with International Association.

Members if going on sympathetic strike will be outlawed by International headquarters.

CALGARY, ALTA.—MASTER PLASTERERS, AND PLASTERERS' LABOURERS UNION. — Agreement in effect from June 1, 1921, to June 1, 1922.

Minimum wage: 63¾ cents per hour, \$5 per 8-hour day.

For work out of Calgary, train fares to be furnished and travelling time up to 8 hours per day to be paid. When board is furnished, wage to be 75 cents per hour; board over \$10 per week being paid by employer.

Hours: 44 per week.

Overtime and holidays, time and one-half; Sundays, double time. No work on Labour Day.

One labourer to tend one plasterer on browning.

Labourers to supply hod, hoe, and shovel.

OTTAWA, ONT.—MASTER PLUMBERS AND STEAMFITTERS' ASSOCIATION, AND PLUMBERS AND STEAMFITTERS' UNION No. 71. Agreement in effect from July 22, 1921, to April 30, 1922, and from year to year unless notice of change is given by January 2.

Hours: 8 per day; Saturdays, 4 hours.

Minimum wage, per hour, 80 cents.

Overtime until midnight, time and one-half. Thereafter and Sundays and holidays, double time.

Employers to use efforts that all plumbers and steamfitters in their employ be union members. This not to apply if union men be not available. Employees to work only for the members of the Association if the latter can give them work.

Apprenticeship to be served continuously in one shop unless otherwise agreed; to serve two years as helpers; after this an examination to be passed before a Joint Examining Board. If successful, apprentice to be permitted to work with tools for two years, at not less than 40 cents per hour for first year, and 50 cents per hour for second year. After this, apprentice to try final examination, and if successful, to become a journeyman. If not successful, to continue as improver for 6 months, and then try examination again.

No more than one apprentice to every three journeymen in a shop to apply for final examination during one year.

One apprentice only to be employed for each steamfitter and plumber employed.

Grievances to be referred to a joint arbitration board of three from each party, with full power to settle grievances and appoint an arbiter if necessary. Matter, if it cannot be settled thus, to be referred to United Association, no strike or lockout to take place until a decision has been rendered.

PETERBOROUGH, ONT.—MASTER PLUMBERS, AND PLUMBERS AND STEAMFITTERS' UNION, No. 730. Agreement in effect from May 1, 1921, to April 30, 1922, and from year to year unless one month's notice be given.

Hours: 8 per day; Saturdays, 4 hours. Minimum wages: Per hour—75 cents. Overtime to 10 p.m., time and one-half; thereafter and Sundays and holidays, double time. In special cases,

overtime work up to one hour to be paid straight time.

One apprentice to each steamfitter; additional help to be labourers.

Grievances to be referred to a joint arbitration board of three from each party, board to meet within 48 hours, and have full power to settle grievances and appoint an arbiter if necessary. In event of a dispute which cannot be settled satisfactorily by board, or of any violations of clauses of this agreement by union, before action is taken, matter to be referred to general office of the Association, no strike or lockout to take place until matter has been investigated by an officer of said association.

MOOSE JAW, SASK.—MASTER PLUMBERS, AND PLUMBERS AND STEAMFITTERS' UNION No. 548. Agreement in effect from July 11, 1921, to March 31, 1923, or with thirty days' notice of change.

Hours of labour, 8 per day; Saturdays, 4 hours. Overtime, till midnight, time and one-half; thereafter and Sundays and holidays, double time.

Wages: Per hour—journeymen, 90 cents.

No steamfitter to be allowed more than two helpers.

Union men to be employed if local can furnish same.

REGINA, SASK.—EMPLOYING PLUMBERS AND PLUMBERS' UNION No. 179.—Agreement in effect from July 7, 1921, to May 1, 1923, or with three months' notice of change.

Hours of labour: eight per day; Saturdays, 4.

Overtime rate, until midnight, time and one-half; thereafter and Sundays and holidays, double time.

Minimum rate, per hour, 90 cents.

No employees to work for any one but registered employing plumbers. Only union members to be employed.

All employees to be covered by insurance as per provincial act.

Only one apprentice to be employed for every three journeymen; no fitter to have more than one helper.

Grievances to be referred to committee of six, three from each party, committee to meet within 48 hours and have power to settle grievance.

Transportation—Water

Grievances or complaints may be investigated by a committee of employees or the union, with right of appeal to the Commissioners, or further right of appeal to the City Council, and, if still not satisfactory, to a Board of Conciliation.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JULY, 1921

THE movement of prices, both wholesale and retail, continued downward though not marked by any very violent fluctuations. The decrease in the food budget, while embracing nearly all the commodities, was on the whole the smallest since last October.

In retail prices of foods, the average cost of a weekly family budget in sixty cities at the first of July was \$10.98 as compared with \$11.16 for June; \$16.84 for July, 1920; \$13.77 for July, 1919; \$13.00 for July, 1918; and \$7.42 for July, 1914. An average increase of 4.5c per dozen in eggs and smaller increases

in evaporated apples and prunes were more than offset by small declines in most of the other items, the principal of which were in roast beef, lard, cheese and sugar. The list of 29 staple foods in the budget showed a net decline of 18c as compared with \$1.09 the month preceding.

In wholesale prices, the index number stood at 238.6 for July as compared with 242.6 for June; 346.8 for July, 1920; 294.0 for July, 1919; 284.0 for July, 1918, and 134.6 for July, 1914. The chief decreases appeared in cattle and beef, fresh fish, sugar and molasses,

and in metals. Marked recoveries occurred, however, in hay, hogs and hog products, cheese, butter and eggs, and in raw furs. A few of the groups showed decreases in some lines, partly offset by increases in others, while many commodities remained unchanged. In grains, wheat and oats were down while corn, barley and flaxseed advanced slightly. In miscellaneous foods, beans, oranges, canned tomatoes, breadstuffs, sugar and molasses were lower, but the rest of the group remained steady. In textiles, cottons were slightly higher while silks showed a small decline. As compared with a year ago all the groups averaged lower and all except fuel and lighting, building materials, and house furnishings averaged lower than two years ago.

The table of retail prices and rentals shows the prices at the beginning of July of over one hundred staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada having a population of 10,000 or over. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city except milk and bread are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of milk, bread and for fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these have been published each month since the beginning of 1910, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE

resident in each locality from dealers doing a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences.

The weekly budget for a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exagger-

ated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month

and for the corresponding months back to 1913.

Retail Prices

In meats, with the exception of lamb, fresh pork, and boiled ham, the movement on the average was downward. Beef was up about 4c per pound in Prince Edward Island, but was lower in all the other provinces with a net decline of about $\frac{1}{2}$ c per pound. Veal was higher in Prince Edward Island and Manitoba but was down in all the other provinces. Mutton was higher in the Eastern provinces and in British Columbia but was down slightly on the average. Bacon was considerably higher in some localities, but averaged lower. Lard was about 3c lower in Nova Scotia, Saskatchewan and British Columbia with smaller declines in other provinces. Eggs were $4\frac{1}{2}$ c per dozen higher on the average, the increase ranging from 3c to 7c in the different provinces. Milk averaged about $\frac{1}{2}$ c per quart lower, there being declines in all provinces. Butter was lower on the average but showed a slight recovery in Ontario and Quebec. Cheese was lower throughout the country showing a decline of about 4c per pound in Saskatchewan, Alberta, and British Columbia. Bread remained steady in all provinces except Manitoba, Saskatchewan and British Columbia, where it was lower. Flour and rolled oats were practically unchanged. Canned vegetables were lower. Potatoes were higher in Quebec and Alberta but were lower in the other provinces. Evaporated apples and prunes averaged slightly higher but were down in some localities. Jam and canned fruits were lower in nearly all provinces. Sugar was down 1c to 3c per pound in all provinces. Tea and ground coffee tended to be slightly lower. In laundry starch there was a slight decrease. Anthracite coal was lower in Halifax, Quebec City, Guelph and Cobalt, but was higher at Sorel, St. John's, P.Q., and Windsor. Bituminous coal was lower in Quebec

City, Sorel, Peterborough, Brantford, Galt, Regina, Vancouver and Victoria. Rent was up at Three Rivers, Kingston, Brantford, Galt and Guelph.

Wholesale Prices

GRAINS AND FODDER.—Wheat, Manitoba No. 1 Northern, at Winnipeg fell from \$1.89 per bushel at the end of June to \$1.75 in the second week in July. Later it recovered to \$1.84 but by the end of the month had again declined to \$1.81. Ontario winter wheat at Toronto fell from \$1.57 per bushel to \$1.40. Barley at Winnipeg, which had fallen from 78c per bushel at the end of June to 75c early in July, rose to 82c by the end of the month. Oats at Winnipeg rose from 45c per bushel to 53c. Flaxseed advanced during the month from \$1.79 per bushel to \$1.98. Hay at Montreal advanced from \$21 per ton to \$25. Straw at Toronto declined \$1 per ton to \$11. Bran and shorts remained steady.

ANIMALS AND MEATS.—Cattle at Winnipeg which at the end of June stood at \$8 per hundred pounds declined to \$6.50 by the end of July. Beef, dressed hindquarters, fell from \$18-\$24 per hundred pounds to \$16-\$22. Forequarters declined \$1 per hundred pounds to \$6-\$8 by the end of the month. Hogs at Toronto were up from \$11 per hundred pounds to \$12.25. Dressed hogs advanced 2c per pound to 18c. Breakfast bacon eased off slightly to 32c per pound. Hams, however, advanced from 35c per pound to 42c at Montreal. Lard rose 2c per pound to 16c. Sheep fell from \$6 per hundred pounds to \$5.50. Mutton, however, remained steady.

DAIRY PRODUCTS.—Finest creamery butter at Montreal rose from 34c per pound to 41c about the middle of the month but later fell off to 38c. Creamery butter at Toronto also showed an advance, rising 8c per pound to 40c. Dairy butter at Toronto rose from 25c per pound to 33c. Cheese at Montreal which was quoted at 16c at the end of June

advanced to 21c during July. Eggs rose 4c per dozen at Montreal to 44c.

FISH.—Fresh salmon trout declined 2c per lb. to 16c and whitefish fell steeply from 20c. per lb. to 11c.

FRUITS AND VEGETABLES.—Raspberries at Toronto declined from 30c per box to 20c. Oranges were down from \$7.00 per box to \$6.50 at Toronto. Potatoes declined to 45c. and 50c. per bag at Montreal for old stock. New potatoes came on at Toronto at \$3.00 per bag. Tomatoes appeared on the market at \$2-\$3 per 11-quart basket but later fell to \$75c-\$1.25. Canned vegetables remained practically unchanged.

MISCELLANEOUS FOODS.—Bread was lower at Toronto and Victoria. Flour was unchanged from last month. Granulated sugar at Toronto was down from \$10.39 per hundred pounds to \$8.64. Yellow sugar also declined during the month from \$9.89 per hundred pounds to \$8.24. Molasses was down 10c per gallon at Montreal to 64c.

TEXTILES.—Little change occurred in woollens and cottons except in raw cotton which was up about \$1 per hundred pounds to \$12.75. Raw silk declined slightly. Jute, flax products, and oilcloths were unchanged.

HIDES, LEATHER, BOOTS AND SHOES.—No changes were reported in this group.

METALS AND IMPLEMENTS.—Pig iron was down \$3 per ton to \$31.80. Iron and steel bar were slightly lower. Black-sheets and iron tinplates and zinc sheets were down. Aluminum, copper, lead, quicksilver, spelter, and solder bar also registered slight declines. Silver bar and tin were up.

FUEL AND LIGHTING.—Coal remained unchanged but Connellsville coke was down to \$2.75-\$3 per ton at the ovens. Gasoline was down from 35c. per gallon to 33c. Coal oil was also lower at 18c. per gallon.

BUILDING MATERIALS.—The lumber market continued weak. Spruce deals

(*) Preliminary figures. (†) Seven commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.
 † Revised. (a) The number of commodities varies from month to month.

were down \$3 per M to \$25 at St. John. Plaster of Paris declined from \$5.35 per barrel at Montreal to \$5.00. Soil pipe fell from 54.4c per foot to 47.6c. Nails, iron wire and copper wire were slightly cheaper. Raw and boiled linseed oil each advanced 1c per gallon. Turpentine was down from \$1.07 per gallon to \$1.00. Benzine was 2c lower at 33c per gallon.

HOUSE FURNISHINGS. — No changes were reported in this group.

DRUGS AND CHEMICALS.—No important changes were reported.

MISCELLANEOUS.—In raw furs muskrat skins advanced from 90c each to \$1.10. Mink, racoon, and skunk skins were unchanged. No change was reported in newsprint. Manilla rope fell 2½c per pound to 23c. Crude rubber at New York was down to 16½c per pound.

PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes show the movements in prices in other countries as compared with the movement in Canada.

United Kingdom

According to the Board of Trade's new Index Number, wholesale prices in June were 25 per cent lower than in December last. The reduction since March has been some 6 per cent only. Taking 1913 as 100, the index number for June was 201.6 and showed a fall of nearly 40 per cent from the maximum of May, 1920. The closest approach to pre-war prices is found in "Other Textiles" comprising wool, silk, flax, hemp and jute, and the "Iron and Steel" group was the highest over the pre-war position.

The *Economist* index number of wholesale prices for June shows a fall of 42 per cent from the highest point, the *Statist* number has fallen 41 per cent.

The *Times* index number has been re-calculated, the base being changed from December 31, 1913, to the average for 1913, and the number of commodities being increased from 40 to 60. The additional commodities consist mainly of

manufactured and semi-manufactured articles. The figures shown in the table are from the re-calculation.

The index number of the British *Labour Gazette* for the retail prices of foods was 220 for July, while that for cost of living, including food, rent, clothing, fuel and light is 219. In each case the base is the level of July, 1914. At the beginning of August the index number of foods had risen to 226.

Australia

The peak in wholesale prices was reached in Australia in August, 1920. Of the eight groups which make up the total, "Jute, Leather, etc.", was the first to begin a decline, after reaching the peak in February, 1920, while the last were "Metals and Coal" and "Groceries," the former not reaching the highest point until November, and the latter not until December. For March, 1921, all groups showed a decline of about 25 per cent. At that time, "Jute, Leather, etc." were nearest to pre-war prices, with "Agricultural Produce, etc." next. Building materials, which had fallen waveringly and only to a slight extent,

were then the highest compared with pre-war prices, the index number being 3,318, while the averages for 1913 and 1914 were 1,128 and 1,081 respectively. The decrease shown in the retail prices of food and groceries was slight up to the month of March.

Germany

Retail prices and the cost of living in Germany have not fluctuated as widely during the last twelve months as have wholesale prices, but the net change has been an important one.

Austria

The *Economic Review*, London, England, prints in its issue of July 22, an index number of cost of living at Vienna, taken from the *Oesterreichische Volkswirt*. This number, which for the first half year of 1914 was 161.15, reached for July, 1921, the very high level of 14,363.05, indicating that prices in terms of the money in circulation were nearly 90 times as high as before the war.

Japan

An article in the *Daily Intelligence* of the International Labour Office for July 12, comments on the fact that while the fall in wholesale prices in Japan had been considerable, there had not been a proportionate fall in the retail prices of daily necessities. It states that this was variously attributed to the number of middlemen, the consumers' lack of organization and to the fact that in some districts too great a number of stores were selling these articles.

In an address on April 11, the president of the Bank of Japan called attention to the fact that wholesale prices of goods for export had fallen more than those of goods for home consumption,

and took this to prove that the purchasing power of the consumer had not yet diminished. He predicted, however, that this would come about through the unemployment and decreases in wages which were bound to follow the slackening of the export trade.

United States

Dun's index of wholesale prices for August 1 showed a slight advance for the first time since May, 1920. The downward re-adjustment in metals continued without interruption, but was offset by the higher prices for commodities largely consumed. The rise is mainly in foodstuffs, while after many months of yielding the clothing group shows a slight recovery.

It will be noted from the table that *Bradstreet's*, *Gibson's*, and the *Annalist* index numbers showed this advance in July.

The index number of wholesale prices calculated by the Bureau of Labour Statistics of the United States shows the same figure (148) for July as for June. Farm products and foodstuffs were slightly higher than in June, while in all other groups decreases took place.

The Bureau's index number of retail prices of foods rose from 144 in June to 148 in July, an increase of 2.7 per cent, the first rise since the general decrease in July, 1920. Potatoes rose 26 per cent; strictly fresh eggs, 20 per cent; butter, 16 per cent; ham, 4 per cent; lard, 3 per cent; oranges, 3 per cent. Other increases were slight. Sugar showed a decline of 9 per cent; cabbage, 8 per cent; plate beef, 6 per cent; onions, 5 per cent; chuck roast, 4 per cent; oleomargarine, 3 per cent while a number of articles fell in price about 1 or 2 per cent.

FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE SECOND QUARTER OF 1921

THE Department has received reports of 216 fatal industrial accidents that occurred during the second quarter of 1921. (Information has also been received of 8 additional fatalities that occurred during the previous quarter making a total of 204 fatal industrial accidents during the first quarter of 1921). Of the fatalities during the second quarter 70 occurred in April, 85 in May and 61 in June, while in the corresponding quarter of 1920 there were

80 reported for April, 79 for May and 99 for June. The distribution of accidents according to industries showed 40 in the lumbering industry, 37 in building and construction industries, 30 in the steam railway service, and 29 in the mines, smelters and quarries.

The following statement does not necessarily include all the fatal industrial accidents that may have occurred, but it has been prepared from information received from all sources available.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1921.

Trade or Industry.	Locality.	Date.	Age.	Cause of Fatality.
METALS, MACHINERY AND CONVEYANCES—				
Employee at car shop.....	Bridgeburg, Ont.....	Apr. 6	63	Car backed while adjusting air brakes.
Helper at refinery.....	Delora, Ont.....	" 23	51	Electrocuted.
Conductor at steel plant.....	Sault Ste. Marie, Ont....	May 1	35	Explosion—burns.
Boilermaker.....	Yarmouth, N.S.....	" 14	18	Kerosene explosion.
Bolt cutter.....	Homfray Channel, B.C..	" 30	38	Struck by falling tree.
Ballor operator.....	New Westminster, B.C..	June 28	17	Caught in machinery.
FOODS, TOBACCO AND LIQUORS—				
Electrician at dairy.....	Toronto, Ont.....	May 4	50	Electrocuted.
Loader at ice plant.....	North Bay, Ont.....	" 28	48	Struck by falling block of ice.
CLOTHING AND LAUNDERING—				
Labourer with glove factory.....	Pembroke, Ont.....	June 28	Run over by auto.
TEXTILES, CORDAGE AND CARPETS—				
Workman.....	Owen Sound, Ont.....	May 17	Electrocuted.
Flax scutcher.....	St. Mary's, Ont.....	June 17	47	Caught in machine.
PULP, PAPER AND FIBRE—				
Employee at paper plant.....	Three Rivers, Que.....	April 6	35	Struck by falling log.
Millwright at paper plant.....	Fort William, Ont.....	" 25	38	Electrocuted.
Electrician at paper plant.....	Ottawa, Ont.....	May 1	36	Electric burns.
WOODWORKING AND FURNITURE—				
Employee at bedding factory.....	Edmonton, Alta.....	April 5	Caught in belting.
Employee at box factory.....	Calgary, Alta.....	" 14	17	Hand caught in knives of machine—shock.
Slate framer at billiard factory.....	Toronto, Ont.....	May 6	52	Struck by board.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1921—*Continued.*

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
CLAY, GLASS AND STONE—				
Employee at stone plant.....	Montreal, Que.....	April 30	34	Electrocuted; picked up broken end of live wire.
Employee at cement works.....	Montreal, Que.....	May 4	28	Struck by falling motor; pulley hook gave way.
Brakeman at cement works.....	Belleville, Ont.....	" 5	18	Crushed while coupling.
Stone crusher.....	North Sydney, N.S.....	" 30	Struck by fly wheel of stone crusher.
PAINTS, OILS, CHEMICALS AND EXPLOSIVES—				
Employee at cartridge plant.....	Brownsburg, Que.....	April 18	35	Explosion of fulminate of mercury.
STEAM RAILWAY SERVICE—				
Labourer.....	Fort William, Ont.....	April 4	Caught in shaffing.
Section foreman.....	Goodwood, Ont.....	" 5	Fell on bar which pierced body.
Sectionman.....	Gillmore, Ont.....	" 18	Struck by engine.
Trainman.....	Charlotte, N.B.....	" 6	52	Jammed between car and shed.
Steward.....	St. Thomas, Ont.....	" 12	29	Crushed between stop block and car.
Inspector.....	Fort Erie, Ont.....	" 13	60	Run over by train.
Inspector.....	Windsor, Ont.....	" 25	Jumped off moving cars.
Engineer.....	Near Chinook, Alta.....	" 7	Collision.
Engineer.....	Palmerston, Ont.....	" 18	43	Crushed between wheel centre and side rod of engine.
Engineer.....	St. Hyacinthe, Que.....	" 28	55	Fall from footboard of engine.
Brakeman.....	Paris, Ont.....	" 24	Fall from train.
Assistant Roadmaster.....	Coronado Sub., Alta.....	" 26	Derailment of gasoline speeder.
Section foreman.....	Sidar Siding, B.C.....	May 1	Fall from gasoline speeder.
Section foreman.....	Caron, Sask.....	" 2	47	Struck by engine.
Section foreman.....	St. Jerome, Que.....	" 31	33	Run over by crane car.
Foreman.....	Holland, Ont.....	" 21	Struck by train.
Brakeman.....	Point Anne, Ont.....	" 5	19	Crushed between cars.
Brakeman.....	Regina, Sask.....	" 16	32	Fall—run over.
Brakeman.....	Mitchell, Ont.....	" 17	33	Struck by car.
Brakemen (2).....	Lasalle, Que.....	" 29	29—32	Derailment.
Patrolman.....	Near Seddell, B.C.....	" 21	30	Engine struck speeder.
Trainman.....	Kitchener and Waterloo Siding, Ont.....	" 30	Fall from train.
Employee.....	Montreal, Que.....	" 30	40	Struck by train in attempt to save boy
Employee.....	Port Hope, Ont.....	June 1	Derailment.
Fireman.....	Sherkston, Ont.....	" 4	40	Derailment.
Fireman.....	Bridgeburg, Ont.....	" 4	40	Derailment.
Fireman.....	Turcot, Que.....	" 10	Struck by train.
Fireman.....	St. Henri, Que.....	" 14	29	Struck by train.
Engineer.....	Kylemore, Sask.....	" 14	31	Engine overturned.
ELECTRIC RAILWAYS—				
Brakeman with power commission..	Stamford, Ont.....	April 7	Fell under cars.
Poleman.....	Preston, Ont.....	May 30	31	Fell from freight train.
MISCELLANEOUS TRANSPORT—				
Oiler at elevator.....	Port Arthur, Ont.....	April 4	23	Clothing caught in machinery.
Elevator employee.....	Castor, Alta.....	" 29	Smothered—caught in hopper.
Teamster at gas works.....	Sherkston, Ont.....	" 5	37	Struck by whiffletree.
Driver of coal wagon.....	Montreal, Que.....	May 10	18	Fall from shaft of wagon.
Stationary engineer.....	Quebec, Que.....	" 19	30	Fall from coal conveyor.
Teamster with brick company.....	Toronto, Ont.....	June 17	30	Fall from wagon.
NAVIGATION—				
Deckhand.....	Sarnia, Ont.....	May 3	Fell from gang plank.
Deckhand.....	Toronto, Ont.....	" 7	28	Drowned.
Ship's cook.....	Cobourg, Ont.....	" 18	36	Drowned.
Ship's steward.....	Montreal, Que.....	" 25	Drowned—fell when boarding ship.
Diver with towing company.....	Sault Ste. Marie, Ont.....	June	(No particulars).

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1921—Continued.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
MINES, SMELTERS AND QUARRIES—				
Grippe boy	Lethbridge, Alta.	April 2	Under 21	Run over by coal cars.
Miner	Springhill, N.S.	" 8	"	Fall of coal.
Miner	Chignecto, N.S.	" 8	36	Shot explosion.
Miner	Stellarton, N.S.	" 18	27	Fall of coal.
Miner	New Glasgow, N.S.	" 18	24	Fall of coal.
Chain runner	Stellarton, N.S.	" 18	17	Suffocated by gas, following fall of coal.
Miners, (2)	Dominion No. 10, N.S.	" 20	40—46	Fall of stone.
Miner	Blairmore, Alta.	" 28	21	Fall of coal.
Helper	Timmins, Ont.	" 13	44	Crushed under muck.
Electrician	Joliette, Que.	" 23	41	Electrocuted.
Miner	Cobalt, Ont.	" 27	24	Struck by runaway car.
Driver	Comox, B.C.	" 28	21	Struck by descending trip.
Foreman at quarry	Edwardsburg, Ont.	" 12	"	Blast explosion.
Workman at mine	Cobalt, Ont.	May 8	50	Fell down shaft.
Driver	Bellevue, Alta.	" 9	21	Crushed between cars.
Surfaceman	Sydney Mines, N.S.	" 12	23	Struck by descending hoist.
Miner	Cassidy, B.C.	" 18	35	Crushed by fall of roof.
Loader	Florence, N.S.	" 23	40	Crushed by fall of coal.
Miner	Champion, Alta.	" 25	21	Struck by car. (Died June 24.)
Miner	Thetford Mines, Que.	June 1	"	Fall of rock and timber in tunnel.
Miner	Blairmore, Alta.	" 1	21	Fall of coal.
Helper at mine	Northpines, Ont.	" 8	30	Crushed under rock.
Machine runner	Schumacher, Ont.	" 9	23	Explosion.
Miner	Caledonia Mines, N.S.	" 9	40	Fell on pick.
Miner	New Waterford, N.S.	" 18	27	Fall of coal.
Miners (2)	Eldon, Alta.	" 24	21	Drowned.
Miner	No. 5 Mine, B.C.	" 29	"	Fall of rock.
BUILDING AND CONSTRUCTION—				
Rigger's helper	Stamford, Ont.	April 5	32	Fell from top of steam shovel.
Driller	Stamford, Ont.	" 5	27	Fall of rock.
Labourer	Stamford, Ont.	" 7	26	Fell from car.
Scaler	Stamford, Ont.	" 9	"	Struck by jack handle.
Trackman	Niagara Falls, Ont.	" 21	"	Rail sprung forcing wrench into lung
Blacksmith	Newman Brook, N.B.	" 20	17	Dynamite explosion.
Labourer	Kapuskasing, Ont.	" 25	50	Drowned.
Ironworker	Imperoyal, N.S.	" 26	20	Explosion of acid tank.
Painter	Hamilton, Ont.	" 27	37	Struck by falling pipe.
Workman	Three Rivers, Que.	" 28	47	Electrocuted.
Workman	Matheson, Ont.	" 29	51	Struck by falling plank.
Plasterer	Toronto, Ont.	" 29	56	Fell down elevator shaft.
Bricklayer	Cornwall, Ont.	" 29	56	Fall of scaffold.
Painter	Montreal, Que.	May 4	47	Fell from ladder.
Painter	St. John, N.B.	" 13	29	Rope used as support broke, causing fall
Painter	Bathurst, N.B.	" 21	"	Electrocuted.
Electrician	North Vancouver, B.C.	" 6	50	Struck by falling plank.
Labourer	Regina, Sask.	" 6	"	Electrocuted-shock due to faulty wire.
Labourer	Galt, Ont.	" 7	"	Fell from bridge.
Labourer	Connaught Tunnel, B.C.	" 12	49	Struck by rock from roof.
Employee	Stamford, Ont.	" 20	25	Derailment of speeder.
Contractor	Fort Erie, Ont.	" 23	31	Electrocuted.
Pile driver	Sumas Prairie, B.C.	" 17	27	Drowned.
Signal transmitter	Montreal, Que.	" 29	40	Struck by descending hoist.
Labourer	Stamford, Ont.	" 30	22	Crushed under bucket.
Dock foreman	St. Thomas, Ont.	" 27	68	Ruptured when lifting load.
Labourer	North Sydney, N.S.	" 30	"	Caught in belt.
Railway labourer	Montfort Jct., Que.	" 31	"	Run over by train.
Scaler	Stamford, Ont.	June 3	35	Struck by stone.
Scaler	Stamford, Ont.	" 19	"	Fall of rock.
Plumber	Montreal, Que.	" 3	45	Asphyxiated by gas while in cellar.
Carpenter	Leaside, Ont.	" 13	42	Burned while lighting fire.
Carpenter	Stamford, Ont.	" 12	30	Fell into canal.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1921—Continued.

Trade or Industry.	Locality.	Date.	Age.	Cause of Fatality.
Painter.....	Hespeley, Ont.....	" 21	Over 21	Hand cut by broken glass from window.
Carpenter.....	Amherstburg, Ont.....	" 25	Fell from scaffold.
Labourer.....	Stamford, Ont.....	" 22	27	Caught in machine.
Teamster.....	Johnstown, Ont.....	" 30	27	Struck by train.
BUILDING AND CONSTRUCTION—Con.				
LUMBERING—				
Sawmill worker.....	Evansburg, Alta.....	April 9	21	Struck head on saw.
Foreman.....	Hawkesbury, Ont.....	" 12	37	Rammed by cart shaft.
Millman.....	Seigas, N.B.....	" 15	69	Clothing caught on machinery.
Logger.....	Knox Bay, B.C.....	" 21	32	Struck by falling tree.
Logger.....	Campbell River, B.C.....	" 28	35	Struck by falling tree.
Logger.....	Ruban River, Que.....	" 30	35	Drowned.
Labourer.....	Massey Bay, Ont.....	" 20	19	Drowned.
River driver.....	Chippewa River, Ont.....	" 23	37	Explosion—struck by flying timber.
River driver.....	Jocko River, Ont.....	" 29	Drowned.
River driver.....	Garden River, Ont.....	" 30	20	Drowned.
Sawmill worker.....	Crow's Nest, B.C.....	May 4	40	Clothing caught in saw.
River driver.....	Timiko River, Ont.....	" 6	Drowned.
River driver.....	Wicksteed Lake, Ont.....	" 6	45	Drowned.
Millwright.....	Bull River, B.C.....	" 11	Over 21	Crushed—carriage started inadvertently.
Logger.....	Sechett Inlet, B.C.....	" 10	40	Crushed by tree.
Logger.....	Burrard Inlet, B.C.....	" 17	43	Drowned while working on boom.
Labourer.....	Midland, Ont.....	" 12	69	Fall—head struck against bin.
Boomman.....	Mission, B.C.....	" 12	18	Fell from trestle into scow.
Loader.....	Kelowna, B.C.....	" 13	44	Struck by rolling log.
Woodsmen.....	Victoria Co., N.B.....	" 16	29	Boat caught in whirlpool—drowned.
River drivers (2).....	White River, Ont.....	" 20	Drowned.
River driver.....	Wicklow River, Ont.....	" 20	Drowned.
River driver.....	Brule Lake, Ont.....	" 23	45	Drowned.
River driver.....	Bull River, B.C.....	" 26	37	Drowned.
Logger.....	Blissfield, N.B.....	" 28	37	Struck by falling tree.
Lumberman.....	Enderby, B.C.....	" 21	28	Drowned—fell from log.
Woodsmen.....	North Co., N.B.....	" 29	28	Struck by falling tree.
Carpenter.....	Marmora, Ont.....	June 2	39	Caught in shafting.
Logger.....	Nimkish Lake, B.C.....	" 8	27	Struck by falling branch.
Timber packer.....	Bellevue, Alta.....	" 8	Over 21	Prop caught—crushed by moving cars.
Signalman.....	Headquarters, B.C.....	" 13	19	Struck by falling tree.
Logger.....	Midway, B.C.....	" 15	48	Crushed by logs.
Employee.....	Ottawa, Ont.....	" 20	16	Drowned; slipped from boom.
Teamster.....	Aldergrove, B.C.....	" 10	27	Struck by piling from load.
Bucker.....	Rock Bay, B.C.....	" 13	Struck by falling limb.
Feller.....	Camp 3, Comox, B.C.....	" 13	Struck by falling limb.
Labourer.....	Wasach, Ont.....	" 18	24	Drowned.
Sawmill worker.....	Pogamising, Ont.....	" 22	Drowned.
Sawmill worker.....	New Dundee, Ont.....	" 28	20	Pinned under logs.
PUBLIC UTILITIES—				
Lineman.....	Montreal, Que.....	April 6	28	Electrocuted.
Lineman.....	Tillsonburg, Ont.....	" 28	21	Electric burns.
Labourer.....	Weston, Ont.....	May 18	19	Crushed finger—infection.
Machine helper.....	Stamford, Ont.....	" 22	34	Crushed under truck.
Power house operator.....	Pointe du Bois, Que.....	" 26	Burned by arc; pulled wrong switch.
Helper.....	Stratford, Ont.....	" 27	20	Electrocuted.
Lineman.....	St. Vital, Man.....	" 27	Fall from pole.
Lineman.....	Ingersoll, Ont.....	June 1	20	Electrocuted.
Lineman.....	Montreal, Que.....	" 4	50	Electrocuted.
Lineman.....	St. Catharines, Ont.....	" 24	30	Electrocuted.
Lineman.....	Windsor, Ont.....	" 28	30	Electrocuted.
Pumpman.....	Stratford, Ont.....	" 9	32	Fall of rock.
Finisher.....	Fort William, Ont.....	" 13	45	Electrocuted.
Labourer.....	Stamford, Ont.....	" 17	30	Electrocuted.
Electrician.....	Montrose, Ont.....	" 17	29	Electrocuted.
Wireman.....	Mitchell, Ont.....	" 18	Electrocuted.

FATAL INDUSTRIAL ACCIDENTS DURING THE SECOND QUARTER OF 1921—*Continued.*

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
PUBLIC AND MUNICIPAL EMPLOYMENT—				
Civic employee.....	Woodstock, Ont.....	April 25	57	Sewer caved in.
Highway foreman.....	Ardrea, Ont.....	May 25	55	Struck by automobile.
Municipal foreman.....	Kingston, Ont.....	June 4	53	Struck by wagon tongue.
Prison guard.....	Burwash Farm, Ont.....	" 18	Struck by pulley.
Stone blaster.....	Dixon's Corners, Ont....	" 21	40	Premature explosion of dynamite.
AGRICULTURE—				
Farmer.....	Brookville, Ont.....	April 1	28	Fell from wagon.
Farmer.....	Selkirk, P. E. I.....	June 18	Horses ran away.
FISHING AND HUNTING—				
Fisherman.....	French River, P.E.I.....	April 22	15	Knocked overboard by boom.
Fishermen, (2).....	Rustico, P.E.I.....	May 2	62—28	Drowned, caught in squall.
Fisherman.....	Ogden Channel, B.C.....	June 24	35	Explosion of gas boat.
MISCELLANEOUS TRADES—

Logger.....	Burrard Inlet, B.C.....	" 15	Fall from a boom.
Municipal labourer.....	Woodstock, Ont.....	" 24	51	Crushed under earth.

RECENT LEGAL DECISIONS AFFECTING LABOUR

OF the three legal decisions summarized below, one relates to the criminal law of manslaughter through negligence, one to the Workmen's Compensation Law of Quebec, and one to an action for damages for negligence in Quebec.

A driver of a vehicle is criminally responsible if he fails to take reasonable care to avoid endangering lives of others

A man driving an automobile on a street of Regina ran it over an obstacle composed of a wooden form and a tarpaulin, and struck a workman, who was working in a manhole in the street, killing him. The driver was indicted for manslaughter and was found guilty by a jury. After the conviction the trial judge submitted to the Court of Appeal of Saskatchewan, in a reserved case, the following questions:

(1) Did I properly instruct the jury as to the negligence which, under the circumstances of the case, would render the accused guilty of manslaughter?

(2) In view of the fact that there was no evidence that the accused saw the deceased nor knew that the deceased was under the tarpaulin referred to in the evidence, could the accused be found guilty of manslaughter?

The Court of Appeal answered these questions in the affirmative and sustained the conviction. An appeal was taken to the Supreme Court of Canada. It was contended by the accused that there must be gross negligence to incur liability and that the degree of negligence must be

higher in criminal cases than in civil cases. Against this contention the Court quoted section 247 of the Criminal Code which reads:

"Every one who has in his charge or under his control anything whatever, whether animate or inanimate, which, in the absence of precaution or care, may endanger human life, is under a legal duty to take reasonable precautions against, and use reasonable care to avoid, such danger, and is criminally responsible for the consequences of omitting, without lawful excuse, to perform such duty."

It was decided by the Court that this section left no room for the refined distinction between negligence and gross negligence, and that the absence of reasonable care in driving an automobile might create a criminal liability. It was the duty of the accused to take reasonable precautions to avoid endangering human life as the jury was told by the trial judge. The Court found that the trial judge's charge was correct and the appeal was dismissed. (*Canada—Rex vs. McCarthy.*)

Employer not liable in Quebec if workman is injured when not following instructions

A workman employed in a furniture factory was injured when using a circular saw. He brought action against his employers for damages under the Workmen's Compensation Act of Quebec. According to the judgment of the Superior Court the plaintiff was engaged to make furniture by hand, and he had been forbidden to use the circular saw,

which had been introduced after he had been working there. Before using the saw, which he did without the knowledge of his superiors, he removed the apparatus which served to guard against such accidents as he had met with. It was held by the Court that the accident to the plaintiff did not arise out of his employment and that the guarantee for

safety which an employer owes to his workmen by virtue of the law of Workmen's Compensation does not apply when the workman does work which has been strictly forbidden him or simply

which he has not been instructed to do. The action of the plaintiff was dismissed with costs. (*Quebec—Oumet vs. Belec.*)

Owner of object causing injury is liable unless he submits absolute proof of innocence

A workman who was employed in the construction of a building was injured in the foot through a radiator falling on him. He brought action for \$3,500 damages in the Superior Court of Quebec against the firm which was installing the heating system. The defendants denied all negligence, claiming that the radiator had been deposited in the best possible way, and that if it had fallen it must have been disturbed by others than their employees.

In the judgment of the Court it was held that the defendants were responsible for the injury caused to the plaintiff by the fall of the radiator unless it was shown that the accident took place in consequence of a circumstance to which they were complete strangers.

The general proof offered by the defendants that the radiator was leaning against the wall in such a way that it could not fall was not sufficient to acquit them, but it was necessary to establish in a precise way the degree of inclination of the radiator against the wall and in consequence the absolute physical impossibility of its falling unless someone displaced it. The Court found that on account of the accident the plaintiff was incapable of working for ten weeks, but it did not appear that the accident had permanently diminished his capacity for work. The Court therefore condemned the defendants to pay the plaintiff the sum of \$670 with costs. (*Quebec—Howard vs. Latourelle & Fils, Limited.*)

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.
DEPUTY MINISTER—F. A. ACLAND.

Number 9

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The month in brief

This issue of the LABOUR GAZETTE contains a synopsis of the proceedings at the recent annual convention of the Trades and Labour Congress of Canada, also a summary of the resolutions adopted at the recent session at Geneva of the International Emigration Commission. It also contains the complete text of an address on The Work of the Employment and Insurance Department of the British Ministry of Labour, delivered by Mr. T. W. Phillips, C.B.E., Head of that Department, before the recent annual convention of the International Association of Public Employment Services.

At the beginning of August unemployment among trade unions was 9.10 per cent of the total membership as compared with 13.15 per cent at the beginning of July and 2.35 per cent at the beginning of August, 1920. Many of the unions continued to report a large proportion of their members as working on short time. According to returns received from some 5,000 firms, employment conditions during August showed a slight improvement, but the situation for the month was decidedly less favourable than during the same period in 1920.

The cost of the weekly family budget of twenty-nine staple foods rose to \$11.41 at the beginning of August as compared

with \$10.96 at the beginning of July; \$16.42 in August, 1920; and \$7.68 in August, 1914. The index number of wholesale prices for August showed little change, standing at 236.4 as compared with 238.6 for July; 330.2 for August, 1920; and 136.3 for August, 1914.

The time loss due to industrial disputes during August was less than during July but greater than during August, 1920. There were in existence during the month 24 strikes involving about 3,221 workpeople and resulting in an estimated time loss of 83,105 working days. At the end of the month there were on record 19 strikes involving about 2,904 workpeople.

Proceedings under the Industrial Disputes Investigation Act

During the month of August the Department received reports from six Boards of Conciliation and Investigation established to deal with disputes between (1) the Niagara, St. Catharines and Toronto Railway and certain of its employees, being members of Local Division No. 846, Amalgamated Association of Street and Electric Railway Employees of America; (2) Canada Steamship Company and certain of its employees, being firemen, oilers, wheelmen, watchmen, deckhands, cooks, stewards, etc., mem-

bers of the Sailors, Firemen and Cooks' Union of Canada; (3) Association of Canadian Building and Construction Industries and men of various trades in the building industry in Hamilton and district, members of Hamilton Building Trades Council; (4) Canadian Fish and Cold Storage Company, Limited, Prince Rupert, B.C., and certain of its employees, being members of the Fish Packers' Union of that city; (5) Corporation of the City of Hull, Québec, and its firemen, being members of local 174, International Association of Fire Fighters, and (6) F. W. Nicholas, of Port McNicholl, Ontario, and certain of his employees in the freight sheds at Port McNicholl, members of Local 1506, International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Six applications were received for the establishment of Boards of Conciliation and Investigation and a Board was established in connection with an application which had been received during the previous month.

An application was also received from the employees of the Intercolonial and Prince Edward Island, National Transcontinental, Grand Trunk Pacific, and Canadian Northern Railways, for a Committee of Conciliation, Mediation and Investigation under the Conciliation and Labour Act.

**Statistics of
Canadian Co-
operative
Societies for
1920.**

The August issue of *The Canadian Co-operative* contains statistics of Canadian Co-operative Societies for 1920. In addition to the United

Grain Growers, Limited, which is a marketing and distributing society, figures are given for twenty societies as compared with sixteen reporting last year. Excluding the United Grain Growers, Limited, the remaining societies had a membership of 7,427, an increase of 1,121 over last year, a share capital of \$256,449, and a loan capital of \$138,021. The value of the stock in trade was \$368,089, while other assets amount-

ed to \$206,624, with reserve funds of \$40,419. The year's sales were to the value of \$2,465,253, an increase of \$332,527 over the previous year. The rate of interest paid on capital ranged from 5 to 8 per cent, and the dividends on purchases from 3 to 12 per cent. The net trading surplus, commonly called "profit" increased by \$9,034 from \$156,870 to \$165,904, and the amount of purchase dividends declared increased by \$19,207 from \$138,216 to \$157,423. The number of employees of the retail societies increased by 27 from 187 to 214, and the salaries and wages paid were \$173,596.

The United Grain Growers, Limited, of Winnipeg, has been established for 14 years. It has a membership of 35,929 scattered over the Western provinces, with a share capital of \$2,608,547. Its stock in trade amounted to \$1,773,467, and its other assets to \$6,495,238, with a reserve fund of \$1,937,084. Its 969 employees received in salaries and wages \$1,213,032. The sales for the year amounted to \$6,908,896, an increase of \$728,537 over the previous year. The rate of interest on capital was 8 per cent and the net profit \$436,675. The United Grain Growers, Limited, also handled 5,654 cars of live stock, an increase of 397 cars, and 24,503,237 bushels of grain, an increase of 377,016 bushels.

**Standard farm
wages in
Western
Canada.**

Efforts have been made this year to standardize the wages of farm labour in the western provinces.

Last spring the managers of the ten public employment service offices of Saskatchewan met in conference representatives of the organized farmers, and it was agreed that \$60 a month should be the standard wage for the summer season. According to the *Public Service Monthly*, an official publication of the Saskatchewan government, "The idea though new, has worked out with fair success and was sufficiently well adopted by the farmers generally to prove that such a standardization of wages was possible." A further con-

ference was held in Winnipeg in connection with harvesting and threshing wages. Officers of the public employment services of the four Western provinces were present as well as leading officers of the Saskatchewan Grain Growers' Association, the United Farmers of Alberta and the United Farmers of Manitoba. After a discussion it was finally agreed that \$4 a day should be the standard rate for experienced men for this work in the three prairie provinces.

Promotion of rural industries

The Honorable E. C. Drury, Premier of Ontario, speaking at Toronto recently, suggested as a

partial remedy for unemployment a revival of the village industry idea, as far as it can be practised. "Out in the country next winter," he is reported as saying, "there will be no lack of food and shelter and there will be plenty of fuel. There is no unemployment on the farms; in fact, my neighbours tell me they have not been able to get enough help this summer." A suggestion on similar lines is contained in a report on the future of disabled soldiers in Great Britain which was issued recently by a joint committee of representatives of the Ministries of Pensions, Agriculture, Trade, Health, Labour and Education. The committee recommends that selected home industries should be organized in rural districts to supplement agriculture. It is claimed that by increasing the prosperity of rural life and judiciously combining and supplementing agricultural work with selected home industries, it will be possible to achieve the following objects:—(a) To check further rural depopulation and emigration; (b) to redistribute men and their families on the soil; (c) to foster agricultural activities, and particularly to render small holdings economic; (d) to increase the economic stability of all classes of rural workers in times of depression; (e) to balance industrial forces by distributing instead of concentrating workers; (f) to restore the national standard of

health. Ordinary factory methods are recognized as unsuitable for the proposed rural industries; which (for the purpose of the committee) should be limited to the capacities of men debarred from ordinary industrial competition. Recent developments in motor transportation, it is suggested, make the scheme easy to put into practice. An advisory committee of doctors concurred in the conclusions of the Departmental Committee.

Wage reductions endorsed by Works Councils

In the August issue of the LABOUR GAZETTE reference was made to the acceptance of a wage reduction by employee

representatives on the Works Council of the International Harvester Company's plant at Hamilton. Similar action was reported to have been recently taken by employee representatives on the Industrial Council of the Verity Plow Company at Brantford. While this company's plant was temporarily closed down owing to lack of demand for its product, a large export order was received contingent upon a price reduction. The situation was laid before the Industrial Council and the employees' representatives thereupon suggested a wage reduction of 25 per cent, in order to enable the company to fill the order. Work was then resumed at the factory.

France objects to item in agenda, International Labour Conference.

The French Government has lodged a formal objection to the inclusion of item (2) in the agenda of the next Session of the International

Labour Conference which will meet in October. This item reads as follows: "Adaptation to agricultural labour of the Washington decisions concerning the regulation of the hours of work." The grounds for the objection are that it would seem "to be hazardous to seek to obtain a concerted system of regulation in the various countries concerned, in view of their diversity in climate, class of agriculture, system of cultivation, and of the countless uncertainties and vicis-

situdes inherent in agriculture." The working day not only varies season by season, but it is subject to inclemency of weather, the necessity of saving the harvest by urgent work, etc. Regulation adapted to these conditions would merely establish averages with wide margins impossible to supervise, or if such regulation was strict it would impose on agricultural production an intolerable burden.

It is provided in Article 402 of the Treaty of Versailles, that items to which objection has finally been made by any of the Governments of the members of the International Labour Organization shall not be excluded from the agenda if at the conference a majority of two-thirds of the votes cast by the delegates present is in favour of considering them.

**Proposed
British Con-
ciliation Com-
mittee in
Agriculture.**

The British government has introduced in the Corn Production Acts (repeal) Bill an amendment creating machinery to take the place of the Agricultural Wages Board. (A reference to the views of landowners and workers on the abolition of the wages board was made in the July issue of the LABOUR GAZETTE, on page 859). The new plan provides for the formation of Conciliation Committees without any independent members. Representatives of employers and workers would vote separately and the decision of the majority would represent the vote of that side. The committees would have power to appoint an independent chairman, who would sit as a conciliator, and if the members of a committee chose they could give him a vote. The committees would deal with hours, wages and conditions of employment and their decisions would be sent to the Minister of Agriculture, who would make an order enforcing them. The committees would have the fullest powers to grant exemptions. This plan provides more elasticity than trade boards and the Committees differ from joint industrial councils in that their

awards will be enforceable and their functions will be more limited.

**National Build-
ing Guild,
Limited, Great
Britain.**

A national conference of Building Guild Committees in Great Britain, whose activities have been noted in previous issues of the LABOUR GAZETTE, was held in Manchester on July 23 for the purpose of forming a national organization. As a result of the conference the National Building Guild, Limited, was formed, composed of a union of 115 guild committees. The constitution of the new body is as follows: A National Board is constituted as the Supreme Governing body, formed of representatives elected one from each regional council: the latter councils are composed of representatives from not less than ten local committees. Guild Committees are formed from not more than two representatives of each trade union connected with the building industry, together with one representative from the administrative, and one from the technical department. Local committees have power to enter into contracts up to £500; Regional Councils up to £2,000; contracts beyond the latter amount must be undertaken by the National Board. In order to guarantee customers against loss where estimates are exceeded, the National Guild has devised a form of contract known as the "maximum sum contract," under which the Guild estimates the cost of the work, (including labour and materials), adds 10 per cent for service charges, and fixes the total of these amounts as the maximum cost to the customer. Any outlay beyond this maximum is borne by the Guild as a loss, but if the cost falls short of the maximum the Guild claims 5 per cent of the amount saved, to be added to its contingency and local funds, and the remainder of the saving goes to the customer. It is claimed in the *Labour News*, an official organ of the British Labour Party, that the Guild is now working below its estimates in almost all

contracts; for example on a contract for twenty-one houses for the Wigan Council savings were effected on each type of house. It was stated at the conference that the work actually completed by the guilds was of the value of £300,000, but during the last five months lack of sufficient credit had prevented them from doing new business, in spite of the help of the Co-operative Societies Wholesale bank. Preliminary steps were taken by the Conference in a campaign for the raising of a National Building Guild loan of £150,000.

Housing plan in Italy.

The Central Housing Commission attached to the Italian Ministry of

Industry and Commerce has issued a report on the work done in Italy to encourage the building of working class houses. The need of improved housing for the working classes has long been apparent to many. Acts were passed in 1907 and 1908 authorizing grants of credit to certain public and private institutions with the object of encouraging the formation of co-operative building societies and other bodies created for similar purposes. The State contributed one-sixth of the interest on these loans and allowed the required real estate an exemption from taxation for ten years. Municipal authorities were asked to encourage building either by granting sites or granting special bonuses to organizations instituted in conformity with these acts. As a result of this legislation there had been formed by December 31, 1914, 643 organizations comprising 528 co-operative societies, 51 autonomous bodies, 40 municipal undertakings and 22 mutual benefit societies. With a total capital of 195,552,149 lire houses had been built containing 111,158 rooms, providing accommodation for 222,316 persons. These results, however, were not sufficient, and in 1914 and 1917 decrees were issued providing further financial facilities and a longer exemption from taxation. After the war the housing shortage was so great, especially in the large towns, that further aid from the

State was required to meet the situation. Decrees were issued by which an independent credit department was created in the National Credit Institute for Co-operation, and the Loans and Deposit Bank was authorized to lend larger sums for the building of working class houses. The period of exemption from taxation was prolonged from 15 to 20 years and the State undertook to pay a portion of the interest, provided the houses were built before June 30, 1924. An additional state grant is to be paid on building loans if the houses are finished before January 1, 1922. The housing plans are submitted for approval to the Ministry of Industry and Commerce, which proposes changes to secure the best sanitary conditions. According to the report of the Commission for working class houses, these decrees have helped largely to relieve the housing crisis. Within six months after the decree of November 30, 1919, the State grants towards building credits amounted to 230,000,000 lire while grants made by Communes, independent organizations and co-operative societies amounted to 100,000,000 lire.

"Flying Squadron" at Goodyear Tire and Rubber Company, Limited.

The Canadian factory of the Goodyear Tire and Rubber Company, Limited, at Toronto, Ont., recently organized a body of fifty of its most expert workers to be known as "the flying squadron" for the purpose of increasing the efficiency of the plant, reducing accidents, checking bad practices, helping to handle new problems of production, and furnishing material for the executive. They are chosen from among the best workmen in the various departments and are fully trained in all the principal operations in the factory. Whenever any department is in need of men to balance up the production, as many of the flying squadron as are needed are brought up. They are changed from one operation to another, making piece-work prices on

the operation on which they work, with a minimum day-work rate guaranteed. When they have become proficient in all operations in the factory they receive a certificate as "master rubber workers," and are in line for higher positions. The flying squadron is already credited with a reduction of accidents, of which 75 per cent were found to have occurred with inexperienced help. *The Canadian Manufacturer* quotes an article by Mr. P. W. Letchfield, originator of this squadron plan at the same company's plant at Akron, Ohio, in which the plan is described. "Every squadron", he says, "holds a meeting once a week on company time, at which, among other things, the members bring up any condition or practice they have seen in the course of their work that did not strike them as in the interest of the business. Of the men who have finished the squadron courses 98 per cent have been promoted usually to executive positions. The man in charge of the labour department and the squadrons in the Canadian factory was a former squadron man in Akron."

United States At the United States
Child Labour Federal Court at Green-
law unconstitutional. boro', North Carolina,
on August 22, Judge

James E. Boyd declared unconstitutional the law which has been in force since April 25, 1919, imposing a Federal tax of 10 per cent on the net profits derived from the operations of firms employing child labour. The provisions of this Act were outlined in the *LABOUR GAZETTE* for May, 1919 (page 583). It was designated to take the place of an earlier law, passed in September, 1916, which had also been declared by the same judge to conflict with State sovereign rights, this opinion being confirmed later by the Supreme Court of the United States. In his latest decision the judge has declared that regulation of labour is one of the powers retained by the several States, and not delegated to the Federal Government. State child labour laws, he held, may provide a

penalty, though not a tax, such as was imposed under the Federal act. A strong protest against this judgment was issued next day by the Executive Council of the American Federation of Labour, with a demand that the decision be at once appealed, and if it should be sustained that Congress devise some other method of preventing child labour. Members of the Executive Council claimed that this law had virtually abolished child labour in mills in the Southern States. The 10 per cent tax was imposed on the profits of (a) any mine or quarry in the United States in which children under 16 have been employed during the taxable year; or (b) any mill, cannery, workshop, factory or manufacturing establishment in which children under 14 years of age have been employed or permitted to work, or children between the ages of 14 and 16 years have worked more than 8 hours a day, or after the hour of 7 p.m., or before 6 a.m. The Vivian Spinning Mills, of Cherrydale, N.C., asked for an order of court restraining the collector of inland revenue from enforcing the act at their plant, with the result outlined above.

Shorter hours
and industrial
fatigue

The effect on the rate of production of reductions in working hours is discussed in a report by the Chief Inspector of Factories and Workshops of Great Britain. The conclusion is reached that shorter hours have had a beneficial effect upon the workers, "perhaps more so than any other recent improvement in industrial conditions." The result in regard to production, however, varies according to the nature of the processes involved. When the process is almost entirely mechanical, output is reduced nearly in direct proportion to the reduction in hours; but when the attention of the workers is involved a decline seldom follows, and an increase is often noted. This general conclusion agrees with that reached by investigators in an inquiry into the effect of shorter hours on production in the United States (see *LA-*

BOUR GAZETTE, June, 1920, p. 696). The present report notes that since the war hours of work have been generally reduced in the United Kingdom and "now rarely exceeded an aggregate of 48 a week." The reduction has been made in almost all industries without legislation, mostly by consent of the parties concerned. In order further to diminish fatigue many firms arrange for a short break in the work in the forenoon and another in the afternoon, while others have lengthened the mid-day interval, these measures resulting in increased production. An American manufacturer, Mr. Henry H. Collins, writing on this subject in a recent issue of *The Survey*, (New York) also advises the provision of rest periods, with refreshments, as an effective means of lessening industrial fatigue, which, according to another writer (B. J. Newman in *Modern Medicine*, February, 1921), is the cause of economic loss estimated at 20 cents per worker per day.

Jottings

The Commercial Telegraphers' Union of America will meet in convention at Toronto, on October 3. The Canadian Federation of Bricklayers, Masons and Plasterers will meet at Drummondville, Quebec, in November.

Section 3 of the Adolescent School Attendance Act for Ontario, passed in 1919, became effective on September 1 of this year. This section requires all adolescents from 14 to 16 years of age to attend school except those who are incapacitated or who have passed a university matriculation examination or its equivalent, or are employed on authority of a home permit or an employment certificate.

The provincial government of Ontario has been requested by the president of the Dominion Trades and Labour Congress to appoint on behalf of organized labour in Ontario a labour man to the Workmen's Compensation Board and to add to the provincial hydro commission

a representative of labour and a representative of the municipalities interested.

The Montreal Labour College, which was started in November, 1920, and which conducted classes in Economics, History of the Labour Movement, Industrial History, Public Speaking, French and English, expects to commence classes again this fall. The college is situated at 70 Mance Street, Montreal.

At a meeting of the Carmen's Union at London, Ont., on August 16, the employees of the G. T. R. car shops voted almost unanimously to work only three weeks each month in place of a reduction of 20 per cent in the staff, the choice of which alternatives had been offered to them. A similar choice was offered to the G. T. R. shop employees at Stratford.

At the Ontario convention of the Journeymen Barbers' International Union which took place at Toronto on August 1 last, it was decided to ask the provincial government to pass a law licensing barbers and insisting upon the observance of a proper standard of cleanliness in barber shops. Mr. H. J. Halford, Hamilton, Ont., was elected president, and Mr. A. Calder, St. Catharines, Ont., secretary-treasurer of the Union. The next annual meeting will be held at Windsor, Ont.

A Fire Prevention Board has recently been organized in New Brunswick in accordance with an act passed at the last session of the legislature.

The New Brunswick council of the St. John's Ambulance Association and the Workmen's Compensation Board of the province are co-operating in a first-aid and safety campaign in the various industries. In St. John six first-aid classes have been arranged by the Workmen's Compensation Board and an instructor has been appointed by the Association for these classes. It is also announced that the Workmen's Compensation Board of Alberta have ar-

ranged to hold first-aid classes in Calgary about October 1.

Figures from the Soldiers' Settlement Board to the end of June show that 26,445 returned soldiers have been settled on the land, of whom 5,980 were on free lands without loans and 20,465 on purchased and free lands with loans. There were 4,854,792 acres occupied by soldier settlers, approximately one-half being free land. It was estimated that 600,000 acres of new land had been broken. A total of \$83,884,210 has been granted for loans to purchase land, to remove encumbrances, for stock and implements, and for permanent improvements. By June 30, 390 men had paid their loans in full.

The report of the Bell Telephone Company of Canada on the operation of its Pension and Benefit Fund for the six months ended June 30 last, shows a total expenditure of \$118,517 as compared with \$129,409 in the first half of 1920. There were decreases of \$15,786 in sick benefits and of \$629 in accident disability expenses, while payments for pensions increased from \$3,839 to \$5,467, accident disability benefits from \$9,068 to \$11,179, and death benefits from \$9,861 to \$12,005. It was announced that the Board of Directors of the Company had approved an increase in the minimum pension rate from \$20 to \$30 per month dating from January 1, 1921.

The British government has recently appointed a special committee to consider the problem of unemployment. The committee comprises Sir Robert Horne, Chancellor of the Exchequer; Dr. T. J. Macnamara, Minister of Labour; Sir Alfred Mond, Minister of Health, and Mr. Robert Munro, Secretary for Scotland.

It is estimated by the British Department of Labour that about 2,750,000 workers in Great Britain are covered by industrial agreements which provide for the regular and automatic adjustment of wage rates in accordance with

variations in the cost of living. In all cases but three, so far as known, the index number published in the British *Labour Gazette* is used to measure the cost of living.

The British Mining Industry Act, 1920, provided for the creation of a Miners' Welfare Fund to be applied to purposes connected with the social well-being, recreation, and living conditions of colliery workers and with mining education and research. Every colliery owner must pay into the fund each year a sum equal to one penny a ton on the annual output. The money is to be allocated by a committee of five appointed by the Board of Trade, one being named by the Mining Association of Great Britain and another by the Miners' Federation. It was announced in the House of Commons that the committee had been appointed in February and on July 13, the sum of over £362,000 stood to the credit of the fund. No allocations had yet been made owing to the recent stoppage of the coal mines.

The International Union of Fruit and Vegetable Workers of North America has recently been organized by the American Federation of Labour with headquarters at Fresno, California. The organization is formed of both permanently located and migratory workers, its territorial jurisdiction comprising English-speaking fruit and vegetable workers (including employees of canneries) in the United States and Canada. This union started with a membership of over 2,000 and locals have been established in 40 of the principal fruit and vegetable districts along the Pacific coast.

As a means of securing the 44-hour week, employed members of the International Typographical Union have, by a referendum vote, assessed themselves 10 per cent of their weekly earnings, thus bringing a revenue of \$200,000 a week or nearly \$1,000,000 a month. Married members receive weekly strike benefits of \$17, and single men or women \$12 a

week, and apprentices are paid such sums as may be agreed by officers of the local union.

A conference has been called by the President of the United States to meet at Washington in September for the purpose of inquiring into the volume of needed employment, the distribution of unemployment, means of lessening the number of unemployed, and measures to effect the recovery of business and commerce. The unemployed in the United States are estimated by the Department of Labour to number 5,735,000.

A National Industrial Committee has recently been organized by the United States National Civic Federation to "bring together representatives of the non-revolutionary labour movement, employers who believe in conferring with labour and representatives of the general public." It is announced that Mr. Samuel Gompers, president of the American Federation of Labour, has accepted membership on the committee, and that both President Harding and

the Secretary of Labour have expressed approval of it.

An official report states that at the end of 1920 there were 1,686,000 women members of the unions comprised in general trade organization of Germany, or nearly one-third of the total membership. Before the war the number of organized working women was only 221,000, or one-tenth of the membership.

It is reported that trade union membership has greatly increased in Austria since the war. In pre-war days Austria, with more than thirty million inhabitants, never had more than half a million workers organized in trade unions, while the present republic of Austria, with only six million inhabitants, has over 900,000 trade unionists. "This means" states *Reconstruction*, a Vienna publication, "that almost the whole of the wage-earning population and a large part of the salaried classes are now organized trade unionists. A good deal of the increase is due to women workers and agricultural workers."

GENERAL REVIEW OF THE INDUSTRIAL SITUATION

I.—The Labour Market, Strikes, Prices

DURING the month of August there was a continuation of the upward tendency displayed during July by the curve of employment based on reports from employers, though the improvement was still on a very moderate scale. Compared with the corresponding month of last year, however, the volume of industrial employment throughout the country was decidedly less. Trade union reports indicated greater activity, while vacancies notified by employers to the offices of the Employment Service in July showed a gain. There was also an increase in the number of placements

effected. The latter two indices partly reflected harvest demands and the movement was expected to expand largely in August.

Weekly reports from employers to the Dominion headquarters of the Employment Service of Canada **EMPLOYERS' REPORTS** for the period July 16 to August 13, showed a more favourable movement in employment. The index figure for the period, averaged 89 as compared with an average of 108.1 for the same weeks of last year. During the first half of the period, (the last two weeks in July) reduced employment was reported, partly on account of slackness in the

iron and steel group in Ontario. For the second half period (July 31-Aug. 13) however, net increases more than compensating for those losses were recorded. In the Maritime Provinces more activity was evidenced during the first two weeks of the period under review than in the latter half; Ontario and Quebec showed a reverse situation. The Prairie Provinces manifested a steady increase in the volume of employment; the gains being particularly marked during the first two weeks of the period. In British Columbia conditions were not as favourable, reduced employment being reported for both bi-weekly periods. As compared with the corresponding period of last year, employment in British Columbia and the Prairie Provinces was better maintained than in the other sections of the country, the Quebec and Ontario district showing larger declines from the 1920 level. In the Maritime Provinces, conditions were better than in Ontario and Quebec, though not as favourable as in the Western districts.

The industries which showed the largest net increases over the previous period were edible plant products (chiefly in the canning, sugar, biscuit and flour manufacturing divisions), textiles (mainly in thread, yarn and cloth factories), coal mining, railway and water transportation, building and railway construction. These increases, with the exception of those in coal mining, water transportation and railway construction, were reported mainly in Quebec and Ontario. In mining the gains occurred largely in Alberta, but also in Nova Scotia. Activity at Upper St. Lawrence and British Columbia ports accounted for the expansion in water transportation, while the additions in railway construction were distributed over the country. Smaller net increases were registered in leather goods, wholesale trade, telegraph communication and hotels and restaurants. Ontario and Quebec absorbed the bulk of these gains though railway transportation showed considerably increased activity in the Prairie Provinces. Sawmills registered the most pronounced losses recorded during the period under review, 2,068

persons having been released during the four weeks. This was, of course, a seasonal movement, reflecting the completion of the summer's operations. In iron and steel there were important losses during the earlier part of the month with some recovery towards the latter part. Weakness was shown in ship building, railway car manufacturing, general machinery and agricultural implements. Tools and rolling mills on the other hand registered gains. Pulp and paper and rubber goods also reported pronounced losses, largely due to shut-downs in Quebec. Electrical apparatus manufacturing manifested a considerably smaller volume of employment during the first part of the period, while tobacco made gains during the latter part. Contractions, though on a smaller scale, were also reported in glass and cement making, asbestos and gypsum quarrying, retail trade, local transportation, logging and telephone operation. During the first part of the period important declines were registered in logging, mainly in Quebec and Ontario; partly offset, however, by gains in the second half. The losses in asbestos occurred in Quebec, while those in gypsum were reported from the Maritime Provinces. Some inactivity on electric lines in the Prairie Provinces accounted for the reductions in local transportation. In retail trade the shrinkages were reported chiefly in Ontario and Quebec in the first half of the period, reflecting to some extent holidays and reductions due to summer dullness. Partial recovery was registered in this group in the second fortnight.

Compared with the corresponding period of last year the majority of industries afforded substantially less employment, exceptions being building and highway construction and local transportation. In the communication, general transportation and coal mining groups the 1920 level of activity was fairly well maintained. The manufacturing group as a whole afforded considerably less employment, particularly in iron and steel, miscellaneous industries, rubber, lumber and its products and clay, glass and stone products. The index number

in logging averaged about 10 points lower than during the midsummer period of last year.

Trade unions at the beginning of August reported a smaller percentage of unemployment than at the first of the preceding month, the improvement having now continued for four months.

TRADE
UNION
REPORTS.

The returns, however, indicated a much less favourable situation than in the corresponding period of 1920 and 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to those unions reporting. Greater activity in the clothing trades, in iron and steel and transportation caused the improvement over July, while there was general dullness as compared with preceding years. All provinces, with the exception of Ontario, shared in the upward movement. In that district increased slackness in the building trades made the percentage of unemployment slightly larger.

Returns were tabulated from over 1,500 unions with a combined membership of 182,624 persons, of whom 16,610 were unemployed. This represents a percentage of 9.1, while at the beginning of July 13.2 per cent of the members were unemployed. In August of the previous year, however, the percentage of unemployment stood at about 2.4. Unions in the manufacturing and mechanical industries reported substantially more activity. In addition to the improvement already noted in clothing, and metals, there was also more employment for workers in sugar refineries, tobacco factories and in glass bottle blowing. On the other hand, trades-

men in the printing and publishing group, in wood working and furniture and boots and shoes were not as fully employed as in July. In the transportation group, steam railway employees registered about three per cent less idleness, the improvement being of a general nature. On the other hand, street and electric railway employees, navigation workers and teamsters and chauffeurs reported more slackness. Building and construction was the only group to record a considerable increase in unemployment as compared with July, the percentage standing at 18.7 as compared with 13.4 in the latter month. Ontario and Quebec reported the bulk of this contraction, but slackness in this group was general throughout the country. Of all the trades coming under this heading, plumbers alone showed considerable increase in activity, while carpenters, electrical workers and building labourers reported especially large percentages of unemployed members. In no case was improvement shown as compared with the returns for the beginning of August of the previous year. Fishermen and lumber workers and loggers reported smaller percentages of unemployed members than in July, though a large number of their members were still out of work. Stationary engineers, hotel and restaurant employees, barbers and theatre employees, however, were not as fully employed, while retail clerks registered some improvement.

A marked increase was recorded in the volume of business transacted by the Employment Service during the four-week period ended July 16, 1921, as compared with the previous four weeks. Although the figures fluctuated slightly from week to week the general tendency was upward. With the customary demand for farm help from the West becoming more pronounced toward the end of the period it is expected that the upward trend will continue for some weeks. Vacancies notified by employers, applications registered, applicants referred to positions, and placements effected all showed gains over the pre-

EMPLOYMENT
OFFICE
REPORTS.

vious period. When the totals for the four weeks under review are compared with those for the four weeks ended July 17, 1920, decreases in the number of vacancies notified, in the number of persons referred to positions and in the number of placements, are apparent, while the number of applicants registered during the same term this year exceeds the total for the last year by over 3,500.

During the four weeks under review, the offices reported 28,475 persons referred to positions, of whom 7,680 were women and 20,795 men, and 20,667 regular placements, of which 3,422 were of women and 17,245 of men. The totals for the previous four weeks were 26,941 and 19,367 respectively. For the corresponding period of 1920 the figures stood at 29,883 and 26,995. From June 20, 1921 to July 16, 1921, the number of applications registered was 37,881, as against 36,282 for the previous four weeks and 34,198 for the same period last year. Vacancies notified by employers totalled 31,590 as compared with 29,335 during the previous period and 34,817 in the same period of 1920.

In addition to the regular placements mentioned above 5,774 placements were made in casual jobs, that is, in work of a duration of one week or less.

The volume of employment in the building trades, as indicated by the value of the building permits issued during July, showed a decline as compared with June.

BUILDING PERMITS. In July the permits issued in 56 cities amounted to \$10,137,547 as compared with \$12,930,499 in the preceding month, a decrease of about 22 per cent. There was also less activity indicated than in the corresponding month of last year, the building permits for July, 1920, having totalled \$13,604,902. This represents a decline of slightly over 25 per cent. All provinces with the exception of Nova Scotia registered declines in the value of the permits issued as compared with June, Ontario showing the most pronounced losses. As compared with July, 1920, only Quebec reported in-

creased activity, while the reductions in Alberta and Saskatchewan were particularly marked in this comparison. Of the larger cities, Montreal, Toronto and Vancouver, registered lower figures than in the preceding month. The latter two centres also reported a smaller volume of building than in July, 1920, while in Montreal there were some gains. On the other hand, at Winnipeg the value of the permits issued during July exceeded that for June, but was less than in the corresponding month of last year. As to the smaller centres, large increases in the value of building permits were recorded in Westmount, Niagara Falls, Peterboro, Welland and New Westminster as compared with both June, 1921 and July of last year.

The loss of time on account of industrial disputes during August was less than during July, 1921, but greater than during August, 1920. There

Strikes

were in existence at some time or other during the month 24 strikes, involving about 3,221 workpeople and resulting in an estimated time loss of 83,105 working days, as compared with 32 strikes, 7,662 workpeople and 103,554 working days in July 1921; and 30 strikes, 4,840 workpeople and 74,366 working days in August, 1920. On August 1, there were on record 22 strikes affecting 3,097 workpeople. Two strikes were reported as having commenced during August, as compared with 5 during July, 1921. Three of the strikes commencing prior to August and the two strikes commencing during August were reported terminated, leaving 19 strikes, involving about 2,904 workpeople on record at the end of the month.

In wholesale prices the movement continued downward but less steeply than in recent months, while in retail prices food showed a slight rise and fuel continued to fall slightly. The Departmental index number of wholesale prices showed little change at 236.4 for August as compared with 238.6 for July; 330.2 for August, 1920; 301.1 for Aug-

Prices

ust, 1919; 284.3 for August, 1918; and 136.3 for August, 1914. The principal increases were in fodder, hogs, butter, eggs, potatoes, and some textiles. The chief decreases were in cattle, beef, hide, leather, and boots, gasoline and coal oil, lumber and other building materials, and wooden furniture. In retail prices the average cost of a list of twenty-nine staple foods for an average family in

some sixty cities rose to \$11.41 at the beginning of August as compared with \$10.96 at the beginning of July; \$16.42 in August, 1920; \$14.43 in August, 1919; \$13.41 in August, 1918; \$11.68 in August, 1917; \$8.63 in August, 1916; and \$7.68 in August, 1914. The chief increases in foods were in potatoes, butter and eggs. Fresh meats were lower.

II.—Industries and Trades during August, 1921

Logging

DURING August logging in Quebec showed varied conditions in regard to employment. Firms at Louisville, Three Rivers, St. Jovite Station and River Desert reported operations partially or entirely concluded. At Hull it was reported that, with the commencement of seasonal activity, a large number of men had been sent to the bush. Ontario showed much the same local fluctuations. Lessened operations as compared with July, were reported at Nestorville, Midland, Haileybury and Fort Frances. On the other hand, considerable activity was displayed at Braeside, Ottawa and Pembroke. In British Columbia the situation was practically the same, the tendency being, however, to reduce staffs. Timber of all species scaled in the province in the month of July totalled 176,233,128 feet as compared with 173,946,005 feet in June, Douglas fir again predominating.

Mining

In coal mining, employment continued to improve somewhat, the most pronounced gains again being reported in Alberta. In British Columbia very slight fluctuations were noted: Metalliferous mining registered practically no change,

while in the quarrying group also employment manifested small fluctuations.

Manufacturing Industries

Sugar refineries at Dartmouth and St. John registered slightly less activity during the month, partly due to dullness following demands for sugar for canning. Chocolate manufacturing at Halifax was not as brisk, but at St. Stephens a slightly more favourable trend was shown. In British Columbia, sugar refining maintained the same level, while at Montreal there was more activity. Flour and cereal mills at Winnipeg and Moose Jaw registered practically no changes. Biscuit making at Brantford was somewhat more active. One large firm in London recorded minor losses, while another showed small gains. At Toronto this trade exhibited some improvement, on the whole, though here also fluctuations were experienced. Flour mills in Port Colborne and Keewatin showed little change, the tendency, however, being upward. Important gains in sugar refining at Wallaceburg were noted. Preserving factories also registered increased activity of a seasonal nature, especially at Leamington. Starch factories at Fort William dis-

played slightly lessened activity. Meat packing plants at Montreal indicated a very slight increase on the whole, though two large firms recorded minor reductions in staff. The same is true of abattoirs and meat packing establishments in Toronto. Dairying was not quite as active in Ontario, partly as a result of the dry weather. At Winnipeg, Calgary and Edmonton abattoirs indicated practically stationary staffs.

At New Glasgow one large iron and steel mill reported a very pronounced increase. A minor addition was registered by

**IRON AND
STEEL
PRODUCTS.**

another plant, while a third remained closed down. At Sydney conditions in iron and steel mills showed considerable improvement. Steel shipyards at Halifax recorded practically no change, while in Montreal, Three Rivers and Sorel, some improvement was noted. Car manufacturing in Montreal manifested an important increase in activity, and rolling mills also registered improvement. Sheet metal working, however, was not quite as brisk. Agricultural implement manufacturing at Terrebonne displayed no change when compared with July. Tool making at Rock Island experienced a decline; at Sherbrooke general machine factories were not as active and there were declines also in sewing machine production at St. John's. The agricultural implement industry at Brantford was not as brisk, though one firm recorded increases. At Toronto reduced activity was reported in the manufacture of engines and boilers, while at Galt and Brantford this industry showed no changes. Automobile manufacturing at Ford and Walkerville registered substantially less activity. At Kingston and Midland the shipbuilding plants continued to employ only a small part of their normal staffs; on the other hand improvement was noted in shipbuilding at Port Arthur. Rolling mills at Sault Ste. Marie made a slight gain, but at Swansea and Hamilton small losses were reported.

Wire manufacturing in Hamilton was less active.

Shoe manufacturing in Montreal on the whole showed a decline, though minor gains were reported by some firms. **LEATHER AND RUBBER PRODUCTS.** At Quebec slightly more activity was displayed.

In Toronto, London and Kitchener leather and shoe factories maintained about the same level of employment as during the preceding month. Important losses were reported in rubber manufacturing at Granby and Montreal, due to temporary shut-downs. Other rubber firms in Montreal reported minor changes, their general tendency, however, being upward. At St. Jérôme conditions also were slightly more favourable. One large rubber firm in Toronto released a large portion of its staff, while minor gains were reported in another factory. At Guelph and Kitchener conditions remained very much the same as in July, though a slight upward tendency was evidenced.

At Plaster Rock, N.B., the lumber industry showed another nominal gain.

LUMBER PRODUCTS. In Quebec the changes on the whole were very slight; saw mills at

Breakeyville, Cowanville and Quebec city reported minor increases, which, however, were offset by similar declines at Beauharnois, Hull, St. Pacôme and Montreal. At Arnprior, important losses were recorded. Rockland also reported considerably less activity. The Stratford furniture factories recorded substantial additions to their staff. At Brantford, Newmarket, Orillia and Toronto saw-mills and wood working factories registered slight declines. On the whole, employment in Ontario showed a downward tendency, partly seasonal in character, reflecting completion of summer cuts in saw mills. At The Pas, saw mills reported increases. In British Columbia, there were minor changes, but at Fraser Mills considerable gains were noted, while a decline was registered at Golden.

Important increases in activity were reported in St. John pulp and paper mills. At Bathurst also there was an increase in employment, though on a smaller scale. Liverpool and Murray, N.S., Paper companies were less busy. At Hull, Shawinigan Falls, Donnacona, Chicoutimi, East Angus, Bagotville, Kenogami and La Tuque conditions were not so favourable. On the other hand mills at Three Rivers were considerably busier; Windsor Mills also manifested more activity. Pulp and paper in Ontario, showed slight fluctuations only, the general trend of employment, however, being downward.

At Marysville, N.B., some employees were released from the cotton mills.

On the other hand, firms in Milltown added slightly to their staffs.

At Yarmouth, N.S., there were minor increases in activity in cotton mills. A knitting mill at Truro was closed temporarily for repairs. At Montreal one large men's furnishings factory was also shut down, and less activity was displayed in the manufacture of thread, yarn and cloth. In Sherbrooke one of the cotton mills showed a fair sized increase, but at Magog, Valleyfield and Lachute, mills were less busy. Knitted goods at St. Hyacinthe exhibited more activity than in July. In a large number of firms in various other Quebec points the July level of employment was well maintained. At Toronto carpet manufacturing, garments, knitting and cloth factories were busier than in the preceding month. In Hamilton, there was very little change, but if anything the trend of employment was upward. The same is true for Brantford in the cordage plants. The manufacture of knitted goods at Paris and Hespeler also was more active. Garment manufacturing in Edmonton remained practically stationary.

Broom and brush making at St. John recovered somewhat from the losses experienced in the preceding month.

Light, heat and power companies in Montreal displayed decreased activity.

Electrical apparatus manufacturing moreover was less brisk. Explosives in the same city registered slight declines. Employment in breweries was well maintained, slightly better conditions if anything prevailing than in July. With few exceptions, tobacco factories also were busy. Electrical apparatus manufacturing at Hamilton and Stratford as in Montreal, was less brisk. Employment in tobacco was well maintained at Hamilton. At Toronto a large firm manufacturing incandescent lamps re-opened during August after a month's shut down, but another firm making the same product reported reduced activity. Musical instruments remained practically stationary at Toronto. Slight changes only were recorded at Toronto in the manufacture of soap and photographic appliances, and by electric power companies. The manufacture of drugs, medical supplies and liquors at Walkerville, showed conditions similar to those in July. Power companies in Winnipeg and Vancouver manifested practically no change. Jewellery working at Montreal stayed at about the same level, slight increases in some firms offsetting similar declines in others. There were minor fluctuations in plants manufacturing brass, bronze and copper products, but employment on the whole was well maintained. In Shawinigan Falls aluminum plants reported more activity, while in Maisonneuve the canning companies were busy, largely on account of seasonal demand. The Copper Cliff nickel refineries were not quite so brisk. The same is true also of brass, bronze and copper products factories at Hamilton. At Toronto and Sarnia employment in this group remained at about the July level. In Toronto there were decreases in aluminum manufacturing. Nickel refining at Port Colborne was slightly more active.

ive. At Anyox, B.C. smelting and refining registered slight declines.

Construction

The Canadian Pacific, Grand Trunk and Canadian National railways reported a small net increase in the volume of employment afforded on railway construction, including maintenance of way, during the month of August, there being about 400 more persons on their staffs at the end of the month than at the end of July. In the middle of the month, their total payrolls were about 1,000 higher than at the end of July, but decreases towards the end of the month reduced the net increase to 400 persons. The shrinkages were confined to Alberta and Saskatchewan and may be attributed to construction workers going on farms for the harvest. Grand Trunk staffs remained practically stationary throughout the month, while gains of about 900 persons were reported by the Canadian National Railways. On the other hand, the Canadian Pacific Railway showed reductions of about 500 men. During July, the value of building permits issued in 56 cities amounted to \$10,137,547 as compared with \$12,930,499 in June, a decrease of about twenty-two per cent. The building industry as indicated by building permits showed an increase only in Nova Scotia, while decreases were registered in all other sections of the country. Reports from large contracting firms indicate varying conditions. At Halifax, there were slight gains; in Courtenay Bay, however, there were some losses, while at St. John no changes were reported. Montreal on the whole manifested increases in activity, though some firms showed minor fluctuations. At Sherbrooke there were gains in employment. Toronto firms on the whole reported a steady situation, although here

also there were individual fluctuations. The volume of employment afforded in the building trades in Hamilton, London, Walkerville and Kingston was somewhat less. New Liskeard reported greater activity. In Winnipeg the tendency was slightly downward. In British Columbia and Alberta the situation remained the same.

Transportation

The gross earnings of the Canadian Pacific Railway in July were \$15,772,927 as compared with \$17,375,760 in July, 1920. The gross earnings of the Canadian National Railways during August were \$8,881,530 as compared with \$8,857,354 in the preceding month. During the month the number of persons employed by the Canadian Pacific, Grand Trunk and Canadian National Railways in operation, including general offices, trainmen, engine crews, station employees, sleeping, parlour and dining car employees, showed an increase of about 1,500 persons. This gain was spread evenly over the whole month and was due to additions of about 800 persons to the Canadian National Railways, 600 to the Canadian Pacific and 100 to the Grand Trunk. The most pronounced increases were reported in Manitoba. Electric railway transportation during August showed a slight decline. Employment in water transportation was, as usual, irregular, but on the whole there was increased activity at the Upper St. Lawrence and British Columbia ports.

Trade

Retail trade as reflected in the payrolls of large departmental stores reported a slight recovery from the minor losses recorded in July. Wholesale business changed but little, though in some districts small advances were again made.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907**PROCEEDINGS FOR THE MONTH OF AUGUST, 1921, WITH TEXTS OF BOARDS' REPORTS**

DURING the month of August the Department received reports from six Boards of Conciliation and Investigation established to deal with disputes between (1) the Niagara, St. Catharines and Toronto Railway and certain of its employees, being members of Local Division No. 846, Amalgamated Association of Street and Electric Railway Employees of America; (2) Canada Steamship Company and certain of its employees, being firemen, oilers, wheelmen, watchmen, deckhands, cooks, stewards, etc., members of the Sailors, Firemen and Cooks' Union of Canada; (3) Association of Canadian Building and Construction Industries and men of various trades in the building industry in Hamilton and district, members of Hamilton Building Trades Council; (4) Canadian Fish and Cold Storage Company, Limited, Prince Rupert, B.C., and certain of its employees, being members of the Fish Packers' Union of that city; (5) Corporation of the City of Hull, Quebec, and its firemen, being members of Local 174, International Association of Fire Fighters; and (6) F. W. Nicholas, of Port McNicholl, Ontario, and certain of his employees in the freight sheds at Port McNicholl, members of Local 1506, International Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Six applications were received for the establishment of Boards of Conciliation and Investigation and a Board was established in connection with an application which had been received during the previous month.

An application was also received from the employees of the Intercolonial and Prince Edward Island, National Transcontinental, Grand Trunk Pacific and Canadian Northern Railways, for a Com-

mittee of Conciliation, Mediation and Investigation under the Conciliation and Labour Act.

Applications Received

During the month of August applications for the establishment of Boards were received as follows:—

(1) From the employees of the Grand Trunk Railway Company, being clerks, freight handlers, roundhouse and shop labourers, station employees, etc., members of the Canadian Brotherhood of Railroad Employees. A Board was established composed as follows: Mr. J. M. Godfrey, K.C., Toronto, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. H. H. Vaughan and Peter Bercovitch, K.C., M.P.P., Montreal, nominees of the company and employees respectively.

(2) From the employees of the Western Stevedore Company, Fort William, Ont., being members of Twin City Lodge No. 605, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. A Board was established composed as follows: Mr. Fred Babe, Fort William, chairman, appointed on the joint recommendation of the other two members, His Honour Judge Hugh O'Leary, Port Arthur, and Mr. T. J. Murray, Winnipeg, nominees of the company and employees respectively.

(3) From the employees of various railways, (namely the Canadian National Railways, the Canadian Pacific Railway, the Grand Trunk Railway and the Toronto, Hamilton and Buffalo Railway) members of the Railway Association of Canada, being engineers, firemen, conductors, trainmen, yardmen and telegraphers, members of the several trade

unions of these classes of workers. A Board was established, Mr. David S. Campbell, Regina, being appointed a member on the recommendation of the employees. At the close of the month the Board had not been completed.

(4) From the employees of the Canadian Merchant Marine, being members of the Sailors' Union of the Pacific and the Marine Firemen and Oilers' Union of British Columbia respectively. Before application for a Board was made a strike occurred, but the employees returned to work pending the establishment of a Board. Action was held pending the outcome of renewed negotiations which were in progress.

(5) From the employees in the Mechanical Stores of the Canadian National Railways at Fort Rouge, Winnipeg, Man., being members of Victoria Lodge No. 1326, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. Pending further direct negotiations between the disputants, the establishment of a Board was held in abeyance.

(6) From the employees of the Canadian National Steamship Company, Prince Rupert, B. C., being longshoremen, members of Local No. 3841, International Longshoremen's Association. Pending further direct negotiations between the disputants the establishment of a Board was held in abeyance.

Other Proceedings under the I.D.I. Act

During the month of August a Board was established to deal with the dispute between the Montreal Tramways Company and certain of its employees, being members of Division No. 790, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: Mr. Adolphe Bazin, Montreal, chairman, appointed by the Minister in the absence of a recommendation from the other two members, Mr. A. P. Frizon, Montreal, appointed by the Minister in the absence of a recommendation from the company, and Mr. Arthur Brossard, K.C., Montreal, nominee of the employees.

Proceedings under the Conciliation and Labour Act

During the month of August an application was received from the employees of the Intercolonial and Prince Edward Island, National Transcontinental, Grand Trunk Pacific and Canadian Northern Railways, for the establishment of a Committee of Conciliation, Mediation and Investigation, under the Conciliation and Labour Act. A Committee was established composed as follows: Mr. Hamnett P. Hill, Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. Geo. D. Kelley, and Harold Fisher, Ottawa, nominees of the company and employees respectively.

Report of Board in Dispute between the Niagara, St. Catharines and Toronto Railway Company and its street railway employees

A REPORT was received from the Board established to deal with the dispute between the Niagara, St. Catharines and Toronto Railway Company and certain of its employees, being members of Local Division No. 846, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows:

Mr. D. Dick, Jr., chairman, Messrs. G. D. Kelley and Jos. Gibbons. The report was signed by the chairman and Mr. Gibbons and contained recommendations as to settlement, which the employees expressed their willingness to accept. Mr. Kelley did not concur in these findings and presented a minority report.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Niagara, St. Catharines and Toronto Railway Company, employer, and certain of its employees, members of Local Division No. 846, Amalgamated Association of Street and Electric Railway Employees of America, employees.

Hon. G. D. Robertson,
Minister of Labour,
Ottawa,

Sir,—

The Board of Conciliation appointed by you met in the City Hall, Welland, on Tuesday, May 17th, and the Welland Hotel, St. Catharines, on May 18th. The Company was represented by Mr. Oliver and other officials, and the employees by Clarence Conroy and Edward Sparrow.

The application was for the reinstatement of three discharged employees, pay for lost time from suspension of Conductor Bowman and Motorman Wilson, back time for Conductor Hannah, and for seniority affecting Conductor Vorleys.

Item 1. Dismissal of Conductor Bauer and Motorman Lampman. — Conductor Bauer was not present, owing, it was stated, to his having met with an accident the day previous; but from the evidence submitted, we feel that Conductor Bauer was responsible for the accident and that the company was justified in his dismissal. Motorman Lampman. — We feel that he cannot be held responsible for the accident, inasmuch as he received his orders from Conductor Bauer, whose duty it was to see that all sections of the train they were to pass were at the station before telling Motorman Lampman to proceed. From the evidence submitted it was shown that it was impossible for Motorman Lampman to see for himself while at his post in the vestibule whether or

not the second car was carrying a red or white flag. The only alternative Motorman Lampman had was to get a signal from the passing cars notifying him that all the sections were in the siding. The giving of signals by one passing car to another is not a rule of the company but a custom of the motormen; and as a matter of fact this is the only way that a motorman can assure himself that the sections had passed; and since this accident the company has realized the importance of one car signalling the other and has made it a part of their rules. The rules of the company do not permit a motorman to leave his post in a car to walk around the train to ascertain whether or not the passing cars are carrying signals; and the only alternative is that the conductor advise the motorman whether or not all cars are passed. In this case the conductor went over to the station and in doing so passed between first and second sections, and returning to car passed between them again and then gave order to motorman to proceed. The motorman in our estimation had the right to assume that the conductor had seen signals and that all sections were in. Owing to the circumstances above-mentioned, we recommend that Motorman Lampman be immediately reinstated, and inasmuch as he has lost considerable time before securing another position that he be paid one month's salary for loss of time, provided, however, that he accepts reinstatement.

Item 2. Dismissal of Conductor Phillips. — In our opinion evidence was submitted to justify the company's action.

Item 3. Suspension of Conductor Bowman. — Five days' suspension for what the company call violation of regulations. The evidence submitted went to show that Conductor Bowman was acting motorman and had written orders from Niagara to St. Catharines and return. There is a notice on the time table that all conductors must call up the despatcher from Thorold. When the crew reached Thorold Conductor Bow-

man went to the phone and called up the despatcher, but got no answer, and alleges that the phone was out of order. He then went to the waiting room to call up the Bell telephone, but the waiting room was locked. He then proceeded. Rule 48 reads: "Orders must be plain and explicit, and if not fully understood by the party addressed an explanation should be required before taking the order. After the reception of the order it must be obeyed to the letter." It was proven that Bowman had a written order to cross the other car at Merriton and according to the rules should have obeyed it. Rule 59 says: "When trains moving in opposite directions are to be moved towards each other by train orders, the train whose rights are to be restricted must first receive the order and be completed before the order is given to the train to move towards it or against it." Bowman having written orders and the despatcher not having heard from him, should not have moved the other train towards him, and Bowman had every reason to expect that the other train would be held at Merriton until he arrived or the despatcher had restricted his running orders.

Under these circumstances we feel that Bowman should be paid for lost time.

Item 4. Conductor Vorley's position on seniority.—Evidence in this case was to the effect that Conductor Vorley was told he would be required to work overtime on Sunday. This he said he would not do; he would rather quit the job. When he had completed his regular schedule on Sunday he was told he would have to continue, and he went into the office and handed in his tools, cap and badge. The men's representative claims that he drew all his time, but the company say only part of his time. When the employee of a street railway turns in his badge the general rule is that he has left the service and if he returns loses his seniority. Therefore Conductor Vorley when he returned should have been started at the foot of the list.

Item 5. Suspension of Conductor Wilson.—The company put in a letter from Mr. Wilson stating he wished his case withdrawn. The representative of the men accordingly removed the case.

Item 6. Case of Conductor Hannah.—The committee also withdrew this case.

Acting upon your communication of June 6, the Board not having submitted its report, representatives of the company were notified that the Board would reconvene on July 27. Mr. Oliver, representing the company, stated by letter dated July 8, also over the phone on July 26, that if the Board intended to take up the cases of Motorman Sparrow and Conductor Terryberry they refused to be present or allow their representative on the Board to be present. This would seem to us to be a peculiar attitude for the company to assume as section 1 of the agreement, dated the 1st of November, 1920, provides as follows: "The party of the first part agrees to meet and treat with the properly accredited officers and committees of the party of the second part on all grievances and disputes that may arise between the company and the employees; and failing to reach an agreement these shall be settled by arbitration under the Industrial Disputes Act."

This crew was discharged the day following the sitting of the Board at Welland. Acting upon the company's refusal to be present the chairman and representative of the men met in the City Hall, St. Catharines, on July 27, and heard all the evidence in connection with the case of Sparrow and Terryberry. This crew was dismissed for the signing of blank orders in advance, a custom which has apparently been practised by almost every conductor and motorman on the line; and we submit for your observation a signed petition from a few of the motormen who state that they had been in the habit of following the same practice as Sparrow and Terryberry were discharged for; as we believe that had it not been for a report which has been said to have been circulated by the

officials of the company, that any employee signing this petition would be immediately discharged, there would in all probability have been a great many more employees who would have signed the petition. It was stated by one witness that he had informed Mr. Oliver that he, together with other motormen, had been signing orders in advance, and that no comment was made by Mr. Oliver, nor was any other employee disciplined.

It has not been shown that any accident has ever occurred from the signing of these orders in advance; but it was stated that the men have been in the habit of doing it feeling that it was facilitating the operation of the service. Motorman Sparrow has been eleven years in the service of the company and conductor Terryberry nine years; and this is their first offence.

If this practice was contrary to any order issued by the company we feel that at the most a suspension of thirty days would have been sufficient punishment. We therefore recommend that Motorman Sparrow and Conductor Terryberry be immediately reinstated and paid for all lost time exceeding thirty days.

There were two other cases to come before the Board as made by the employees; but inasmuch as the company's representative was not present we could not take any cases other than the ones above stated.

The balance of the cases to come before the Board were subsequently withdrawn by the employees' representative, with the exception of one case, Noah E. Smith's seniority; and we submit to you our recommendation, as based on letters received from the company and from the employee, Noah E. Smith, that the said Smith be reinstated to full seniority rights.

All of which is respectfully submitted.

Obediently yours,

(Sgd.) D. DICK, Jr.,
Chairman.

(Sgd.) JOSEPH GIBBONS,
Employees' Representative.

St. Catharines, Ont.,

July 28th, 1921.

As I have not been feeling very well the doctor advised me to make a change for three or four months so about November 7th, 1920, I was granted four months leave of absence by the Assistant Superintendent Mr. Tom Clarke. During that time I worked for the D. W. Harmer Co., for a short time, and while I was working there the N. S. & T. issued new badges numbering them according to seniority. I went to the office and got my badge still holding my seniority, and in January when the time table changed they called me up over the phone asking what run I wanted to sign up on. So about March 12th, 1921, I started back to work and nothing was said to me. I worked about two and a half months on my same run and got the same money I had been getting when I got leave of absence. So on May 29th, 1921, Mr. Cumming called me to his office stating that as I had been off those four months I would lose my seniority and would have to start on first year money again. He said he would not ask me for a refund on the money he had paid me for the two months I had been working.

(Sgd.) NOAH E. SMITH.

I have been employed by the N. S. & T. since 1914.

We the undersigned trainmen are guilty of the same offense of signing train orders ahead of time as Messrs. Sparrow and Terryberry, but not with the intention of breaking rules of, or causing offense to the company or its officials.

(Sgd.) F. RICHARDSON,
(Sgd.) S. PRATT,
(Sgd.) N. MARIE,
(Sgd.) F. MITCHELL.

Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and the dispute between the Niagara, St. Catharines and Toronto Railway, (employer), and certain of its employees, members of Local Division Number 846, Amalgamated Association of Street and Electric Railway Employees of America, (employees).

Honourable G. D. Robertson,
Minister of Labour,
Ottawa.

Sir,—

The Board of Conciliation appointed by you met at Welland, Ont., on Tues-

day, May 17, and St. Catharines on May 18. Subsequently I attended on the Chairman of the Board at Ottawa in August and on the Niagara, St. Catharines and Toronto Railway Company at Toronto in the same month. On May 17 and May 18 the following items were dealt with by your Board:

**Item 1.—DISMISSAL OF CONDUCTOR BAUER
AND MOTORMAN LAMPMAN.**

This complaint arose out of the dismissal of these employees, following a very serious accident in which some eighteen people were injured. Conductor Bauer did not appear to give evidence and it was conceded that his dismissal was justified. Motorman Lampman did appear. He admitted that he knew that the 11 a.m. car out of St. Catharines for Niagara Falls was running in sections and that he saw the first and second sections. He claimed that he did not see what signal the second section displayed, though it was carrying the signals that would have warned him that another section was to follow. Conductor Bauer, having left their car, returned, making a casual remark to Lampman to the effect that there were no orders. Lampman neglected to enquire as to whether all of the sections had passed. He, himself, made no effort whatever to ascertain whether the sections had all passed and he admitted this. Under the rules of the Company, he was equally responsible with Conductor Bauer for train orders. Rule 70 reads as follows:

The Driver will be held responsible for the speed of the train and is equally responsible for train orders issued to Conductors.

He was not bound to remain in the car as the majority report sets out. Rule 9 of the Company governs this, it being as follows:

No Driver or Conductor must leave his car when on duty for any cause except to turn a switch or to perform some other specified duty.

In view of the notice that is given to a trainman by the exhibition or warning signals, Lampman was under an obligation to make certain that all sections had passed, and in default of enquiring from his conductor, he should, himself, have made certain on this point.

One of the first principles of railway operation is that rules and orders must be obeyed. Motorman Lampman submitted, as majority report sets out, that he "had the right to assume that the Conductor had seen signals and that all sections were in." He had absolutely no right whatever to "assume" anything. It is because negligent employees "assume" that places the lives of themselves and those of their fellow employees and the general public in danger. The gross negligence of Motorman Lampman amply justifies his dismissal.

**Item 2. — DISMISSAL OF CONDUCTOR
PHILLIPS.**

The evidence submitted by Conductor Phillips was sufficient to justify the Company's action. It was difficult to see how a request could be made to reinstate a man guilty of using such language to a passenger as this man admitted he had used.

**Item 3. — SUSPENSION OF CONDUCTOR
BOWMAN.**

This case is a particularly flagrant example of a violation of the Company's rules and a disregard for public safety. Motorman Bowman had the following Order:

Run to St. Catharines, avoiding regulars.
Meet Number 48 at Merriton, Conductor Jamieson.
No. 4 Conductor Kulp at St. Catharines.

At the time of receiving this order, he was also governed by the following general Time Table Clause printed across the face of all working time-tables:

All Conductors must call up Despatcher for orders before leaving Thorold.

Bowman's run would of necessity cause him to reach Thorold. He admitted that he knew that he must not leave Thorold before calling up the Despatcher and he knew that it was on the carrying out of the instructions to so call that the Despatching system of this road had relied for years past in advancing trains that would otherwise be delayed, thereby restoring and maintaining cars on schedule. He knew the Despatcher in discharge of his duty, not having heard from him, Bowman, would advance No. 48. Bowman's excuse is a most peculiar one. He claims that he attempted to call up the Despatcher but that the phone was not in working order. This is denied by the Company's officials and it was shown that the phone was in good order just before the time Bowman claims to have called and almost immediately after. The majority report is in error in stating that the waiting room was locked. The Company's office in the waiting room was locked and Bowman could not reach the phone in it, but Bowman stated that the waiting room was open and that he could have used the Bell Telephone. On being pressed as to why he did not do so he stated that he saw no occasion to spend the necessary 5 cents to make a call and that he considered he was safe in proceeding, as he intended to proceed carefully. If Bowman did not choose to use the Bell Telephone and rely on the Company repaying him, he could have gone back a short distance in the Company's yards to another Company telephone, or he could have made use of a private telephone in the vicinity. He, however, took a chance at proceeding and, while fortunately an accident was averted, the two passenger cars almost collided and one had to back up to the next siding. The Despatcher at Merritton, having a positive stop on Bowman's train by rule in time-table, advanced No. 48 as he should have done, knowing that Conductor Bowman, if properly performing his duty, would not pass Thorold without obtaining orders from him to do so. Because an actual collision did not oc-

cur, such cannot be urged in the defence of the party at fault. In view of Bowman's record, instead of his dismissal he was suspended for five days, which suspension is justified.

Item 4.—CONDUCTOR WORLEY'S POSITION OF SENIORITY.

The contract of engagement between Conductor Worley and the Company was never terminated. Conductor Worley drew part of his pay only. It is possible that he may have felt aggrieved at what he considered unfair treatment, but this in itself would not be sufficient to bring his employment with the Company to an end. The complaint is particularly unfortunate inasmuch as Worley had resigned from the Local Union, who now make the complaint against him, and had refused to again become a member thereof. In my opinion he is entitled to retain his seniority.

Item 5. — SUSPENSION OF CONDUCTOR WILSON.

Conductor Wilson attempted to make out a case of his own but on being confronted with a letter addressed to the Company, signed by himself, stated that he wished his case withdrawn.

Item 6.—CASE OF CONDUCTOR HANNAH.

An attempt was made to proceed with this case but the Company objected to going on with it in view of the fact that Hannah was dismissed for dishonest practices. In view of what was disclosed as to Conductor Hannah's actions, I wish it to be clear that I am not a party to advising the Company to withhold proceedings.

Following the sittings of the Board on May 18, dealing with the above cases, it was agreed that the Chairman should draft a report and submit it either to Mr. Gibbons or to myself so as to endeavour to obtain the signature of either one of us at least, if not of both. I heard

nothing from the Chairman of the Board and, on the officials of your Department communicating with me, I advised them to this effect as the Company was desirous of ascertaining what report was to be submitted herein. I wrote the Chairman of the Board on June 30, advising him that the officials of your Department were requesting information as to when the report would be filed. I received no reply to this letter. I left Ottawa on a two-weeks' holiday on July 16, about two months after the last sitting of the Board, spending my time at a point where I could not be reached by telephone and where mail delivery was uncertain. On my return to the City on August 2, I learned that on Monday July 18, the following was received at my office:

"Dick advises will hold Conciliation Board for balance of cases Wednesday either Niagara or St. Catharines. Is this date satisfactory to you? Oliver away but have wired him. J. R. Empringham."

This was replied to as follows: "Your wire Mr. Kelley away holidaying in the wilds. Cannot be reached by wire. Will not return till end of month. Ewart, Scott, Kelley & Kelley."

Mr. Empringham, (an official of the Niagara, St. Catharines and Toronto Railway Co.), states he advised the Chairman of the Board accordingly. I am advised by members of my firm that on the afternoon of July 26 a wire reached my office from the Chairman of the Board calling a meeting for July 27. The following reply was sent to this: "Your wire to our Mr. Kelley. He is absent on holidays and cannot be reached. Will be back Monday next."

Nothing further reached my office and on August 2nd, on my return to the City, I advised the Chairman of the Board as follows: "I returned to my office today after an absence of a couple of weeks and I found your telegram of July 26th. It was, of course, impossible for me to be present at any meeting proposed to be held on the 27th. I expect to be in To-

ronto for a few days either the end of this week or the beginning of next and could then meet with you and Mr. Gibbons, either at Toronto, Welland or St. Catharines. Naturally, I am anxious to have the matters in dispute disposed of."

It seems most peculiar that after months of delay a meeting of the Board should have been so suddenly called.

It was known to the other members of the Board that I had no knowledge of the proposed meeting and that I could not possibly attend on the notice given. The Niagara, St. Catharines and Toronto Railway Company never requested me not to attend nor did they attempt to interfere with my actions in any way. I did not receive any communication from the Chairman of the Board or from the officials of your Department as to what additional matters were to be dealt with by the Board in addition to the six items hereinbefore referred to. The first intimation that I had of the other members of the Board having arrived at a decision was when the Chairman was in the City and submitted to me a finding of himself and the representative of the men. He communicated to me material that had been furnished to him and on which he based the finding. I advised him that if on an investigation I found that true and correct information had been laid before him that I would feel inclined to join in his report and I requested that he hold the filing of his report until I could communicate with the Company, which the Chairman agreed to do. The report was not so held by him, however, but was instead filed. On laying before the Company information on which the Chairman of the Board stated he had acted I found that he had been misinformed on many important points.

I feel satisfied that, if the Board had before it the information that it could have obtained, the dismissal of Messrs. Sparrow and Terryberry would have been sustained.

Bulletin No. 11 of the Company, of which both Sparrow and Terryberry had knowledge, reads as follows:

Effective February 16th, old form of train order will be superseded by new form number 92 "Train Order Book". Train Order Books will be issued to Passenger conductors, at St. Catharines Ticket Office, and to Freight Conductors at freight Train Master's Office. Conductors are required to always have two books in their possession.

Despatcher will give the train order numbers. Orders will be numbered consecutively each day, commencing at No. 1 at 4.00 a.m.

To obtain orders at telephone stations the Conductor will call the Despatcher, who will give such orders as are necessary. The Conductor, when taking the Order, will write the same plainly in his Train Order Book, and when he has finished writing the Order he will repeat it to the Despatcher, who will complete the order, if correct, by giving the initials of the Superintendent and the time of completion, which initials and time shall be promptly written on the order. When the order has been properly completed the Conductor taking the order shall then sign his name to the order, after which it is in full force and effect. The Motorman will then read the order aloud to the Conductor who has taken the order, sign his name to the order, and take one copy for his use.

The use of abbreviations, indicated by numerals in Paragraph 143, "General Rules and Instructions Book," is discontinued henceforth.

Notwithstanding the foregoing, Sparrow and Terryberry admitted the practice of signing blank orders. The majority of the members of the Board decided to excuse this gross infraction of the Bulletin 11 on the ground that some other employees of the Company had committed a similar offence, and they submit the names of four employees out of some one hundred employees in support of this contention. Such a line of argument carries with it its own refutation. Two wrongs do not now and never have made a right.

A person in any way versed in railway operation would appreciate that the signing of orders in advance constitutes one of the gravest offences of which an

employee can be guilty. To suggest that the officials of the Company had any knowledge that such a practice was being followed by their employees and countenanced the same is too absurd to be the subject of serious argument.

The officials of this particular road absolutely deny having had any such knowledge, and I am quite prepared to accept their statements, as it can be easily appreciated that their years of railway experience would prevent their acting in such a manner. In view of such serious allegations being made I respectfully submit that the Chairman of the Board, if the officials of the Company would not otherwise attend, should have issued subpoenas directed to them. A duty was owing to such officials that they should have an opportunity of appearing, and a duty was owing to the public that if they would not appear they should be compelled to do so.

It is extremely fortunate that no accident appears to have followed the practices of Messrs. Sparrow and Terryberry in signing such blank orders, but this certainly does not excuse their offence nor does it entitle them to submit as a defence that they broke the rule, "Feeling that it was facilitating the operation of the service." One can easily imagine how such an explanation would be received in a criminal prosecution or a civil action following an accident.

It is unfortunate that the Chairman was misled as to this being the first offence of Motorman Sparrow and Conductor Terryberry, and also with regard to their length of service. A reference to the files of the Company shows that both of these employees have been guilty of offences on previous occasions. In the case of Motorman Sparrow, the record shows he had overrun his train orders on previous occasions. It was stated that "Sparrow has been in the service of the Company eleven years and Conductor Terryberry nine years and this is their first offence." The record shows that Sparrow entered the train service in 1915, having been previously

employed at different times on section and line forces, while he had also been in the same departments on the Grand Trunk Railway and Hydro.

The suggestion was made that Sparrow was punished owing to his prominent position in the Local Union affairs. The best answer to this is the leniency shown him on previous occasions. In addition, the leniency shown to Hannah, another officer of the Local Union, would show that the Company's officials had no animus against any one occupying a position in the Union.

In view of the foregoing, while I was deprived of an opportunity of hearing the evidence of Messrs. Sparrow and Terriberry, yet considering what is set up on their behalf in the majority report, I have no hesitation whatever in recommending that the dismissal of each of these employees by the Company be sustained.

The safety of the public must be carefully considered and employees must be impressed that rules are made for their guidance and that they must observe the same. If employees are to act because they "assume" or they "feel" that a certain line of conduct should be followed and rules disregarded, then a strange condition of affairs has come to pass in the railway world.

I am not sufficiently familiar with the Noah E. Smith case to deal with it.

In filing this report, I desire to state that in my opinion the Company will have every justification for refusing to act on the recommendations of the majority report, because neither facts nor good railway practice support the decisions reached, and, on account of the procedure followed in the preparation of the majority findings. I, as a member of the Board, did not receive notice of the meeting in ample time to admit of my attendance at the final sittings of the Board as prescribed in the Act,—such final sittings being hastily called after two months' delay for which I was in no way responsible.

In my opinion the taking of evidence on this occasion should have been postponed until I was able to be present. I would also like to express my opinion that in view of the disregard of the provisions of Section 48 of the Act, the majority findings are not legal findings of a Conciliation Board, but are merely the opinions of two private individuals.

All of which is respectfully submitted.

(Sgd.) GEO. D. KELLEY,
Company's Representative.

September 2, 1921.

Memorandum by the Minister of Labour

THE above statement, dated September 2nd, over the signature of Mr. Geo. D. Kelley, the member appointed on the recommendation of the employer of the Board of Conciliation and Investigation established in this matter, was received in the office of the Minister of Labour on the evening of the 6th instant, together with the following covering note addressed to the Minister under date of the 6th:—

Re Niagara, St. Catharines and Toronto Ry.

I am handing to you herewith report in connection with the above Board of Conciliation, which report was omitted from my previous letter. Absence from the City has prevented this going over to you before this.

The Minister observes that the report of the Board dated from Welland August 6th and bearing the signatures of the Chairman, Mr. D. Dick, Jr., and the employee Board member, Mr. Joseph Gibbons, was received in the Department on August 8, with a covering note from the Chairman in which the latter remarked that a copy "has been submitted to Mr. Geo. Kelley, who practically agreed to sign, and, inasmuch as Mr. Kelley is in Ottawa, I thought that your Department might call him on the telephone and say that the report is there for his signature. I am also writing Mr. Kelley today." The Department, on receipt of the Chairman's communication, telephoned to Mr. Kelley to

learn if he proposed to sign the report or to present a minority report, but Mr. Kelley was unable to speak positively as to his intentions.

It is the practice of the Department, on receipt of a report from a Board of Conciliation, to have certified copies of the same made immediately and forwarded to the parties to the dispute. In the great majority of cases certified copies of a report are mailed on the same day as that on which the report is received. If a minority report is received at the same time, the report and minority report are forwarded simultaneously to the disputants. This practice is moreover in accordance with what are believed to be the requirements of the statute. A report signed by two members of the Board is the report of the Board, whether or not a minority report is submitted.

On August 16th, no written communication having been received from Mr. Kelley and Mr. Kelley's verbal statements having been inconclusive, the representative of the employees having moreover telegraphed as to the cause of delay, Mr. Kelley was informed in the forenoon that it was impossible longer to withhold publication of the report and was requested to indicate definitely whether or not his signature would be attached. No reply having been received from Mr. Kelley, certified copies of the report were, on August 16th, mailed to the disputants. Some days later, the employing company having intimated that a minority report was still expected, inquiry was again made of Mr. Kelley, who stated it was his intention to submit such a report. On September 1st, a note was received by the Minister from Mr. Kelley as follows:—

Re Niagara, St. Catharines and Toronto Railway Board of Conciliation.

I have the honour to submit to you herewith the minority report of the Board of Conciliation appointed on the above matter.

No report was, however, enclosed, and Mr. Kelley was immediately notified of the omission. Mr. Kelley's report was finally received late yesterday afternoon, and certified copies are being made and despatched to the representatives of the disputing parties.

It will be noted that Mr. Kelley, apart from his discussion of the matters coming before the Board, expresses the view that "the majority findings are not legal findings of a Conciliation Board, but are merely the opinions of two private individuals." On this point the Minister observes that, the Board's report having been in Mr. Kelley's hands for many days prior to its issue by the Registrar, and having been held by the Registrar expressly for the consideration of Mr. Kelley, and Mr. Kelley being aware of this fact, it would seem to have been the duty of Mr. Kelley as a member of the Board to have drawn attention to any feature which in his view made the findings of the Board illegal and to have indicated in detail his grounds for this view, so that the Minister might have had the opportunity of determining if in the circumstances it might have been desirable to reconvene the Board. Mr. Kelley having failed to take this course, and the statement of his views on the matter of the dispute generally having been delayed so long beyond the date on which the Board's report was submitted to him for signature, it is doubtful if the statement in question can be deemed to be in any formal or legal sense a minority report, though the term "minority report" is, for convenience, used in forwarding Mr. Kelley's statement to the respective disputants, accompanied by the present memorandum noting the Minister's observations, which will be appended also to the statements printed on the subject in the LABOUR GAZETTE.

Ottawa, September 7, 1921.

Report of Board in Dispute between the Canada Steamship Company and certain of its employees

A REPORT was received from the Board established to deal with the dispute between the Canada Steamship Company, operating on the Great Lakes of Canada, and certain of its employees being firemen, oilers, wheelmen, watchmen, deckhands, cooks, stewards, etc., members of the Sailors, Firemen and Cooks' Union of Canada. The Board was composed as follows: Mr. T. Trueman Black, chairman, Lt. Col. Geo. E. Burns and Mr. D. L. Kennedy. The report of the Board was unanimous and contained recommendations concerning settlement of the dispute. Appended to the report was a supplementary report concerning conditions on a certain vessel which it was alleged was operated by the Canada Steamship Company. The findings of the Board were accepted by the employees only.

Report of Board

Montreal, Canada,
July 28th, 1921.

To the Honourable

G. D. Robertson,

Minister of Labour, Ottawa.

The undersigned members of the Conciliation Board authorized under the Industrial Disputes Investigation Act of 1907 in the matter of a dispute between the Canada Steamship Lines, Limited, Employer, and certain of the employees, being firemen, oilers, wheelmen, watchmen, deckhands, cooks, stewards, etc., members of the Sailors, Firemen and Cooks' Union of Canada, under date of the second day of May, A. D., 1921, have the honour to submit the following:—

1. After the first preliminary session of the Board, it was found that a great many difficulties faced it, principally among which was the difficulty of securing witnesses. The seamen at this season of the year are scattered over the Great

Lakes and canals and it simply meant a slow process of digging up material evidence and bringing the same before the Board, having regard for the convenience of the witnesses and the non-interruption of the movement of traffic. Unfortunately no set presentation of the case for the men as regards witnesses had been arranged by the Secretary of the Union, Mr. Gray, and the Board had to act in conjunction with him by advice and many consultations to bring before the Board material and necessary evidence.

2. In addition to securing evidence under oath, the Board considered it advisable to make a personal inspection of different vessels, a list of which is hereto attached, for the purpose of confirming to their own satisfaction the state of affairs existing on said vessels. This was done on the occasion of two trips to Port Colborne where advantage was taken of the fact that it was a meeting place of the Upper Lake boats and those engaged in the canal traffic to Montreal. At this point also, through the energetic efforts of the local Business Agent, Mr. C. Crombie, many witnesses were secured and their evidence taken on the occasion of each visit. Further investigations were made by the Board by numerous interviews with gentlemen who are familiar with the different phases of sailor life on the Great Lakes, and valuable information was thus secured by informal discussions.

OBSERVATIONS ON THE EVIDENCE.

3. The Board satisfied itself by examination of the Secretary of the Union, Mr. Gray, that conditions absolutely existed justifying the appointment of a Board, i.e., that on or about the eleventh day of April, 1921, after the new schedule of wages had been announced by the Canada Steamship Lines, Limited,

there was great dissatisfaction, and the seamen employed by them at Midland, Ontario, being members of the Union, had threatened to go on strike, but at a meeting held on the above date, at which there was a fair attendance of at least seventy-five representatives of the men, it was decided to wait until a Board of Conciliation had been secured in accordance with the Act, and, in the meantime, that all hands should be instructed to resume work. At this time at Midland there were nine (9) boats of the Canada Steamship Lines, Limited, lying up ready to go into commission at the opening of navigation carrying a total crew of approximately 190 men, and in the event of their striking, eighty (80) odd license men would be directly affected. At Port Colborne there was also a number of boats laid up awaiting developments at Midland. On hearing of the decision of the Midland meeting, that was accepted by the Union at Port Colborne. In the event of a strike by these men, other Unions affected would be the Longshoremen's, Elevator Handlers' and other employees engaged in the handling of traffic at the Upper Lake ports.

The decision of this meeting was communicated to all points and apparently the understanding was that they were to join up at the Company's rates of wages and carry on until an award was made by the Board which was being applied for under the Act. The negotiations which were entered into between the officials of the Union and the Canada Steamship Lines, Limited, Montreal, were carefully gone into and copies of all correspondence are hereto attached. This has already been submitted to the Department prior to the appointment of the Board. The question of the membership of the Union was also gone into and it was discovered that there were some twenty-one hundred (2,100) members on the list, in good standing. The membership cards were produced and checked over roughly, also the matter of the authorization of the Secretary,

Mr. Gray, to act for the Union, was verified.

In the course of the examination of various witnesses as regards the taking off of coal passers, which was one of the complaints made to the Department, other complaints and grievances were disclosed, among which were the following:—

- (a) Lack of First Aid.
- (b) Lack of ventilation in sleeping quarters below deck.
- (c) Paying off of crew by time check.
- (d) Careless treatment of sick and injured sailors.
- (e) Sanitary conveniences.
- (f) The undermanning of ships.
- (g) Prevalence of venereal diseases.
- (h) Lack of recreation.
- (i) No certificate of discharge.
- (j) Discrimination against union men on the part of certain skippers.
- (k) Lax compliance of the Shipping Act in reference to the signing of the Articles.
- (l) Desirability of the appointment of Shipping Masters at the Inland Ports.
- (m) Notices of discharge, etc.
- (n) Men paid at a monthly rate for single trips of less than twenty-four hours.

4. The above subjects were gone into very exhaustively and every effort was made to get at the actual facts. After consideration the Board has concluded to make the following findings in respect to each subject:—

(a) *Lack of First Aid.*

This complaint was discovered to be absolutely true. While some time back, somebody had authorized and provided medical chests and boxes containing essentials for First Aid and medical comforts, through lack of proper supervision, nobody apparently considering it his duty to look after this branch, the whole arrangement gradually fell down until the present time when scarcely any ship has a vestige of the system left, or material to use in case of accident. This point was brought to the attention of the local Superintendent, Mr. Grant, of Toronto, who, it appears, must have communie-

ated the matter to the General Manager in Montreal, because when the latter was examined he said that he had recently ordered complete boxes containing First Aid appliances and medical comforts with strict instructions that the same were to be looked after by the Certificated Officers. The General Manager admitted the subject had been neglected. The Board is of the opinion that the instructions do not go far enough, but that orders should be issued that certain officers of each ship should take a course in First Aid which, it is imagined, could easily be done during the winter when the ships are laid up. The complaints leading up to this investigation were various, men having cited instances of hardship and danger to their lives by their inability to get First Aid attention until they reached a hospital at the first port.

(b) *Lack of ventilation in sleeping quarters below deck.*

The Board finds that the complaint as to lack of ventilation in sleeping quarters below deck is justified on many ships, and recommends that steps be taken — especially in the old vessels in commission — to have this grievance remedied without delay. It would appear that the idea seems to prevail on many ships that all the ventilation necessary is a port hole, no intelligent study being made as to the circulation of the air.

(c) *Paying off of crew by time check.*

This practice should be abolished. While it may work in many cases without any hardship, at the same time the Board sees no reason why any member of the crew being paid off should not receive his cash. If the Captain's allowance of cash is not sufficient, which we understand is now \$200, the amount should be increased.

(d) *Careless treatment of sick and injured sailors.*

Sick sailors are at once sent to a hospital, but unless the sickness has oc-

curred through the fault of the ship, the sailor is obliged to pay his own hospital fee and medical attendance. There is no Sick Mariners' Dues on the Inland Lakes the same as at sea-ports. Although this matter has been under discussion for some time, no decision has been arrived at. The Board is of the opinion that there is no unsurmountable reason why the same system could not be put into effect as at the seaboard.

In the case of injured sailors, the masters have instructions to give an immediate report of all accidents — even minor ones — to the Head Office. A form is then filled out, directed to the Workmen's Compensation Board of Toronto, who take charge of the case. A thorough investigation is made and a claim duly presented to the Canada Steamship Lines, Limited, in due course. Cases under the Quebec Workmen's Compensation Act are somewhat different, the responsibility of the Company being determined by the Courts instead of by a Board. All these accident claims are insured against by the Company. The Board is of the opinion that some instructions should be issued to the seamen defining exactly what their rights are in respect to sickness and accident, and the procedure to be taken, as the Board has met several cases where the seaman has met with mishap and apparently through ignorance or neglect of someone has received no redress.

(e) *Sanitary conveniences.*
